8 Language. Linguistics. Literature	881
9 Geography. Biography. History	891

FOREWORD

Overview

This edition of the UDC has been created from the entire content of the UDC Master Reference File database (over 66 700 entries). It takes account of official amendments up to and including those in *Extensions and Corrections to the UDC*, Number 26, November 2004. It supersedes *Universal Decimal Classification*, BS 1000M:1993.

UDC is an indexing and retrieval language for classifying information on all subjects and in all forms. It was originally derived from Dewey Decimal Classification (DDC), and managed by the organization known as the International Federation for Information and Documentation (FID). It was first published, in French, from 1904 to 1907.

The preparation and publication of the English versions of UDC as BS 1000 was at the original joint request of the British Society for International Bibliography (BSIB) and the Association of Special Libraries and Information Bureaux (ASLIB), now amalgamated as Aslib, the Association for Information Management. It was approved by Lake Placid Education Foundation, New York, then proprietors of the Dewey Decimal Classification. DDC is now published by Forest Press, a division of OCLC Online Computer Library Center, Inc., Albany, NY, USA, the current owner of the copyright in DDC.

On 1 January 1992, all rights and responsibilities for UDC were transferred to the UDC Consortium (UDCC), whose founder members were:

- AENOR (Asociación Española de Normalización y Certificación), Spain
- Bohn Stafleu Van Loghum, Netherlands
- BSI (British Standards Institution), UK
- CLPCF (Centre de Lecture publique de la Communauté française de Belgique), Belgium
- FID (International Federation for Information and Documentation)
- INFOSTA-NIPDOK (Information Science and Technology Association), Japan.

Since 1992 UDC has been maintained in English in a database called the UDC MRF. The UDC MRF was derived from the machine-readable files of the first edition of BS 1000M: 1985, and was then amplified and updated. The classification is regularly updated by UDCC (<http://www.udcc.org>) and a new database file is released and distributed to licence holders annually. During the period 1993–2005 UDC has been extensively revised and amended. The list of classes that have undergone major change is published at http://www.udcc.org/major_changes.htm.

This edition is published under general licence from the UDCC, whose Executive Committee authorizes editions in various languages and at various levels of inclusiveness. This edition corresponds to what was previously known as the 'medium' edition and appears in two volumes, of which this is *Volume 1 – Systematic tables*. The alphabetical subject index constitutes *Volume 2*.

Typographic presentation

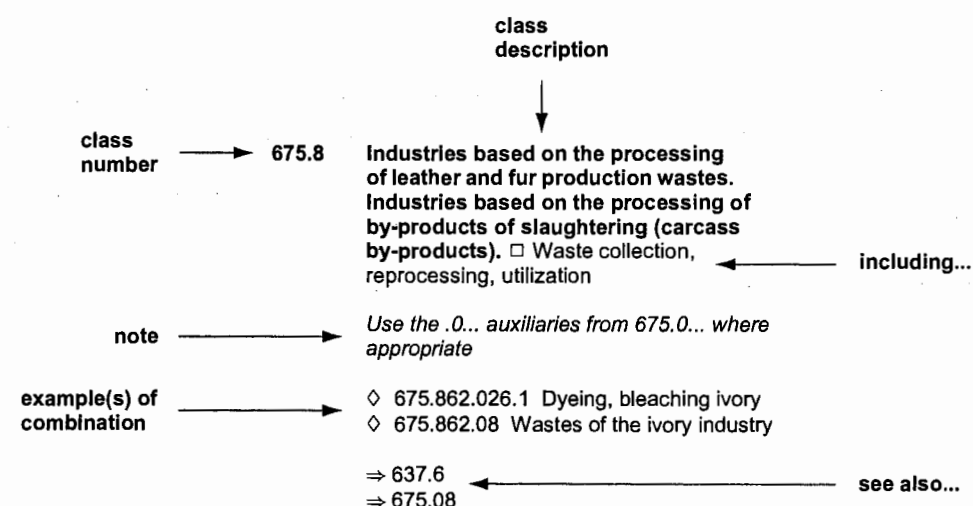

Layout

A UDC entry consists of three main elements:

- the class number (notation), which appears in the number column at the left
- the class description (caption), which appears in the text column at the right
- various amplifications, which appear indented within the text column.

The latter include notes, cross-references, instructions for synthesizing and examples of compound notation obtained. Class description can be extended with other concepts that are included in the class; in this edition the word 'Including' is replaced by the symbol □ (square). It should be noted that synthesis is available to the user wherever it results in a meaningful combination, and the compound numbers shown are only examples from a potentially vast number. In this edition, examples are indented and they are preceded by the symbol ◇ (diamond).

Sample entry layout

Special auxiliary tables, usually placed at the beginning of the main class in which they are valid, are marked with a vertical line to the left of the class number.

Summary of symbols used

In addition to the UDC notation, including the signs in Tables 1a to 1k, the following symbols are used in this edition:

sign		meaning
⇒	(double arrow)	see also
◇	(diamond)	example(s) of combination
□	(square)	including
≡	(approximately equal to)	subdivide as
	(sidelining)	special auxiliaries
*	(asterisk)	non-UDC notation (see Table 1h)

Acknowledgements

The UDC was originally derived from the Dewey Decimal Classification, and the schedules and tables in this edition incorporate some material published in later editions of DDC © 1911, 1913, 1915, 1919, 1922, 1927, 1932, 1942, 1951–52, 1958, 1965, 1971, 1979, 1989, variously by Melvil Dewey, Lake Placid [Club] Education Foundation, Forest Press and OCLC Online Computer Library Center, Inc., Albany, NY, USA.

It is possible that some proprietary names occur in this publication. No reflections on their legal status, either by the British Standards Institution or by any of its cooperating organizations, are intended, and none should be inferred from this publication.

Many place names are included. The names used, the selection and sequence of regions, descriptive expressions and relations implied by the numeric hierarchy do not constitute any endorsement of their national or international status either by the British Standards Institution or by any of its cooperating organizations. No opinions about any of these matters should be inferred from this publication.

BSI would like to express their gratitude to Aida Slavic-Overfield from the BSI UDC advisory board. Aida was not only able to provide invaluable advice during the development stages of this new edition but also committed a tremendous amount of time and effort in editing the proofs. Thanks are also due to Rich Cutler from Helius for all his technical expertise.

INTRODUCTION

1 History of UDC

1.1 The use of decimal notation as a code for expressing the concepts in a documentary classification was first proposed by the physicist André Made Ampère (1775–1836) and popularized by the American librarian Melvil Dewey in the later nineteenth century. Dewey's scheme was developed and used in the library of Amherst College, Massachusetts, and first published in 1876. The first edition, entitled 'Classification and subject index', was brief, with its ten pages of tables containing 919 headings, and lacked some of the features later associated with the scheme (it was not called decimal, and contained no decimal fractions); nor was the order of subjects particularly innovative, deriving from a tradition going back to the Paris booksellers of the seventeenth century; but it still contained the beginnings of a system that was to prove immensely serviceable and influential. Later, the three-digit minimum and the decimal point after the third digit were introduced, the scheme was expanded in successive editions, and its use spread rapidly throughout the USA and then in other English-speaking countries. It played an important part in establishing the norm of a systematic code denoting the subject as a primary means of arranging and retrieving literature in libraries grouping together works on similar subjects, irrespective of marks identifying individual documents.

1.2 In 1895, a further step in the development of decimal classification was taken by Paul Otlet (1869–1944), a young Belgian barrister already noted for his work in bibliography in the social sciences. Under the aegis of the newly founded Institut International de Bibliographie (IIB) in Brussels, Otlet and his collaborator Henry La Fontaine (1854–1943) were working on the projected Universal Bibliographic Repertory, which was intended to become a comprehensive classified index to all published information. A means of arranging the entries would be needed, and Otlet, having heard of Dewey's Decimal Classification, now in its fifth edition (1894), had obtained a copy and been deeply impressed by it. He wrote to Melvil Dewey in 1895 and obtained permission to translate it into French. Otlet and La Fontaine saw in Decimal Classification a taxonomy of human knowledge that could be expressed 'in an international language – that of numbers'; they saw too that, because of the extensibility of decimal numbers, it could readily accommodate the detail needed for bibliographic rather than strictly library use. The idea outgrew the plan of mere translation, and a number of radical innovations were made, adapting the purely enumerative classification (in which all the subjects envisaged are already listed and coded) into one which allows for synthesis (that is, the construction of compound numbers to denote interrelated subjects that could never be exhaustively foreseen); various possible relations between subjects were identified, and symbols assigned to represent them. They also realized that characteristics common to many subjects could be assembled as a separate list; repeated patterns of digits where the same characteristic of division was applied were already present to some extent in Dewey's first edition, but now the further step was taken of detaching the terminal digits and listing them as tables of auxiliary numbers, which could be added as required by the user. This synthetic principle meant that a level of detail could be obtained much greater than what was actually displayed in the published scheme: higher precision combined with economy of presentation. At the same time, Otlet and La Fontaine were expanding the purely enumerative content, to provide for the extensive requirements of the Repertory, and the result was a scheme both more copious and more sophisticated than its predecessor. It contained about 33 000 subdivisions. It was published by the IIB, in French, from 1904 to 1907, and was called the 'Handbook to the Universal Bibliographic Repertory' (*Manuel du Répertoire Bibliographique Universel*). It was in fact the first edition of UDC.

1.3 The scheme continued to expand, though interrupted by the First World War, and work progressed on a second edition, in which editorship was shared with Frits Donker Duyvis of the Dutch Patent Office, who was responsible for the extensive revision and expansion of the science and technology sections. It was published from 1927 to 1933, and by now had over 70 000 subdivisions. The Universal Bibliographic Repertory, the impetus for the scheme, was proving unmanageable, and this edition was now offered independently under the title 'Classification Décimale Universelle', the name by which (in various translations) it is still known. This edition became the master version of UDC, and remained so until 1993, when a new database became the authoritative source; from 1933 to 1993 the second French edition, as modified and augmented by approved amendments collected in various supplements and later in the serial *Extensions and Corrections to the UDC*, was the official source for all UDC editions. A third edition, the first in German, was next begun, under the editorship of Carl Walther, and published from 1934 to 1951; this was probably double the size of the second, about 140 000 subdivisions.

1.4 Interest in UDC in the United Kingdom was particularly promoted by the enthusiasm of Dr S.C. Bradford (1878–1948), who was keeper of the Science Museum Library from 1925 to 1937, and responsible for its adoption of UDC in 1928. The *Classification for Works on Pure and Applied Science in the Science Museum Library*, third edition (but the first to use UDC) was published in 1936, and was the first completed (though selective) edition of UDC in English. It was in fact an abridged edition (about 6000 subdivisions) with emphasis on science and technology. Work was also under way on a translation of the still authoritative second (French) edition, and this was to be the beginning of a fourth full edition of UDC, the first in English. Parts of this were published in 1936 to 1939, jointly by the British Society for International Bibliography and the Association of Special Libraries and Information Bureaux (BSIB and ASLIB later united to form Aslib, the Society for Information Management). At their request, the British Standards Institution (BSI) assumed responsibility for publishing UDC, and, after issuing slightly corrected versions of the existing parts in 1943, continued to produce English editions in the BS 1000 series.

1.5 The Institut International de Bibliographie (IIB) in 1931 became the Institut International de Documentation (IID), now with its headquarters at The Hague; in 1937 it changed to the Fédération Internationale de Documentation (FID), and in 1988 changed again to the International Federation for Information and Documentation (FID) – the name it held until the Federation's dissolution in 2000. FID remained for many years the centre for the management and maintenance of UDC. In 1991, acting on the recommendations of the specially formed Task Force for UDC System Development, it held talks with several UDC publishers about restructuring the finance, management and maintenance of the scheme to ensure its future into the next century. As a result of these talks, the UDC Consortium (UDCC) was formed, with FID, BSI and four other publishers as founder members (see Foreword). All rights were transferred to the UDCC on 1 January 1992. Its first priority was the creation of a database of 60 000 entries, known as the Master Reference File (MRF), which was completed in the spring of 1993 and is now the authoritative statement of the content of UDC. The former full editions (totalling about 220 000 entries) remain valid.

1.6 Since August 1949, authorized amendments have appeared in *Extensions and Corrections to the UDC*, issued at first six-monthly, later annually.

1.7 The working languages of FID were English, French and German, and these remained the medium for the maintenance and management of UDC (including all amendments appearing in *Extensions and Corrections to the UDC*) until 1992, when the UDCC took over. The official language of the Consortium is English. The Master Reference File is currently in English, but is planned to be extended to include French and German, and perhaps other languages. Since its early editions, UDC has been translated into many other languages and is used in over one

hundred countries worldwide. There are editions of various lengths in 39 different languages listed in the 'UDC Translations: A survey report and bibliography' (*Extensions and Corrections to the UDC*, 26 (2004), 58–69; an updated version of the same report is available at <http://dlist.sir.arizona.edu/649/>).

2 Characteristics of UDC

2.1 Nature of classification

Classification is a means of bringing order to a multiplicity of concepts or items of information, by arranging them into classes. A *class* is a group of concepts that have at least one thing in common. This shared property gives the class its identity. A class may be further divided into smaller classes (or subclasses), and so on, until no further subdivision is feasible. So classification is likely to be hierarchic, with each level of division (except the lowest) divided into its logical subsets.

Classes may consist of various kinds of concept, such as physical things (objects, persons, places, etc.) and their parts, activities, processes, abstract ideas; for example:

- buildings (schools, churches, houses, etc.) – things
- parts of buildings (doors, walls, stairways, etc.) – parts
- building services (joinery, glazing, plumbing, etc.) – activities
- architectural styles (classical, Georgian, etc.) – abstract ideas.

2.2 Kinds of classification

Classifications may be designed for various purposes. They include scientific and documentary classifications. *Scientific* classifications arrange the phenomena of the natural world as an aid to systematic study. They include the arrangements in systematic botany and zoology, and the table of chemical elements, and they often form the basis of field guides. The other kind of classification is designed for *information organization and retrieval* – in other words, for locating knowledge recorded in various information resources (objects, images, sounds, printed or digital documents), hence its name: *documentary* classification. The above categories of classification scheme are not mutually exclusive. Scientific classifications may be incorporated into documentary ones, as they have been to some extent in UDC, for example at 549 and (though not explicitly) parts of 58 and 59. Bibliographic and library classifications may each incorporate some of the other's features, and in practice are not limited to a single application.

2.2.1 In one respect, UDC differs markedly from *scientific* classifications, which tend to be taxonomies – that is, isolating phenomena and allocating to each a unique place in the scheme. UDC, like any documentary classification, is an *aspect classification*, in which a phenomenon is classed according to the context or discipline in which it is considered (so that its various aspects occur at many different places). For example, 'coal' has no single place in UDC. The petrological aspect is at 552.574, the economic geology aspect at 553.94, the mining aspect at 622.33, or as dust at 622.411.52, the soil mechanics aspect at 624.131.27, the agricultural aspect (fertilizers) at 631.878, the fuels aspect at 662.66 and 662.74, or as briquettes at 662.814, and coal for pig iron production is at 669.162.16. More peripheral aspects are at still other numbers. Theoretically, general documents covering all of those aspects should be classed at all of those numbers; but in a given collection, with a particular bias, it is often possible to select one number as the main place for a subject.

2.2.2 Documentary classifications tend to be either for library use – for the physical arrangement of an actual collection and as a guide to its coverage; or bibliographic – for the detailed indexing and description of documents, not confined to any one collection. They will often be enumerative – exhaustively listing the categories into which the universe of knowledge has been divided; or faceted – identifying characteristics common to many categories and arranging them in lists or tables each representing a facet (that is, the total of concepts obtained by applying a particular characteristic of division). Thus, the compiler has analysed subjects into

their elements for the user to recombine or synthesize, and faceted classification is also called analytico-synthetic. UDC has evolved from a project to develop an enumerative into a faceted classification.

2.2.3 Classifications may be special – concentrating on, or biased towards, a particular subject; or general – covering the universe of knowledge. UDC is a general classification scheme that is particularly detailed and sophisticated. It can therefore be used both for information organization in covering all subjects, or most of them, and in document collections which are more specialized but still cover a range of other subjects in less detail. UDC was designed for bibliographic use, but has proved eminently suitable for library use. Though general, it has been found useful in special collections and services, and a number of specialized selections (known as special-subject editions) have appeared.

2.3 UDC notation

Notation is a code that symbolizes the subject of each class and its place in the sequence. A simple list of named classes filed alphabetically would not fulfil the purpose of keeping related items together or separating unrelated ones. This can be done by using a notation which has an inherent order, such as numerals, alphabetic notation or a mixture (alpha-numeric). When such a code is assigned to each class, it expresses and fixes the order of classes (that is the *filing order*), and enables automatic sorting of entries. Notation with variable length can also express the position in the hierarchy, with each extra character representing a lower level; this is called *expressive notation*. Arabic numerals, arranged as decimal fractions, are ideal for this purpose and are the basis of the notation in UDC.

Notation is an artificial indexing language, from which many of the ambiguities of natural language have been eliminated. For example, the term 'paraffin' has both a technical sense (a series of saturated aliphatic hydrocarbons of the general formula C_nH_{2n+2}) and a popular one (= kerosine, a petroleum fraction with a particular boiling range), while 'kerosine' has at times been known as 'petroleum', a term now used as the general name for mineral oils. But in UDC there is no such ambiguity; in the context of mineral oil technology, 'mineral oil' generally (petroleum) is at 665.6, 'production of paraffins' is at 665.637.2, and 'production of kerosine' is at 665.634. Similarly, 'power' in mechanical engineering (the output of an engine) is at 621.1.018.7, and 'power' in electrical engineering is at 621.3.016.2, with 'power supply' at 621.311. Other aspects of these subjects may occur elsewhere, but in each case the class number represents a clearly defined concept, not a word or phrase whose meaning may vary according to context.

UDC notation is based on Arabic numerals (plus a few other common symbols). The numbers are arranged as decimal fractions, and this determines their filing order. One can think of them as following an imaginary nought and point, which for convenience are omitted (for example, 5 stands for 0.5). So they do not have the same order as integers, in which 6 would precede 59 by a long way; 5 is followed not immediately by 6, but by 50 to 59. Similarly, 59 is followed by all its subdivisions from 591 to 599 before you reach 6; and between 591 and 592 come all the subdivisions of 591 up to 591.9. After the third digit, there is a point, but it is **not** a decimal point – merely punctuation for ease of reading. A long code is easier to read if it is broken into small groups, so a point is added after every third digit; for example, in the UDC database the eleven-digit number 62138233332 becomes 621.382.333.32, which is far more manageable. As the whole class number is a decimal fraction, including the part before the first point, it is preferable to pronounce it not as an integer but as a series of digits ('six-two-one point three ...' rather than 'six hundred and twenty-one point three ...').

As an example, the following numbers would be in this order if they were integers (or integers plus decimals): 1, 02, 3, 6, 22, 37, 66, 82, 94, 210, 543, 655, 681.81, 728.1, 811, 929; but if they are UDC class numbers, they file as if they were all decimal fractions, thus:

class number	as if
02	0.02
1	0.1
210	0.210
22	0.22
3	0.3
37	0.37
543	0.543
6	0.6
655	0.655
66	0.66
681.81	0.68181
728.1	0.7281
811	0.811
82	0.82
929	0.929
94	0.94

Because decimal fractions are infinitely extensible, it is always possible to introduce further subdivisions without altering the ordinal value of the rest of the sequence. New developments, or increasingly detailed information, can therefore be accommodated in the scheme by the creation of new classes while preserving the stability of the rest. Such notation is said to be *hospitable*.

NOTE: For filing order in general, see 2.4.3.

2.4 Structure of UDC

It will be apparent from its history that UDC is a hybrid of two kinds of documentary classification scheme (enumerative and analytico-synthetic), and its structure reflects this. There are two kinds of table: the main and auxiliary tables (sometimes called the 'schedules' and 'tables' respectively), and, though the distinction is not hard and fast, they exemplify to some extent the enumerative and analytico-synthetic elements in UDC, and their associated notation (see Figure 1).

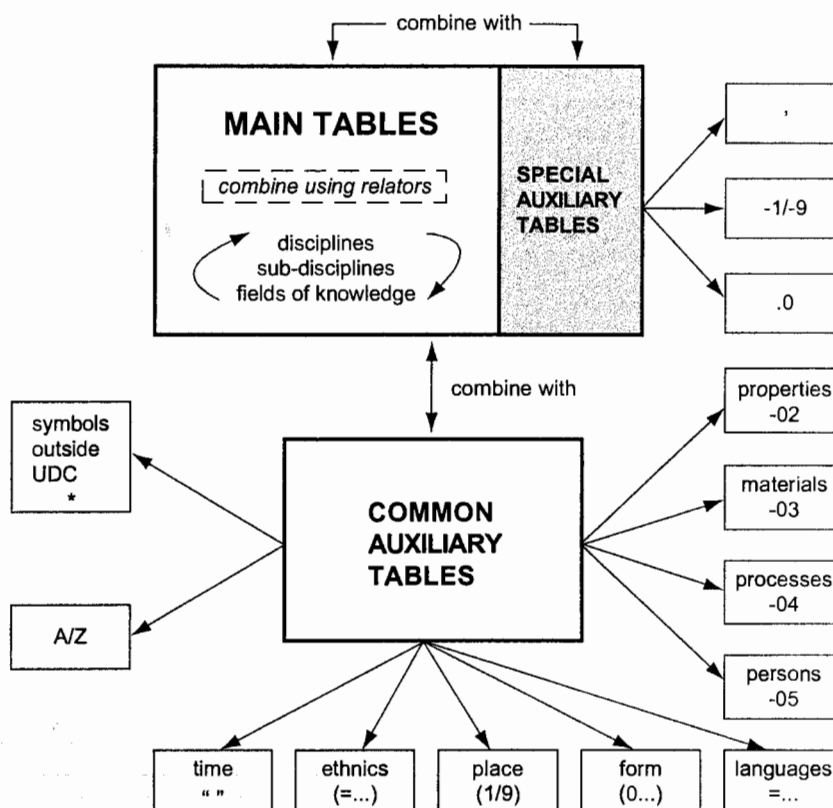

Figure 1. UDC macrostructure

2.4.1 Main tables

2.4.1.1 The main tables, and thus the primary notation, in UDC are the ones most closely related to DDC. In Dewey's scheme, the universe was divided into ten classes, each of which was then further divided. In UDC, one class is now vacant, since class 4 was cancelled in 1963 to make room for future developments, and its subject, linguistics, was merged into class 8 with literature. UDC therefore comprises the following top classes:

- 0 Generalities. Science and knowledge. Organization. Information. Documentation. Librarianship. Institutions. Publications
- 1 Philosophy. Psychology
- 2 Religion. Theology
- 3 Social sciences. Statistics. Politics. Economics. Trade. Law. Government. Military affairs. Welfare. Insurance. Education. Folklore
- [4] [Vacant]
- 5 Mathematics and natural sciences
- 6 Applied sciences. Medicine. Technology
- 7 The arts. Recreation. Entertainment. Sport
- 8 Language. Linguistics. Literature
- 9 Geography. Biography. History

Thus, each of these broadest classes is denoted by a single-digit Arabic number. Each of the ten theoretical classes, or nine occupied classes, may in turn be divided to form ten narrower classes (or *subclasses*). The *subclasses* accommodate more restricted concepts, as represented by longer numbers. For example, class 5 is divided into the following *subclasses*:

- 50 Generalities about the pure sciences
- 51 Mathematics
- 52 Astronomy. Astrophysics. Space research. Geodesy
- 53 Physics
- 54 Chemistry. Crystallography. Mineralogy
- 55 Earth sciences. Geology, meteorology etc.
- 56 Palaeontology
- 57 Biological sciences in general
- 58 Botany
- 59 Zoology

The next level of division gives three digits; for example, 57 is divided into:

- 572 Anthropology
- 573 General and theoretical biology
- 574 General ecology and biodiversity...
- 575 General genetics. General cytogenetics... Evolution etc.
- 576 Cellular and subcellular biology. Cytology
- 577 Material bases of life. Biochemistry... Biophysics
- 578 Virology
- 579 Microbiology

Each of these is a logical subdivision of the content of class 5 and 57 respectively, and each is denoted by a number beginning with 5; but each is also a more restrictive class than 5, and has a class number one digit longer. The main tables, in other words, are divided hierarchically, with the numeric hierarchy reflecting the conceptual hierarchy; the broadest classes are at the highest level, and the narrowest or most restrictive classes are at the lowest level, of the hierarchy. The length of the class number is indicative of the degree of detail. Class numbers of the same length, denoting a similar level of generality (or extension) are *coordinate*. Classes with shorter numbers, denoting greater extension, are *superordinate*. Classes with longer numbers, denoting greater specificity (or intension) are *subordinate*. 58 and 59 are coordinate. 5 is superordinate to 58 and 59. 591 is subordinate to 59. An

exhaustive set of coordinate classes (containing the full logical subdivisions of the superordinate class) is an *array*.

2.4.1.2 The parsing of an example will show the structure of a long class number from the main tables:

621.397.132.125 Phase Alternating Line (PAL) system

This string of twelve digits represents a chain in a hierarchy of concepts, in which each successive place implies a choice from the possible subclasses:

6	Applied sciences. Medicine. Technology
62	Engineering. Technology in general
621	Mechanical engineering ... Electrical engineering. Machinery
621.3	Electrical engineering
621.39	Telecommunication ... Telecontrol
621.397	Video technology. Television engineering
621.397.1	[vacant]
621.397.13	Television
621.397.132	Colour television
621.397.132.1	Simultaneous colour systems
621.397.132.12	With common transmission channel for the primary colour signals
621.397.132.125	Phase Alternating Line (PAL) system

The first digit, 6, denotes 'Applied sciences. Medicine. Technology'. A start has been made along a path down the hierarchy, which branches at each successive level: out of the universe of information, a class of concepts has been selected that belong to the applied sciences. The second digit, 2, shows that, of the ten possible subclasses 60 to 69, the one selected is 62, restricting us to engineering. Each succeeding digit further specifies the preceding concept, and symbolizes a more restrictive class, until the lowest level is reached. The meaning of each digit is determined by its place in the chain (2 means 'engineering' only if it follows 6). The full number 621.397.132.125 exhibits increasing specificity going towards the right.

2.4.1.3 Reality sometimes declines to fit into predetermined categories, and the universe cannot consistently be divided into decimal fractions. Not every number is necessarily occupied. Nought tends to be reserved for a special purpose, particularly when following a point, but most arrays occupy fewer than the nine remaining places. Occasionally they require more than nine places (e.g. ministries occupy the range 354.11/.86).

2.4.2 Auxiliary tables

2.4.2.1 UDC's most innovative and influential feature was its auxiliary notation, the signs and subdivisions provided to allow for the construction of compound numbers, or synthesis. The auxiliary tables list concepts which recur throughout several or all subjects, such as time and place, and are therefore applicable in a range of classes. They are added to a class number to express a more precise meaning.

Auxiliary notation is of two main kinds: the common and special auxiliaries. The *common auxiliaries*, as well as providing a means of expressing interrelations between subjects, denote *generally recurrent* characteristics (i.e. those that are applicable throughout the main tables). The *special auxiliaries* denote *locally recurrent characteristics* (i.e. those that are applicable in a limited range of the main tables).

There are also linking signs which enable combination of numbers from different parts of the tables. For convenience, these are also presented as tables. A number taken from a single place in the tables and cited on its own – whether a main number or an independent auxiliary – is a *simple number*, e.g. (410) and 622 are simple numbers. A number created by synthesizing, using elements from more

than one place in the tables, is a *compound number*, e.g. 622+669 and 622(410) are compound numbers.

2.4.2.2 Common auxiliaries. The common auxiliaries comprise two kinds of symbol: the signs and subdivisions. The common auxiliary *signs* are the plus, the stroke, the colon, the square brackets and the double colon, which serve as relators, linking UDC numbers (either main or auxiliary), but are not themselves numbers, do not represent classes, and cannot be subdivided. Not many kinds of relation are distinguished: the plus and the stroke represent kinds of *aggregation* (the sum of meanings of several UDC numbers), while the colon serves for most other relations. When UDC numbers are linked by colon, it merely shows that the subjects denoted by the numbers are related to each other in some way; it does not specify which influences the other(s), nor show the nature of the influence exerted – in short, it does not denote the *phase* of the relation. For example, the compound:

658.512.2:004 Industrial design in relation to computers and data processing

does not indicate whether computers are the instrument or the object of designing (computer-aided design or design of computers). Changing the order of the elements in such a compound does not in principle change the meaning: it is stated in Table 1b that the relation is reversible, and that A:B and B:A are of equal significance. In private use, however, the order might be made significant. Recent additions to the UDC vocabulary are the algebraic subgrouping and order-fixing signs (Table 1b, Sections 2 and 3). These to some extent afford the user a means of clarifying relations between subjects.

2.4.2.2.1 The lack of specificity in the common auxiliary signs, notably the colon, implies a correspondingly extensive usefulness: this device enables any concept in the whole classification to be related to any other, and so in a sense to qualify it. Such a copious range of qualifiers could hardly be achieved by other means.

2.4.2.2.2 The common auxiliary *subdivisions* consist of numeric tables, in which concepts are enumerated and arranged hierarchically; to this extent, they resemble the main tables, but they are distinguished by their own symbols either prefixed to, or enclosing, the number. Common auxiliary tables are as follows:

concept	symbol
the linking signs – Tables 1a and 1b	+, /, :
language of the document – Table 1c	= ...
form of the document – Table 1d	(0/09)
place – Table 1e	(1/9)
race, nationality etc. – Table 1f	(= ...)
time – Table 1g	" ... "
non-UDC codes etc. – Table 1h	#, A/Z
general characteristics – Table 1k, includes	-0...
properties	-02...
materials	-03...
processes	-04...
persons	-05...

It is important to note that two of the tables (language and form) denote characteristics of the document (or information carrier), e.g. the language in which it is written or spoken. The others denote aspects of the subject, e.g. the materials or persons involved. One must distinguish between:

811.112.2 German (as a subject – main number) and
 =112.2 German (language of document – auxiliary number), as in
 5=112.2 Scientific works in German.

Some features, such as time and space, are relevant to practically all phenomena, while others, such as language and documentary form, become relevant as soon as a phenomenon becomes the subject of a document. When a given characteristic of

division recurs throughout a classification, it is convenient and mnemonic if the resultant facet is expressed in the same notation wherever it occurs; but this also makes it possible for the digits expressing it to be detached and separately listed. By this means, they become available to be affixed, theoretically, to every class number in the main tables, so permitting more specific denotation of any concept in the scheme. Removed from their context, they require an extra symbol to identify the characteristic of division (a *facet indicator*); for example, the digits 1 to 9 have many different meanings, but when they are enclosed in parentheses, this announces that the place facet is to be enumerated. Similarly, quotation marks announce the time facet, and so on. Some of these symbols serve more than one purpose, and their meaning depends on what immediately follows; for example, an opening parenthesis may be followed by 0, denoting form, by 1 to 9, denoting place, or by the equals sign, denoting race and nationality. The numeric part of the auxiliary notation is punctuated after every third digit, as with the main tables.

2.4.2.2.3 The common auxiliary subdivisions fall into two groups: the independent and the dependent auxiliary tables. The *independent auxiliary tables*, though they may be affixed to any UDC number where appropriate, may also be used on their own, to form the whole class number for a document. These are Tables 1c to 1g, the auxiliaries of language, form, place, race and time. For example, if it were decided that the place facet was the only one that needed to be expressed (e.g. in classifying maps), a way of doing this would be to cite the place auxiliary alone, from Table 1e. The *dependent auxiliary tables* must always be affixed to a UDC number; these are, officially, Table 1k common auxiliaries of general characteristics: properties, processes, materials and persons. Additionally, Table 1h, which specifies means of adding non-UDC notation, is in practice dependent (though not described as such), since the asterisk and alphabetic extensions must be added to a UDC number.

2.4.2.2.4 Most of the independent auxiliary tables have symbols that enclose the number, thus demarcating it from adjacent numbers. These are *biterminal signs* – that is: signs with both an opening and a closing element. Tables 1d, 1e and 1f have parentheses, while Table 1g has quotation marks. The exception is Table 1c (Common auxiliaries of language), which has only an initial equals sign; this is compensated for by adding a colon at the end of the language notation in some positions, as in the example =133.1:641.5(083.1) given in the preamble to Table 1c. Because of their demarcation, auxiliaries with biterminal signs can be affixed to any part of a UDC number, at the beginning, middle or end (i.e. *prefixed, infixes or suffixed*, as well as being usable independently, e.g.

(410)	Great Britain. United Kingdom of Great Britain and Northern Ireland
(410)622.33	Britain – coal mining
622(410).33	Mining – Britain – coal
622.33(410)	Coal mining – Britain

This is in contrast with the dependent auxiliaries, which are used only as suffixes, e.g.

622.33-022.316	Coal mining – sustainable
----------------	---------------------------

though they may be followed by further auxiliaries, e.g.

622.33-022.316(410)	Coal mining – sustainable – Britain
---------------------	-------------------------------------

The asterisk, the point and the hyphen, therefore, can never occur at the beginning of a number.

2.4.2.3 Special auxiliaries. The special auxiliaries, unlike the common auxiliaries, are not listed in one place, and by definition do not have such extensive applicability. They occur at various places in the tables, and express concepts that are recurrent, but in a more limited subject range.

2.4.2.3.1 Of the notation used in special auxiliaries, the three main kinds are described and differentiated in auxiliary tables. Section II: the hyphen series -1/-9, the point-nought series .01/.09 and the apostrophe series '1/'9. (.0 is almost always used to introduce special auxiliary subdivisions, but there are a few exceptions, such as 626.0 and 669.05.) In this edition, special auxiliary numbers are recognizable by side-lining, for example under UDC 53:

53	Physics
53.02	General laws of phenomena
53.05	Observation and recording of phenomena. Visual indication of phenomena ...

The number **before** the side-lining is a main number, 53 'Physics'. The auxiliary notation .0... may be used either in the form in which it is shown, i.e.

53.05 Observation and recording of phenomena etc. (in general)

or detached and added to any direct decimal subdivision of the main number, e.g.

531	Mechanics
531.05	Observation and recording of mechanical phenomena
531.5	Gravity ...
531.5.05	Observation and recording of gravitational phenomena

2.4.2.3.2 Most special auxiliaries are enumerative, though there is one synthesizing sign, the apostrophe (which, however, is also used in some places to introduce enumerated subdivisions). Special auxiliaries are always listed as suffixes to other numbers, and cannot be used independently. A common form of presentation is a list immediately under the main number where they are valid. If no other indication is given, they are applicable also to all the direct divisions of that number. For example, at 621.3.01 to .095.4, the .0 element is applicable anywhere from 621.31 to 621.398, as well as 621.3 itself.

2.4.2.3.3 Special auxiliaries are applicable only where indicated, and the same notation may be used elsewhere with a different meaning. In a few cases, special auxiliaries have either an extended or a reduced range of applicability. This is always indicated by a note, e.g. at 52-1/-8 or 616. For instance, hyphen auxiliaries under 62 are applicable throughout the range 62 to 69 (as indicated in a running footnote), and the point-nought auxiliaries listed at 7, applicable throughout the class except under 77. Also, for example, the 666.1.03 and .05 auxiliaries are valid not only under 666.1, but throughout 666.11/.28, as is indicated in the note preceding them; and a note at 666.21/.28 draws attention to the availability of these auxiliaries in this section outside their expected range.

2.4.2.3.4 Special auxiliaries may also occur within other series of auxiliaries, as they do, for example, at the beginning of Table 1d: Common auxiliaries of form. The principle is the same: they may be used in the form in which they appear, e.g.

(0.035.22) Transparent, strip-form [documents]. Microfilm

or the special auxiliary element (beginning with .0) may be detached and affixed to any of the direct divisions of (0), e.g.

(05) Serial publications. Periodicals
(05.035.22) Periodicals on microfilm.

The compound thus formed is still a common auxiliary, which may qualify a main number, e.g.

5(05.035.22) Science periodicals on microfilm.

The -6 auxiliaries at 66.041 are an example of special auxiliaries within other special auxiliaries.

2.4.2.3.5 There is another device, though not an auxiliary table at all, that is similar to special auxiliaries in that it results in the same notation being used to denote a

given concept in more than one place. It is *parallel division*, signalled in the tables by the *subdivide-as* sign $\equiv$. This simply means that the number preceding $\equiv$ may be subdivided in a manner analogous to the number following it; this will result in an exactly analogous array, with the same concepts expressed by the same sequence of digits. A simple example is in 611 'Anatomy', parts of which are parallel to 616 'Pathology', where both are subdivided into particular organs. The compiler has opted to give more detail under 616 (the pathology of particular organs), but it would not matter which was chosen as the main place: the point is that they are parallel, and to enumerate organs fully in both places would be a waste of space and effort. Instead, there are instructions such as that under 611.2 'Respiratory system': 611.21/.26 $\equiv$ 616.21/.26, or under 611.3 'Digestive system': 611.3 $\equiv$ 616.3. In these cases, the 616 subdivisions are the *source numbers*, from which digits may be detached and added to the *target numbers* under 611; thus 616.21 gives us the analogous 611.21, while 616.31 gives us 611.31, and so on. The parallel arrays may be represented symmetrically:

611.21	Nose. Sinuses	616.21
.22	Larynx (voice-box)	.22
.23	Trachea (windpipe)	.23
.24	Lungs	.24
.25	Pleurae	.25
.26	Diaphragm	.26

The numbers in the left-hand column represent these items in the context of anatomy, while those in the right-hand column represent them in the context of pathology. The list of items is the same.

2.4.2.3.6 This is generally easy to follow when the source number and the target number are the same length. When they are of different lengths, then repunctuation may be necessary. An example of this is 611.81 'Central nervous system', divided like 616.831; thus 611.813 derives from 616.831.3. The parallelism here is not obvious to the eye, but the principle is the same: the digits that follow 611.81 are inferred from the digits that follow 616.831; thus, from 616.831.3 the final 3 is detached and added to 611.81 – hence: 611.813. It may be helpful in such cases to delete the points mentally; then 61181 $\equiv$ 616831 and from 6168313 we infer 611813. We then punctuate after every third digit – hence 611.813. Here too, the parallel arrays may be represented symmetrically:

611.813	Prosencephalon (forebrain) etc.	616.831.3
.814	Diencephalon (thalamencephalon)	.4
.815	Mesencephalon (midbrain) etc.	.5
.817	Metencephalon (hindbrain)	.7
.818	Myelencephalon etc.	.8
.819	Cerebral meninges	.9

and it becomes clear that the italicized digits are common to both number columns.

2.4.2.3.7 There is no limit to the kinds of notation where parallel division is used. They may be main numbers (611.81 $\equiv$ 616.831); they may be special auxiliaries (675.025 $\equiv$ 3675.055); they may be common auxiliaries ("511" $\equiv$ "411"); auxiliary numbers may derive from main numbers (-036.4 $\equiv$ 678.4) or vice versa (811 $\equiv$ =11/=9); and a number may be the source for the parallel division of one of its own subdivisions (546.289 $\equiv$ 546.28). This should cause no confusion, as in every case where parallel division is authorized, the fact is clearly indicated, often with examples.

2.4.3 Filing order

2.4.3.1 The filing order of UDC symbols is based on a progression from the general to the particular. Thus, the common auxiliaries (which are by definition general) come first, and an independent auxiliary used alone or cited first (see 2.4.4.1) files before a main number. Next, an aggregation of several numbers has a broader

meaning than a simple number, so compounds with the plus and the stroke – Table 1a – file before a single component number (622+669 comes before 622). Finally, a shorter number files before a longer number, because a number followed by an auxiliary (unless it is an aggregation) is more specific than the simple number, while in simple hierarchic division each successive digit further specifies the concept, increasing the particularity.

2.4.3.2 Arabic numerals arranged as decimal fractions have an inherent ordinal value; the other symbols have been given an arbitrary one. Table 1 shows the filing order of both simple and compound numbers.

Table 1. Filing order

symbol	example	
=	=112.2	German language
(0...)	(0.035.2)	Microform documents
(1/9)	(430)	Germany
(=...)	(=1.410)	British nationals
"..."	"18"	Nineteenth century
+	622+669	Mining and metallurgy
/	622/623	Mining and military engineering
simple number	622	Mining
:	622:338.3	Productivity in mining
=	622=112.2	Documents in German about mining
(0..)	622(0.035.2)	Microform documents about mining
(1/9)	622(430)	Mining in Germany
(=..)	622(=1.366)	Mining among the ancient British
"..."	622"18"	Mining in the nineteenth century
*	622*Fe ₂ O ₃	Mining of red haematite (Fe ₂ O ₃)
A/Z	622GOE	Mining of named ores: goethite
-0	622-057.2	Manual workers in mining
-1/-9	622-78	Protective devices and measures in mining
.0	622.03	Geological character of ore deposits
'	622'17	Tailings, waste, residues from mining
next simple number	622.3	Mining (extraction) of specific minerals...

2.4.3.3 The algebraic subgrouping sign (square brackets) does not affect the filing order, and may be ignored for this purpose, except where class numbers would be identical but for the square brackets. Then one may apply the rule of nothing-before-something, so that the one without brackets files first:

658.512.2:004-051	Industrial design in relation to: practitioners of data processing (e.g. designing for convenience of computer operators)
[658.512.2:004]-051	Practitioners of: industrial design in relation to data processing (e.g. practitioners of computer-aided design)

2.4.3.4 *Intercalation* of auxiliaries (see 2.4.5) may lead to class numbers with infixes at any point in the hierarchy. Such a compound, where the auxiliary separates the opening element from the closing element of the simple number, files after the opening element alone and the opening element plus suffix. For example, the compound 622.341.1(430) in Figure 2 could be rearranged as:

622(430).341.1 Mining – Germany – iron ores

so creating an order such as:

622 Mining
622(430) Mining – Germany
622(430).341.1 Mining – Germany – iron ores

2.4.3.5 In general, it will be seen that the filing order of UDC symbols is that in which they are displayed in the tables. The exceptions are (i) that the simple number comes between compounds with the stroke and compounds with the colon, and (ii) that square brackets have no inherent filing order.

2.4.4 Citation order

2.4.4.1 When an element of notation is selected as representing an aspect of a document's subject, and is incorporated into a class number for that subject, it is said to be cited. The order in which the elements are combined to make a compound number is the *citation order* (as each element symbolizes a facet of the subject, the citation order is also known as the *facet formula*).

2.4.4.2 In order to ensure a sequence from general to special, it is necessary that the filing order should be the reverse of the citation order (this is called the *principle of inversion*). In theory, either might be taken as the starting point, but here we have a specified filing order with both tables as a whole, and examples of synthesis given within the tables displayed in this order. So the simplest rule for citing elements in a compound is:

the citation order is the reverse of the filing order.

This means that the elements in a compound class number proceed from special to general. If one needed to cite, say, =112.2 and (430) and "18" and '17, all qualifying 622.341.1, the standard order would be: '17; "18"; (430); =112.2, thus:

622.341.1'17."18"(430)=112.2 Iron-ore mining – wastes – nineteenth century – Germany – in German

2.4.4.3 The standard citation order may not be satisfactory for all purposes. The reason would be the need, in particular collections, to bring together (or *collocate*) all references to a particular aspect of a subject, which would be separated if the standard order were followed. For example, in the standard citation order, time "... " would precede place (1/9) (the reverse of the filing order), and so, following the main number, a sequence of entries would be arranged primarily according to time, with any given time aspect divided secondarily according to place:

622"-..."	Mining at various times BC
622"-..."(1/9)	Mining, BC, in various places
622"-..."(410.197)	Mining, BC, in Cornwall
622"+..."	Mining at various times AD
622"+..."(1/9)	Mining, AD, in various places
622"+..."(410.197)	Mining, AD, in Cornwall
622"17"	Mining in the eighteenth century
622"17"(1/9)	Mining, eighteenth century, in various places
622"17"(410.197)	Mining, eighteenth century, in Cornwall

In this example, references to Cornwall are scattered through the sequence, separated by, first, the time element, and, second, most of the place sequence, since (1/9) represents many individual entries. If, for a particular purpose, it were necessary to collocate references to mining in Cornwall, it would be necessary to exchange the positions of the time and place auxiliaries in the citation order. Then the division would be primarily according to place and secondarily according to time:

622(1/9)	Mining in various places
622(1/9)"-..."	Mining in various places, BC
622(1/9)" + ..."	Mining in various places, AD
622(1/9)"17"	Mining in various places, eighteenth century
622(410.197)	Mining in Cornwall
622(410.197)"-..."	Mining in Cornwall, BC
622(410.197)" + ..."	Mining in Cornwall, AD
622(410.197)"17"	Mining in Cornwall, eighteenth century

In this example, references to Cornwall are brought together, but references to the eighteenth century are scattered.

2.4.4.4 One may summarize the matter of citation order as follows. If there is no other preference, follow the standard citation order (reverse of filing order). But to bring together aspects that would otherwise be scattered, vary the citation order so as to place the relevant notation nearer the beginning of the compound (so affecting the filing order of the class number). The filing order is prescribed, but the citation order is optional.

2.4.5 Intercalation

2.4.5.1 *Intercalation* is the use of an auxiliary as an infix rather than a prefix or suffix. In other words, certain auxiliaries may interrupt a main number, creating a compound such as 622(430).341.1 (mentioned in 2.4.3.4). The reason for this would be to create a more helpful arrangement of documents, or references to them, when classed. It is merely an extreme case of varying the citation order to produce a different sequence. In the example given in 2.4.4.3, the place auxiliary (410.197) was brought forward to precede the time auxiliary "17", giving 622(410.197)"17". Theoretically, it might be brought still further forward, and intercalated into the main number, giving 62(410.197)2"17". This would be useful only if one wanted to group all information on the subject 62 'Engineering', then subdivide it according to place (1/9) before proceeding to ...2 'Mining'. In practice, this is not likely, but there might be a need to group information about a more specific activity, such as mining, in a given area:

622(410)	Mining – Britain
622(410).333	Mining – Britain – coal
22(410).34	Mining – Britain – metal ores
622(430)	Mining – Germany
622(430).333	Mining – Germany – coal
622(430).34	Mining – Germany – metal ores

or about institutions, such as laws, that vary from country to country:

347.78(410)	Copyright laws – Britain
347.78(410)1	Literary copyright – Britain
347.78(410)5	Copyright of music – Britain
347.78(44)	Copyright laws – France
347.78(44)1	Literary copyright – France
347.78(44)5	Copyright of music – France

2.4.5.2 This can only be done with auxiliaries that have biterminal signs i.e. parentheses or quotation marks: the common auxiliaries of form, place, race and time.

3 Management of UDC

3.1 For many years, UDC was managed by the organization created by Otlet and La Fontaine, known since 1988 as the International Federation for Information and Documentation (FID). On 1 January 1992, all rights in UDC were transferred to the UDC Consortium (UDCC), of which FID was a founder member along with five UDC publishers, including BSI. Hence, since 1992 UDC has been owned by the UDC Consortium (UDCC), an international group of UDC publishers. The

Consortium has an Executive Committee and an Advisory Board, both with international membership, and an Editor in Chief. Its headquarters is at the Royal Library in The Hague. Each member publisher has the right to issue UDC editions in its own language.

3.2 One of the UDCC's first actions after its inauguration in 1992 was to create an internationally owned database which would represent the authoritative text of UDC. This is known as the Master Reference File (MRF). It is updated once a year according to the authorized amendments, as issued in the annual *Extensions and Corrections to the UDC*. The MRF in 2005 contains 66 736 entries, currently in English, with versions in French and German planned for the future. It is available for use under licence and users can choose the type of database exports. The database is in CDS/ISIS and users buying a UDC MRF licence are also provided with database definition files if they wish to use UDC in the database.

The UDCC maintains the Master Reference File (MRF), which is the authoritative statement of the content of UDC. This has superseded the Master Version of UDC which was formerly maintained by FID, and which consisted of the text of the French edition of 1927–1933, as modified by all approved amendments since that date. The MRF is the authority for, and source of, published UDC editions.

3.3 Published editions of UDC are authorized by the Executive Committee of the UDCC in various languages and at various levels of inclusiveness, and each Executive Member organization has the right to publish them in its own language. Other publishers can apply for licences to publish UDC editions. Most published editions are in a single language, and are known as the *language editions*, there have occasionally also been multilingual editions (printed and digital). BSI is the publisher of the English-language editions. The UDC MRF is also available in an online version: UDC Online (<http://www.udconline.net/>), with a powerful and user-friendly searching interface.

3.4 The scheme is under continuous revision, a state of affairs that has been maintained since the first edition began to appear in 1904. This means that later states of knowledge in a subject, and missing concepts previously overlooked, can be considered, and if necessary acted on, without waiting until a new edition is imminent. An Editor-in-Chief is appointed, who, supported by an editorial board, is charged to maintain the quality of the UDC and enhance its international credibility. Major revision proposals are published in *Extensions and Corrections* (see 3.5), along with the authorized amendments. Once amendments are authorized, they are entered in the database, and are taken into account whenever new editions are undertaken by the publishers.

3.5 The published amendments became known from early on as *Extensions et Corrections*. Starting in 1933 with a duplicated loose-leaf updating service called *Extensions et Corrections Décidées*, this developed into a formal periodical, *Extensions and Corrections to the UDC*, from 1949. This was at first semi-annual, and later annual, cumulating in three-year series; the earlier series have been collected into two larger volumes:

Cumulated UDC Supplement (~1964)
Cumulated UDC Supplement 1965–1975

The (so far) uncollected series start with Series 9, No. 3, dated 1977. The text of the entries in *Extensions and Corrections* used to be in any one of the three FID languages, or in bilingual or trilingual versions. From Series 15 (September 1993), the entries are in English. This series has also introduced a new section entitled 'Comments and Communications', including revision proposals.

3.6 To take full advantage of UDC's continuity of revision, users therefore have the obligation of annually updating their editions, and their classifying practice, by reference to *Extensions and Corrections*. The UDC publishers, such as BSI, from time to time replace published versions with new editions incorporating recent amendments, but inevitably there is some delay. It is necessary to weigh the

advantages of up-to-dateness against the onus of the updating procedure. The full editions appear in many sections at different stages of up-to-dateness, but with self-contained versions such as the present one, it is possible to make a decision to use UDC in a given, date,d edition.

3.7 Though the revision structure is still subject to change, the UDCC continues to welcome proposals for improving UDC from any of its users. Suggestions and inquiries about UDC can be addressed to the following:

SUMMARY OF THE CLASSIFICATION

The summary extends to second-level classes (two-digit numbers) except for class 62 and a few cases where notational anomalies prevent consistency. Class 62 is summarized to the third level.

Numbers enclosed in brackets [thus] denote classes that are currently vacant.

Common auxiliary tables

- 1a Coordination. Extension
- 1b Relation. Subgrouping. Order-fixing
- 1c Language
- 1d Form
- 1e Place
- 1f Ethnic grouping and nationality
- 1g Time
- 1h Subject specification by notations from non-UDC sources
- 1k General characteristics
Properties, Materials, Processes, Persons

Main tables (schedules)

- 94 General history

Part 1

Auxiliary tables

SECTION I: COMMON AUXILIARY SIGNS AND SUBDIVISIONS

+ , / TABLE 1a. COORDINATION. EXTENSION

Filing order. The symbols in Table 1a extend rather than restrict the meaning of a number, and compounds containing them file before the simple number itself. First in the filing order comes the number followed by +...; secondly, the number followed by /...; thirdly, the simple number.

Use with biterminal auxiliaries. When the plus + and stroke or slash / are used to link auxiliary numbers with biterminal signs (i.e. parentheses or quotation marks), the resultant compound number is enclosed within a single set of signs, e.g.

(470+571) Russia. Russian Federation - not (470)+(571).

"19/20" The 20th and 21st centuries - not "19"/"20".

(410)(051) Britain - periodicals (place - form).

(410)(051)"20" Britain - periodicals - 21st century (place - form - time).

SECTION 1. COORDINATION. ADDITION

The coordination sign + (plus) connects two or more separated (non-consecutive) UDC numbers, to denote a compound subject for which no single number exists, e.g.

(44+460) France and Spain.

622+669 Mining and metallurgy.

SECTION 2. CONSECUTIVE EXTENSION

The extension sign / (stroke or slash) connects the first and last of a series of consecutive UDC numbers to denote a broad subject, or range of concepts, e.g.

(7/8) North and Central America, and South America. The Americas.

592/599 Systematic zoology (equivalent to 592+593.1/.99 +599).

629.734/.735 Heavier-than-air craft. Aeroplanes.

643/645 The home and household equipment (equivalent to 643+644+645).

If the number following the stroke is more than three digits long and begins with a group of digits in common with the preceding number, it may be abbreviated by omitting the digits common to both, so long as the first item after the stroke is a decimal point. Thus, in the third example above, compounded from 629.734 and 629.735, the group 629 is common to both and is not repeated; the group .735 following the stroke is coordinate with .734 preceding it. The use of the stroke in this way to form a range-number conceals all the component numbers except the first, and the information so classed files in only one place in a classified list. It is therefore inappropriate in cases where there is a need to retrieve information from all the component numbers, e.g.

546.32/.35.

The more important alkali metals might require separate class entries as follows.

546.32 Potassium.

546.33 Sodium.

546.34 Lithium.

546.35 Rubidium

;, [, :: TABLE 1b. RELATION. SUBGROUPING. ORDER-FIXING

SECTION 1. SIMPLE RELATION.

The relation sign : (colon) indicates relationship between two or more subjects by connecting their UDC numbers. Unlike the plus and stroke (Table 1a), the colon restricts rather than extends the subjects it connects. E.g.

17:7 Ethics in relation to art.

341.63(44:450) Arbitration of disputes between France and Italy.

628.463:692.758 Refuse collection systems using refuse chutes.

When the colon is used to link auxiliary numbers with biterminal signs (i.e. parentheses or quotation marks), the resultant compound number is enclosed within a single set of signs, as in the example (44:450) above.

SECTION 2. SUBGROUPING.

Square brackets [] may be used as a subgrouping device within a complex combination of UDC numbers, in order to clarify the relationship of the components. Subgrouping may be needed when a subject denoted by two or more UDC numbers linked by plus sign, stroke or colon is as a whole related to another number by colon, or is modified by a common or special auxiliary, e.g.

061.2(100):[54+66]IUPAC International Union of Pure and Applied Chemistry.

[622+669](485) Mining and metallurgy in Sweden.

004.384:[621.771.016.3:669.14] Computers in cold-rolling mills for steel.

783:[274/278] Protestant church music.

SECTION 3. ORDER-FIXING.

The double colon :: may be used to fix the order of the component numbers in a compound number, especially when the UDC is used in a computer-based information system, e.g.

061.2(100)::[54+66]IUPAC International Union of Pure and Applied Chemistry.

575::576.3 Cytogenetics.

77.044::355.4 War photography

=... TABLE 1c. COMMON AUXILIARIES OF LANGUAGE

The common auxiliaries of language denote the language or linguistic form of a document whose subject is denoted by a main UDC number.

Table 1c is the main place in the UDC tables for enumeration of languages, and serves as the source for the subdivision of Class 811 Languages (as subjects of study), Class 821 Literatures of individual languages, and (=...) Table 1f - Common auxiliaries of ethnic grouping

Although in theory the language of any document or item of information may be denoted, in practice it is useful only when there is a need to distinguish between those in different languages, e.g. to enable retrieval according to language or to provide a satisfactory filing order.

CITATION ORDER. In citation order, the language auxiliary normally comes last; it may, however, be cited medially or even first in a compound number if there is a need to file documents in order of language rather than subject. If necessary, it is separated from the following number by a colon (as in the second example below), e.g.

663.4(493)(075)=112.5 Brewing industry in Belgium - textbook - in Flemish.

(02.053.2)=111:... Children's books - in English - subject arrangement.

=111(02.053.2)... English language works - children's books - subject arrangement.

MULTILINGUAL DOCUMENTS. Multilingual documents may be denoted by =00 or by the auxiliaries of the individual languages in ascending numeric order, e.g.

53(035)=00 Multilingual handbook of physics.

53(035)=111=112.2=133.1 Handbook of physics in English, French and German

Systematic table

=... '0 ORIGINS AND PERIODS OF LANGUAGE. PHASES OF DEVELOPMENT

'03, '05, '07 and '09 are not generally applicable. They are reserved for specific applications (e.g. at Latin, Greek, Hebrew, Egyptian)

=... '01	Old period. Archaic period	=025	Adapted, edited, amended versions
=... '02	Classical period		⇒ (0.046)
=... '04	Middle period		⇒ (0.074)
=... '06	Modern period	=030	Translated documents. Translations
=... '08	Revived language		=030.1/.9 ⇒ =1/=9
=... '282	Dialects. Local and regional language. Variants and vernaculars		Denote the source language by =030.1/.9 and the target language directly by =1/=9
	=... '282 ⇒ 81'282		◇ 61=030.161.1 Medical documents translated from Russian
=00	MULTILINGUAL. POLYGLOT		◇ 61=030.161.1=133.1 Medical documents translated from Russian into French (filed near other medical translations from Russian)
	⇒ 81'246.3		◇ 61=133.1=030.161.1 Medical documents translated from Russian into French (filed near other medical documents in French)
	⇒ 81'374.8-022.218		⇒ 81'25
=02	ORIGINALS OR THEIR ADAPTATIONS (UNTRANSLATED)		⇒ 81'322
=021	Original versions (unadapted, unedited)		

=1/=9 LANGUAGES (NATURAL AND ARTIFICIAL)

=1/=8	NATURAL LANGUAGES	=112.22	Upper German
=1/=2	INDO-EUROPEAN LANGUAGES	=112.24	Middle German
=11	Germanic languages		(Not to be confused with =122.2'04 Middle High German)
=111	English	=112.28	Yiddish (Judeo-German)
	◇ =111'01 Anglo-Saxon (Old English)	=112.3/.4	Low German
	◇ =111'04 Middle English	=112.3	Plattdeutsch ('Low German' in the narrower sense)
=111.8	English based pidgins and creoles		Frisian
	Specify by (4/9) for geographical region and/or by name (alphabetic extension - Table 1h)	=112.4	Dutch (Flemish in Belgium and north-eastern France)
		=112.5	Dutch-based pidgins and creoles
=112	Other West Germanic languages		Specify by (4/9) for geographical region and/or by name (alphabetic extension - Table 1h)
=112.2	German (High German, Standard written German)	=112.58	
	◇ =112.2'04 Middle High German (c. 10th-14th century)		

=... Table 1c. Common auxiliaries of language

(0...) TABLE 1d. COMMON AUXILIARIES OF FORM

SCOPE. The common auxiliaries of form denote the form or presentation of documents. They are not used to denote the subject matter of documents.

Literary forms (poetry, plays, fiction etc.) are classed under 82-1/-9.

Kinds of form not listed in Table 1d may be denoted by (0:...), e.g.

929(0:82-31) Biography presented in novel form

CITATION ORDER. These auxiliaries are normally used following a subject notation, but, if desired, all documents of the same form of presentation (or their surrogates) may be grouped together under the appropriate form auxiliary, e.g.

54(035) Handbooks of chemistry.

54(038) Dictionaries of chemistry (filed beside other works on chemistry).

(038)54 Dictionaries of chemistry (filed beside other dictionaries).

(054) Newspapers (of all kinds).

(054)(44) French newspapers.

(085.6)685.53 Price lists of camping equipment (filed beside other price lists).

INNER AND OUTER FORM. Where more than one form aspect is to be expressed, distinction should be made between inner form, where the form influences the subject (e.g. historical presentation) and outer form, which expresses only the physical characteristics of the information carrier (e.g. a sound recording). Regardless of numerical order, inner form should occur next to the subject before outer form is expressed, e.g.

[792+82-2](091)(086.7) A spoken-word history of the theatre (subject - historical form - sound recording)

Systematic table

(0.0...) 		(094.9)	Collections of legal documents. Collections of rulings, legal decisions. Legal case-books

(1/9) TABLE 1e. COMMON AUXILIARIES OF PLACE

SCOPE. The place auxiliaries indicate the geographical range, locality or other spatial aspect of a subject denoted by a main UDC number, e.g.

- 331.2(44) Wages in France.
- 338.47(81) Economics of transport in Brazil.

They are the primary characteristic of division in 913 'Regional geography' and 94 'History'

CITATION ORDER. These auxiliaries are normally used following a subject notation. A sequence based on place can also be created by citing the place auxiliary first, e.g.

- 339.5.053(73) Trade balance - USA.
- (73)339.5.053 USA - trade balance.

The place auxiliary may also be intercalated in a UDC number to achieve a desired sequence, e.g.

- 354(44) Central administration in France.
- 354(44)51 French ministry of justice.

Exceptionally, the place auxiliary alone might be adequate for classifying some kinds of document where the place aspect is the only one likely to be sought (e.g. some maps).

FURTHER SUBDIVISION. In general, the political section of the following table, (4/9), is subdivided as far as counties, departments or equivalent administrative units.

Smaller units may be denoted in two ways by using the special auxiliaries under (1-2) and (1-3), either at the number for the high-level unit (country, state) or at that for the lower-level unit (county, department, etc.), e.g.

- (44) France.
- (44-2) Communes of France.
- (44-37) Arrondissements of France.
- (441.1) Département of Finistère.
- (441.1-2) Communes of Finistère.
- (441.1-37) Arrondissements of Finistère.

The names used, the selection and sequence of regions, descriptive expressions and relations implied by the numeric hierarchy do not constitute any endorsement of their national or international status either by the UDC Consortium or by any of its cooperating organizations. No opinions about any of these matters should be inferred from this publication

Systematic table

(1) PLACE AND SPACE IN GENERAL. LOCALIZATION. ORIENTATION

(1:....)	ONE PLACE IN RELATION TO ANOTHER ◇ (44:450) Relations between France and Italy ◇ 339.5(44:450) Trade relations between France and Italy	(1-021)	Biological zones

(1-077.2)	Zones free of particular weapons. □ Non-nuclear zones (atomic-weapon-free zones) ◇ (430-077.2) Non-nuclear zones in Germany	(1-198.2)	Vertical
(1-077.4)	Zones free of particular military installations	(1-198.4)	Inclined. Sloping. Oblique. Skew
(1-077.6)	Disarmament zones. Demilitarized zones	(1-198.6)	Horizontal
(1-078)	Territories under control of a counter-government (rival government)	(1-199)	Position undefined. Free. Free-moving
(1-08)	Unknown, unexplored regions and zones	(1-2/-4)	Political units. Administrative units <i>The (-2/-4) auxiliaries are applicable to (3/9), in which case they refer to specific localities; used in the form in which they are listed here, they refer to the administrative unit in general and related affairs</i>
(1-1)	Orientation. Points of the compass. Relative position	(1-2)	Lowest administrative units. Localities. □ Districts (UK). Communes (France). Gemeinden (Germany)
(1-11)	East. Eastern <i>Use (...-11) only for relative position or orientation. For the East (Orient) conventionally defined see (5)</i>	(1-21)	Municipalities. Urban... Urban districts
(1-12)	South-east. South-eastern	(1-22)	Village communities, parishes. Rural... Rural districts
(1-13)	South. Southern	(1-24)	Joint local administrative units. □ Cantons (France). Ämter (Germany)
(1-14)	South-west. South-western	(1-25)	Capital cities. Metropolises
(1-15)	West. Western <i>Use (...-15) only for relative position or orientation. For The West (Occident) conventionally defined see (4+7)</i>	(1-28)	Intercommunal groupings. □ for vocational training, water supply
(1-16)	North-west. North-western	(1-29)	Independent functional authorities, jurisdictions
(1-17)	North. Northern	(1-291)	Dike-building associations. Improvement boards. Polder boards
(1-18)	North-east. North-eastern	(1-3)	Larger units within the state
(1-19)	Relative location, direction and orientation	(1-32)	Higher-level administrative units. Provinces
(1-191)	Internal spatial relationships. Inside. Within. Endo-...	(1-328)	Inter-provincial. Higher-order communal associations
(1-191.2)	Central. In the middle	(1-35)	Middle-level administrative units. □ Counties (UK). Départements (France). Regierungsbezirke (Germany). Amter (Denmark)
(1-191.4)	Movement in relation to the centre	(1-37)	Lower-level administrative units. □ Arrondissements (France). Kreise (Germany)
(1-191.42)	Centripetal	(1-4)	Units of highest (state) level. Nations. States. Confederations
(1-191.44)	Centrifugal	(1-41)	Confederations of states. Federations. Commonwealths
(1-191.6)	Eccentric. Not in the middle	(1-43)	◇ (494-41) Switzerland as a confederation ◇ (73-41) USA as a federation ◇ (94-41) Australia as a commonwealth Constituent states within a confederation. Federal states. Autonomous republics ◇ (494-43) Swiss cantons ◇ (73-43) States of the USA ◇ (94-43) Australian states ◇ (944-43) New South Wales as a state of the Commonwealth of Australia
(1-191.8)	Peripheral. At the edge		
(1-192)	Position in relation to a border or frontier		
(1-192.2)	Adjacent. Bordering. Touching		
(1-192.4)	Overlapping. Intruding into		
(1-192.6)	On this side. Cis-...		
(1-192.7)	On the other side. Trans-...		
(1-192.8)	Opposite. Facing		
(1-194)	External spatial relationships. Outside. Exo-...		
(1-194.2)	Alongside. Adjoining. Nearby. Close		
(1-194.4)	Half-way. Midway		
(1-194.6)	Far off. Far away. Distant. Wide apart		
(1-195)	Lengthwise. Longitudinal relations		

(1-44)	Empires. Combination of mother-country, dominions and colonies ◇ (41-44) British Commonwealth and Empire generally	(1-662)	Capitalist countries
(1-45)	Nonfederal sovereign states	(1-664)	Socialist countries
(1-46)	Territories geographically separated from the mother country but integrated in its administration	(1-67)	Groupings of states according to economic point of view
(1-5)	Dependent or semi-dependent territories	(1-672)	Countries with market economy
(1-51)	Dependent territory administered by a specific state ◇ (668.2-51:44) Dahomey under French administration	(1-674)	Countries with centrally planned economy
(1-52)	Colonized territory. Colonies ◇ (6-52) Colonized territory in Africa ◇ (676.2-52) Kenya as a colony	(1-69)	Groupings of states according to other points of view. □ From scientific or technical point of view <i>Specify by A/Z</i> ◇ (4-69ESA) Countries of the European Space Agency
(1-53)	Concessions (territorial) ◇ (512.317-53) The New Territories of Hong Kong as a leased territory	(1-7)	Places and areas according to privacy, publicness and other special features
(1-54)	Dependent or semi-dependent territories with special statute	(1-71)	Places of private, individual and familial activity. In private places. In private
(1-542)	Protectorates ◇ (676.1-542) Uganda as a protectorate	(1-72)	Places of public, collective, group activity. In public places. In public
(1-544)	Mandate (League of Nations). Trusteeship (United Nations) ◇ (569.1-544) Syria as a mandated territory	(1-75)	Areas designated for special treatment
(1-546)	Condominium ◇ (934-546:410+44) New Hebrides (now Vanuatu) as British-French condominium	(1-751)	Areas protected for specific scientific or recreational purposes
(1-55)	Territories in transition between dependence and independence ◇ (549.3-55) East Pakistan during its secession (becoming Bangladesh)	(1-751.2)	National parks (primarily large open spaces for aesthetic and recreational purposes, and including human cultural features) ⇒ 712.253
(1-6)	States or groupings of states from various points of view <i>The (1-6) auxiliaries apply when the territorial aspect is subsidiary</i> ◇ 669.18(4-672EU) Steel production in EU (European Union) countries	(1-751.3)	Nature reserves (primarily for the protection of plant and animal species and habitats, usually with limitation of human access). □ National Wildlife Refuges (USA). Special Protection Areas and Special Areas of Conservation (European Union). Ramsar sites (International Convention on Wetlands of International Importance, Ramsar, Iran, 1971)
(1-61)	Groupings from the point of view of sovereignty	(1-751.4)	Areas primarily for protection of landscapes with aesthetic value. □ Areas of Outstanding Natural Beauty (UK)
(1-612)	Groupings without surrender of sovereignty	(1-751.6)	Areas primarily for protection of inanimate features of scientific interest. □ Sites of Special Scientific Interest (UK)
(1-615)	Groupings with partial surrender of sovereignty	(1-77)	Areas according to stage of development
(1-618)	Groupings with total surrender of sovereignty	(1-773)	Developing countries. 'Third World' countries
(1-62)	Groupings of states according to military or defence view	(1-775)	Developed areas. Highly developed areas
(1-622)	Countries belonging to military or defence pacts <i>Specify by A/Z</i> ◇ (1-622) NATO Countries of the North Atlantic Treaty Organization ⇒ (1-65) ⇒ 327.51	(1-8)	Location. Source. Transit. Destination
(1-624)	Noncommitted countries. Nonaligned countries ⇒ (1-652) ⇒ 327.55	(1-81)	Location. Site. Place of manifestation
(1-65)	Wartime groupings of states	(1-82)	Source. Place of origin. Source of supply ◇ [663.551.5:663.43](410.5-82) Scotch whisky
(1-651)	Belligerent states	(1-83)	Place of transit. Transit area
(1-651.1)	Aggressor	(1-85)	Destination
(1-651.2)	Attacked	(1-86)	Place in a conventional sense, i.e. used as descriptive of some particular article ◇ 677.074.58(55-86) Persian carpets
(1-652)	Neutral states	(1-87)	Foreign. Abroad. Elsewhere than one's own country ⇒ -027.63
(1-66)	Groupings of states according to social and political system	(1-88)	Home. One's own country ◇ 27-46(1-88) Christian missions in the home country. Home missions
		(1-89)	Places in their earlier, historical status. Historical and traditional entities
		(1-9)	Regionalization according to specialized points of view

(1/9) Table 1e. Common auxiliaries of place

(1-92)	Regionalization of the earth according to physiogeographical features <i>If an arrangement according to physiographic feature as leading category is required, an alternative classification is provided at (29). If this alternative is selected, the auxiliary (1-92) should not be used</i>		<i>Further subdivision by three-figure and two-figure notation for degrees longitude and latitude respectively, delineating the western and southern boundaries of the area concerned</i>
	◇ (52-92) Physical regions of Japan	(161)	◇ (161.007.49) River Nahe and western Rhenipfalz area - 7°E, 49°N
	◇ (98-92) Arctic regions		
(100)	UNIVERSAL AS TO PLACE. INTERNATIONAL. ALL COUNTRIES IN GENERAL <i>Up to three countries may be denoted by the auxiliaries for the individual countries. Where more than three countries are concerned, one (or each, by multiple entry) may be specified, in relation to (100). The totality of all or many countries is denoted by (100) alone</i>	(162)	Places in the northern quadrant, 0° to 180° east of Greenwich ◇ (161.000.51) Kent, England - 0°E, 51°N ◇ (161.106.48) Ulan Bator, Mongolia - 106°E, 48°N
	◇ (44+460) France and Spain	(163)	Places in the southern quadrant, 0° to 180° east of Greenwich ◇ (163.026.18) Victoria Falls (R. Zambezi) - 26°E, 18°S ◇ (163.138.35) Gulf of St Vincent near Adelaide, South Australia - 138°E, 35°S
	◇ (44+100) France and various other countries		
	◇ 061.2(100) International organizations		
(15)	The universe, celestial or cosmic space generally. In Space. Cosmic. Extraterrestrial localities	(164)	Places in the southern quadrant, 0° to 180° west of Greenwich ◇ (164.070.16) Lake Titicaca - 70°W, 16°S ◇ (164.150.18) Tahiti - 150°W, 18°S
(151.2)	Specific parts of the cosmos		
(151.21)	In the Solar System ⇒ 523	(18)	SPATIAL MEASUREMENTS OR DIMENSIONS <i>Details by colon combination with (2...)</i> ◇ (23:181) Heights (above sea level) ◇ (24:181) Depths (below sea level) ◇ (24:183) Volume. Cubic capacity (of caves etc.) ◇ (25:182) Surface areas. Areas of land ◇ (26:181) Ocean or sea depths
(151.22)	Environs of the Solar System		
(151.23)	The local stellar system		
(151.24)	Region of the Galaxy (Milky Way) ⇒ 524.6		
(157)	Planets, their regions and localities		
(158)	The Moon, its regions and localities ⇒ 523.34		
(16)	PLACES AND AREAS OF THE EARTH ACCORDING TO GEOGRAPHICAL COORDINATES OR GRIDS ⇒ 528.28	(181)	One-dimensional measurements. Linear dimensions. Distances. Lengths etc. <i>For precise distances, add standard international abbreviation for unit, followed by actual figures</i> ◇ (181m100) 100 metres ◇ (181km427) 427 kilometres Short Medium length Long
(160)	Geographical meridians and parallels. Poles. Points on the Earth according to geographical coordinates		
(160.1)	Longitudes. Meridians ◇ (160.1-11) Eastern longitudes ◇ (160.1-15) Western longitudes	(181.3)	
(160.2)	Latitudes. Parallels ◇ (160.2-13) Southern latitudes ◇ (160.2-17) Northern latitudes	(181.5)	
(160.20)	Equator	(181.7)	
(160.23)	Tropics ◇ (160.23-13) Southern: Tropic of Capricorn ◇ (160.23-17) Northern: Tropic of Cancer	(182)	Two-dimensional measurements. Square dimensions. Areas <i>Details as (181)</i> ◇ (182m2000) 2000 square metres
(160.26)	Polar circles ◇ (160.26-13) South Polar Circle (Antarctic Circle) ◇ (160.26-17) North Polar Circle (Arctic Circle)	(183)	Three-dimensional measurements. Cubic dimensions. Volumes <i>Details as (181)</i> ◇ (183m150) 150 cubic metres
(160.27)	Poles ◇ (160.27-13) South Pole ◇ (160.27-17) North Pole		
(161/164)	Place according to quadrants <i>The Earth's surface is divided into four quadrants: two northern, 0°-180°E and 0°-180°W of Greenwich, and two southern, 0°-180°E and 0°-180°W of Greenwich, numbered (161) to (164)</i>	(188)	Relative size of places, areas, spaces (188.2) Very small. Part of a small area (188.3) Small. Part of a medium-sized area (188.5) Medium-sized. Moderate-sized. Part of a large area (188.7) Large. Part of a very large area (188.8) Very large. Huge areas

(2) PHYSIOGRAPHIC DESIGNATION

(20)	ECOSPHERE	(213.14)	Wet or humid subtropical regions. Cotton Belt type
(203)	In the atmosphere. In the air. Aerial ⇒ 551.510	(213.5)	Tropical regions. Torrid zone. Tropics
(203.1)	Thermosphere. Outermost atmospheric space	(213.52)	Hot dry or arid regions. Hot desert
(203.3)	Mesosphere (upper boundary: mesopause)	(213.521)	Deserts of Asia
(203.5)	Stratosphere (upper boundary: stratopause)	(213.521.1)	Syrian desert
(203.7)	Troposphere (upper boundary: tropopause)	(213.521.2)	Negev desert
(204)	Of the hydrosphere. In the water. Aquatic ⇒ (26) ⇒ (28) ⇒ 556	(213.521.4)	Rub'al Khali
(204.1)	Underwater	(213.521.6)	Thar desert (Great Indian desert)
(204.2)	Floating	(213.522)	Deserts of Africa
(205)	Lithosphere. Earth's mantle. Centrosphere	(213.522.2)	Sahara desert. □ Libyan desert. Arabian desert (Western desert). Nubian desert
(205.2)	Lithosphere. Outer crust. Surface layer	(213.522.4)	Kalahari desert
(205.4)	Centrosphere. Earth's core. Barysphere	(213.522.6)	Namib desert
(207)	Of, or in the spheres of Nature. Biosphere	(213.523)	Deserts of North America
(207.3)	In the plant kingdom	(213.523.4)	Mojave (Mohave) desert
(207.4)	In the animal kingdom	(213.523.6)	Colorado desert
(208)	In human surroundings. In human society. In social, artificial milieux	(213.524)	Deserts of South America
(21)	SURFACE OF THE EARTH IN GENERAL. LAND AREAS IN PARTICULAR. NATURAL ZONES AND REGIONS ⇒ 551.4 ⇒ 551.8	(213.524.2)	Atacama desert
(210)	Land formations	(213.525)	Deserts of Australia
(210.1)	Peninsulas	(213.525.2)	Great Sandy desert
(210.2)	Capes. Promontories	(213.525.4)	Gibson desert
(210.3)	Headlands. Tongues of land	(213.525.6)	Great Victoria desert
(210.4)	Isthmuses. Necks of land	(213.54)	Savanna. Tropical grassland regions with gallery forest
(210.5)	Coasts. Beaches. Banks. Shores. Littoral...	(213.55)	Monsoon regions
(210.7)	Islands	(213.56)	Hot humid regions. Equatorial forest regions. Tropical forest regions
(211/213)	Climatic zones	(215)	Hemispheres ◇ (215-11) Eastern hemisphere ◇ (215-13) Southern hemisphere ◇ (215-15) Western hemisphere ◇ (215-17) Northern hemisphere
(211)	Cold regions. Polar regions. Frigid regions ◇ (211-13) South polar regions. Antarctic regions ◇ (211-17) North polar regions. Arctic regions	(217)	Former continents. Pangaea. Laurentia. Fennosarmatia. Angaria (Angaraland). Gondwanaland. Serindia. Sinia. Philippina ⇒ (309)
(211.6)	Ice-cap climate	(218)	Individual crustal plates. Eurasian. African. Indian. Pacific. North American. South American. Nazca. Antarctic ⇒ 551.24
(211.7)	Tundra	(23)	ABOVE SEA LEVEL. SURFACE RELIEF. ABOVE GROUND GENERALLY. MOUNTAINS <i>Specify height by colon combination with (181)</i> ◇ (23:181) Heights above sea level ◇ (23:181m4500) Mountains with height of 4500 metres above sea level
(212)	Intermediate and subpolar regions. Temperate zones. Mid-latitude climatic regions ◇ (212-13) South temperate zone ◇ (212-17) North temperate zone	(23.0)	In mountainous country. In hill country
(212.3)	Cold intermediate regions. Subpolar regions. Coniferous Forest Belt	(23.01)	Lower mountains. Hills
(212.4)	Cool temperate regions	(23.02)	Medium mountains. Mid-mountain
(212.5)	Warm temperate regions	(23.03)	High mountains. Higher parts of mountains
(212.6)	Mid-latitude steppe regions	(23.04)	Orological formations. Mountain chains. Terraces. Valleys ⇒ 551.43
(212.7)	Mid-latitude desert regions	(23.042)	Mountain chains
(212.72)	Gobi (Shamo) desert	(23.044)	Terraces
(212.75)	Takla Makan desert	(23.045)	Plateaux
(212.77)	Kara Kum desert	(23.046)	Valleys ⇒ 551.43
(213)	Subtropical and tropical regions generally ◇ 69.03(213.5) Tropical building	(23.07)	Limits of altitude. Height zones
(213.1)	Subtropical regions generally	(23.071)	Tree zones. Limits of trees
(213.12)	Dry subtropical regions	(23.073)	Treeless vegetation zones. Limits of vegetation
		(23.075)	Snow zones. Limits of snow

(1/9) Table 1e. Common auxiliaries of place

(234)	Mountains of Europe	(234.321.5)	Cetic Alps
(234.1)	Mountains of the Iberian peninsula	(234.321.6)	Plessur Alps
(234.12)	Pyrenees. Monte Perdido. Maladetta	(234.321.7)	Salzburg Schist Alps
(234.13)	Catalonian Mountains. Montserrat	(234.321.8)	Eisenerzer Alpen
(234.17)	Sierra Nevada. Mulhacén	(234.322)	Northern limestone Alps
(234.2)	Mountains of France and Belgium	(234.322.1)	Allgäuer Alps
(234.23)	Armorican Massif	(234.322.11)	Rhätikon

	<i>Croatia is divided into 21 counties (županija) including Grad Zagreb; The following classification allows for the five major geographical areas: Central Croatia; Mountain Croatia; Istria and Kvarner; and Southern Croatian Coast, i.e. Dalmatia and Dalmatian Coast. Within these are the 20 traditional, functional regions, e.g. the subdivisions of (497.521); these are the focus of much literature. Finally, the 21 županija are allowed for, being the official administrative structure, though not of much documentary significance. Where these are coextensive with functional regions, they dealt with in 'class here' notes, as at (497.522); where several are contained within a region, they are enumerated, as in the subdivisions of (497.525); where a region is contained within a županija, the region is notationally subordinate, as at (497.529.1); finally, where there is no correspondence at all, the županija has its own class mark, as (497.526).</i>	(497.581.2)	Istra (Istria)
	⇒ (497.13)	(497.583)	<i>Class here Istarska županija</i>

(624.45)	Jungoli (Jonglei, Jonglie, Jonqley, Junglei, Junqali). □ Bor (capital)		<i>Morocco is divided into 16 regions or states (wilayat) and each wilaya is subdivided into prefectures and provinces. The prefectures tend to be the more urbanized divisions, centred on larger cities; the provinces are more agricultural and centred on smaller cities. Historically, Spain had possessions on the Mediterranean coast of Morocco. She still retains 2 enclaves, Ceuta and Melilla, in addition to a few small islands which are governed as overseas territories. The United Nations intends to hold a referendum to determine the future of the territory, known as Western Sahara. Pending the decision, other governments have withheld recognition of Morocco's sovereignty over Western Sahara. The region is known by the locals as the Sahrawi Arab Democratic Republic (SADR), supported by the Polisario political movement. In 2002 the situation is that Morocco claims it, but that the SADR continues to struggle to become an independent territory. The area consists of 4 provinces in Laâoune-Boujdour-Sakia El Hamra, Oued Ed-Dahab-Lagouira and Guelmim-Es-Semara: Boujdour, Es-Semara, Laâoune, Oued Ed-Dahab</i>

(668.231)	Mono (department), Lokossa (department capital). □ Athiémié. Bopa. Comè. Grand-Popo. Houéyogbé. Lokossa (communes)	(669.164)	Ebonyi. □ Abakaliki (state capital)
(668.233)	Atlantique (department), Ouidah (department capital?). □ Abomey-Calavi. Allada. Kpomassè. Sô-Ava. Toffo. Torri-Bossito. Zè (communes)	(669.166)	Enugu. □ Enugu (state capital)
(668.235)	Littoral (department), Cotonou (department capital).	(669.168)	Kogi. □ Lokoja (state capital)
(668.237)	Ouémè (department), Porto-Novo (state and department capital). □ Adjarra (Adjara). Adjohoun. Aguégués (Aguégué). Akpro-Missérété. Avrankou. Bonou. Dangbo. Sèmè-Kpodji (Sèmè-Podji) (communes)	(669.172)	Edo. □ Benin City (state capital)
(669.1)	NIGERIA. FEDERAL REPUBLIC OF NIGERIA <i>Nigeria is divided into 36 states and one territory. As there are marked cultural and religious differences between the north and south of the country, it seemed useful to divide the states in two groups: those mainly north of a line formed by the Niger and Benue rivers up to the confluence, and those mainly south of the line; but there is one state, Adamawa, that lies to either side in roughly equal proportions (so assignment to the north is somewhat arbitrary). The opportunity is taken to relocate Nigeria from (669) to (669.1), so that Sao Tomé e Príncipe at (669.95) no longer appears to be a subdivision of Nigeria</i>	(669.174)	Anambra. □ Awka (state capital)
(669.111.14)	States mainly north of the Niger-Benue river system	(669.176)	Imo. □ Owerri (state capital)
(669.112)	Kebbi. □ Birnin Kebbi (state capital)	(669.178)	Rivers. □ Port Harcourt (state capital)
(669.114)	Sokoto. □ Sokoto (state capital)	(669.182)	Bayelsa. □ Yenogoa (state capital)
(669.116)	Zamfara. □ Gusau (state capital)	(669.184)	Delta. □ Asaba (state capital)
(669.118)	Niger. □ Minna (state capital)	(669.186)	Ondo. □ Akure (state capital)
(669.122)	Abuja Federal Capital Territory. □ Abuja (national capital)	(669.188)	Osun. □ Oshogbo (state capital)
(669.124)	Nassarawa. □ Lafia (state capital)	(669.192)	Ekiti. □ Ado-Ekiti (state capital)
(669.126)	Kaduna. □ Kaduna (state capital). Zaria	(669.194)	Kwara. □ Ilorin (state capital)
(669.128)	Katsina. □ Katsina (state capital)	(669.196)	Oyo. □ Ibadan (state capital)
(669.132)	Jigawa. □ Dutse (state capital)	(669.198)	Ogun. □ Abeokuta (state capital)
(669.134)	Kano. □ Kano (state capital)	(669.199)	Lagos (state). □ Ikeja (state capital). Lagos (city)
(669.136)	Plateau. □ Jos (state capital)	(669.95)	SÃO TOMÉ E PRÍNCIPE. DEMOCRATIC REPUBLIC OF SÃO TOMÉ AND PRÍNCIPE
(669.138)	Bauchi. □ Bauchi (state capital)	(669.951)	Ilha de São Tomé
(669.142)	Gombe. □ Gombe (state capital)	(669.952)	Ilha do Príncipe
(669.144)	Yobe. □ Damaturu (state capital)	(669.953)	São João Baptista de Ajudá
(669.146)	Borno. □ Maiduguri (state capital)	(67)	EQUATORIAL, CENTRAL AND EASTERN AFRICAN STATES AND TERRITORIES
		(671.1)	CAMEROON. REPUBLIC OF CAMEROON. RÉPUBLIQUE DU CAMEROUN <i>Cameroon gained independence from France in 1960 and the following year Southern Cameroons was united with it. Northern Cameroons later joined Nigeria. Cameroon is divided into 10 provinces which are subdivided into departments. These are further subdivided into arrondissements and then into districts. The departments in Nord-Ouest and Sud-Ouest provinces, which used to be part of the British mandate, are sometimes called 'divisions'</i>
		(671.11)	Francophone provinces
		(671.111)	Extrême Nord (province). □ Diamaré (department), Maroua (provincial and department capital). Logone-et-Chari (department), Kousséri (department capital). 		(674)	INNER AFRICAN (CENTRAL AFRICAN) TERRITORIES
		(674.1)	CENTRAL AFRICAN REPUBLIC <i>The Central African Republic was formerly known as Ubangi-Shari when it was one of the overseas divisions of French Equatorial Africa. Officially proclaimed the Central African Republic in 1958, from 1975-1979 it was renamed Central African Empire. The name Central African Republic was restored in 1979. The Central African Republic is divided into prefectures, except for Bangui which is an autonomous commune and Nana-Grébizi and Sangha-Mbaéré which are economic prefectures. The prefectures are further subdivided into sub-prefectures, 2002 totalling 71</i>

(1/9) Table 1e. Common auxiliaries of place

(674.11)	Western prefectures				<i>annexed by Libya. The area generally known as the Aozou (Aouzou) Strip was awarded to Chad by the International Court of Justice in 1993 and Libya withdrew its troops in 1994. The administrative divisions of Chad were completely re-organized in 1999 into departments which are subdivided into sub-prefectures. Except where noted, the capitals of the subprefectures are the same as the subprefecture. There is one exception N'Djaména which is a commune, subdivided into arrondissements</i>
(674.111)	Ouham-Pendé (prefecture), Bozoum (subprefecture and prefecture capital). □ Bocaranga, Kouï, Ngaoundaye, Paoua (subprefectures)				
(674.112)	Nana-Mambéré (Bouar-Baboua, Bouar-Baboua, Nana Mambéré) (prefecture), Bouar (subprefecture and prefecture capital). □ Abba, Baboua, Baoro (subprefectures)				
(674.113)	Mambéré-Kadéï (Haute-Sangha, Mambéré Kadéï) (prefecture), Berbérati (subprefecture and prefecture capital). □ Amada-Gaza, Carnot, Dédé-Mokouba, Gadzi, Gamboula, Sosso-Nakombo (subprefectures)	(674.31)			Northern departments
(674.114)	Sangha-Mbaéré (Sangha, Sangha-Économique, Sangha-M'Baéré) (economic prefecture), Nola (subprefecture and prefecture capital). □ Bambio, Bayanga (subprefectures)	(674.311)			(Bourkou-Ennedi-Tibesti, B.E.T.)
(674.115)	Lobaye (prefecture), Mbaïki (subprefecture and prefecture capital). □ Boda, Boganangone, Boganda, Mongoumba (subprefectures)	(674.313)			Tibesti (department), Bardaï (subprefecture and department capital). □ Aouzou, Zouar (subprefectures)
(674.116)	Ombella-M'Poko (Ombella-Mpoko, Ombelle Mpoko) (prefecture), Bimbo (subprefecture and prefecture capital). □ Boali, Bogangolo, Bossembélé, Damara, Yaloké (subprefectures)	(674.315)			Borkou (department), Faya-Largeau (subprefecture and department capital). □ Bourkou Yala (subprefecture), Kirdimi (subprefecture capital). Kouba Olanga (subprefecture)
(674.117)	Bangui (state capital and autonomous commune)				Ennedi (department), Fada (subprefecture and department capital). □ Gouro, Kalait (subprefectures). Ouadi Hawar (subprefecture), Bahaï (subprefecture capital). Ounianga Kébir (subprefecture)
(674.118)	Ouham (prefecture), Bossangoa (subprefecture and prefecture capital). □ Batangafo, Bouca, Kabo, Nana-Bakassa, Nanga-Boguila (subprefectures)	(674.33)			Central departments
(674.13)	Central prefectures	(674.331)			Kanem (department), Mao (subprefecture and department capital). □ Mondo, Nokou, Rig-Rig (subprefectures)
(674.131)	Nana-Grébizi (Gribingui, Gribingui-Économique, Ibingui, Nana Gribizi) (economic prefecture), Kaga Bondoro (subprefecture and prefecture capital). □ Mbrès (subprefecture)	(674.332)			Bar el Gazal (department), Moussoro (subprefecture and department capital).
(674.133)	Kémo (Kémo-Gribingui, Kémo-Ibingui) (prefecture), Sibut (subprefecture and prefecture capital). □ Dekoa, Mala, Ndkoukou (subprefectures)	(674.333)			□ Michémire, Salal (subprefectures)
(674.135)	Ouaka (prefecture), Bambari (subprefecture and prefecture capital). □ Bakala, Grimari, Ippy, Kouango, Markounda (subprefectures)	(674.334)			Batha Ouest (department), Ati (subprefecture and department capital). □ Djédaa (subprefecture). Fitri (subprefecture), Yao (subprefecture capital). Haraze Djombo Kibit, Koundjourou (subprefectures)
(674.137)	Bamingui-Bangoran (N'Dele, Ndélé) (prefecture), Ndélé (subprefecture and prefecture capital). □ Bamingui (subprefecture)	(674.335)			Batha Est (department), Oum Hadjer (subprefecture and department capital).
(674.15)	Eastern prefectures	(674.336)			□ Assinet, Oum Hadjer (subprefectures)
(674.151)	Vakaga (prefecture), Birao (subprefecture and prefecture capital). □ Ouanda Djallé (subprefecture)	(674.337)			Biltine (department, subprefecture and department capital). □ Am Zoer, Arada, Guéréda, Iriba (subprefectures)
(674.153)	Haute-Kotto (prefecture), Bria (subprefecture and prefecture capital). □ Ouadda, Yalinga (subprefectures)	(674.338)			Ouaddaï (department), Abéché (subprefecture and department capital). □ Abdi, Abougoudam, Am Dam, Chokoyan (subprefectures)
(674.155)	Basse-Kotto (prefecture), Mobaye (subprefecture and prefecture capital). □ Alindao, Kembé, Mingala, Satema, Zangba (subprefectures)	(674.339)			Assongha (department), Adré (subprefecture and department capital). □ Hadjer Hadid, Mabrone (subprefectures)
(674.157)	Mbomou (M'Bomou) (prefecture), Bangassou (subprefecture and prefecture capital). □ Bakouma, Gambo, Ouango, Rafan (subprefectures)	(674.340)			Sila (department), Goz Beïda (subprefecture and department capital). □ Adé, Koukou Angarana, Tissi (subprefectures)
(674.158)	Haut-Mbomou (Haut-M'bomou, Obo-Zemio) (prefecture), Obo (subprefecture and prefecture capital). □ Bambouti, Djemah, Zemio (subprefectures)	(674.35)			Southern departments
(674.3)	CHAD. REPUBLIC OF CHAD. RÉPUBLIQUE DU TCHAD <i>Chad gained full independence from France in 1960. In the mid 1970s a strip of territory along the Norther border of Chad was</i>	(674.351)			Salamat (department), Am Timan (department capital). □ Abou Deïa, Am Timan. Harazé (subprefectures)
		(674.352)			Guéra (department), Mongo (subprefecture and department capital). □ Bitkine, Mangalmé, Melfi (subprefectures)
		(674.353)			Lac Iro (department), Kyabé (subprefecture and department capital). □ Bohobé, Boum Kebir, Kyabé (subprefectures)
		(674.354)			Barh Kôh (department), Sarh (subprefecture and department capital). □ Dembo, Korbol, Maro (subprefectures)
		(674.355)			Mandoul (department), Koumra (subprefecture and department capital). □ Béjondo, Bouna, Goundi, Moïssala (subprefectures)

(674.356)	Logone Oriental (department), Doba (subprefecture and department capital). □ Bébedjia. Béboto. Bodo, Goré (subprefectures)		<i>the Katanga province was called Shaba and Haut and Bas Congo were Haut- and Bas-Zaïre respectively. The names of major cities have been provided with their colonial forms in brackets to assist reference</i>
(674.357)	Monts de Lam (department), Baïbokoum (subprefecture and department capital). □ Baïkoro. Bessao, Larmanaye (subprefectures)	(675.1)	Northern provinces
(674.358)	Tandjilé Est (department), Laï (subprefecture and department capital). □ Déressia (subprefecture). Dono Manga (subprefecture), Guidari (subprefecture capital)	(675.11)	Equateur (province), Mbandaka (Coquilhatville) (administrative zone and provincial capital). □ Basankusu, Befale, Bikoro, Boende, Bokungu, Bolomba, Bomongo, Bongandan, Bosobolo, Budjala, Bumba, Businga, Djolu, Gemena, Ikela, Ingende, Kungu, Libenge, Lisala, Lukolelave, Makanza, Mobayi-Mbongo, Monkot, Nzulu, Wangata, Wango, Yakoma (administrative zones)
(674.359)	Tandjilé Ouest (department), Kélo (subprefecture and department capital). □ Béré, Dafra (subprefectures)		Haut-Congo (province), Kisangani (Stanleyville) (administrative zone and provincial capital). □ Aketi, Ango, Aru, Bafwasende, Bambesa, Banalia, Basoko, Bondo, Buta, Djugu, Dungu, Faradje, Irumu, Isangi, Kabondo, Kisangani, Lubunga, Mahagi, Makiso, Mambasa, Mangobo, Niangara, Opala, Poko, Rungu, Tshopo, Ubundu, Wamba, Watsa, Yahuma (administrative zones)
(674.37)	Western departments		<i>There are two places called Basoko in the Democratic Republic of Congo, at (677.13) and (677.31); and two places called Kabondo, at (677.13) and (677.33)</i>
(674.371)	Lac (department), Bol (subprefecture and department capital). □ Baga Sola, Doum-Doum (subprefectures). Liwa (subprefecture), Guim (subprefecture capital), Ngouri (subprefecture)	(675.13)	Nord-Kivu (province), Goma (administrative zone and provincial capital). □ Beni, Lubero, Masisi, Rutshuru, Walikale (administrative zones)
(674.372)	Hadjer Lamis (department), Massaguet (subprefecture and department capital). □ Karal, Linia, Mandéla, Mani, Massakory (subprefectures)		Southern provinces
(674.373)	N'Djaména (Nyamena, Yamena) (state capital and commune)		Bandundu (Banningville) (province and provincial capital). □ Bagata, Basoko, Bolobo, Bulungu, Disasa, Feshi, Gungu, Idiofa, Inongo, Kahemba, Kasongo-Lunda, Kazamba, Kenge, Kiri, Kutu, Lukeni, Lukolela, Masi-Manimba, Mayoyo, Mushie, Nzinda, Oshwe, Popokabak (administrative zones)
(674.374)	Dababa (department), Bokoro (subprefecture and department capital). □ Doba, Gama, Moïto (subprefectures)	(675.15)	<i>There are two places called Basoko in the Democratic Republic of Congo, at (677.13) and (677.31)</i>
(674.375)	Baguirmi (department), Massénya Adré (subprefecture and department capital). □ Bousso, Dourbali (subprefectures)	(675.3)	Kinshasa (Leopoldville) (state capital). □ Bandalung, Barumbu, Bumbu, Gombe, Kalamu, Kasa-Vubu, Kimbanseke, Kintambo, Kisenso, Lemba, Limete, Lingwala, Makala, Maluku, Masina, Matete, Mont-Ngafu, Ndjili, Ngaba, Ngaliema, Ngiri-Ngiri, Nsele, Selembao (administrative zones)
(674.376)	Mayo Boneye (department), Bongor (subprefecture and department capital). □ Guélandeng, Kim (subprefectures). Rigaza (subprefecture), Biliam Oursi (subprefecture capital)	(675.31)	<i>There are two places called Kalamu in the Democratic Republic of Congo, at (677.32) and (677.33)</i>
(674.377)	Kabia (department), Gounou Gaya (subprefecture and department capital). □ Binder, Fianga (subprefectures)		Bas-Congo (province), Matadi (administrative zone and provincial capital). □ Kabondo, Kalamu, Kasangulu, Kimvula, Lukula, Luozi, Madimba, Mbanza-Ngungu, Moanda, Mvuzi, Nzadi, Nzanza, Seke-Banza, Songololo, Tshela (administrative zones)
(674.378)	Mayo-Dallah (Mayo Dala)(department), Pala (subprefecture and department capital). □ Gagai, Lagon, Léré (subprefectures)	(675.32)	<i>There are two places called Kabondo in the Democratic Republic of Congo, at (677.13) and (677.33); and two places called Kalamu, at (677.32) and (677.33)</i>
(674.379)	Logone Occidental (department), Moundou (subprefecture and department capital). □ Beinamar (subprefecture). Krim-Krim (subprefecture), Bao (subprefecture capital)		Kasai-Occidental (province), Kananga (Luluabourg) (administrative zone and provincial capital). □ Dekese, Demba, Dibaya, Dimbelenge, Ilebo, Katoka, Kazumba, Luebo, Luiza, Lukonga, Mweka, Ndesha, Nganza, Tshikapa (administrative zones)
(675)	DEMOCRATIC REPUBLIC OF CONGO <i>Formerly the colony of Belgian Congo. From 1926 to 1960. The Belgian mandate (late Trust Territory) of Ruanda-Urundi (now Rwanda) was also affiliated to the colony. It became independent in 1960, becoming Republic of the Congo. In July 1960 the southern province of Katanga seceded, and in August the mining State of South Kasai also proclaimed its independence. In early 1963 both were again incorporated into the Congo state. In 1964 the country's name became Democratic Republic of the Congo and in 1971 Republic of Zaïre was adopted as the official name of the state. In 1997 it changed back to the Democratic Republic of Congo; Congo is divided into eleven regions, or provinces, including the city of Kinshasa. The regions are divided into sub-regions which are divided into administrative zones, which are further subdivided into collectivities. Each collectivity contains groupings which in turn contain numerous villages. From 1972-1997</i>	(675.33)	Kasai-Oriental (province), Mbuji-Mayi (Bakwanga) (provincial capital). □ Bipemba, Dibindi, Diulu, Kabeya-Kamwanga, Kabinda,

(1/9) Table 1e. Common auxiliaries of place

	Kamiji, Kanshi, Katoko-Kombe, Katanda, Kole, Lodja, Lomela, Lubao, Lubefu, Lupatapata, Lusambo, Miabi, Muya, Mwene-Ditu, Ngandajika, Tshilenge (administrative zones)	(675.973.6)	Bujumbura Rural. □ Isale, Kabezi, Kanyosha, Mugongomanga, Muhuta, Mukiki, Mutambu, Mutimbuzi (communes)
(675.36)	Maniema (province), Kindu (administrative zone and provincial capital). □ Kabambare, Kasongo, Kibombo, Lubutu, Oangi, Punia (administrative zones)	(675.973.7)	Bururi. □ Burambi, Buyengero, Matana, Mubimbi, Mugamba, Rutovu Rumonge, Songa, Vyanda (communes)
(675.37)	Sud-Kivu (province), Bukavu (Cotermansville) (provincial capital). □ Bagira, Fizi, Ibanda, Ile Idjwi, Kabare, Kadutu, Kalehe, Mwenga, Shabunda, Uvira, Walungu (administrative zones)	(675.973.8)	Rutana. □ Bukemba, Gihao, Gitanga, Mpinga, Musongati (communes)
(675.38)	Katanga (province), Lubumbashi (+Isabethville) (provincial capital). □ Annexe, Bukama, Dilala, Dilolo, Kabalo, Kabongo, Kalemie, Kamalondo, Kambove, Kamina, Kampemba, Kaniama, Kapanga, Kasenga, Katuba, Kenya, Kikula, Kipushi, Kongolo, Likasi, Lubudi, Lubumbashi, Malemba Nkulu, Manika, Manono, Mitwaba, Moba, Mutshatsh, Nyunzu, Panda, Pweto, Ruashi, Sakanina, Sandoa, Tshituru (administrative zones)	(675.973.9)	Makamba. □ Kayogoro, Kibago, Mabanda, Nyanza-Lac, Vugizo (communes)
		(675.98)	RWANDA. REPUBLIC OF RWANDA <i>Rwanda was formerly the Northern division (Ruanda) of the Belgian administered Trust territory of Ruanda-Urundi. It achieved independence in 1962 and became the Republic of Rwanda. Rwanda is divided into 12 provinces which are further divided into districts and municipalities. The provincial capitals have the same name as their provinces and are municipalities</i>
(675.97)	BURUNDI. REPUBLIC OF BURUNDI <i>Burundi was formerly the southern division (Urundi) of the Belgian administered Trust Territory of Ruanda-Urundi. It became independent as the Kingdom of Burundi in 1960, and following the deposition of the monarch in 1966 it became the Republic of Burundi. Burundi is divided into provinces, and the capitals have the same name as the province. The regions are subdivided into 114 districts and the districts are divided into communes</i>	(675.981)	Western provinces
		(675.981.1)	Ruhengeri. □ Bugarura, Buhoma, Bukamba, Bukonya, Kinigi, Mutobo, Nyamugali, Nyarutovu (districts)

(94)	AUSTRALIA. COMMONWEALTH OF AUSTRALIA <i>The subdivision of Australia has been compiled using the Statistical Divisions of the 1991 Census. Each state is divided into the headings corresponding to these, with the exception of the category 'Offshore islands and migratory' used in every state, but not considered helpful for the present purpose, since many areas in this category have a moving, aboriginal population and are not settlements or towns. Islands that are inhabited have been listed under the appropriate Division of each State and the remainder are at (948). Major towns in each state have been listed, and all cities with a population of over 10,000 are included. The decision of what constitutes a major town, however, varies from state to state, since many in the South East of the continent are considerably larger than those of Western Australia or Northern Territory, for example</i>	(942.95)	Class here <i>Central Australia</i> (a term still in general use but of specific administrative meaning only between 1926 and 1931; today the term 'Central Australia' usually refers to Alice Springs and an area of about 700 km radius around it - generally a major tourist destination)

(=...) TABLE 1f. COMMON AUXILIARIES OF RACE, ETHNIC GROUPING AND NATIONALITY

SCOPE. The concept of race is difficult to define and a sensitive subject, but the distinctive physical types of human are a fact, and important in (e.g.) medicine. Where race is defined by genetically determined physical characteristics, three races are commonly recognized - in alphabetical order, Caucasian, Mongoloid and Negroid. A fourth, Australoid, is recognized in some sources. In UDC, the system of dividing the ethnic auxiliaries like the language auxiliaries is useful for cultural-linguistic groupings ('Anglo-Saxon', Hispanic etc.), but is a clumsy way of denoting physically defined races, involving cumbersome range numbers such as (=11/=19) for caucasoids and (=415/=5) for negroids - while (=512.3) for mongoloids is positively misleading, since notationally it appears to exclude (=521) Japanese-speaking and (=581) Chinese-speaking peoples. The four races recognized in MeSH (Medical Subject Headings) are now enumerate at (=011/=014) and the derived numbers in (=11/=8) are clearly limited in linguistic-cultural concepts.

The common auxiliaries of ethnic grouping and nationality denote the nationality or ethnic aspects of a subject represented by a main UDC number, e.g.

398(=81/=82) North Amerindian (American Indian) folklore.

They are derived mainly from the common auxiliaries of language =... (Table 1c) and so may also usefully distinguish linguistic-cultural groups, e.g.

(=111) English speaking peoples (as opposed to the English).

Political nationality (citizenship of nation-states) may also be denoted, mainly by (=1:4/9) which derive from the common auxiliaries of place (4/9) (Table 1e), but it may be found that for some subjects the place auxiliaries themselves will often serve as well.

For ethnology as a main subject see 572.9

CITATION ORDER. In citation order, a common auxiliary of ethnic grouping or nationality normally follows a main UDC number; it may, however, be cited medially or even first in a compound number if there is a need to group together documents or references on particular ethnic groups or nationalities

⇒ 572.9

Systematic table

(=01)	Physically defined races	(=11/=8)	Linguistic-cultural groups, ethnic groups, peoples
(=011)	Caucasoid		(=11/=8) = =11/=8
(=012)	Mongoloid	(=11/=2)	Indo-European ethnic groups and peoples
(=013)	Negroid	(=11)	Germanic races and peoples
(=014)	Australoid	(=111)	English-speaking peoples
(=088)	Mixed race	(=112.2)	German-speaking peoples
(=1:1/9)	Peoples associated with particular places	(=13)	Romanic, 'Latin' races and peoples
	Denote details by colon combination with	(=133.1)	French-speaking, Gallic races and peoples
	place auxiliaries (Table 1e) and other ethnic	(=16)	Slavic (Slavonic) races and peoples
	auxiliaries from this table	(=2/=8)	Oriental, African and other ethnic groups and peoples
◇	(=1:100) Cosmopolitans		peoples
◇	(=1:2) Peoples of particular physiogeographic areas	(=21)	Indic races and peoples
◇	(=1:210.7) Islanders	(=214.58)	Romany peoples. Gipsies
◇	(=1:23) Mountain-dwellers	(=41)	Afro-Asiatic races and peoples
◇	(=1:24) Cave-dwellers. Troglodytes	(=411)	Semitic races and peoples
◇	(=1:253) Forest-dwellers. Jungle-dwellers	(=411.16)	Hebraic. Jews. Ethnically Jewish
◇	(=1:3) Particular nationalities of the ancient world	(=411.21)	See 26-051 for Jews by religion
◇	(=1:37) Ancient Romans	(=414/=45)	Arabic. Arabs. Arab
◇	(=1:4/9) Particular nationalities of the modern world		Various sub-Saharan African ethnic groups and peoples
◇	(=1:493) Belgians	(=521)	Japanese-speaking peoples. Ethnically Japanese people
◇	(=1:6=013) Black Africans	(=581)	Chinese-speaking peoples. Ethnically Chinese people
◇	(=1:73=013) Black Americans	(=62)	Austronesians
		(=622.82)	Polynesians
(=1-81)	Autochthonous (aboriginal) races and peoples	(=72)	Australian races and peoples. Australian aboriginal peoples
(=1-82)	Indigenes. Native, local-born inhabitants	(=81/=82)	North Amerindian (American Indian) peoples
	◇ (=1:72-82) Native Mexicans (Mexicans born in Mexico)	(=87)	Central and South Amerindian (American Indian) peoples

"..." TABLE 1g. COMMON AUXILIARIES OF TIME

SCOPE. The common auxiliaries of time denote the date, point of time or range of time of a subject represented by a main UDC number. They do not indicate the date of publication of a document, which is a cataloguing matter. The basis of date indication is the Christian calendar, but non-Christian systems of time reckoning are also allowed for (in "68" and "69"), as well as other time concepts, e.g. seasons and geologic time.

NOTATION. In calendar notation (see 'DATES' below), the point separates elements of different magnitudes (year-month-day). Otherwise, a point occurs after every third digit, as usual in UDC. Non-hierarchical numbering is introduced by the hash or asterisk, e.g. under "327" for months. Only arabic numerals are used, e.g. MM should be converted to "2000".

CITATION ORDER. The time auxiliary is normally cited after the main number, but since quotation marks are biterminal, they readily permit reversal of order or intercalation. E.g. 'Nineteenth-century chamber music' would normally be denoted by 785.7"18", but if a filing order giving higher priority to date is desired then 785"18"7, or even "18"785.7, is possible. Within the auxiliary itself, the time elements are cited in order of decreasing magnitude.

DATES. Dates are denoted by citing the ordinary calendar notation in the order year-month-day, enclosed in quotation marks, e.g.

"1898.12.11" 11 December 1898 CE.

The order of magnitudes (beginning with the greatest and ending with the least) corresponds to the principle of progression from general to special. In the interests of consistency, the year is always expressed as a four-digit number, and the month and day as two-digit numbers. The non-significant places are occupied by zeros, e.g.

"0435.08.04" 4 August 435 CE.

CHRISTIAN OR COMMON ERA AND PRE-CHRISTIAN ERAS. Dates BCE (Before Common era; also known as Before Christ/BC) and CE (Common era; also known as Anno Domini/AD) may be distinguished by prefixing the minus sign to dates BCE, e.g. "-0054" for 54 BCE, (and optionally the plus sign to dates CE, e.g. "+0043" for 43 CE). This method of distinction need only be used when references to both kinds of date are likely to occur.

"-" and "+" may be used without dates to denote the Before Common and Common era.

CENTURIES, DECADES. Centuries and decades may be denoted by 2 and 3 digits respectively, e.g.

"03" The 300s (loosely, the 4th century).

"19" The 1900s (loosely, the 20th century).

"192" The 1920s (1920-1929).

"200" The 2000s (first decade, i.e. 2000-2009).

RANGES OF TIME. Ranges of several centuries, decades or years may be denoted by the initial and final figures, using the slash or oblique stroke, e.g.

"04/14" The 5th to 15th centuries (the Middle Ages).

"1815/1830" The period from 1815 to 1830.

"625/627" Glacial and post-glacial periods.

When one of the limiting dates is undetermined, it is represented by three dots, e.g.

94(100)".../18" World history up to the (end of the) 19th century.

94(100)"19/..." World history from the (beginning of the) 20th century onwards.

SMALLER TIME DIVISIONS. If required, the exact hour, minute or second when an event occurred may be denoted, using two-digit notations separated by points, e.g.

"1898.12.07.15.46.03" 7 December 1898 at 15 hours, 46 minutes, 3 seconds

Systematic table

"-"	BCE (Before Christian era) (BC)
⇒ "679"	
"+"	CE (Christian era) (AD)

"0/2" DATES AND RANGES OF TIME (CE OR AD) IN CONVENTIONAL CHRISTIAN (GREGORIAN) RECKONING

Denote a millennium by 1 digit, a century by 2 digits, a decade by 3 digits and a year by 4 digits

"0"	FIRST MILLENNIUM CE	"000"	First decade of first century CE
"00"	First century CE	"0001"	First year. 1 CE

"368.7"	Recommended or prescribed times or periods	"378"	Time for daily routine, meals etc. (other than working time and leisure time)
"37"	Time of work activity, occupation, production, daily routine	"378.1"	Waking, rising, dressing time. Getting-up time ⇒ "344.2"
"372"	Working hours. Service hours. Time of occupation ⇒ 331.31	"378.3"	Time of morning meal. Breakfast time
"372.1"	Starting time. Opening time. Clocking-on (clocking-in) time	"378.5"	Time of midday meal. Lunchtime
"372.2"	Working hours. Business hours. Real working time. Productive hours	"378.7"	Time of evening meal. Dinner time. Supper time
"372.3"	Hours of opening to the public (of shops, administration etc.). Service hours. Trading hours	"378.9"	Bedtime
"372.4"	Time for leisure facilities, during working hours ⇒ "374.2" ⇒ "377.4"	"38"	Holidays. Festive and commemorative occasions
"372.5"	Finishing time. Closing time. End of working hours. Clocking-off (clocking-out) time	"382"	Religious holidays, festive and commemorative occasions <i>Prefer main numbers where available</i> ⇒ "69"
"372.6"	Full-time (e.g. working, occupation)	"383"	Public, national or regional holidays (other than religious) ◇ "383:321"(410) Spring public holiday ('Bank holiday') in Britain ◇ "383:327*07.04"(73) July 4th (Independence Day) in USA
"372.7"	Part-time (e.g. working, occupation)	"385"	Personal private holidays, vacation or leave time ◇ "385:322" Summer holiday (summer vacation) time
"372.8"	Divided time. Shared time	"387"	Festive and commemorative occasions (other than holidays) <i>When in doubt, prefer main numbers</i>
"373"	Time for maintenance, renovation, repair, household work	"388"	Personal anniversaries ◇ 392.5"388" Wedding anniversary
"373.2"	Renovation, alteration, inspection time	"4"	DURATION. TIME-SPAN. PERIOD. TERM. AGES AND AGE-GROUPS <i>The subdivisions of "4" denote all kinds of duration, including periods or ages in relation to activities, processes, events, things, persons, groups, institutions, nations etc. The elements in the number denote, following an asterisk, firstly, unit of time; secondly, duration in terms of that unit; and then, separated by points, successively smaller time-units (mostly two digits). The slash is used to denote time-spans or age ranges.</i>
"373.3"	Maintenance time		
"373.5"	Repair time		
"373.8"	Time for household work. Cleaning time		
"374"	Lost time. Wasted time. Idle periods ⇒ 331.316		
"374.2"	Break time. Rest periods during working hours. Meal breaks. Tea, coffee breaks etc. Time spent on personal needs ⇒ "372.4" ⇒ "377" ⇒ "378" ⇒ 331.313.4		
"374.3"	Time spent on travel, transport, to and from workplace. Travelling time ⇒ 331.315		
"374.4"	Time lost through internal factors at workplace		
"374.5"	Time lost through external factors. □ Through weather, natural disasters, acts of war		
"374.6"	Time lost through illness, injury, accidents. Sick leave ⇒ 331.316.2		

"..." Table 1g. Common auxiliaries of time

	For properties related to temporal values see -022.3.	"430"	Duration of 1 to less than 10 weeks
	For human age-groups, prefer -053		◇ "430*1" Duration of 1 week
	◇ "414*03.14.46.012" Duration of 3 hours, 14 minutes, 46 seconds, 12 milliseconds	"431"	◇ "430*2" Duration of 2 weeks. Fortnights
	◇ "440*8" Period of 8 months		Duration of 10 to less than 100 weeks
	◇ "451*12.06" Period of 12 years, 6 months	"432"	◇ "431*40" Duration of 40 weeks
	◇ "463*07" Seven weeks old		Duration of 100 to less than 1000 weeks
	◇ "465*13/19" Age range 13 to 19 years	"433"	◇ "432*105" Duration of 105 weeks
	⇒ -053.6	"437"	Duration of 1000 or more weeks
"40"	Relative duration, period, term		The working week. The week conventionally defined in terms of occupied hours
"401"	Life or lifetime with definite term or deadline.		◇ "437.5" 5-day week
	Period of durability	"44"	◇ "437.7" 7-day week
	⇒ -027.45	"440"	Duration expressed in months
"401.3"	Economic life. Durability from economic point of view		Duration of 1 to less than 10 months
"401.4"	Useful life. Operating life. Durability in relation to use		◇ "440*1" Duration of 1 month
	⇒ 620.193.95		◇ "440*3" Duration of 3 months. Quarters (quarter years). Trimesters
"401.7"	Lifetime duration. For life. During one's lifetime		◇ "440*4" Duration of 4 months
	⇒ "408"		◇ "440*6" Duration of 6 months. Half years. Semesters
"403"	Short duration. Short-term	"441"	Duration of 10 to less than 100 months
"404"	Medium duration. Medium-term		◇ "441*33" Duration of 33 months
"405"	Long duration. Long-term	"442"	Duration of 100 to less than 1000 months
"408"	Indefinite, unlimited duration. Without specific term or deadline		◇ "442*120" Duration of 120 months
"409"	Definite duration. With specific term or deadline	"45"	Duration expressed in years, centuries, millenniums, etc.
"41"	Duration up to one day		"45..." corresponds broadly to "42..."
"411"	Duration in fractions of a second (of periods less than a second)		⇒ "0/2"
			⇒ "67"
"411.001/.009"	Duration expressed in milliseconds (of periods less than 1/100 of a second)	"450"	Duration of 1 to less than 10 years
"411.01/.09"	Duration expressed in centiseconds (of periods less than 1/10 of a second)		◇ "450*1" Duration of 1 year
"411.1/.9"	Duration expressed in deciseconds (of periods less than 1 second)		◇ "450*3" Duration of 3 years. Trienniums
"412"	Duration expressed in seconds (of periods less than 1 minute)		◇ "450*4" Duration of 4 years. Quadrenniums, e.g. Olympiads
	◇ "412*46" Duration of 46 seconds	"451"	◇ "450*5" Duration of 5 years. Quinquenniums
	◇ "412*46.012" Duration of 46 seconds, 12 milliseconds		Duration of 10 to less than 100 years
"413"	Duration expressed in minutes (of periods less than 1 hour)		◇ "451*10" Duration of 10 years. Decenniums. Decades
	◇ "413*14" Duration of 14 minutes		◇ "451*12.06" Duration of 12 years, 6 months (12.5 years)
	◇ "413*14.46.012" Duration of 14 minutes, 46 seconds, 12 milliseconds	"452"	◇ "451*35" Duration of 35 years (3.5 decades)
"414"	Duration expressed in hours		◇ "451*99" Duration of 99 years
	◇ "414*03" Duration of 3 hours		Duration in centuries (or 3-figure periods of years)
	◇ "414*03.14.46.012" Duration of 3 hours, 14 minutes, 46 seconds, 12 milliseconds	"453"	◇ "452*2" Duration of 2 centuries
"42"	Duration expressed in days		◇ "452*2.50" Duration of 250 years (2.5 centuries)
"420"	Duration of 1 to less than 10 days		◇ "452*9" Duration of 9 centuries
	◇ "420*1" Duration of 1 day		Duration in millenniums
	◇ "420*3" Duration of 3 days		◇ "453*1" Duration of 1 millennium (1000 years)
	◇ "420*3.12" Duration of 3 days, 12 hours	"454"	◇ "453*2.25" Duration of 2.25 millenniums (2250 years)
	◇ "420*9" Duration of 9 days	"455"	Duration in tens of thousands of years
"421"	Duration of 10 to less than 100 days	"456"	Duration in hundreds of thousands of years
	◇ "421*12" Duration of 12 days		Duration in millions of years
	◇ "421*40" Duration of 40 days		⇒ "67"
"422"	Duration of 100 to less than 1000 days	"46"	Ages and age groups of persons, animate and inanimate things
	◇ "422*280" Duration of 280 days		⇒ "712"
"423"	Duration of 1000 or more days	"461/464"	Age expressed in hours and fractions of hours, days, weeks, months
	⇒ "44"		"461/464" ≡ "41/44"
	⇒ "45"		Age of up to one day
"427"	The working day. The day conventionally defined in terms of occupied hours	"461"	◇ "461.4*03.15" Age of 3 hours, 15 minutes
	◇ "427.08" 8-hour day	"462"	Age in days
	◇ "427.12" 12-hour day		◇ "462.1*11" Age of 11 days. 11 days old
	⇒ "37"	"463"	Age in weeks
"43"	Duration expressed in weeks		◇ "463.0*5" Age of 5 weeks. 5 weeks old

"464"	Age in months ◇ "464.1*10" Age of 10 months. 10 months old	"521"	At intervals of 10 to less than 100 days ◇ "521*12" Every 12 days
"465"	Age expressed in years and decades ◇ "465*02.06" Age of 2 years, 6 months (2.5 years old) ◇ "465*06/11" Age group 6 to 11 years ◇ "465*06" Age of 6 years. 6 years old ◇ "465*13/19" Age group 13 to 19 years. Teenagers ⇒ -053.6 ◇ "465*9" Age of 90 years or more. Nonagenarians	"522"	At intervals of 100 to less than 1000 days ◇ "522*280" Every 280 days
"467"	Age expressed in centuries (to less than 1000 years) ◇ "467*1" Age range 100 to 199 years ◇ "467*110" Age of 110 years. 110 years old ◇ "467*8" Age of 800 years. 8 centuries old	"523"	At intervals of 1000 or more days
"468"	Age expressed in millennia (to less than 10 000 years) ◇ "468*1" Age of 1 millennium (1000 years). 1000 years old ⇒ "679"	"53"	Recurring at intervals of 1 week or more (expressed in weeks) <i>Details by colon combination with "3..."</i> ◇ "53:329" Recurring on a particular day of the week
"469"	Age expressed in larger time units, e.g. millions of years ⇒ "62" ⇒ "67"	"530"	At intervals of 1 to less than 10 weeks ◇ "530*1" Once per week. Weekly ◇ "530*2" Every 2 weeks. Fortnightly
"5"	PERIODICITY. FREQUENCY. RECURRENCE AT SPECIFIED INTERVALS	"531"	At intervals of 10 to less than 100 weeks ◇ "531*40" Every 40 weeks
"51"	Recurring at intervals of less than a day. More frequent than daily	"532"	At intervals of 100 to less than 1000 weeks
"511"	More frequent than once per second ◇ "511*001" Once per millisecond ◇ "511*25" Every 0.25 of a second (25 centiseconds). 4 times per second ◇ "511*5" Every 0.5 of a second (5 deciseconds). Twice per second	"533"	At intervals of 1000 or more weeks
"512"	At intervals of 1 second or more (to less than 1 minute) ◇ "512*01" Once per second. Every second ◇ "512*05" Every 5 seconds. 12 times per minute ◇ "512*12" Every 12 seconds. 5 times per minute ◇ "512*30" Every 30 seconds (half-minute). Twice per minute	"54"	Recurring at intervals of 1 month or more (expressed in months) <i>Details by colon combination with "3..."</i> ◇ "54:328" Recurring in a particular week of the month ◇ "54:329" Recurring on a particular day of the month
"513"	At intervals of 1 minute or more (to less than 1 hour) ◇ "513*02" Every 2 minutes ◇ "513*15" Every 15 minutes. Quarter-hourly. 4 times per hour ◇ "513*30" Every 30 minutes. Half-hourly. Twice per hour	"540"	At intervals of 1 to less than 10 months ◇ "540*1" Once per month. Monthly ◇ "540*2" Every 2 months ◇ "540*3" Every 3 months. Quarterly. Trimestrial ◇ "540*6" Every 6 months. Half-yearly. Semiannual
"514"	At intervals of 1 hour or more (to less than 1 day) ◇ "514*01" Once per hour. Hourly ◇ "514*03" Every 3 hours. 8 times per day ◇ "514*12" Every 12 hours. Twice per day	"541"	At intervals of 10 to less than 100 months ◇ "541*18" Every 18 months
"52"	Recurring at intervals of 1 day or more (expressed in days) <i>Details by colon combination with "3..."</i> ◇ "52:344" Recurring during daylight hours ◇ "52:345" Recurring during hours of darkness ◇ "52:347" Recurring at specific times of day	"542"	At intervals of 100 to less than 1000 months
"520"	At intervals of 1 to less than 10 days ◇ "520*1" Once per day. Daily ◇ "520*2" Every 2 days. Every other day ◇ "520*3" Every 3 days. Twice per week ◇ "520*9" Every 9 days	"543"	At intervals of 1000 or more months
		"55"	Recurring at intervals of 1 year or more (expressed in years, centuries, millennia) <i>Details by colon combination with "3..."</i> ◇ "55:327" Recurring in a particular month of the year ◇ "55:329" Recurring on a particular day of the year
		"550"	At intervals of 1 to less than 10 years ◇ "550*1" Once per year. Yearly. Annual ◇ "550*2" Every 2 years. Biennial ◇ "550*3" Every 3 years. Triennial
		"551"	At intervals of 10 to less than 100 years ◇ "551*10" Every 10 years. Decennial
		"552"	At intervals of 100 to less than 1000 years ◇ "552*1" Once per century. Every 100 years. Centennial ◇ "552*2" Every 2 centuries. Bicentennial
		"553"	At intervals of 1000 or more years ◇ "553*1" Once per millennium. Every 1000 years. Millennial
		"554"	At intervals of tens of thousands of years
		"555"	At intervals of hundreds of thousands of years
		"556"	At intervals of millions of years
		"56"	Recurring every generation, lifetime etc. Life-cycle "56" = "46"
		"6"	GEOLOGICAL, ARCHAEOLOGICAL AND CULTURAL TIME DIVISIONS. □ Universal reckoning: YBP (Years Before Present), MYBP (Million Years Before Present). Other non-Christian (non-Gregorian) time reckonings

"..." Table 1g. Common auxiliaries of time

"61/62"	Geological (lithological/biological/palaeoecological) time division. □ Aeons (eons). Eras. Periods ⇒ 551.7	"654"	Modern times (Renaissance to contemporary 21st century times) ⇒ "15/20"
"611"	Precambrian (more than 600 MYBP)	"67/69"	Time reckonings: universal, secular, non-Christian religious
"611.1"	Archaean. Archaeozoic	"67"	Universal time reckoning. Before Present <i>IMPORTANT: The 3-digit subdivisions of "67" provide a forward chronological sequence, avoiding problems of filing dates in reverse order. However, they overlap other time auxiliaries in meaning, and must be used with discretion. If "672/678" are used for geological periods, then "61/63" may not be used. If "679" is used, then calendar notation may not be used. Fourth and subsequent digits may be added (after a point) to denote Years Before Present (YBP) or Million Years Before Present (MYBP), but be aware that this will enumerate dates in reverse chronological order</i>
"611.2"	Eozoic. Proterozoic. Algonkian		◇ "676.4" 4 MYBP
"613"	Palaeozoic (600-220 MYBP)		◇ "676.3" 3 MYBP
"613.1"	Cambrian (600-490 MYBP)	"672"	10 billion (10 thousand million) YBP or more. The Beginning. Time of initial explosion of the Universe
"613.2"	Ordovician (490-430 MYBP)	"673"	Less than 10 billion to 1 billion YBP (1000 MYBP). □ Time of origin of the Solar System to time of origin of Kiruna iron ore
"613.3"	Silurian (430-400 MYBP)	"674"	Less than 1 billion YBP (1000 MYBP) to 100 MYBP. □ Cambrian and Carboniferous periods
"613.4"	Devonian (400-350 MYBP)	"675"	Less than 100 MYBP to 10 MYBP. □ Beginning of Tertiary period
"613.5"	Carboniferous (350-270 MYBP)	"676"	Less than 10 MYBP. □ Approximate time of transition from animal to human. Time of Homo habilis
"613.6"	Permian (270-220 MYBP)	"677"	Less than 1 MYBP to 100 000 YBP. □ Time of Pithecanthropus. Time of Swanscombe Man
"615"	Mesozoic (220-70 MYBP)	"678"	Less than 100 000 to 10 000 YBP. □ Time of late Neanderthal Man, e.g. at Mount Carmel.
"615.1"	Triassic (220-180 MYBP)	"679"	Time of Cro-Magnon Man Less than 10 000 YBP <i>Alternatively, dates BC and CE may be denoted by "-9999/-0001" and "0/2" (calendar notation); use only one option or the other</i>
"615.2"	Jurassic (180-135 MYBP)		◇ "679.8" 8000 YBP
"615.3"	Cretaceous (135-70 MYBP)		◇ "679.1" 1000 YBP
"62"	Cenozoic (Cainozoic). Neozoic (70 MYBP - present)	"68"	Secular time reckonings other than universal and the Christian (Gregorian) calendar <i>Specify by (3/9) or (=...), with actual dates denoted by four-digit numbers</i>
"623"	Tertiary (70-1 MYBP)		◇ "68(37)" Dates in ancient Roman time reckoning 'Ab Urbe Condita'
"623.1"	Palaeogene (70-25 MYBP). □ Palaeocene. Eocene. Oligocene		◇ "68(37)0001" Supposed year of the foundation of Rome, 1 AUC, i.e. 753 BC
"623.5"	Neocene (25-1 MYBP). □ Miocene. Pliocene		◇ "68(37)0753" 753 AUC in the Roman reckoning, i.e. 1 CE
"624/627"	Pleistocene. Quaternary (1 MYBP - present)		◇ "68(=821.16)" Time reckoning of the Mayas
"624"	Preglacial. Calabrian. Villafranchian. Blancan		
"625"	Glacial/Interglacial/Interstadial cycle (G/I/IS). Ice ages	"69"	Dates and time units in non-Christian (non-Gregorian) religious time reckonings <i>Add other time auxiliaries to the subdivisions as required, and denote actual dates by four-digit numbers</i> "69" ≡ 21/26 "69" ≡ 28/29
"626"	Late Glacial. Late Pleistocene. Late Quaternary (14 000-10 300 YBP)		
"627"	Postglacial. Flandrian. Holocene (10 300 YBP - present)	"694"	Buddhist time reckoning "694" is derived from 24 ◇ "694:327.02" Second month of the Buddhist year
"63"	Archaeological, prehistoric, protohistoric periods and ages <i>Details by (292...) for regions, (3/9) for countries</i> ⇒ 7.031.1		
"631/634"	Stone Age		
"631"	Eolithic period		
"632"	Palaeolithic period		
"632.2"	Lower Palaeolithic		
"632.3"	Middle Palaeolithic		
"632.5"	Upper Palaeolithic		
"632.8"	Epi-Palaeolithic		
"633"	Mesolithic period		
"634"	Neolithic period		
"634.2"	Pre-pottery Neolithic		
"634.3"	Early Neolithic		
"634.5"	Middle Neolithic		
"634.7"	Late Neolithic		
"636/637"	Copper and Bronze Ages		
"636"	Chalcolithic. Copper Age		
"637"	Bronze Age		
"637.3"	Early Bronze Age		
"637.5"	Middle Bronze Age		
"637.7"	Late Bronze Age		
"638"	Iron Age		
"638.3"	Early Iron Age		
"638.5"	Middle Iron Age		
"638.7"	Late Iron Age		
"639"	Protohistoric period (earliest historic period). Period of first written records (of uncertain date) <i>For later periods and records with ascertainable dates, use "-..."</i>		
"65"	Periods of civilizations and cultures <i>For specified periods by date use "-...", "0/2"</i>		
"652"	Ancient times (historic). Antiquity. □ Oriental antiquity. Classical antiquity		
"653"	Mediaeval times. Middle ages ⇒ "04/14"		

"696"	Jewish religious time reckoning "696" is derived from 26 ◇ "696:550*1" Once every Jewish year	"712.4"	Early period. Time of immaturity, youth, growth ⇒ -027.14 ⇒ -044.88 ⇒ 7.03'01
"698"	Islamic time reckoning "698" is derived from 28 ◇ "698*0001" Year of the Hejira (flight of Mohammed from Mecca to Medina), i.e. 622 CE ◇ "698:327*09" Ramadan, ninth month of the Islamic year	"712.7"	Period of flowering, flourishing. Peak. Heyday. Prime. Zenith. Maturity ⇒ 005.414 ⇒ 159.922.62 ⇒ 7.03'02'04
"7"	PHENOMENA IN TIME. PHENOMENOLOGY OF TIME <i>The subdivisions of "7" overlap with some of the common auxiliaries of properties, -02... and processes, -04... Use "7..." only if there is clearly a chronological aspect</i>	"712.8"	Late period. Period of ripeness, fulfilment ⇒ 7.03'06
		"712.9"	Final period. Period of decline. Completion. End ⇒ -043.92/93 ⇒ -044.94 ⇒ -044.967 ⇒ 005.416
"71"	Evolution. Development. Progression ⇒ -027.1	"713"	Aftermath. Period of successors, epigones. Subsequent. Following. Post-... ⇒ -021.68
"711"	Time of precursors, forerunners. Time of preparation. Preceding. Before. Pre-... ⇒ -021.67 ⇒ -027.14	"714"	Transition period. Period of diffusion, dispersal, dissemination ⇒ -027.19
"712"	Period of existence ⇒ -021.121 ⇒ -021.142.5	"715"	Period of reactivation, revival, renaissance, renewal ⇒ -043.95 ⇒ -048.37/38 ⇒ 005.418
"712.3"	Beginnings. Earliest phase. Time of origin, generation, creation, infancy. Embryonic, incipient ⇒ -027.14 ⇒ -043.83	"78"	Indefiniteness of time. Indeterminate, uncertain in time. Random in time ⇒ -022.345.4

***, A/Z TABLE 1h. SUBJECT SPECIFICATION BY NOTATIONS FROM NON-UDC SOURCES**

0. GENERAL

Non-UDC notation and alphabetic extension may be used to increase the specificity of a UDC class mark. If they relate to a facet denoted by a biterminal auxiliary (see Tables 1a and 1b), they should be placed within the biterminal signs, but otherwise they should be placed outside the signs. In the example (492...) below, the asterisked component is part of the place facet - Netherlands place name codes - and is therefore inside the parentheses; in the example 625.711.1(4)*E4, it is not part of the place facet, but introduces a new characteristic - highway identifiers - and is therefore placed after the closing parenthesis. Similarly, in (492.83Utrecht), the alpha component is part of the place facet, whereas in 005.71-027.563(430)AEG it is not: it introduces a new characteristic - names of firms.*

1. THE ASTERISK *

A. *The asterisk * introduces a notation which is not an authorized UDC number.*

B. *The asterisk may follow a UDC number to introduce a word, symbol or number from a non-UDC source, which is added in order to specify a subject. For all such codings, the asterisk serves to mark their separation from the UDC numbers, e.g.*

(492*...) Netherlands: local subdivisions (4-figure code numbers from the Ned. PTT Plaatsnamencode).

523.44*433 Minor planet Eros (IAU authorized number).

546.42.027*90 Strontium 90 (atomic mass number of isotope).

625.711.1(4)*E4 Europa highway 4 (E4), in road engineering.

66-97*C150 Temperature of 150° Centigrade.

796.83*kg51 Flyweight (maximum 51 kg), in boxing.

Where the use of a non-UDC code following the asterisk is recommended, the source of the code is stated in a note.

C. *The asterisk may also be used to indicate an unauthorized, locally assigned notation, usually resembling a UDC number, for a concept which is missing in UDC.*

2. DIRECT ALPHABETICAL SPECIFICATION

For alphabetical specification by proper names (or their abbreviations) and acronyms, the letter notations may be added direct to the UDC base number, with no asterisk or blank space intervening. Such alphabetical specification of the auxiliaries of place (Table 1e) should be within the brackets. E.g.

(492.83UTR) City of Utrecht.

005.71-027.563(430)AEG Business firms - Germany - AEG (the former Allgemeine Elektrizitätsgesellschaft).

597.556.255HIP The sea-horse, in zoology.

821.133.1MOL Works of Molière, in literature.

929NAP1 Biography of Napoleon I (Bonaparte).

-0... TABLE 1k. COMMON AUXILIARIES OF GENERAL CHARACTERISTICS

Systematic table

-02 COMMON AUXILIARIES OF PROPERTIES

The -02 auxiliaries denote general properties or attributes of entities

The -02 auxiliaries are applicable throughout the main tables. The -02 auxiliaries are not to be used independently, or cited first in a compound notation. They are always suffixed to a main number or notation which expresses the subject to be qualified. Since there is some repetition of terms between the various auxiliary tables, care should be taken in selecting the appropriate application e.g. to distinguish between audio-visual as a property (audio-visual training methods classified as 377.44-028.26) and as a form (a training video classified as 377.44(086.8))

-021	Properties of existence	-021.331	Whole. Complete. Full. Entire. Comprehensive ⇒ -024.13
-021.111	True. False. Fallacious	-021.332	Partial. Incomplete ⇒ -024.14
-021.121	Real. Actual. Unreal	-021.333	Ideal. Perfect
-021.131	Virtual	-021.341	Open ⇒ -025.28
-021.141	Imaginary	-021.342	Closed ⇒ -025.31
-021.142	Capacity for existence	-021.351	Limited. Limits. Unlimited
-021.142.1	Non-existent	-021.352	Free ⇒ -027.5
-021.142.3	Potential	-021.353	Infinite
-021.142.5	Existent	-021.361	Integral. Intrinsic
-021.143	Incidence	-021.362	Included. Contained. Excluded <i>In the sense of membership of a set. For physical containment see -024.78</i>
-021.144	Occurrence	-021.363	Complementarity. Complementary
-021.146	Presence (or not)	-021.364	Reciprocal. Reciprocation
-021.146.2	Present. At hand. With	-021.37	Properties of regularity
-021.146.4	Absent. Lacking. Without	-021.371	Regular. Usual. Ordinary
-021.151	Possible. Impossible ⇒ -027.233	-021.372	Irregular. Unusual. Extraordinary
-021.161	Available. Unavailable. Extant <i>For defunct, obsolete see -027.17</i>	-021.381	Simple. Simplified. Unified
-021.163	Lost	-021.383	Complex
-021.167	Definite. Indefinite	-021.385	Compound. Composite ⇒ -025.26
-021.171	Fictional <i>'Fictional' is understood here in the broadest sense of imagined, non-existent. For literary fiction use colon combination at -029:</i> ◇ 343.12-05-029:82-3 Fictional detectives ⇒ -029:82-3	-021.387	Constant. Stable. Unchanging. Invariable ⇒ -022.322
-021.181	Fantasy	-021.388	Variability. Variety. □ Inconstant. Unstable.
-021.191	Misleading. Hoax. Spurious	-021.4	Variable. Changing. Fluctuating
-021.2	Properties of relation	-021.411	Properties of value, quality
-021.21	Absolute	-021.412	Nature. Purpose. Essence. Character
-021.22	Relative	-021.412.1	Significance. Meaning Significant. Important. Critical ⇒ -028.43
-021.23	Equality. Inequality	-021.412.2	Insignificant. Trivial
-021.24	Degrees of equivalence	-021.413	Relevant. Irrelevant
-021.242	Equivalence. Synonymy	-021.414	Value. Status
-021.244	Non-equivalence. Antonymy	-021.415	Correct. Incorrect
-021.25	Degrees of likeness	-021.416	Precise. Imprecise. Exact. Inexact. Accurate. Inaccurate
-021.252	Similarity. Resemblance. Partial equivalence. Alike	-021.42	Degree of normality
-021.254	Dissimilarity. Difference. Unlike	-021.421	Normal
-021.261	Congruity. Congruence	-021.423	Abnormal
-021.262	Coincidence. Coincident	-021.425	Paranormal
-021.263	Proportion. Proportional	-021.427	Subnormal
-021.271	Analogy	-021.431	Rational. Irrational
-021.272	Comparison. Comparable. Comparability	-021.432	Logical. Illogical
-021.273	Interchangeability	-021.433	Axiomatic. Non-axiomatic
-021.29	Compatible. Incompatible ⇒ -021.482	-021.434	Perceivable. Comprehensible. Incomprehensible
-021.3	Properties of range	-021.451	Obscure
-021.311	General. Universal ⇒ -027.511	-021.452	Hidden
-021.321	Special. Specific ⇒ -027.512	-021.453	Secret. Esoteric. Clandestine

-0... Table 1k. Common auxiliaries of general characteristics

-021.461	Conditional. Unconditional	-022.227	All. Comprehensive. Total
-021.462	Dependent. Independent	-022.231	Least. Minimum
-021.463	Interdependent	-022.233	Optimum
-021.464	Self-contained. Self-supporting. Self-sufficient	-022.235	Most. Maximum
-021.465	Quality	-022.241	Uniqueness
-021.466	Pure. Unadulterated	-022.251	Rare. Rarity
-021.467	Impure. Mixed	-022.252	Dearth. Shortage. Insufficient. Uncommon
-021.471	Good. Benign	-022.253	Adequate. Sufficient
-021.472	Neutral. Indifferent	-022.255	Abundant. Plenteous. Common
-021.473	Bad. Malignant. Malign	-022.257	Excess. Extreme. Excessive
-021.474	Pleasant. Unpleasant	-022.258	Acute. Chronic
-021.475	Degree of advantage	-022.3	Properties related to temporal values
-021.475.2	Advantageous. Advantages, benefits of ...		<i>Care should be taken in the use of this array; many of the terms are applicable in more than one context (spatial or causal, as well as temporal). If the purely temporal aspect is intended, Table 1g should be preferred</i>
-021.475.4	Disadvantageous. Disadvantages of		
-021.476	Difficulties with ...		
-021.476	Unwanted		Duration. Durable
-021.477	Superior. Better		⇒ "4"
	⇒ -024.71		⇒ -027.45
-021.478	Inferior. Worse	-022.312	Long-lasting
	⇒ -024.72		Sustained. Sustainable
-021.479	Best. Ideal. Luxury		Non-durable. Disposable
-021.481	Worst	-022.314	⇒ -027.34

-028.81	Radical		

-03 COMMON AUXILIARIES OF MATERIALS

SCOPE. The -03 auxiliaries denote the materials or constituents of which objects or products are made.

The main places for classing materials as such are in most cases the sections of 66 and 67 dealing with their manufacture or processing. Documents about materials in general, or all or many materials from a particular point of view (e.g. dangerous goods) are classed under 620.2, materials testing under 620.1, and chemical analysis under 543

USE. The -03 auxiliaries are applicable throughout the main tables (unless an exception is noted, e.g. at 613.2, 616-03) if the material aspect is secondary to the subject.

CITATION ORDER. The -03 auxiliaries are not to be used independently or cited first in a compound notation. They are always suffixed to a main number or notation which expresses the subject to be qualified.

COMPOSITE MATERIALS. Composite materials may be denoted by apostrophe combination, in which the apostrophe replaces -03 in the second and subsequent component numbers, e.g.

-036.674 Polyester resins.

-037.52 Artificial mineral fibres. Glass fibres. Ceramic fibres.

-036.674'752 Polyester and glass fibre

-032	Naturally occurring mineral materials	-032.32	Mineral oil. Petroleum
	⇒ -033	-032.34	Peat
	⇒ -034	-032.35	Coal, including lignite and anthracite
	⇒ -039.6	-032.36	Graphite
-032.1	Air. □ Air at atmospheric pressure.	-032.37	Bitumen (asphalt, pitch etc.)
	Compressed air. Rarefied air	-032.38	Fossil resins and copals
-032.2	Water (in any of its forms)	-032.386	Ozokerite
-032.23	Water vapour. Steam	-032.387	Amber
-032.24	Ice. Snow	-032.4	Ores. Metalliferous minerals
-032.25	Fresh water (liquid)	⇒ -034	
-032.26	Salt water. Brine	-032.41	Iron ores. Manganese ores. □ Haematite.
-032.27	Mineral waters (spring waters)		Manganite
	-032.27 ≡ 553.7	-032.42	Gold ores. Silver ores. □ Argentite
-032.3	Carbonaceous and hydrocarbon minerals	-032.43/49	Other ores (as materials)
-032.31	Natural gas		-032.43/49 ≡ 553.43/499

-032.5	Rock. Stone -032.5 $\equiv$ 553.5 $\Rightarrow$ -033.2	-034.7	Light metals. Light-metal alloys
-032.6	Earths. Nonmetalliferous minerals -032.6 $\equiv$ 553.6	-034.822	Uranium
-032.61	Earth (soil) in general. Clay etc. $\diamond$ -032.61/22 Earth and water. Mud. Adobe	-034.88	Alkali metals
-032.8	Precious stones. Semiprecious stones -032.81/.87 $\equiv$ 553.81/.87	-034.89	Alkaline-earth metals
-032.89	Other precious and semiprecious stones -032.89 $\equiv$ 549	-035	Materials of mainly organic origin $\Rightarrow$ -036 $\Rightarrow$ -037 $\Rightarrow$ -039.7
-033	Manufactured mineral-based materials	-035.2	Materials of plant (vegetable) origin <i>For wood use -035.3 and subdivisions</i>
-033.2	Hard-setting plasters, cements, compositions	-035.22	Grass. Herbage (fresh or dried). Turf
-033.21	Gypsum and anhydrite plasters. $\square$ Plaster of Paris	-035.23/.25	Specific crop materials and plant products -035.23/.25 $\equiv$ 633/635 $\diamond$ -035.237.1 Tobacco products, including nicotine
-033.22	Lime. Quicklime. Limewash. Fine stuff	-035.26	Stems. Twigs. Cane etc. $\square$ Hay. Bamboo -035.26 $\equiv$ 677.54
-033.24	Cement. $\square$ Portland cement. High-alumina cement -033.24 $\equiv$ 666.94	-035.27	Plant parts other than stems. $\square$ Foliage. Flowers. Juice -035.27 $\equiv$ 631.57
-033.25	Pozzolana and materials with similar effect -033.25 $\equiv$ 666.95	-035.3	Wood. Timber. Logwood etc.
-033.26	Hard-setting compositions. Imitation stone -033.26 $\equiv$ 666.96	-035.31	Hardwood
-033.27	Putty and similar oil-bound compositions	-035.32	Softwood
-033.3	Concrete (cement concrete)	-035.35	Cork
-033.32	Plain concrete (mass concrete)	-035.38	Wood waste. Sawdust. Shavings. Wood-wool
-033.33	Lightweight concretes. $\square$ No-fines concrete. Aerated concrete	-035.4	Pulp. Paper. Board
-033.34	Special concretes. $\square$ Fire-resisting concrete. Expansive concrete	-035.41	Pulp
-033.37	Reinforced concrete	-035.42/.46	Papers -035.42/.46 $\equiv$ 676.22/.26
-033.38	Prestressed concrete	-035.47	Board. Cardboard. Boxboards
-033.5	Glass and similar vitreous materials	-035.48	Building boards. $\square$ Fibreboards. Hardboard. Wallboard
-033.51	Ordinary rolled glass. $\square$ Plate glass	-035.5	Materials of animal origin
-033.52	High-quality glass. $\square$ Crown glass. Flint glass. Crystal glass	-035.51	Leather (natural leather)
-033.53	Strass	-035.511	Raw skins. Hides
-033.57	Enamel	-035.513	Soft leathers. $\square$ Kid leather. Morocco leather
-033.58	Fused quartz. Fused basalt etc. $\Rightarrow$ -037.51	-035.514	Hard, rigid leathers
-033.6	Ceramics. Pottery. Clayware in general $\Rightarrow$ -032.61	-035.52	Specially processed leathers. $\square$ Suède. Parchment -035.52 $\equiv$ 675.2
-033.62	Porcelain. Semiporcelain. China	-035.53	Imitation leather. Simulated leather, of plastics etc.
-033.63	Stoneware. $\square$ Technical, chemical, sanitary stoneware	-035.54	Furs
-033.64	Earthenware (porous ware). $\square$ Terracotta. Fireclay -033.64 $\equiv$ 666.64	-035.55	Hair. Feathers
-033.65	Special ceramic objects for electrical purposes. Ceramic insulators	-035.552	Hair. Bristles etc. $\Rightarrow$ -037.3
-033.7	Heavy clayware. Refractories. Cermets $\Rightarrow$ 666.7	-035.554	Feathers. Quills
-033.71	Bricks	-035.56	Bones. Teeth. Horns. Shell. Ivory. Tortoiseshell etc. -035.56 $\equiv$ 675.86
-033.76	Refractories	-035.57	Live animal produce as materials. $\square$ Milk. Eggs -035.57 $\equiv$ 637
-033.77	Chemically resistant clayware	-035.58	Dung
-033.78	Cermets. Ceramic-metal composites <i>Denote constituent metal by '4...', derived from -034...</i>	-035.6	Chemically processed materials, mainly organic
-034	Metals -034 $\equiv$ 669 $\Rightarrow$ -032.4 $\Rightarrow$ -033.78	-035.63/.64	Materials of the food and drink industry -035.63/.64 $\equiv$ 663/664
-034.1	Ferrous metals. Iron and steel	-035.66	Organoleptics. Odorants. Flavourings $\Rightarrow$ -035.8
-034.13	Cast iron	-035.67	Colorants. Dyes. Inks. Paints etc. -035.67 $\equiv$ 667
-034.14	Steel	-035.68	Distillates and residues of wood, coal etc.
-034.15	Alloy steel	-035.682	Tars. $\square$ Coal tar. Wood tar
-034.2/.8	Nonferrous metals	-035.683	Charcoal. Wood distillation residues
-034.3	Copper. Copper alloys	-035.684	Coke. Coal distillation residues
-034.4	Lead. Lead alloys	-035.8	Oils. Fats. Waxes. Gums. Natural resins
-034.5	Zinc. Zinc alloys	-035.81	Fats. Natural waxes -035.81 $\equiv$ 665.1
-034.6	Tin. Tin alloys	-035.82	Animal oils, fats and waxes -035.82 $\equiv$ 665.2
		-035.83	Vegetable oils, fats and waxes -035.83 $\equiv$ 665.3

-0... Table 1k. Common auxiliaries of general characteristics

-035.84	Gums. Natural resins. Oleoresins	-037.4	Man-made fibres. Chemical fibres
-035.841	Gums. □ Gum arabic. Tragacanth	⇒ -036	
-035.842/.847	Natural resins. Oleoresins	-037.45	Semisynthetic fibres (cellulosic fibres etc.).
	-035.842/.847 ≡ 665.944.2/.7	□ Rayon. Artificial silk	
-035.848	Rosin (colophony)	-037.47	Synthetic fibres
-035.85	Essential oils. Cosmetics	-037.474	Polyester fibres and fabrics
	-035.85 ≡ 665.5	-037.475	Polyamide fibres and fabrics. Nylon fibres
-036	Macromolecular materials. Rubbers and plastics	-037.477	Polyethylene fibres

	-036.5 ≡ 678.5	Asbestos fibres	
⇒ -037.4		-037.53	Artificial mineral fibres. Glass fibres. Ceramic fibres
-036.6/.8	Synthetic plastics, resins, rubbers etc.	-037.6	Metal fibres
-036.6	Polycondensates (condensation resins, fibres).	-037.63	Mixed fabrics. Special fabrics (woven, knitted etc.)
	□ Polyesters. Polyamides. Nylon	-037.65	Felts, batts etc.
	-036.6 ≡ 678.6	-037.7	Gauze. Lace. Other openwork fabrics
-036.7	Polymerizates (addition resins and copolymers). □ Polyethylene. Polyvinyls.	-037.71	Cordage. Trimmage. Fancy fabrics
	Polystyrene	-037.75	Cordage. □ Rope. Twine. String
	-036.7 ≡ 678.7	-037.8	Ribbon. Tape. Webbing
-036.8	Mixed polymerizate-polycondensates. Other macromoleculars. □ Silicones	-037.86	Specially treated and finished textiles
	-036.8 ≡ 678.8	-037.87	Proofed, coated or bonded fabrics
-037	Textiles. Fibres. Yarns. Fabrics. Cloth	-039	Other materials
	-037.1/.3 ≡ 677.1/.3	-039.6	Inorganic chemicals and compounds
-037.1	Vegetable fibres. □ Bast. Flax. Hemp. Jute.		<i>Except those at -032/-034</i>
	Sisal	-039.6 ≡ 546	
-037.2	Vegetable seed hairs. □ Cotton. Kapok	-039.7	Organic chemicals and compounds
-037.3	Animal fibres and hairs. □ Wool. Silk		<i>Except those at -035/-036</i>
⇒ -035.55		-039.7 ≡ 547	

-04 COMMON AUXILIARIES OF RELATIONS, PROCESSES AND OPERATIONS

SCOPE. The -04 auxiliaries denote relations between concepts (particularly under -042) and processes, activities and operations in any discipline. They are applicable throughout the main tables. Where such processes etc. are already adequately denoted in a main class, that notation may be preferred. Care should be taken to distinguish between a process as a subsidiary aspect of a subject, and cases where the process or activity is itself the subject, e.g. appraisal of research and methodology in the social sciences would be classed using -04..., at 303.1-047.4 - as opposed to appraisal as a management technique, denoted by a main number at 005.96.

CITATION ORDER. The -04 auxiliaries are not to be used independently, or cited first in a compound notation. They are always suffixed to a main number.

-042	Phase relations	-042.75	Interdependence. Mutual dependence.
-042.1	Bias phase	'Symbiosis'	
	<i>Use form auxiliary (0.05) Documents designed for particular types of reader/audience</i>	-042.82	Complementarity
		-043	General processes
-042.2	Comparison phase	-043.2	Action
-042.3	Influence phase	-043.3	Inaction. Inertia
-042.4	Tool phase. Exposition phase	-043.4	Reaction. Response
	<i>Intended to provide for relations of the 'study sample' or 'case study' variety; e.g. gene mutation as demonstrated in drosophila, where drosophila is the vehicle or tool and not the principal focus of the study</i>	-043.5	Interaction
		-043.61	Preparing. Preparation
		-043.62	Starting
		-043.65	Stopping
		-043.7	Change
		-043.72	Transition
		-043.74	Variation. Alteration (change in one direction)
-042.5/.8	Other terms descriptive of relationships between entities	-043.76	Fluctuation (alternating change, bipolar variation)
	⇒ -021.2	-043.77	Rate of change

-05 COMMON AUXILIARIES OF PERSONS AND PERSONAL CHARACTERISTICS

SCOPE. The -05 auxiliaries denote the persons concerned or their characteristics

USE. The -05 auxiliaries are applicable throughout the main tables, if the personal aspect is secondary to the subject.

If the main table for a particular subject provides no direct subdivision or special auxiliary for the personal aspect, -05 itself may be used to denote this, e.g.

324 Elections.

324-05 Persons connected with elections.

The roles of agent and target should usually be distinguished by -051 or -052, e.g.

324 Elections.

324-051 Electors, voters.

324-052 Elected representatives.

with any further personal characteristics denoted by adding the appropriate subdivision of -053/-058, e.g.

324-052-055.2 Female elected representatives.

If the main tables already provide a place for the personal aspect, then the subdivisions of -053/-058 may be added directly to this, e.g.

070.42-057.13 Freelance journalists.

347.96-055.2 Female lawyers.

616-083-055.1 Male nurses.

As with all common auxiliaries, the subdivisions of -05 may be combined with each other, or other auxiliaries, e.g.

647-053.6-055.2 Female adolescent domestic staff.

78.071-056.45(=411.16) Jewish musical prodigies.

CITATION ORDER. The -05 auxiliaries are not to be used independently or cited first in a compound notation. They are always suffixed to a main number or notation which expresses the subject to be qualified

-051	Persons as agents, doers, practitioners (studying, making, serving etc.)	-053.4	Preschool-age children. Toddlers
	◇ 616-051 Medical staff: doctors, nurses etc.	-053.5	School-age children (in general)
	◇ 929-051 Biographers	-053.6	⇒ -057.87
-052	Persons as targets, clients, users (studied, served etc.)		Young persons. Adolescents. Teenagers
	◇ 616-052 Medical patients	-053.66	⇒ -057.87
	◇ 929-052 Biographees	-053.67	Persons in early adolescence
-053	Persons according to age or age-groups	-053.8	Persons in late adolescence
	<i>Details by "4..."</i>	-053.81	Adults. Grown-ups
-053.1	Human beings, born or unborn, living or dead		Young adults. Persons in prime of life
-053.12	Ovum	-053.85	<i>Details by "465..."</i>
-053.13	Embryo (foetus)	-053.87	◇ -053.81 "465*20/29" Persons in their
-053.15	Alive. Living persons	-053.88	twenties
-053.18	Dead. Deceased persons	-053.9	Persons in middle age (in general)
-053.2	Children and infants (in general)		Persons in climacteric (change of life)
	⇒ -055.15	-054	Persons in late middle age (troisième âge)
	⇒ -055.25		Old persons. Persons in old age. Senior citizens
	⇒ -055.62		
-053.3	Infants. Babies		Persons according to ethnic characteristics, nationality, citizenship etc.
-053.31	New-born babies	-054.4	◇ -054(23) Mountain dwellers. Hill folk
-053.32	Premature babies	-054.5	◇ -054(=2/=8) Coloured persons
			Residents (national or non-national)
			Nationals. Citizens of a country

-0... Table 1k. Common auxiliaries of general characteristics

-054.51	Nationals by birth	-056.1	Persons according to general constitution, disposition or character
-054.52	Naturalized citizens		
	◊ -054.52-058.833 Naturalized by marriage	-056.12	Passive persons. □ Unreactive. Inactive.
-054.57	Members of national minorities		Neutral. Indifferent. Placid. Lazy. Apathetic
-054.6	Non-nationals. Foreigners. Aliens	-056.13	Moderately, normally active persons.
-054.62	Resident aliens		□ Reactive. Concerned. Interested
-054.64	Enemy aliens	-056.14	Intensively, abnormally, excessively active persons. □ Overreactive. Energetic.
-054.65	Prisoners of war		Hyperergic. Enthusiasts. Fanatics. Zealots
-054.68	Nonresidents. Visiting foreigners		Personal bias
	⇒ -057.68	-056.15	⇒ 316.353
-054.7	Expatriates. Exiles. Repatriates. Migrants.		Positive bias. Pro-... For... In favour of...
	Stateless persons	-056.153	Supporters
-054.72	Voluntary migrants. □ Immigrants. Emigrants		Neutral. Uncommitted. Neither for nor against
-054.73	Refugees. Evacuées. Displaced persons	-056.155	Negative bias. Anti-... Against... Opposed to...
-054.74	Compulsory exiles. Banned persons	-056.157	Persons according to laterality
	(proscribed from entry). Expellees. Deportees	-056.17	Right-handed persons. Dextrals
-054.75	Repatriates	-056.172	Left-handed persons. Sinistrals
-054.78	Stateless persons. Apatriates	-056.173	Ambidextrous persons
-055	Persons according to gender and kinship	-056.175	Persons according to physical state and health
-055.1/3	Persons according to gender (sex)	-056.2	Physically healthy persons
-055.1	Male persons. Men	-056.22	Persons according to body size, height, stature
-055.15	Boys	-056.23	Very small, very short persons. Dwarfs
-055.2	Female persons. Women	-056.231	Small persons. Short persons
-055.25	Girls	-056.232	Persons of average size or height
-055.26	Women as child-bearers. Pregnant women.	-056.233	Big persons. Tall persons
	Expectant mothers. Nursing mothers	-056.234	Very big, very tall persons. Giants
-055.3	Persons according to sexual orientation	-056.235	Physically ill persons. The sick. Invalids.
	<i>Class other sexual and quasi-sexual characteristics with the subject, e.g.</i>	-056.24	Convalescents
	<i>391.2 Transvestism.</i>	-056.25	Persons according to nourishment (nutritional state) or body weight
	<i>612.6.058 Hermaphroditism (intersexuality).</i>		Underweight persons. Weakened, wasted, debilitated by hunger etc. Starved.
	<i>616.89-008.442 Sexual psychopathology</i>	-056.253	Undernourished. Suffering from malnutrition.
-055.32	Heterosexual		Hypotrophic
-055.34	Homosexual. Gay		Persons of average weight. Normally nourished. Eutrophic
	◊ -055.34-055.1 Gay male	-056.255	Overweight persons. Overnourished. Fat.
	◊ -055.34-055.2 Lesbian		Obese. Hypertrophic
-055.36	Bisexual	-056.257	Physically handicapped persons. Disabled persons
-055.5/7	Persons according to family or other kinship relation		⇒ -058.65
-055.5	Persons in parental or ascendant relation.	-056.26	Blind persons
	Ancestors. Forebears		Deaf persons. Dumb persons. Deaf-mutes
-055.52	Parents		Persons with speech impediments.
	◊ -055.52-058.832 Single parents	-056.262	Speech-defective persons. □ Stammerers. Stutterers
	◊ -055.52-058.832-055.1 Single fathers	-056.263	Temporarily disabled persons. Injured. Wounded (curably)
	◊ -055.52-058.832-055.2 Single mothers	-056.264	Permanently disabled persons. Cripples
-055.53	Grandparents. Great-grandparents. Further forebears in direct ascendant line		Totally disabled persons
-055.54	Persons in indirect ascendant relation.	-056.265	Motor-handicapped persons
	□ Uncles. Aunts. Great-uncles. Great-aunts		Persons according to intelligence and mental or psychological state
-055.6	Persons in filial or descendant relation	-056.266	Persons according to intelligence
-055.62	Offspring. Children of... Filial	-056.268	<i>Denote level of intelligence either by the direct subdivisions below or by adding intelligence quotient (IQ) after an asterisk, see Table 1h</i>
-055.621	Children born in wedlock. Legitimate children	-056.29	◊ -056.31*IQ105 Persons with IQ of 105
-055.623	Children born out of wedlock. Natural children.	-056.3	Persons of low intelligence
	Illegitimate children. Bastard children		Persons of normal, average intelligence
-055.63	Grandchildren. Great-grandchildren. Further descendants in direct line	-056.31	Persons of high intelligence
-055.64	Persons in indirect descendant relation.		Mentally healthy persons
	□ Nephews. Nieces. Great-nephews.	-056.32	Persons with mental health problems. Mentally ill persons
	Great-nieces	-056.34	Persons with learning difficulties. Mentally handicapped persons
-055.7	Persons in collateral relation		Persons according to temperament, predisposition
-055.71	Persons as siblings	-056.313	Accident-prone (injury-prone) persons
	◊ -055.71-055.1 Brothers	-056.315	
	◊ -055.71-055.2 Sisters	-056.317	
-055.72	Persons in collateral relation of the same generation, or in more distant collateral relation. Cousins	-056.32	
		-056.34	
-055.76	Persons as twins, triplets etc., or as one of twins, triplets etc..	-056.36	
-056	Persons according to constitution, health, disposition, hereditary or other traits	-056.4	
		-056.42	

-056.43	Disease-prone (disorder-prone) persons. Persons with diathesis. Hypersensitive persons. Allergic persons	-057.17 -057.173 -057.175 -057.177	Managers in general. The management Lower management Middle management Higher management. Top management. □ Directorate. Board of directors. Chief scientific staff. Chief technical staff. Chief administrative staff Chairmen. Presidents Acting Chairmen. Vice Presidents Chief executive officers. Managing directors Deputy chairmen, presidents Directors. Board members Executive directors Non-executive directors Deputy directors. Assistant directors First-line managers. Supervisors People related to the organization <i>For persons officially on half-pay (previously at this number) see -057.116</i>
-056.45	Gifted persons. Precocious persons. Geniuses. Prodigies		
-056.47	Maladjusted persons. Misfits. Eccentrics. Cranks		
-056.48	Introverts. Extraverts	-057.177.1	
-056.49	Persons with behavioural problems	-057.177.11	
-056.7	Persons according to their inherited characteristics, constitution	-057.177.2 -057.177.21 -057.177.3 -057.177.31 -057.177.32 -057.177.321 -057.177.4 -057.18	
-056.8	Persons according to their acquired habits, behaviour, attitude		
-056.82	Persons characterized by particular daily, routine habits. □ Early risers, late risers. Active in daytime, nighttime. Indoor, outdoor types		
-056.83	Persons with persistent cravings. Addicts: alcohol, tobacco, narcotics etc.		
-056.84	Vegetarians		
-056.85	Total abstainers from stimulants. Teetotallers	-057.182	Agents. Representatives
-056.87	Persons well-disposed to their fellows. □ Sociable, friendly, sympathetic types. Benefactors. Humanitarians. Philanthropists	-057.184 -057.185 -057.187 -057.188 -057.19	Governors Shareholders Customers Suppliers Unemployed persons. Jobless, out-of-work persons Persons seeking work Applicants. Candidates Technical staff. Operatives. Manual workers (blue-collar workers) ⇒ 331.102.342 Specialized workers. Skilled workers. Craftsmen. Artisans Supervisory technical staff. □ Works managers. Foremen Executive technical staff. □ Craftsmen. Operatives Unskilled workers. □ Labourers Workers in training. Apprentice workers Clerical, administrative workers. Clerks. Office staff (white-collar workers) Clerical and related workers in commerce and industry Sales and service workers Officials of the political authority and officials of administrative authorities Heads of state. Monarchs. Presidents Ministers of state Persons in military service. Persons in civilian services. □ Armed forces personnel (servicemen, servicewomen). Police personnel. Fire service personnel Inspectors Professional or academic workers <i>Except those at -057.3...</i>
-056.88	Persons ill-disposed to their fellows. □ Unsociable, unfriendly, cruel types. Misanthropes. Bullies ⇒ 177.84 ⇒ 316.624.3 ⇒ 364.636

-058.865	Adopted children	-059.2	Persons plurally or collectively. Groups. Parties

-1/-9, .01/.09, '0/'9 SECTION II: SPECIAL AUXILIARY SUBDIVISIONS

The special auxiliary subdivisions -1/-9, .01/.09 and '0/'9 are limited in their scope, and each series is used to denote recurrent concepts in that part of the main tables for which it is designed and scheduled, or in certain other sections where specifically indicated. Thus, unlike the common auxiliary signs and subdivisions of Section I, in the special auxiliaries the same notation may be used with different meanings in different parts of the main tables, e.g. -3 at 54, 62 and 82; .02 at 06, 334, 53, 54, 57, 621.3, 629, 656, 66, 677, and 7. It always, however, denotes the same recurrent concept at the main number where it is listed or at the subdivisions of that number

A. Three kinds of notation are in use as special auxiliary subdivisions.

(a) The hyphen series -1/-9 (but not -0, see Table 1k) are mainly analytical or differentiative in function, serving to indicate elements, components, properties and other details of the subject denoted by the main number to which they apply.

Examples: the series listed at 62-1/-8 and 66-9, applicable (with minor exceptions) throughout 62/69, denoting engineering, mechanical and processing details; the series 82-1/-9, applicable throughout 82, denoting literary form (poetry, drama, novels etc.).

(b) The point-nought series .01/.09 are more diversely used and often developed in much more detail than -1/-9, providing sets and subsets of recurrent concepts such as aspect studies, activities, processes, operations, plant and equipment.

Examples: 3.07/.08, applicable throughout 30/39 and developed in fuller detail under 35; 7.01/.09, applicable (with minor exceptions) throughout 71/79; series at many two-digit and lower-level divisions of Class 5 (e.g. 528, 53, 54, 556, 57/59), Class 8 and Class 9; and numerous series in the divisions of Class 6.

(c) The apostrophe series '0/'9 are usually more specific than -1/-9 and .01/.09, and are often synthetic or integrative in function, denoting compound subjects by compound notation. They are sometimes fully listed, but elsewhere are derived from main numbers by parallel division.

Examples: Synthesis of subdivisions of 329 'Political parties', e.g.

329.17'23'12 Nationalist-republican-liberal parties (from 329.17, 329.23 and 329.12).

Specification of compounds at 547 'Organic chemistry' by '11/'19 (derived from 546.1/.9) and '2/'8 (derived from 547.2/.8), e.g.

547.426.24'117 Nitroglycerine (from 546.17).

Specification of alloys at 669 'Metallurgy', e.g.

669.35'5'6 Copper-zinc-tin alloys (from 669.35, 669.5 and 669.6).

Listed apostrophe auxiliaries, as at 628.1'1 'Characteristics of waterworks systems', 81'0 'Phases of development of languages', 81'2'44 'Subject fields of linguistics' and 903'1 'Prehistoric culture forms'.

B. Special auxiliaries may be used either singly or in combination with other auxiliaries.

(a) Citing a single auxiliary, e.g.

329.052 Opposition parties.

329.12'23 Liberal-republican parties.

547.29-41 Reagents for organic acids.

547.29.07 Preparation of organic acids.

547.29'26 Acid-alcohol esters.

821.161.1-31 Russian novels.

821.161.1.09 Criticism of Russian literature.

(b) Citing several auxiliaries with the same symbol (a homogeneous chain), e.g.

329.053.052 Opposition splinter parties.

329.12'13'23 Liberal-progressive-republican parties.

62-242-436 Engine pistons - spherical.

678.6.067.029.4 Polycondensate mouldings - joining.

(c) Citing several auxiliaries with different symbols (a heterogeneous chain), e.g.

329.12'23.052 Liberal-republican opposition parties.

547.29'26.07-41 Acid-alcohol ester preparation - reagents.

821.161.1-31.09 Russian novels - criticism

011/016

BIBLIOGRAPHIES

Ideal lists of documents, not confined to an actual collection

011

UNIVERSAL AND GENERAL BIBLIOGRAPHIES

Not limited to a specific author, country of origin, subject or format

- 012 AUTHOR BIBLIOGRAPHIES. INDIVIDUAL BIBLIOGRAPHIES**
Bibliographies of editions of, or writings about, the works of a particular author, or particular anonymous works. Bibliographies of works published by a particular organization
- 013 COLLECTIVE BIBLIOGRAPHIES**
Bibliographies of works of a particular class of writer
Denote bibliographies of authors belonging to a particular profession, society or subject field by ...; of works in a particular language by ...; of authors of a particular period by "..."; of authors of a particular nationality by (1/9)
- 014 BIBLIOGRAPHIES OF WORKS OF PARTICULAR CHARACTERISTICS**
- 014.1 Bibliographies of anonymous and pseudonymous works**
- 014.3 Contents bibliographies.** □ Abstracts. Lists of works appearing in serials or polygraphies. Contents lists and indexes of all kinds
- 014.5 Concordances.** □ Analytical indexes to individual authors or works
- 015 BIBLIOGRAPHIES OF PLACE.**
 □ National bibliographies. Local and regional bibliographies
 ◇ 015(410) Bibliographies of works published in the UK, e.g. British National Bibliography
- 016 SPECIAL SUBJECT BIBLIOGRAPHIES**
 ◇ 016:011 Bibliographies of general bibliographies
 ◇ 016:087.5 Bibliographies of publications for children
 ◇ 016:34(05) Bibliographies of law journals
 ◇ 016:929 Biobibliographies
- 017/019 CATALOGUES.** □ Inventories of actual collections. Library catalogues. Publishers', booksellers' lists etc.
 ⇒ 025.3
- 017 CATALOGUES IN GENERAL. SUBJECT CATALOGUES.** □ Classified or systematic catalogues. Alphabetic subject catalogues
- 017.09 Kinds of catalogue within an individual library**
 017.091 Location indexes. Shelf lists
 017.092 Accessions catalogues
 017.099 Other kinds of catalogue, arranged for the particular needs of individual libraries
- 017.1 Catalogues of non-private libraries.**
 □ Catalogues of public libraries (municipal libraries), national libraries, provincial libraries, libraries of public bodies, associations, corporations, universities, learned societies
- 017.11 Union, central, joint subject catalogues.**
 □ Repertories. Catalogues of the holdings of more than one library
- 017.2 Catalogues of private libraries**
- 017.3 Auction catalogues. Catalogues of book sales**
- 017.4 Commercial, trade catalogues.**
 □ Publishers', printers', distributors', booksellers' catalogues
- 017.41 Collective trade catalogues.** □ Catalogues of distributors, booksellers etc. (not confined to a single printer or publisher)
- 017.42 Trade catalogues of individual presses, printers, publishers**
- 017.43 Catalogues of book bargains.**
 □ Second-hand, antiquarian book catalogues
- 018 NAME CATALOGUES.** □ Author catalogues. Alphabetic catalogues of persons and places. Catchword catalogues
 018.09 ≡ 017.09
- 018.1 Name catalogues of non-private libraries**
For scope of 'non-private' see 017.1
- 018.11 Union name catalogues**
- 018.2 Name catalogues of private libraries**
- 018.3 Auction name catalogues. Name catalogues of book sales**
- 018.4 Commercial, trade alphabetic catalogues.** □ Name catalogues of publishers, printers, distributors, booksellers
- 019 DICTIONARY CATALOGUES**
Catalogues incorporating author, title, catchword, alphabetic subject entries etc. in a single sequence
 019.09 ≡ 017.09
- 019.1 Dictionary catalogues of non-private libraries**
For scope of 'non-private' see 017.1
- 019.11 Dictionary union catalogues**
- 019.2 Dictionary catalogues of private libraries**
- 019.3 Auction dictionary catalogues. Dictionary catalogues of book sales**
- 019.4 Commercial, trade dictionary catalogues.** □ Publishers', printers', distributors', booksellers' dictionary catalogues
- 019.6 Union catalogues in general. Repertories**
 ⇒ 017.11
 ⇒ 018.11
 ⇒ 019.11
- 019.9 Bibliographies and catalogues according to their own characteristics as publications**
Alternative classification
- 019.91 According to frequency of publication**
 Periodic bibliographies. □ Bibliographies in periodical form: daily, weekly, monthly, yearly etc., in which new works are listed as they appear. Current awareness lists
 019.911 Nonperiodic bibliographies. Once-and-for-all bibliographies
- 019.912 According to degree of coverage**
 Exhaustive, comprehensive bibliographies and catalogues
 019.921 Selective, partial bibliographies and catalogues
- 019.922 According to degree of bibliographic detail**
 Complete bibliographies and catalogues
 019.931 *With full bibliographic details*
 Concise bibliographies and catalogues
 019.932 *With abbreviated or summarized entries*

019.94	According to analytical or critical character	019.954	Card bibliographies and catalogues.
019.941	Critical bibliographies and catalogues.		□ Catalogue cards in books ('prenatal' cataloguing)
019.942	Noncritical bibliographies and catalogues.	019.96	According to arrangement of entries
	□ Title lists	019.962	In alphabetic order of author's name
019.95	According to format, style of publication	019.963	In subject order, alphabetic or systematic (classified)
019.951	Separately published bibliographies and catalogues in volume form	019.964	In alphabetic order of title
019.952	Bibliographies and catalogues in periodicals, serials	019.965	Combinations of the above arrangements.
			Mixed entries

 ⇒ 81'23
 ⇒ 81'342.2
 Graphic expression. Reading. □ Writing. Drawing
 Volition. Will
 Freedom of will. □ Deliberation. Choice. Decision
 ⇒ 141.5
 Responsibility
 Determination
 Human act of will. □ Training of will. Self-discipline
 Intentions. Motives. Desires, wishes
 ⇒ 316.628
 159.95 **Higher mental processes**
 159.952 Attention
 159.952.1 Conditions of selection
 159.952.12 Objective conditions. □ Suddenness. Novelty. Colour
 Subjective conditions. □ Interest. Expectancy. Purpose
 Varieties of attention (according to origin, stimulus, development)

159.952.3	Physical reactions. □ Circulation. Respiration. Posture	159.962.2	Inducing hypnosis
159.952.4	Clarity and strength of attention. □ Concentrated attention. Divided attention	159.962.6	Autohypnosis
159.952.5	Scope and duration of attention. Span, range, fluctuation of attention	159.962.7	Suggestion. Autosuggestion
159.952.6	Acquired inattention. Lack of concentration	159.963	Sleep and dreams
159.953	Memory and learning	159.963.2	Sleep
159.953.2	Types of memory. □ Visual, auditory, olfactory, gustatory, tactile, motor memory	159.963.22	Conditions inducing sleep
159.953.3	Memory processes	159.963.23	Normal phenomena accompanying sleep. □ Brain activity during sleep
159.953.32	Association	159.963.24	Depth and duration of sleep
159.953.33	Retention	159.963.25	Effects of sleep
159.953.34	Remembering. Recall. Reproduction	159.963.27	Abnormal phenomena ⇒ 615.214.24
159.953.35	Recognition. Identification	159.963.272	Somnolence
159.953.4	Memory aids. Mnemonics. Mnemonic techniques	159.963.273	Sleeplessness. Wakefulness. Insomnia
159.953.5	Learning. Acquisition. Assimilation. □ Mechanical learning, rote. Logical learning	159.963.3	Dreams. Visions
159.953.6	Forgetting. Lapses of memory. Forgetfulness	159.963.32	Classification of dreams. Types of dream
159.953.7	Loss of memory. Amnesia ⇒ 616.89-008.46	159.963.33	Contents of dreams
159.954	Imagination. Imaginative, creative faculty	159.963.34	Special characteristics of dreams. □ Duration. Compression. Meaninglessness
159.954.2	Fancy. Fantasy. Image-inventing faculty	159.963.36	Dreams of different persons ◇ 159.963.36-053.2 Children's dreams ◇ 159.963.36-056.262 Dreams of blind persons ◇ 159.963.36-056.83 Dreams of addicts
159.954.3	Imagery. □ Verbal imagery. Eidetic imagery	159.963.37	Day dreams. Autistic thinking
159.954.4	Forms of imagination. □ Reproductive, representative imagination. Constructive, creative imagination	159.963.38	Interpretation of dreams
159.954.5	Limits of the imaginative process	159.963.5	Somnambulism. Sleepwalking
159.955	Thinking. Thought	159.963.6	Somniloquence. Talking in sleep
159.955.1	Ideation. Idea formation	159.964	Depth psychology
159.955.2	Conception. Concept formation	159.964.2	Psychoanalysis ⇒ 615.851
159.955.3	Abstraction. Selection. Comparison	159.964.21	Explanations of mental processes. □ Drives, instincts. Libido etc. Complexes. Conflict. Sublimation. Compensation
159.955.4	Reflection	159.964.22	Techniques. Methods
159.955.5	Judgement	159.964.222	Cathartic method. Abreaction
159.955.6	Reasoning. Inference. Induction. Deduction ⇒ 162	159.964.224	Free association
159.956	Intuition	159.964.225	Suggestive influence
159.956.2	Intellectual or speculative intuition. □ Internal sense. Common sense	159.964.227	Re-education
159.956.3	Sense intuition	159.964.26	Psychoanalytical schools, systems (Freudian, Jungian, Adlerian etc.) Specify by name (alphabetic extension - Table 1h)
159.956.4	Motor intuition	159.964.28	Applications of psychoanalysis
159.96	Special mental states and processes	159.964.3	Other kinds of depth psychology
159.961	Parapsychology. Psychic phenomena and research ⇒ 2-544.8 ⇒ 398.4 ⇒ 550.87	159.964.32	Psychological schools. □ Schools of Prince, Rivers, McDougall
159.961.2	Hallucinations. Illusions. □ Apparitions. Ghosts	159.97	Abnormal psychology ⇒ 616.89
159.961.3	Prophecy. Prediction. Oracles	159.972	Mental disorders. Insanity. Alienation
159.961.6	Telepathy (mindreading), clairvoyance, clairaudience as psychic phenomena ⇒ 133.3	159.973	Mental deficiency
159.961.8	Out-of-body experiences	159.974	Hypochondria. Melancholia
159.961.9	Near-death experiences	159.975	Catalepsy
159.962	Hypnotism. Suggestion	159.976	Ecstasy
		159.98	Applied psychology (psychotechnology) in general. □ Aptitude testing

16 LOGIC. EPISTEMOLOGY. THEORY OF KNOWLEDGE. METHODOLOGY OF LOGIC

160.1	Nature and role of logic	161.113	General scheme. Overall picture. Mode of association of a concept
161/162	FUNDAMENTALS OF LOGIC	161.114	Types of concept
161.1	Concept ⇒ 159.955.2	161.114.1	Single concept. Individual concept. Name
161.11	Criteria and types of concept	161.114.2	General concept. Category concept. Type concept. Collective concept. Veritable concept
161.111	Comparison. Differentiation. Abstraction	161.114.3	Possible and impossible concepts. Compatibility of predicates. Contradictio in adjecto
161.112	Types of criterion. □ Essential, nonessential. Inner, outer. Qualitative, quantitative. Original, derived	161.12	Categories. Predicaments (modi essendi) ◇ 161.12 Kant's theory of categories

161.13	Categoremata. Predicables (modi praedicandi)	162.13	Contraposition. Inversion
161.14	Scope. Range of concepts	162.14	Subalternation. Rearrangement. Subordination. Dictum de omni et nullo. Superposition
161.15	Content. Simple and compound concepts	162.15	Opposition. Contrasting
161.16	Order relationships of concepts	162.2	Syllogism. Deductive reasoning (from general to particular)
161.161	Coordination	162.3	Induction. Inductive reasoning (from particular to general)
161.162	Subordination	162.4	Inference by analogy
161.163	Subsumption	162.5	Fallacious reasoning. False conclusions. Non-sequiturs. Sophisms. Paralogisms ⇒ 161.25 ⇒ 168.35
161.17	Parts of speech	162.6	Dialectics. Eristics
161.2	Judgement. Statement	164	LOGISTIC. SYMBOLIC LOGIC. MATHEMATICAL LOGIC. LOGICAL CALCULUS
161.201	Theories of judgement	164.01	Nature and role of symbolic logic
161.201.1	Area theories	164.02	Signs. Symbols. Symbolism
161.201.2	Theories of content	164.021	Variable
161.201.3	Theory of total identity (Münsterberg)	164.022	Constants
161.201.4	Theories of assent (Stoa, Descartes, J.S. Mill)	164.03	Functions
161.201.5	Existential theory (Brentano)	164.031	Argument

 2-167.6 Malevolent
 2-167.62 Demons. Devils
 2-167.64 Satan. The devil. The evil one
 2-167.7 Changeable. Unpredictable
 2-167.8 Semi-divine beings. Half mortals
- 2-168 Deified beings**
 ◇ 2-168:321.011.1-051 Deified sovereigns
 ◇ 2-168:599.89 Deified humans
 ◇ 2-168-055.5 Deified ancestors
- 2-169 Mythical creatures**
 2-169.5 Therianthropic beings (Part human part animal)
- 2-17 THE UNIVERSE. NATURE OF THE UNIVERSE. COSMOLOGY**
- 2-172 The material world. The physical environment**
 2-172.2 Origins. Cosmogony. Creation of the world
 2-172.24 State before creation. Chaos. Primordial chaos
 2-172.25 Primal, primeval battle
 2-172.27 Axis mundi
 2-172.4 Theological aspects of elements in the material world (as distinct from their role as objects of worship)
 ◇ 2-172.4:52 The heavens
 ◇ 2-172.4:524 Stars
 ◇ 2-172.4:551 Earth
 ◇ 2-172.4:556 Waters
 ◇ 2-172.4:556.166 Natural disasters. Floods
 ◇ 2-172.4:57.017.5 Fertility
 ◇ 2-172.4:58 Vegetation
- 2-173 Underworld. Netherworld**
 ⇒ 2-188.7
- 2-174 Spiritual realms. Heaven. Abode of the gods. Spirit world**
When perceived as part of the material universe; otherwise use 2-188
- 2-175 Eschatology. End of the world. Last things**
 2-175.2 Apocalypse. Apocalyptic
 2-175.25 Signs of the end times
 2-175.27 Events of the end times
 2-175.3 Last judgement
 2-175.35 Damnation
 2-175.4 Annihilation. Conflagration. Destruction of the world
 2-175.5 Twilight of the gods
 2-175.6 Cosmic restoration. Cosmic apokatastasis. Transformation
 2-175.7 Kingdom, rule of the god(s)
 2-175.75 Millennialism. Chiliasm
- 2-18 MAN. MANKIND. HUMANITY. DOCTRINAL ANTHROPOLOGY**
- 2-181 Origins of man**
 2-181.5 Creation of man
 2-181.7 Primeval paradise. Earthly paradise
- 2-182 Purpose, destiny of man**
2-183 Nature of man
 2-183.5 The soul. The spirit. Human spirit
 2-183.7 Freedom. Free will. Predestination
- 2-184 Man's relation to god(s)**
 2-184.2 Religious feelings. Religious experience
- 2-184.25 Abnormal feelings. Fanaticism
 2-184.27 Illusory feelings, experience. Delusions
 2-184.3 Faith. Belief in god(s)
 2-184.35 Formal acknowledgement of faith. Religious conversion
 ⇒ 2-767
 2-184.4 Doubt. Unbelief
 2-184.5 Denial. Apostasy
 2-184.6 Grace
 2-184.7 Covenantal relations
 2-184.8 God's response to man
 2-184.85 God's gifts to man. Gifts of the Holy Spirit
- 2-185 Human experience. Life**
 2-185.2 Suffering
 2-185.3 Evil. The problem of evil. Sin
Class here general ideas of the nature and religious understanding of sin. Conformity to the specific requirements of religious law and practice should file with 2-42 religious observance and moral theology
 2-185.32 Origin and nature of sin. Nature of evil
 2-185.325 Original sin. Inherent sinfulness of mankind.
 Fall of man
 2-185.33 Repentance. Contrition
 2-185.35 Atonement for sin
 2-185.36 Forgiveness. Remission. Absolution
 2-185.5 Salvation. Soteriology
 2-185.52 Justification
 2-185.53 Redemption
 2-185.57 Reconciliation
- 2-186 Death. The dead**
For funerary customs and rituals see 2-557
- 2-187 Life after death. Afterlife. Hereafter**
 2-187.2 States of being. Forms of continued existence
 2-187.3 Immortality. Persistence of life
 2-187.4 Restoration (apokatastasis) of souls
 2-187.5 Reincarnation. Metempsychosis.
 Metamorphosis
 2-187.55 Birth and re-birth
 2-187.6 Resurrection. Rejuvenation. Restoration of the physical body
 2-187.7 Spiritual, immaterial body. Heavenly body
 2-187.8 Liberation of the soul from the body
 2-187.85 Annihilation. Cessation of existence.
 Non-being. Assimilation. Nirvana
- 2-188 Spiritual realms. Non-material world. Spirit world**
 ⇒ 2-173
 ⇒ 2-174
 Access to the spirit world
 Preparation
 Judgement
 Journey to the spirit world. Ascension. Descent
 Heaven. The heavens. Paradise. Abode of the gods. Astral plane
 Abode of ancestors
 2-188.55 Intermediate state. Limbo. Purgatory
 2-188.6 Hell. Underworld. Hades. Sheol
 2-188.7 ⇒ 2-173
 Abode of ghosts
- 2-2 EVIDENCES OF RELIGION**
- 2-21 NATURAL THEOLOGY. EVIDENCE OF THE NATURAL WORLD. RATIONAL ARGUMENTS FOR BELIEF**
- 2-22 REVEALED THEOLOGY. REVELATION OF GOD(S)**

- 2-225 Theophany. Hierophany. Kratophany**
For revelation of gods in human form see 2-166
- 2-23 SACRED BOOKS. SCRIPTURES. RELIGIOUS TEXTS**
In most faiths there are central sacred books (which have been largely enumerated for each religion). Secondary types of material (religious law, liturgical material, etc.) are provided for as well. These should not be confused with the scriptures themselves (e.g. Torah is regarded as a work of scripture, and not a work of religious law, although it is in the form of law). Examples here are mainly taken from the Hebrew or Christian Bible and religious texts; these are to be understood as a pattern for the works of other faiths, which are enumerated at the appropriate place in the main table
- 2-232 Original texts. Canonical works of scripture**
- 2-233 Variants**
- 2-234 Translations (i.e. from the original text)**
Use common auxiliary Tables 1c and 1g to specify language and period as required
◇ 2-234"05"=124 Vulgate
- 2-235 Versions**
Forms of the text not translated from original sources
Use common auxiliary Tables 1c and 1g to specify language and period as required
- 2-236 Rewritings. Paraphrases**
2-236.5 Narrative summaries. 'Bible stories'
2-236.7 Parodies
- 2-24 SPECIFIC TEXTS. NAMED TEXTS AND BOOKS**
Use to enumerate specific texts, books, elements, etc. of the sacred writings of a particular religion
- 2-25 SECONDARY LITERATURE. PSEUDO-CANONICAL WORKS**
- 2-252 Apocrypha. Pseudepigrapha (other than as named)**
- 2-254 Commentary on sacred works**
E.g. Mishnah, Qu'uranic commentary
- 2-256 Interpretative works. Works of guidance on practice**
E.g. Talmud, sutras
- 2-262 Oral forms. Oral tradition**
- 2-264 Myths and legends**
- 2-265 Other literary forms**
2-265.2 Poetic works
2-265.3 Epics and sagas
2-265.4 Dramatic works
2-265.6 Ritual drama. Ritual re-enactments
- 2-266 Law. Legal codes. Legal texts**
- 2-268 Texts on 'secular' subjects (e.g. medicine, science)**
- 2-27 CRITICAL WORKS**
- 2-271 Aids to study**
- 2-271.4 Parallel forms. Interlinear texts. Harmonies
2-271.5 Annotated versions
- 2-272 Concordances**
2-272.4 Verbal concordances
2-272.5 Subject concordances
- 2-273 Commentaries**
- 2-274 General criticism**
2-274.2 Authorship, origin of texts
2-274.4 Canon. Canonicity
2-274.6 Authority, inerrancy of scripture
- 2-275 Textual criticism**
2-275.2 Textual apparatus
- 2-276 Literary criticism**
2-276.2 Origin and formation of scriptures
2-276.3 Documentary hypotheses
2-276.4 Form criticism. Formgeschichte
2-276.5 Redaction criticism
2-276.6 Literary content
2-276.63 Symbolism
2-276.64 Typology
2-276.66 Allegory
2-276.7 Historical criticism. Salvation history. Heilsgeschichte
- 2-277 Interpretation. Understanding. 'Bible study'**
2-277.2 Exegesis. Hermeneutics
2-277.3 Eisegesis
2-277.4 Literalist, fundamentalist interpretation
2-277.6 Allegorical interpretation
2-277.7 Demythologizing
- 2-278 Theology of sacred texts. Theological content**
Denote further detail by combining hyphen auxiliaries
◇ 27-278-31 Christology of the New Testament
- 2-279 Religion as demonstrated in sacred texts. Religious practice**
Denote further detail by combining hyphen auxiliaries
◇ 26-279-538 Sacrifice in the Old Testament
- 2-28 OTHER RELIGIOUS TEXTS**
- 2-282 Liturgical works. Liturgical texts**
This class provides for the collocation of religious texts if required. Normally liturgical materials are subordinated to the ritual to which they apply
2-282.2 Comprehensive liturgical works
2-282.3 Creeds and confessions of faith
2-282.4 Catechisms
2-282.5 Prayer books. Books of prayers
2-282.7 Service books. Missals. Breviaries
- 2-283 Historical documents. Evidential documents. Historical records. Contemporaneous accounts. Letters**
- 2-284 Works of doctrine, dogma. Articles of faith. Systematic theology. Dogmatics**
Normally the doctrine of say, a practice, will be subordinated to the practice e.g. 27-549-284 the doctrine of the Holy Communion. 2-284 may be used to collect all works of doctrine at this point e.g. 27-284-549 the doctrine of the Holy Communion

- 2-285** **Defence and exposition of doctrine**
General works only. Normally subordinate to the subject discussed, using hyphen combination. See note above at 2-284
- 2-285.2 Apologetics
2-285.4 Polemics
- 2-286** **Other forms of religious texts**
- 2-287** **Sermons as a form**
⇒ 2-475
- 2-29** **RELIGIOUS LITERATURE**
Imaginative literature designed to support the faith, or with religious subjects as a theme
- 2-291** **Religious poetry**
- 2-292** **Religious drama**
Religious plays. See 2-265.6 for ritual drama
- 2-293.1 Religious novels
- 2-3** **PERSONS IN RELIGION**
Religious officials, persons in authority in the faith etc., are dealt with under the institutional structure of the religion at 2-725/-727. However, there are some general classes of agents that are not linked in this way with a particular religious activity, and these are given here
Generally speaking, persons should be subordinated to the function they perform using the common auxiliaries of persons Table 1k-05 e.g.
2-468.6-051 healers = healing + persons.
2-788-051 monks = monastic orders + persons
- 2-31** **ORIGINATOR, FOUNDER, CENTRAL FIGURE OF THE FAITH**
- 2-312** **Founder's life**
2-312.3 Birth, nativity
2-312.4 Family of the founder
2-312.45 Father
2-312.47 Mother
2-312.5 Other significant individuals
2-312.55 Original followers, supporters
2-312.6 Initiation. Conversion. Enlightenment
2-312.7 Ministry. Public life
2-312.8 Death
2-312.9 Events after death
- 2-313** **Relics of the founder**
- 2-315** **Accounts, anecdotal material**
- 2-317** **Memoirs. Sayings. Deeds**
- 2-318** **Founder as model, example**
- 2-32** **MESSIAH(S)**
- 2-33** **INSPIRED PERSONS. MAJOR FIGURES**
- 2-335** **Scholars. Thinkers. Philosophers**
2-337 Reformers
- 2-34** **MARTYRS**
- 2-35** **ASCETICS. HERMITS. FAKIRS**
- 2-36** **SAINTS. BODDHISATVAS. ENLIGHTENED ONES**
- 2-37** **MAHATMAS. GURUS. WISE MEN**
- 2-38** **CHARISMATICS. PERSONS WITH SUPERNATURAL POWERS**
- 2-382** **Shamans. Witch doctors. Medicine men. Sorcerers**
⇒ 256
- 2-384** **Cultic priests. High priests**
- 2-386** **Thaumaturgers. Wonder workers. Miracle workers**
- 2-39** **THEOCRATIC SOVEREIGNS. DIVINELY APPOINTED KINGS. SACRAL KINGSHIP**
- 2-4** **RELIGIOUS ACTIVITIES. RELIGIOUS PRACTICE**
- 2-41** **SOCIAL BEHAVIOUR AND ACTIVITIES. NON-FORMAL RELIGIOUS PRACTICE AND OBSERVANCE**
- 2-42** **MORAL BEHAVIOUR. MORAL THEOLOGY**
Moral theology is distinguished from the theological discussion of the nature of Sin which is located at 2-185.3. This class is concerned with human ethical actions, and with right and wrong, virtue and vice, rather than inherent sinfulness
- 2-423** **Right and wrong. Good and evil**
2-423.3 Knowledge of right and wrong
2-423.35 Conscience. Guilt
2-423.4 Freedom to act. Free will. Human ethical actions
2-423.42 Influences on the exercise of free will
2-423.44 Determinism
2-423.45 Predestination
2-423.47 Temptation
2-423.5 Wrongdoing. Sin
2-423.53 Origin, source of wrongdoing
2-423.55 Nature of wrongdoing. Nature of sin. □ Gravity of sin
2-423.57 Specific sins
◇ 2-423.57-184.3 Sins against the faith
- 2-423.58 Seven deadly sins. Mortal sins
2-423.59 Venial sins
2-423.7 Good. Virtue. The good
2-423.73 Origin of good
2-423.75 Nature of virtue
2-423.77 Specific virtues
2-423.78 Cardinal virtues, etc.
2-423.79 Theological virtues. □ Faith. Hope. Charity
- 2-425** **Ethical systems. Ethical theory**
These should be derived from Philosophy
◇ 2-425:17.023.6 Casuistry. Situation ethics
◇ 2-425:17.026.4 Categorical imperativism. Kantian ethics
◇ 2-425:17.036.2 Utilitarianism
- 2-426** **Religious ethics. Ethics directly derived from religious systems**
- 2-427** **Informal promotion of the faith. Acting as exemplar or ambassador for the faith**
- 2-428** **Religious laws, obligations, moral precepts, moral laws. Regulations. Religious duties**
Many of these are not particularly 'moral', and if required, will be subordinated to the religious practice they refer to; so, dietary laws to dietary practice
2-428.2 Nature of religious law

- 2-428.3 Requirements of law
2-428.4 Prohibitions
For specific prohibitions use colon combination e.g. 2-428.4:002 prohibited books
- 2-428.5 Obedience to the law
2-428.6 Interpretation of law
⇒ 256
- 2-428.7 Exemption from law
2-428.8 Transgression of law
2-428.85 Mitigation
2-428.87 Indulgences
2-428.9 Amendment, cancellation of law
- 2-43 SOCIAL CUSTOMS AND PRACTICE. SOCIAL THEOLOGY**
This class is regarded as embracing pastoral theology, but there is a clear distinction between social behaviour (such as food laws, sexual customs) and pastoral behaviour (almsgiving, counselling)
- 2-44 SOCIAL BEHAVIOUR**
- 2-441 Self-emptying. Kenosis**
- 2-442 Food and diet**
2-442.4 Food laws
2-442.45 Dietary requirements. Dietary limitations
2-442.47 Abstinence. Fasting. Prohibition
2-442.5 Rules concerning specific foods and drinks
◇ 2-442.5:637.5 Rules concerning meat
◇ 2-442.5:663.2/.5 Rules concerning alcoholic drinks
- 2-443 Personal hygiene and appearance. Personal conduct**
2-443.3 Cleanliness. Washing
2-443.5 Clothing. Headgear
2-443.7 Cutting, wearing, arrangement of the hair
- 2-444 Social relationships**
2-444.2 Friendships
2-444.4 Conversation
2-444.6 Silence
- 2-445 Domestic customs and routines**
- 2-446 Medical care and treatment**
◇ 2-446:615.38 Attitudes to blood transfusion
◇ 2-446:615 Attitudes to drugs
- 2-447 Sexual relations, activity**
2-447.2 Segregation of sexes
2-447.4 Chastity. Purity
2-447.6 Sexual faithfulness. Promiscuity
2-447.7 Abstinence. Celibacy
2-447.8 Prostitution
- 2-45 MARRIAGE AND THE FAMILY**
- 2-452 Courtship. Selection of marriage partners. Betrothal**
2-452.2 Marriage contracts
- 2-453 Marital partners**
2-453.2 Monogamy
2-453.5 Polygamy. Polyandry
- 2-454 Divorce**
- 2-455 Children**
- 2-456 Pregnancy**
2-456.2 Abortion
2-456.5 Childbirth
- 2-457 Parenthood**
2-457.5 Adoption
- 2-458 Surrogacy**
- 2-46 CHARITY. SUPPORT FOR OTHERS. PASTORAL ACTIVITIES. PASTORAL THEOLOGY IN THE BROAD SENSE**
- 2-462 Agencies, institutions for pastoral care and support**
- 2-463 Charitable giving**
2-463.2 Tithes. Stewardship
2-463.4 Almsgiving
2-463.6 Surrender of wealth, possessions. Voluntary poverty
- 2-464 Practical support. Voluntary work**
- 2-465 Counselling. Advising**
- 2-466 Visiting**
- 2-467 Hospitality**
- 2-468 Care. Physical care and attendance**
2-468.2 Temporary, respite care
2-468.4 Residential care
2-468.45 Shelter. Housing
2-468.47 Hostels. Hospices
2-468.5 Nursing care. Medical care
2-468.6 Healing
2-468.65 Laying on of hands
- 2-47 EDUCATION**
⇒ 2-725:37
⇒ 2-75
- 2-472 Religious education**
◇ 2-472-053.2 Religious education for children. Sunday school
2-472.3 Preparation for initiation. Religious instruction.
□ Catechism
2-472.5 Continuing religious education
- 2-474 Scriptural study and interpretation (for education)**
⇒ 2-277
Preaching (as education and instruction)
⇒ 2-766
2-475 Homiletics. Theory of preaching
2-475.2 Sermons
2-475.5 *See 2-287 for sermons as a form*
- 2-48 RECIPIENTS OF PASTORAL CARE. SOCIAL TYPES AND GROUPS**
- 2-482 Children**
- 2-483 Elderly. Aged**
- 2-484 Victims**
2-484.3 Victims of crime
2-484.5 Victims of war
2-484.7 Oppressed groups. Liberation theology
2-484.75 Religious and politically oppressed
- 2-485 Minority groups**
2-485.5 Ethnic minority
- 2-486 Sick**
2-486.3 Mentally ill
2-486.5 Physically ill
2-486.7 Disabled
- 2-487 Dying**
- 2-488 Other disadvantaged groups**
2-488.2 Needy. Poor
2-488.3 Homeless
2-488.4 Jobless. Unemployed
2-488.5 Destitute

- 2-488.6 Prisoners
2-488.65 Prisoners' families
2-488.7 Widows and orphans
2-488.8 Foreigners. Aliens. Strangers
2-488.85 Refugees
- 2-5 WORSHIP BROADLY. CULT. RITES AND CEREMONIES**
- 2-52 (AGENTS OF WORSHIP)**
- 2-522 Religious sites, locations. Holy places**
2-522.2 Situation, position, location, orientation
2-522.4 Places of particular spirituality, holiness
2-522.5 Places with spiritual associations
2-522.52 Sites of visions
2-522.54 Places of martyrdom
2-522.58 Birthplace of holy persons
- 2-523 Buildings for religious use**
General only. For details of buildings use 72 Architecture
2-523.2 Parts of buildings. Rooms. Areas
2-523.3 Monuments. Shrines
2-523.4 Centres of worship (religious significance)
For religious architecture see 726
2-523.41 Chief centres of worship. □ Principal temples, mosques. Cathedrals
2-523.42 Local and peripheral centres of worship.
□ Temples. Mosques. Parish churches
2-523.43 Small, simple or austere centres of worship.
□ Separate, free-standing shrines and chapels
For shrines that are not buildings see 2-523.3
2-523.44 Sanctuary. Holy area
2-523.45 Appellation. Dedication
2-523.46 Side rooms. Chapels
2-523.47 Screens
2-523.472 Doors
2-523.48 Functional rooms. Robing rooms. Vestries
2-523.5 Subsidiary, attached structures
2-523.6 Monasteries. Community buildings
2-523.8 Buildings for secular purposes
- 2-524 Vehicles of cultic acts**
◇ 2-524:536.46 Fire
◇ 2-524:612.1 Blood
◇ 2-524:662 Ashes
◇ 2-524-032.2 Water
◇ 2-524-035.8 Oil
2-525.2 Incense
2-525.4 Vestments. Clothing. Robes. Head coverings
2-525.5 Masks
2-525.6 Headgear. Head-dresses
2-525.7 Religion draperies. Hangings. Textiles
- 2-526 Objects in worship. Furnishings and decorations**
2-526.1 Furniture. Platforms. Lecterns
2-526.2 Altars. Tables
2-526.3 Containers. Sacred vessels. Chalices. Cups
2-526.4 Aids to prayer. Prayer wheels. Rosaries
2-526.5 Lights
2-526.6 Symbols. Images
2-526.62 Pictorial symbols. Icons
2-526.63 Decorative devices and objects
2-526.64 Statuary. Statues
⇒ 730
2-526.65 Funerary monuments. Tombs and tombstones. Memorials
2-526.7 Relics. Reliquaries. Containers for religious objects
2-526.8 Objects worn on the body. Charms. Talismans
- 2-526.9 Musical instruments in worship
As part of the ritual e.g. horns, bells, shophar. See 2-535 for religious music
- 2-528 Liturgy**
General treatments of liturgy only. Liturgical texts should be subordinated to the rites and ceremonies they refer to using 2-282 e.g. 272-555-282 texts of the Catholic marriage service. Alternatively 2-282 may be used alone to collocate all the liturgical texts of a faith
2-528.5 Form of rite. Office
- 2-53 ACTS OF WORSHIP (BY PARTICIPANTS)**
2-532.2 Public worship. Communal worship. Services. (Usually assumed)
◇ 2-532.2"345" Night services. Vigils
Ceremonial. Ceremonies on the grand scale
State ceremonies
Partially public
Domestic observances. Family worship.
Worship in the home
Personal worship. Private devotions
Secret worship (by degree of compulsion)
Compulsory. Obligatory
Recommended
Voluntary. Optional
- 2-533 (Object of worship)**
Use colon combination with numbers from the whole classification
◇ 2-533-312.47 Mariolatry
◇ 271-533-526.62 Veneration of icons in the Orthodox church
- 2-534 Form of rites, worship (oral)**
2-534.2 Calling to worship, prayer
2-534.3 Prayer
Communal prayer assumed. See 2-58 for private prayer
2-534.35 Specific prayers
2-534.4 Reading of texts
2-534.5 Chants. Incantations
2-534.6 Prophecy
2-534.7 Glossolalia. Ecstatic utterance. Speaking in tongues
- 2-535 Music in worship**
The preferred location for religious music is in 783.
Music by function and purpose: in general subordinate to function e.g. 2-555-535
Wedding music. This location may be used to collate works of music if required. Obtain by hyphen combination e.g. 2-535-555
Wedding music
2-535.2 Solo singing
2-535.3 Choral music
2-535.35 Musical chants. Plainsong
2-535.36 Antiphonal singing
2-535.4 Congregational music. Public singing.
Community singing
Instrumental music
Liturgical settings
Of texts
Of services
Hymns
This class may be used to collate collections of hymns and hymnology if so desired
◇ 2-535.7:631.5 Harvest hymns
◇ 2-535.7-23 Hymns based on text from sacred books
◇ 2-535.7-544.5 Hymns of thanksgiving

- 2-535.75 Anthems
 2-535.8 Psalms
 2-535.85 Metrical psalms
 2-535.9 Religious musical works. Oratorios. Cantatas
- 2-536 Physical rites and ceremonies**
 2-536.1 Washing. Ablution. Immersion in water.
 Sprinkling of water
 2-536.2 Use of other materials, substances
 2-536.25 Oil. Anointing. Unction
 2-536.27 Incense. Censing
 2-536.3 Postures
 2-536.32 Orientation
 2-536.34 Bowing. Bending
 2-536.35 Kneeling. Genuflection
 2-536.36 Prostration
 2-536.37 Laying on of hands
 ⇒ 2-468.65
 2-536.4 Symbolic gestures
 2-536.5 Procession. Circumambulation
 2-536.6 Dance
 2-536.65 Drama. Symbolic enactment
 2-536.7 Eating. Food rites and ceremonies

2-584.5 Spiritual growth and development
2-584.7 Spiritual exercises
- 2-585** **Asceticism**
2-585.5 Self-denial
2-585.7 Mortification of the flesh
- 2-586** **Withdrawal. Retreat**
2-586.5 Hermitage. Isolation
- 2-587** **Mysticism. Altered states of consciousness. Mystic experiences**
◇ 2-587-184.27 False mystical experiences
2-587.3 Trances
2-587.5 Visions
2-587.6 Mystic phenomena
2-587.65 Stigmata
2-587.7 Direct experience of the divine
- 2-6** **PROCESSES IN RELIGION**
Most activities in religion will come under the heading of operations (religious practice, observance, ritual; the administration of churches; pastoral care; missions and so on). Some much more general 'activity' terms deal with the internal dynamics of religions, and their external relations with each other. These rather less concrete and internalized actions are analyzed as 'processes'. Although some are developmental, they should not be regarded as historical (history of a subject is more than adequately catered for in UDC by the application of common auxiliaries and the judicious use of the colon)
- 2-63** **DEVELOPMENTAL PROCESSES. INTERNAL PROCESSES**
- 2-632** **Origin of the faith. Genesis**
- 2-633** **Evolution. Development**
- 2-634** **Growth. Expansion**
- 2-635** **Decline. Contraction**
- 2-636** **Revival. Rejuvenation. Renaissance**
- 2-637** **Death. Extinction**
- 2-64** **RELATIVE PROCESSES. EXTERNAL PROCESSES. INTERACTIONS BETWEEN FAITHS**
- 2-65** **COMPARISON**
A caveat on the use of the term 'Comparative religion'. This usually means comprehensive rather than comparative; works of comparative religion are still usually descriptive in nature, traditionally used to handle non-Christian religion, and most of the literature will reflect this. Therefore 'comparison' should be used conservatively
- 2-66** **INFLUENCE**
- 2-662** **Influence on. Effect on**
- 2-663** **Dependence**
- 2-664** **Influenced by**
2-664.3 Syncretism. Borrowing
2-664.5 Assimilation
- 2-67** **RELATIONS BETWEEN FAITHS OR WITH SOCIETY IN GENERAL. RELIGION AND SOCIETY**
⇒ 322
- 2-672** **Isolation. Separation**
- 2-673** **Co-existence**
2-673.5 Tolerance. Irenics
- 2-674** **Conflict. Antagonism. Hostility**
2-674.5 Persecution
- 2-675** **Dialogue. Ecumenism**
- 2-676** **Co-operation**
- 2-677** **Inter-communion**
- 2-678** **Integration. Merger. Amalgamation**
- 2-679** **Re-union**
- 2-7** **RELIGIOUS ORGANIZATION AND ADMINISTRATION**
All things to do with the structure and organization of a religion. Subordinated to structure are the activities associated with the management and administration of churches, faiths and movements
- 2-72** **NATURE AND STRUCTURE OF THE ORGANIZED RELIGION, CHURCH. ECCLESIOLOGY**
◇ 2-72-1 Doctrine of the religious body, church
◇ 2-72-133/-134 Origin and nature of the church
◇ 2-72-144 Characteristics of the church
◇ 2-72-4 Practice of the religion. Religious custom and tradition
- 2-722** **Persons in religion**
Normally persons in religion with specific functions will be subordinate to the function they perform, and expressed by the use of the common auxiliaries of persons Table 1k-05 e.g.
2-544.8-051 Soothsayers.
2-76-051 Missionaries.

This location is used to deal with material on the 'clergy' or officers of the group generally, and to provide a single class for aggregating such literature

2-725

Officers of the religion. Priests. Ministers. Leaders

Most of the detail in this class will be provided by hyphen combination or by colon combination with appropriate main classes

- ◇ 2-725:331 Conditions of service. Appointment. Preferment. Tenure. Support and maintenance of ministry
- ◇ 2-725:331.2 Financial support. Salaries. Stipends
- ◇ 2-725:332.8 Physical support. Housing
- ◇ 2-725:37 Education and training of the clergy
- ◇ 2-725:377 Training colleges. Seminaries
- ◇ 2-725-428 Obligations
- ◇ 2-725-447.7 Celibacy of priests
- ◇ 2-725-45 Marriage of priests
- ◇ 2-725-544.6 Vows
- ◇ 2-725-584 Spiritual life

2-726

Levels of leadership

⇒ 2-732.2

- 2-726.1 Archbishops. Metropolitans
- 2-726.2 Senior. Bishops. Abbots
- 2-726.3 Priests. Ministers
- 2-726.4 Deacons. Assistant ministers
- 2-726.5 Lay assistants
- 2-726.6 Laity in general. Lay persons. Adherents
- 2-726.7 Elders. Senior members (either lay or ministers)

2-727

Non-adherents of the religion. Non-believers

2-73

GOVERNMENT OF THE RELIGION

2-732

Authority of the church (Agents of authority)

- ◇ 2-732-31 Authority of founder
- 2-732.1 Source of authority
- 2-732.2 Head of religion
- 2-732.3 Ruling bodies. Synods. Convocations
- ◇ 2-732.3-284 Doctrine, judgements of synods and councils
- 2-732.4 Councils. Bodies convened for the purpose of establishing doctrine and practice
- 2-732.5 Authority of officers, priests
- 2-732.6 Lay persons. Adherents

2-733

Religious office. Vocation

2-735

Management and administration

Detail in this class will usually be provided by colon combination

- ◇ 2-735:336 Temporal goods, wealth of the church
- ◇ 2-735:347.23 Church property, lands, patrimony
- ◇ 2-735:657 Accountancy
- ◇ 2-735:658.14/17 Financial matters
- ◇ 2-735:658.3 Personnel management

2-736

Other institutions, agencies, organizations within the religion or church

2-737

Congregations. Worshippers

2-74

LEGAL ADMINISTRATION. RELIGIOUS LAW. CANON LAW

In many cases, religious law deals only with discipline within the faith; in this case most detail can be obtained by hyphen combination with other parts of Class 2. Religious law may however also be the Law of the Land; in such case provision is made to append the detail of Class 34 if so desired

- ◇ 2-74-67 Religious law and the law of the land
- ⇒ 348

2-741

Theory of canon law. Religious jurisprudence

2-742

Sources of law

- ◇ 2-742-14 Divine inspiration. God as source of law
- ◇ 2-742-23 Texts. Religious texts
- ◇ 2-742-266 Codes of law
- ◇ 2-742-267 Commentary and interpretation. Legal texts

2-744

Legal practice and procedure.

- Verdict. Sentence

2-745

Religious courts

2-746

Religious judgements

2-747

Subjects of law

- ◇ 2-747:342 Public law
- ◇ 2-747:343 Criminal law
- ◇ 2-747:347 Civil law. Private law
- ◇ 2-747:347.2 Property law
- ◇ 2-747:347.6 Family law

2-747-1/-9

Topics in religious law

In general the law of specific concepts like those below should be regarded as indistinguishable from custom and practice, and placed with the practice; exceptions to this would be cases when the subject of discussion was very clearly the law itself

- ◇ 2-747-1/-9-442 Dietary laws
- ◇ 2-747-1/-9-443 Laws on personal hygiene

2-75

EDUCATION

Education as a function of the central church, religion.

For education at the local level, including religious instruction and Sunday schools, see 2-47 and its subdivisions

Denote details by colon combination with 37

⇒ 2-725:37

2-752

Secular education. Religious schools, foundations

2-754

Tertiary education. Colleges with religious association

2-756

Higher education. Religiously based universities

2-76

RECRUITMENT. MISSIONARY ACTIVITY. MISSIONS BROADLY. MISSIOLOGY

- ◇ 2-76-051 Missionaries
- ◇ 2-76-736 Missionary societies

2-762

Missionary work. Forms of missionary activity

2-763

Campaigns. Crusades

- ◇ 2-763(1-88) Home missions

- 2-764** Overseas missions. Missions in the narrow sense
- 2-765** Propaganda. Religious propaganda. Publicity
- 2-766** Evangelical activity. Evangelism
⇒ 2-475

(Persons in religious orders)
 ◇ 2-788-055.1 Monks
 ◇ 2-788-055.2 Nuns
- 2-788-1/-9** **Monastic religion and practice**
- 2-788.2** Enclosed orders. Separated from the world
- 2-788.3** Mendicant orders
- 2-788.4** Working orders
- 2-788.435** Militant, military
- 2-788.437** Teaching
- 2-788.461** Medical, nursing, caring. Hospitallers
- 2-788.5** Celibate orders
- 2-788.6** Silent orders
- 2-789** Named monastic orders
- 2-79** **SECTS. SECTARIAN MOVEMENTS**
Generally, where significant these will be specified or enumerated sub-classes of a particular religion. Use this location for general works on sectarian movements, or where the given sect is not otherwise specified
- 2-8** **RELIGIONS CHARACTERISED BY VARIOUS PROPERTIES**
It is not recommended that this facet be used for the generation of compound classes which ought really to be enumerated sub-classes of a religion; e.g. Orthodox Christianity, Reformed Judaism should be regarded as significant divisions of the faith, and treated as movements in their own right. The subtlety and complexity of relations between religious movements do not allow for the simplistic results given by over rigorous facet analysis where it is clearly not merited
- 2-81** **CLASSIFICATION OF RELIGIONS**
(Properties derived from previous facets)
 ◇ 2-81-154 Monotheistic religions
 ◇ 2-81-22 Revealed religions
- 2-82** **PROPERTIES RELATED TO MINISTRY**
- 2-823** Religions with hierarchical structure, levels of ministry. 'Episcopalian'
- 2-824** Religions with ministers, priests 'Presbyterian'
- 2-825** Religions without ministers, priests 'Congregational'
- 2-83** **PROPERTIES RELATING TO ORTHODOXY**
- 2-832** Ultraorthodox
- 2-833** Orthodox
- 2-834** Heterodox
- 2-835** Moderate
- 2-836** Reformed
- 2-837** Liberal
- 2-838** Reconstructed
- 2-84** **PROPERTIES RELATING TO THE STATE**
- 2-842** National religions
- 2-844** Established churches. State religions
- 2-846** Religions of specific regions or countries
Use common auxiliaries of place Table 1e for detail
 ◇ 2-846(1-773) Religions of the Third World
 ◇ 2-846(519) Religions of Korea
- 2-85** **PROPERTIES RELATING TO DEGREE OF OFFICIALDOM**
- 2-852** **Official. Mainstream**
 Philosophies. Schools of thought
Use for recognised parties within a religion
- 2-852.5**
- 2-853** **Popular. Folk religion. Popular religiosity**

- 2-853.5 Superstition
 ⇒ 133
 ⇒ 398
- 2-854 Dissident
- 2-855 Separatist
- 2-856 Unofficial. Breakaway
- 2-86 **FACTIONAL GROUPS. FACTIONS**
Groups that are a recognised part of a mainstream religion, but which form a distinctive and identifiable separate entity. There is a clear distinction between dissenting factions within a religion, and those that have broken away, which are classed at 2-856. Class here those that differ in matters of practice or observance, as distinct from those that have major differences of theology and doctrine. The latter should be regarded as heresies or schisms, and classed at 2-87
- 2-87 **SCHISMATIC GROUPS. HERESIES**
Groups that are in dispute with the major part of the faith, or do not accept significant doctrines
- 2-9 **HISTORY OF THE FAITH, RELIGION, DENOMINATION OR CHURCH**
- 21/29 **RELIGIOUS SYSTEMS. RELIGIONS AND FAITHS**
*There are numerous criteria for deciding what constitutes a religion; in this arrangement it is taken that, at the very broadest level, a religion is a system which contains some recognition of a spiritual or supernatural dimension in its view of the world.
 The fundamental arrangement is historical, but within that religions are organized in familial groups i.e. Hinduism, Jainism and Sikhism.
 Problems arise in the placing of 'new' groups that have roots in an older religion, but regard themselves as independent. This is particularly evident in the case of twentieth century movements. As a general rule, self-definition is taken as the authority. In order to assist the indexer, and to accommodate the enormous number of specialised terms in religious literature, a large number of examples of combination are given for a range of religions and faiths. It is intended that the indexer use these as a pattern for the development of the classes for all other religions as required*
- 21 **PREHISTORIC AND PRIMITIVE RELIGIONS**
- 212 **PREHISTORIC RELIGIONS**
- 213 **PRIMITIVE RELIGIONS**
In general only the containing class should be used, and no specific movements should be located here
- 22 **RELIGIONS ORIGINATING IN THE FAR EAST**
- 221 **RELIGIONS OF CHINA**
 ◇ 221-853 Folk religion of China. Popular Chinese religion
- 221.3 Taoism
- 221.5 The old State religion
- 221.7 Confucianism
- 223 **RELIGIONS OF KOREA**

3.07	ADMINISTRATIVE ARRANGEMENTS. AUTHORITIES. DEPARTMENTS <i>3.07 ≡ 35.07</i>	3.08	PERSONNEL OF AUTHORITIES. OFFICIALS. STAFF <i>3.08 ≡ 35.08</i>
3.071	Foundation. Development	3.083	Duties, obligations of officials
3.072	Relations with other organizations	3.085	Competence, powers of officials. Responsibilities. Official actions
3.076	Competence, sphere of authority. Duties. Powers	3.086	Responsibility, answerability of officials

30 THEORIES, METHODOLOGY AND METHODS IN SOCIAL SCIENCES IN GENERAL. SOCIOGRAPHY

303	METHODS OF THE SOCIAL SCIENCES	303.043	Unstructured
303.01	Theoretical aspects	303.05	Degree of systematizing
303.02	General features of research	303.052	Systematic
303.022	Qualitative	303.053	Unsystematic
303.023	Quantitative. Degree of quantification	303.06	Degree of automation
303.023.2	Categorical. Nominal	303.062	Conventional
303.023.22	Dichotomous	303.063	Mechanized
303.023.23	Cardinal	303.064	Electronic. Computer-aided
303.023.3	Ordinal	303.09	Special aspects and problems of social science models
303.023.4	Interval	303.092	Assumptions in empirical models
303.023.5	Ratio	303.092.2	Linear
303.024	Relations of quantities	303.092.3	Nonlinear (exponential, quadratic, log-linear)
303.024.2	Absolute quantitative values	303.092.4	Deterministic
303.024.3	Relative quantitative values. Proportions. Standardized values. Indices	303.092.5	Stochastic. Probabilistic. □ Discrete (binominal, Poisson-distributed, hypergeometric). Continuous (normal-distributed, t-distributed, F-distributed, chi-square-distributed). Bayesian
303.025	Empirical	303.092.6	With ML-estimators
303.026	Nonempirical	303.092.7	With other estimators
303.028	Open. Overt. Undisguised	303.092.8	Parametric
303.029	Covert. Disguised	303.092.9	Nonparametric
303.03	Degree of complexity and direction of research of the method	303.093	Kind of system in empirical models
303.031	Dimensionality	303.093.2	Closed (without external effects)
303.031.1	Unidimensional	303.093.3	Open (with external effects)
303.031.12	Quasi-unidimensional	303.093.6	Static
303.031.2	Bidimensional. Two-dimensional	303.093.7	Dynamic
303.031.3	Three-dimensional	303.094	Building empirical models
303.031.4	Multidimensional	303.094.2	Specification
303.032	Variability	303.094.3	Aggregation
303.032.1	Univariate	303.094.4	Identification
303.032.2	Bivariate	303.094.5	Estimation
303.032.4	Multivariate	303.094.6	Forecasting
303.035	Orientation	303.094.7	Simulation
303.035.2	Direction of analysis	303.094.8	Linkage
303.035.22	R-analysis type (oriented on variables)	303.1	General methodology of social research ⇒ 303.211 ⇒ 303.832
303.035.23	Q-analysis type (oriented on units)	303.2	Measurement
303.035.24	Three-mode. Three-way (simultaneous)	303.21	Theory of measurement
303.035.3	Direction of testing	303.211	Operational definition. Indicators
303.035.31	One-sided. Unilateral. Asymmetric. One-tailed	303.212	Measurement level (nominal, ordinal, interval, ratio)
303.035.32	Two-sided. Bilateral. Symmetric. Two-tailed	303.213	Discreteness and continuity of variables
303.035.33	Multi-sided. Multilateral	303.214	Measuring criteria ⇒ 303.714
303.035.4	Direction of factors		
303.035.42	Orthogonal		
303.035.43	Oblique		
303.039	Kind of control of the variables under study		
303.039.2	Partial (without indirect influences)		
303.039.3	Multiple (with multiple influences)		
303.039.4	Crossed. Multiway (with multiple effects)		
303.039.5	Canonical		
303.04	Degree of structuring		
303.042	Structured		

303.214.2	Reliability (retest, split half procedure, parallel test, inter-item consistency)	303.447.2	Nonexperimental. □ Correlation studies
303.214.3	Validity (structural, predictive, observational validity)	303.447.3	Experimental studies. □ Natural experiment.
303.214.4	Selectivity	303.448	Artificial experiment. Projective experiment
303.214.5	Degree of complexity		Method testing investigations
303.214.6	Homogeneity		⇒ 303.714
303.22	Measuring methods	303.5	Selection. Sampling
303.222	Free estimation method		◇ 303.5.01 Sampling theory
303.223	Index formation	303.51	Fixing investigation population. Universe of investigation
	⇒ 303.71	303.52	Selection methods
303.224	Scaling. Scaling models. □ Cumulative estimation. Discrimination technique. Scalogram analysis. Polarity profile	303.522	Sample size
		303.522.2	Total survey
		303.522.3	Representative sample
		303.522.4	Nonrepresentative sample
		303.523	Sample collecting
		303.523.2	Probability samples. Random samples
		303.523.3	Conscious samples. Intentional samples
303.4	Kinds of investigation. Research strategies. Investigation design	303.53	Sampling technique
303.42	Investigation methods	303.532	Sampling framework. Sampling basis. □ List sampling. Area sampling. Random walk
303.422	Biographies. Biograms		Selection of the investigating unit. Survey unit
	⇒ 303.686		
	⇒ 929		
303.423	Small-group research. □ Sociometric, genealogical investigations	303.533	
303.424	Organizational research. Institutional research	303.54	Projection methods
303.425	Survey. □ Opinion polling. Market research	303.55	Estimation of sample error
303.43	Research strategies	303.6	Survey methods
303.432	With regard to database. □ Primary, secondary investigations. Replication study	303.62	Inquiry methods. Interview. Questionnaire
303.433	With regard to scope	303.621	Kinds of inquiry
303.433.2	Individual. Case study. Monographic study	303.621.2	Degree of standardization
303.433.3	Multi-case investigation	303.621.3	Form of inquiry
303.436	Origin of data	303.621.32	Oral interview. □ Personal interview.
303.436.2	Archives. Libraries. Authorities		Telephone interview
303.436.3	Field	303.621.33	Written interview. □ Postal inquiry.
303.436.4	Laboratory		Questionnaire schedule
303.44	Investigation design	303.621.34	Answer-sheet interview
303.442	Qualitative investigations	303.621.35	Group interview. Group discussion methods
	⇒ 303.022	303.621.36	Special forms of questioning. □ In-depth interview. Motivation interview
303.442.2	Exploratory investigations	303.622	Questionnaire design. □ Open questions.
303.442.22	Descriptive investigations. Exploration of facts		Options, multiple choice questions
	⇒ 303.721	303.623	Interview strategy. □ Hard, soft interview
	⇒ 303.722	303.624	Interviewer
303.442.23	Field research. Analysis of social environment, milieu. 'Natural sociology'	303.625	Interviewee
	⇒ 303.433.2	303.626	Interview context. □ Timing. Location
	⇒ 303.686	303.627	Recording, writing up of interview. Accessories at interview
	⇒ 316.277		Sociology of the interview
303.442.3	Analytical investigations	303.628	
	⇒ 164	303.63	Observation methods
	⇒ 303.725.2	303.632	Kind of observation
303.442.4	Interpretative methods. Hermeneutic approach. Reconstructive methods. Investigation of meaning	303.632.2	Self-observation
	⇒ 316.257	303.632.3	Independent observation
	⇒ 316.277	303.632.4	Environmental observation
	⇒ 930.2		⇒ 303.688
303.443	Attendant, concomitant research. Scientific advice	303.633	Observers. □ Selection. Training
303.444	Prognostic investigations	303.634	Observation scheme
303.445	Nomologic studies. Parameter estimation	303.635	Recording the observation. □ Observation report. Technical accessories
303.446	Comparative investigations	303.64	Content analysis
303.446.2	Cultural comparison. Cross-sectional comparison. □ Intercultural comparison. Intracultural comparison	303.642	Kinds of content analysis
		303.643	Medium of content analysis
		303.643.2	Kind of medium. □ Written material. Audio material. Visual material
		303.643.3	Form of medium
303.446.3	Time comparison. □ Panel study, analysis. Trend study. Time series study. Cohort study, analysis		◇ 303.643.3:070 Newspapers as a medium
			◇ 303.643.3(044.4) Business letters, office correspondence as a medium
303.446.4	Historical comparison. Historiography	303.644	Unit of analysis
303.447	Hypothesis-testing investigations	303.645	Content analysis methods
	⇒ 303.714		◇ 303.645.063 Computerized content analysis

316.1 Object and scope of sociology

316.2

Sociological points of view and trends

The names of individual sociologists in the following subdivisions are intended only to characterise more closely the type of tendency mentioned

Denote individual sociologists and their schools of thought by 316.2A/Z (alphabetic extension - Table 1h)

316.22

Mechanistic trend

316.222

Sociological mechanists (S.C.Haret, A.J.Lotka)

316.223

Sociological physicists (Carey)

316.224

Sociological energeticists (Solvay, Bekhterev, Ostwald, Winiarski)

316.225

Mathematical sociologists (Pareto, Carli)

- 316.23 Synthetic and geographical trends**
 316.232 Synthetico-geographical trend (Le Play)
 316.233 Geographical trend (Jevons, Moore, Huntington)
- 316.24 Biological trend**
 316.242 Organicists (Lilienfeld, Schäffle, Worms, Novikov, Fouillée)
 316.243 Race theory trend (Gobineau, Lapouge, Chamberlain)
 316.244 Darwinian trend. Evolutionary theories of sociology. Historical sociology (Morgan, Bachofen, Spencer, Aron, Ginsburg)
 ⇒ 316.423.2
 316.245 Sociobiological trend. Demographic trend (Coste)
 316.246 Biopsychological trend. Instinctivists
- 316.25 Sociological trends**
 316.252 Neopositivists (Roberty)
 316.253 Pure sociology (Durkheim)
 316.254 Theory of group conflict (Gumpłowicz, Oppenheimer)
 316.255 Formal sociology. Morphological trend (Simmel, G. Richard, Von Wiese, Park, Burgess)
 316.256 Institutional trend in sociology (Gehlen, Schelsky)
 316.257 Frankfurt School. Critical theory. Hermeneutic trend (Horkheimer, Adorno, Marcuse)
 316.258 Functionalism. Structural-functional sociology. Functional-structural sociology (Merton, Parsons, Luhmann)
 316.259 Cybernetics trends, general systems theories, and game theories in sociology (K.W. Deutsch, Rappoport)
- 316.26 Marxist-Leninist sociology (Marx, Engels, Lenin)**
- 316.27 Psychological trend**
 316.272 Sociology according to certain psychological factors (Tarde, Le Bon, Sighele)
 316.273 Ethnic psychology (Lazarus, Steinthal, W. Wundt)
 316.274 Introspectivists (Müller-Freienfels)
 316.275 Behaviourist and experimental sociology. Learning theoretical trend (Skinner, Cooley, Dollard, Bandura, Opp)
 316.276 Cognitive theories (Heider, Newcomb, Festinger, H.H. Kelley, Jones, Davis).
 □ Balance theory. Consistency theory. Dissonance theory. Attribution theory. Inference theory
 316.277 Phenomenological trend. Gestalt-theoretical trend (Mauß, G.H. Mead)
- 316.28 Trends based on communication theory**
 316.282 Action theory (Max Weber)
 316.283 Role theory. Reference group theory. Exchange theory (Homans, Blau, J.W. Thibaut, H.H. Kelley)
 316.285 Conflict theory. Theories of social inequality (Coser, Dahrendorf, S.N. Eisenstadt)
 316.286 Reflexive sociology. Paradigms based on communication theory (Habermas, Eisermann, Bendix, I. Eisenstadt)
- 316.3 Social structure. Society as a social system**
 Denote persons and personal characteristics by -05... (Table 1k)
- 316.32 Global societies**
The following classification of global societies enumerates abstract, theoretical types of society. For classing concrete societies use 316.32 and the common auxiliaries of place (1/9) (Table 1e) and time "..." (Table 1g).
To class a particular society as a specimen of a special type of society, use the notation for that type and the common auxiliaries of place and time
 ◇ 316.32(493) Belgian society
 ◇ 316.323.72(439) Hungary as a socialist society
 ◇ 316.324.7(439) Hungary as an industrial society
 ◇ 316.323.82(675)"18" Nineteenth century Zaire as a colonial society
 316.322 General typologies of global societies
 316.323 Socioeconomic types of global society. Socioeconomic formations
 316.323.2 Kinship societies. Primitive society
 316.323.3 Societies of Antiquity. Slave-owning societies
 316.323.4 Asiatic despotisms
 316.323.5 Feudal societies
 316.323.6 Capitalist societies
 316.323.62 Early capitalist societies
 316.323.63 High-capitalist societies
 316.323.64 Late capitalist societies
 316.323.65 Welfare State
 316.323.7 Socialist and communist societies
 316.323.72 Socialist societies
 316.323.73 Communist societies. Classless societies
 316.323.8 Colonial and neocolonial societies
 316.323.82 Colonial societies
 316.323.83 Neocolonial societies. Postcolonial societies
 316.324 Global societies according to stages of economic development
 316.324.2 Preagricultural societies
 316.324.22 Hunting and gathering societies
 316.324.23 Horticultural societies
 316.324.3 Nomadic societies. Herding societies
 316.324.4 Fishing societies. Maritime societies
 316.324.5/7 Agrar-industrial societies
 316.324.5 Agricultural, agrarian societies
 316.324.6 Preindustrial societies
 316.324.7 Industrial societies
 316.324.8 Postindustrial societies
 316.325 Societies according to specific criteria. E.g. theocracies, mass societies
- 316.33 Basic elements and subsystems of global societies as sociological categories**
 Base and superstructure
 Subsystems and institutions
 Sociology of economic subsystems and institutions. Economic structure. Sociology of economics
 ◇ 316.334.2:338.439 Nutritional sociology

		339.986	Economic war
339.743.053	Equilibrium of exchange rates		⇒ 339.548

34 LAW. JURISPRUDENCE

The method of classification of section 34 is independent of the legislative systems of particular countries with different philosophies of law; it provides instead an arrangement and hierarchy based on generalized legal principles. Only in this way can a classification be offered that is equally applicable to any country

Legal systems valid in only part of a state may be denoted by place auxiliaries (3/9) and the form auxiliaries for legal sources (094)

◇ 34-055.2 Women and the law

◇ 347.736(494)(094.73) Bankruptcy in Swiss cantonal law

34.0...	SPECIAL AUXILIARY SUBDIVISION FOR CLASS 34 LAW. JURISPRUDENCE	340.111.5	Legal relationships
	<i>The auxiliaries listed under 34.0... are not applicable at 341.12 and 348 and their subdivisions. At some classes (e.g. 347.951) they have been adapted or extended to suit the special subject matter</i>	340.112	Ontology and structure of the law
		340.113	Legal terminology and linguistic usage
		340.114	Fundamental ideas, sources and objectives of the law. Justice. Law and power
		340.115	Methodology of law. Juridical methods ⇒ 34.06
34.01	Nature of law. Scope of law	340.116	Subdivision and classification of law.
34.02	Conditions of existence of law		Disciplines, faculties, branches of law. Legal specialities
34.021	Precedence, priority of laws	340.12	Trends in theory of law. Schools, doctrines of law. Philosophy of law. Theory of state and law
34.023	Conditions relating to subject of law		⇒ 340.15
34.025	Conditions relating to object of law		Theocratic and theological doctrines and schools
34.028	Conditions relating to form of law. □ Officially prescribed formalities. Openness of legal procedures and legal acts to the public	340.121	Doctrine of natural law. Doctrine of law of reason
		340.122	Historical schools of law
34.03	Operation, workings of law. Effects of law	340.123	Positivist and normativist schools. Pure theory of law
		340.124	Sociological and biological schools. Legal pragmatism

SOCIAL WELFARE

A large table of special auxiliaries has been provided to allow for complex numbers to be built up. Some of the examples provided are very detailed and, consequently, lengthy. This is to indicate how complex concepts can be identified, if required.

It is recommended that literature on people suffering from social welfare problems be filed under the problems. Use of the common auxiliaries Table 1k-05 is largely restricted to indicating age groups, whilst colon combination should be used for types of condition or disability, or particular causes of social problems.

On occasions it is necessary to change the standard citation order. In particular, the age group of people suffering from specified problems should be cited before the type of welfare activity applied is indicated.

Examples of this are:

364.63-053.2-73:351.755 Registration of abused children.

364.696-053.9-783.442:648.5 Home help cleaning services for the elderly.

For details of administrative arrangements in general in social welfare the special auxiliaries at 3.07/.086 and 35.07/.088.7 should be used, pending completion of the new schedule for management

◇ 364.2:613.2	Nutritional requirements. Need for food		◇ 364.324-642:364.694-022.1 Levels of invalidity allowance receivable based on degree of disability
◇ 364.2:613.31	Need for drinking water		◇ 364.324-642-26:336.72 Influence of savings on levels of invalidity allowance
		364.326	Parental insurance. Maternity, paternity insurance
		364.334	Unemployment insurance
			◇ 364.334-642-26:347.627.4 Influence of remarriage on levels of unemployment allowance

- 364.35 Old age insurance. Pensions insurance**
 ◇ 364.35-642-053 Amounts receivable linked to age
 ◇ 364.35-642-26:347.627.1 Influence of death of partner on pension level
 ◇ 364.35-646.2:662.6/.9 Grants for pensioners to meet heating costs. Grants for pensioners to meet fuel costs
 ◇ 364.35-646.3:615 Free prescribed medication for pensioners
- 364.37 Surviving dependants' insurance**
- 364.38 Child benefit insurance**
 ◇ 364.38-646.3:637.14 Free milk for children
- 364.39 Minimum income insurance**
 ◇ 364.39-64-236:331 Requirement to work. Requirement to provide service in return for minimum income allowance
- 364.4 Fields of practice in social work**
For kinds of relief service (previously at this number) see 364-78
For general works only. For particular actions applied to problems use special auxiliaries under 364-7 with problems under 364.6. Use common auxiliaries Table 1k-05 to denote work with specific age groups and/or genders or colon combination to denote work with people with particular problems, or community group work
 ◇ 364.4:159.9 Work with people with mental health problems
 ◇ 364.4:316.334.55/.56 Community welfare work
 ◇ 364.4:316.334.55 Work with rural communities
 ◇ 364.4:316.334.56 Work with urban communities
 ◇ 364.4:331 Labour welfare work
 ◇ 364.4:343.265.2 Probation services
 ◇ 364.4:61 Medical social work
 ◇ 364.4:614.8.067.3 Work with people disabled as a result of accidents
 ◇ 364.4:616.899 Work with people with learning difficulties
 ◇ 364.4-022.326.5 Emergency relief services. Disaster relief services
 ◇ 364.4-05.5/.7 Children and family services
 ◇ 364.4-053.2 Child welfare. Work with children
 ◇ 364.4-053.6 Youth welfare
 ◇ 364.4-053.9 Elderly welfare services. Work with the elderly
 ◇ 364.4-616-036.86 Work with people disabled as a result of illness
- 364.6 Social welfare issues.** □ Social problems
For persons involved in social welfare (previously at this number) see 364-4
Social issues are denoted, under each heading, in a range of identifiable concepts indicating the absence or presence of ideal conditions. To indicate degrees, if these are not represented here, use the common auxiliaries Table 1k-02. Particularly relevant are:..
 -021.142 Existence. Non-existence.
 -021.146 Presence (or not).
 -021.146.2 Present. At hand.
- 021.146.4 Absent. Lacking.
 -021.161 Available. Unavailable. Extant.
 -021.331 Whole. Complete. Full. Entire. Comprehensive.
 -021.332 Partial. Incomplete.
 -021.333 Ideal. Perfect.
 -021.351 Limited. Limits. Unlimited.
 -022.12 Light.
 -022.15 Moderate.
 -022.18 Excessive. Severe.
 -022.251 Rare. Rarity.
 -022.252 Dearth. Shortage. Insufficient. Uncommon.
 -022.253 Adequate. Sufficient.
 -022.255 Abundant. Plenteous. Common.
 -022.257 Excess. Extreme. Excessive.
 -022.258 Acute. Chronic.
In order to prevent separation of related subjects, use colon combination to indicate people suffering from particular problems as well as the issues themselves, but use Table 1k-05 to denote the age groups and/or gender. For problems applying to particular ethnic groups use common auxiliaries Table 1f. To keep international problems separate from problems at individual/community level, intercalate place auxiliaries (Table 1e) after 364. For causation use -11 (theories of causation) from the special auxiliaries listed at 364
 ◇ 364(1-773).664 Debt in developing countries
 ◇ 364.664:331.56 Debt problems of unemployed people
 ◇ 364.682.42-11-053.6 Causes of teenage homelessness
- 364.61 Opportunity**
 Social injustice. Social deprivation
 ◇ 364.612(1-21)-78-22 Preventive social work applied to urban deprivation, inner-city deprivation
 ◇ 364.612(1-21)-787.6:061.2 Provision of social clubs in inner-city areas
 ◇ 364.612(1-21)-787.6:791.7 Provision of recreation grounds, playgrounds in inner-city areas
 ◇ 364.612(1-22)-78-24 Remedial social work applied to rural deprivation
 ◇ 364.612(1-22)-787.6:725.835 Provision of community centres, village halls in rural areas
 Disadvantage. Social disadvantage. Underprivilege
 ◇ 364.614:323.1 Social disadvantage due to racism
 ◇ 364.614:81'243 Social disadvantage due to language barriers
 ◇ 364.614:323.12 Acculturation work
 ◇ 364.614'234 Promoting opportunity through social pedagogy
 Special needs
 ⇒ 37.614.2
 Equal opportunity. Social justice
- 364.62 Psychological welfare**
For helpers, welfare workers (previously at this number) see 364-4
 ◇ 364.62-47-053.2 Psychological welfare of children as carers
 ⇒ 159.9

391.7	Adornment. Ornament. Jewellery ⇒ 671.1	392.5	Marriage. Wedding. Nuptials ⇒ 27-45 ⇒ 347.62
391.75	Badges. Insignia ◇ 391.75:796 Sports badges	392.51	Wedding customs
391.8	Masks. □ Face masks. Dominoes. Party masks ⇒ 688.751	392.52	Supposed sexual right of feudal lord. Jus primae noctis. Droit du seigneur
391.9	Ornamentation of the human body and other objects	392.53	Abstinence from matrimony or sexual relations Unmarried state. Agamy ⇒ -058.832 Sexual abstinence. Celibacy
391.91	Tattooing. Body painting ⇒ 616-089.815 ⇒ 616.5-003.6	392.532	
391.92	Decorative disfigurement, mutilation. □ Earrings. Nose rings. Piercing of lips	392.534	
391.98	Ornamentation of animals, plants and objects	392.54	Forms of marriage ◇ 392.54-027.522 Group marriage Arranged marriage Endogamy and exogamy Consanguineous marriage. Marriage between kin Polygamy. □ Polyandry (plurality of husbands). Polygyny (plurality of wives) Monogamy Forced marriage Marriage by capture Marriage by purchase
391.982	Ornamentation, dressing and decking out of animals	392.541	
391.983	Ornamentation of plants	392.542	
391.984	Ornamentation of objects	392.543	
391.985	Ornamentation of buildings	392.544	
392	CUSTOMS, MANNERS, USAGE IN PRIVATE LIFE	392.545	
392.1	Rites of passage. □ Birth. Baptism. Circumcision. Puberty. Adolescence. Majority. Marriage	392.546/.547	
392.11	Prenatal customs	392.546	
392.12	Birth customs	392.547	
392.13	Couvade	392.57	Customs during marriage. □ Menstrual customs
392.14	Baptism. Naming ⇒ 27-558.3	392.6	Relations between the sexes ⇒ 176
392.15	Removal of the prepuce. Circumcision	392.61	Love. Art of love
392.16	Removal of the clitoris (clitoridectomy). 'Female circumcision'	392.62	Concubinage, common-law marriage. Morganatic marriage
392.17	Attainment of manhood. Initiation ceremonies. Puberty rituals	392.63	Ritual celibacy. Abstinence for religious reasons ⇒ 27-725
392.18	Coming of age. Declaration of majority	392.64	Promiscuity
392.2	Killing of humans ◇ 392.2-053.2 Killing of children ◇ 392.2-053.9 Killing of old people ◇ 392.2-058.57 Killing of prisoners	392.7	Friendship. Hospitality. Enmity ⇒ 177
392.24	Ritual murders. Human sacrifices. □ Head-hunting ⇒ 2-538.6:599.89	392.71	Friendship
392.27	Mutilation of sacrifices	392.72	Hospitality ⇒ 394.9
392.28	Insane killers. □ Werewolves. Vampires	392.73	Sociability. Socializing ◇ 392.73:061 Social clubs
392.3	Family life. Familial systems ⇒ 173 ⇒ 321.11	392.77	Enmity between individuals, families etc. □ Feuds. Vendettas
392.31	Kinship relations. □ Agnation. Cognation	392.8	Meals. Eating ⇒ 394.1 ⇒ 642
392.312	Patriarchy. The father of the family. The eldest of the family	392.81	Customs in preparation and consumption of food
392.313	Matriarchy	392.82	Fasts
392.317	Kinship on the mother's side. Natural kinship	392.83	Forbidden foods
392.33	Kinship by marriage ◇ 392.33-055.62 Offspring	392.85	Stimulants. Narcotics ⇒ 178
		392.86	Customs in preparation and consumption of drinks
		392.87	Geophagy. Swallowing of earth. Eating of other indigestible and peculiar substances

- 392.89 Cannibalism. Anthropophagy. Eating of human flesh
- 392.91 Names. □ Personal, family, clan, tribal names. Nicknames. Soubriquets
⇒ 81'373.23
⇒ 929
- 393 DEATH. TREATMENT OF CORPSES. FUNERALS. DEATH RITES
⇒ 614.6
⇒ 718
- 393.1 Interment. Burial
- 393.2 Cremation. Incineration. Pyres
- 393.3 Embalming. Mummification. Death masks
- 393.4 Lying in state. Death watch. Vigil. Wakes. Lyke-wakes
- 393.7 Mourning
- 393.9 Other funeral customs
- 393.92 Obsequies. Funeral processions. Cortèges
- 393.93 Death dances
- 393.94 Death prayers. Dirges. Keening
- 393.95 Sacrificial gifts at burials. Funeral offerings. Funeral feasts
- 393.98 Treatment of surviving spouse.
□ Immolation of widows (suttee)
- 394 PUBLIC LIFE. PAGEANTRY. SOCIAL LIFE. LIFE OF THE PEOPLE. □ Everyday life. Court life. Street life
- 394.1 Banquets. Public, ceremonial meals
⇒ 392.8
⇒ 642.4
- 394.2 National festivals. Folk festivals. Popular recreations
- 394.21 National festivals
- 394.23 Circuses
- 394.24 Folk entertainment
⇒ 394.3
- 394.25 Carnivals. Masquerades
- 394.26 Holidays. □ National holidays. Holidaying as social custom
⇒ 331.32
⇒ 371.235
⇒ 379.8
- 394.268 Special days and periods
- 394.268.2 Special days for the family
- 394.268.22 Mother's day. Mothering Sunday
- 394.268.3 Days honouring the dead
- 394.268.7 Special days for animals
- 394.268.8 Special days for plants and for the planting of trees
- 394.3 Games. Rounds. Dances. Balls
⇒ 793.3
⇒ 796
- 394.4 Public ceremonial
- 394.43 Coronations. Installations. Investitures
- 394.44 Receptions. State visits. Entries
- 394.46 Commemorative festivals. Annual historical commemorations, anniversaries. Jubilees.
□ Commemorative trees
- 394.48 Public events, displays etc. organized by, or associated with, organizations and societies
- 394.481 Opening ceremonies. Inaugurations
- 394.49 Public spectacles
◇ 394.49:628.974.6 Festive lighting (illuminations) as public spectacle
◇ 394.49:662.11 Pyrotechnic displays. Fireworks shows
- 394.5 Processions. Parades. Corsos. Street pageants. Marchpasts. □ Torchlight processions
◇ 394.5:355.511.44 Military marchpasts
- 394.6 Annual fairs, markets. Kermesses (kermissen)
⇒ 394.46
- 394.7 Chivalric festivals. Jousting. Tourneys
⇒ 798.256
- 394.8 Combat. Duel. Suicide
- 394.84 Duelling. Duels
- 394.86 Suicide. Hara-kiri
- 394.9 Public hospitality. International social relations
⇒ 338.48
⇒ 392.72
- 394.912 Organization of relations between different countries
◇ 394.912(44:493) Société pour les relations franco-belges
⇒ 351.88
- 394.92 Friendly relations without personal visits.
□ Correspondence, letters. Pen-friends
- 394.94 Behaviour towards particular persons.
□ Newcomers, novices, initiates. Ragging. Ducking at 'crossing the line' (equator). Catcalling. The unpopular, butts, pariahs. The popular. Homage, esteem
⇒ 371.82
⇒ 37.091.8
- 395 SOCIAL CEREMONIAL. ETIQUETTE. GOOD MANNERS. SOCIAL FORMS. RANK. TITLE
⇒ 177
⇒ 613.87
- 395.3 Social rank. Hierarchy
- 395.4 Marks and records of honour. □ Rolls of honour. Commemorative albums, tablets etc.
- 395.5 Salutation. Greeting. Leave-taking. Farewells. Hand kissing. Marks of respect. Obeisances. Bowing
- 395.6 Conversational etiquette. Mode of address. □ Second-person pronoun: familiar, formal
- 395.7 Epistolary etiquette. Polite formulae in correspondence, letters
- 395.8 Expressions of shared emotion, sympathy
- 395.82 Felicitations. Congratulations
- 395.83 Gifts
⇒ 347.472
⇒ 347.473
- 395.84 Manifestations of sympathy. Verbal comfort. Condolences. Commiserations

398	FOLKLORE IN THE STRICT SENSE	398.41	Good and evil spirits. □ Demons. Gremlins. Bugbears ⇒ 2-167.6 ⇒ 2-167.62
398.1	Popular traditions. Folk wisdom		
398.2	Stories. Narrations. Folk humour ⇒ 82-34	398.42	Ghosts. Spooks. Will-o-the-wisps etc.
398.21	Stories. Tales. □ Folk tales. Fairy tales. Fables	398.43	The elemental. □ Earth spirits. Nature sprites. Goblins. Gnomes. Fairies. Elves
398.22	Sagas. □ Mythological tales. Christian legends. Historical tales. Hero tales	398.44	Dragons
398.23	Anecdotes. Popular humour ⇒ 82-36	398.46	Giants. Ogres. Dwarfs
398.25	Jests. Buffoonery	398.47	Witches. Witchcraft. Sorcery ⇒ 133.4 ⇒ 2-545
398.3	Popular beliefs and customs. Superstitions. Old wives' tales	398.5	Folk literature. Traditional drama
398.31	Beliefs and customs concerning fire. □ Beltane fires. Solstitial fires. Pyromancy	398.51	Folk books. Chap books
398.32	Beliefs and customs concerning particular places. □ Churchyards. Ruins. Springs. Forests	398.54	Folk plays. □ Mumming. Punch and Judy ⇒ 82-292
398.33	Beliefs and customs concerning particular times and festivals ⇒ 27-564	398.6	Riddles. Conundrums. Rebuses. Traditional jokes. Mottoes, devices, popular heraldry ⇒ 82-193
398.332	High days and holidays	398.7	Dream books. Popular interpretation of dreams ⇒ 2-544.8
398.332.1	Spring festivals		
398.332.12	Easter. Easter customs. □ Easter eggs	398.8	Folksongs. Traditional songs. Shanties ⇒ 784.4 ⇒ 82-144
398.332.16	Whitsun	398.81	Patriotic songs
398.332.19	Festivals and customs at seed times. □ May customs. Maypole. Walpurgis night	398.82	Songs of nature, the seasons, the passing year
398.332.2	Summer festivals. □ Summer solstice. Midsummer day	398.83	Songs of home, family, friendship, love
398.332.3	Autumn	398.831	Children's songs. Lullabies ⇒ 784.67
398.332.33	Harvest festivals and harvest customs. Harvest Thanksgiving	398.836	Friendship songs
398.332.34	Vintage. Vintage festivals	398.837	Farewell songs
398.332.36	All Saints' Day (All Hallows, Hallowmas). Halloween. All Souls' Day	398.838	Love songs
398.332.39	Late autumn. St Martin's Day. Miscellaneous late autumn festivals	398.84	Songs of community, dance, rambling, sport. Team songs ⇒ 784.66
398.332.4	Winter festivals	398.85	Songs of status, role, occupation. □ Work songs
398.332.41	Midwinter festivals. Winter solstice and associated customs	398.86	Comic songs. Street ballads ⇒ 784.72
398.332.412	St Nicholas	398.87	Songs with narrative or historical content. Folk ballads
398.332.414	Advent	398.88	Religious folksongs. Spirituals
398.332.416	Christmas and yuletide customs. □ Christmas trees	398.9	Proverbs. Popular maxims. Folk sayings. Taunts. Gibes
398.332.42	New Year's Eve.(Feast of St Sylvester). New Year's Day	398.91	Proverbs
398.332.44	Epiphany	398.94	Witticisms. Quips
398.332.46	St Valentine's Day	398.95	Popular names for people, plants, animals, places, streets etc. ⇒ 81'373.2
398.332.47	Festivals before and after Lent. □ Carnival. Shrove Tuesday (Mardi Gras) ⇒ 394.25		
398.34	Beliefs and customs in the home, household		
398.341	The house. □ Foundation stone. Topping out. Housewarming		
398.344	The household		
398.345	Garden		
398.4	The supernatural ⇒ 133		

5 MATHEMATICS AND NATURAL SCIENCES

Class here generalities about the pure sciences and the exact or mathematical sciences (including astronomy, mechanics and mathematical physics)

◇ 5(091) History of science

◇ 5-051 Practitioners of science. Scientists

502/504	ENVIRONMENTAL SCIENCE. CONSERVATION OF NATURAL RESOURCES. THREATS TO THE ENVIRONMENT AND PROTECTION AGAINST THEM	502.2	The environment as a whole <i>For nature study, observation of nature, natural history (previously at this number) see 57.081.1</i>
502	THE ENVIRONMENT AND ITS PROTECTION	502.21	Natural resources and energy ◇ 502.21:523.9 Solar energy ◇ 502.21:621.039 Nuclear energy
502.1	The environment and society. Conservation and protection in general	502.211	Protection of the living world, the biosphere ◇ 502.211:061 Organizations. Wildlife protection associations (e.g. World Wildlife Fund, WWF) ◇ 502.211:579 Microbial kingdom ◇ 502.211:582 Vegetation. Plant kingdom ◇ 502.211:592/599(204) Aquatic wildlife
502.11	Interaction, interdependence of environment and society. Mutual benefits, etc.		
502.12	Environmental awareness. 'Green' outlook. Green issues. 'Greenness'	502.22	The man-made environment ⇒ 71/72
502.13	Conservation measures and management		
502.131	Development	502.3/.7	Parts of the environment
502.131.1	Sustainable development ⇒ 332.146.2	502.3	Atmospheric environment <i>For nature and society, nature conservation and protection in general (previously at this number) see 502.1</i> ◇ 502.3:504.5:621.43.064 Atmospheric pollution by exhaust fumes from traffic ◇ 502.3:504.5:662.6/.7 Atmospheric pollution by fossil fuels ◇ 502.3:504.7 Global warming of atmosphere ⇒ 551.5 ◇ 502.3:551.510.534 Ozone layer ◇ 502.3:551.510.534:504.12 Ozone layer depletion ◇ 502.3:551.515 Atmospheric layers ◇ 502.3:613.15 Air quality. Including: Clean air ⇒ 546.217
502.132	Improvement		
502.14	Social, administrative, legislative measures on environmental conservation ◇ 502.14:061 Organizations to promote conservation ◇ 502.14:329.63 'Green' parties		
502.15	Environment in relation to planning and development ⇒ 71	502.5	Earth's surface. Landscape. Scenery <i>For nature complex as a whole, balance, danger, damage, threat of destruction (previously at this number) see 502.2 and 504</i>
502.17	Protection of the environment in general ⇒ 620.9	502.51	Hydrospheric environment ◇ 502.51:504.5 Hydrospheric pollution. Water pollution ◇ 502.51(26) Ocean and sea environment. Including: Sea floor. Sea water ◇ 502.51(26):504.5:665.6 Oil spillage at sea ◇ 502.51(28) Freshwater environment. Inland surface ◇ 502.51(282) Fluvial environment. Including: Rivers. Streams ◇ 502.51(282.02) Groundwater environment. Including: Springs. Aquifers ◇ 502.51(282.05) Fluvio-marine environment. Including: River mouths. Estuaries ◇ 502.51(285) Lakes. Reservoirs. Ponds ◇ 502.51(285.3) Swamps. Marshes ⇒ 551.46 ⇒ 574.6
502.171	Protection, rational use and renewal of natural resources ◇ 502.171:531.62 Energy conservation ◇ 502.171:546.212 Water conservation ◇ 502.171:662.997 Conservation of geothermal energy		
502.172	Protection of endangered living elements ◇ 502.172:502.211 Protection of endangered species. 'Red data'		
502.173	Control of usage, avoidance of waste, rationing of resources		
502.174	Restoration, salvage, reclamation, rescue measures. Wasteless and low-waste technology ◇ 502.174:627.533 Land reclamation ⇒ 620.97		
502.174.1	Recycling ⇒ 628.39		
502.174.2	Use of biodegradable materials		
502.174.3	Use of renewable energy resources ◇ 502.174.3:627.8.09 Use of hydroelectric power ⇒ 502.21		
502.175	Control of environmental quality. Control of pollution ⇒ 504.5 ⇒ 628.19 ⇒ 628.39 ⇒ 628.5		

- 502.52 Lithospheric environment**
For balance, self-correcting imbalance (previously at this number) see 502.2
 ◇ 502.52:551.21:502.13 Conservation of volcanic features
 ◇ 502.52:551.312.2:502.13 Conservation of marshes, moors
 ◇ 502.52:551.435.11:502.13 Conservation of gorges, canyons
 ◇ 502.52(210):502.13 Conservation of land formations. Coasts, etc.
 ◇ 502.52(23):502.13 Conservation of mountains, hills, slopes
- 502.521 Soil
 ⇒ 631.4
- 502.6 Glacial environment.** □ Ice. Snow
For protection of inanimate nature, landscape (previously at this number) see 502.17
 ⇒ 551.32
- 502.7 Earth's interior**
For protection of animate nature, wildlife conservation and protection (previously at this number) see 502.172
 ◇ 502.7:662.765.4 Conservation of oil deposits
- 504 THREATS TO THE ENVIRONMENT**
For environment science, environmentology (previously at this number) see 502
- 504.1 Direct damage. Depredation. Threat of depredation**
- 504.11 Mass depredation, despoliation. Destruction**
- 504.12 Depletion or exhaustion by over-exploitation or misuse**
 ◇ 504.12:502.7 Depletion of deposits
 ◇ 504.12:662.66 Depletion of coal deposits
 ◇ 504.12:502.7:662.765.4 Depletion of oil deposits
 ◇ 504.12:502.7:662.767 Depletion of natural gas reserves
 ◇ 504.12:639.2.058 Overfishing
- 504.121 Erosion
 ◇ 504.121:551.311.21 Erosion by flowing water
- 504.122 Deforestation
- 504.123 Desertification
- 504.2 Accidental damage by a natural or unknown agent**
 ◇ 504.2:614.84 Damage by fire (especially open-air fire)
- 504.3 Damage by a known natural or biological agent**
For atmospheric environment (previously at this number) see 502.3
 ◇ 504.3:632.5 Plant depredation. Including: Weeds. Epiphytes
 ◇ 504.3:632.6/.7 Animal depredation. Including: Vermin attack. Stampede
 ⇒ 582
 ⇒ 59
- 504.35 Genetic contamination**
 ◇ 504.35:599.742.73 Genetic contamination of Felidae spp., e.g. of wild cat *Felis silvestris* by hybridization with feral domestic cat *Felis catus*
 ⇒ 575.222.7
- 504.4 Damage from natural causes. Natural disasters. Natural hazards**
For hydrospheric environment (previously at this number) see 502.51 and 556. For water pollution see 502.51:504.5
 ◇ 504.4:551.21 Volcanic damage
 ◇ 504.4:551.515.3 Hurricane damage
 ◇ 504.4:556.166 Flood damage
 ◇ 504.4:556.167 Drought damage
- 504.5 Damage from harmful materials. Pollution.** □ Persistent organic pollutants (POPs). Persistent, toxic, bioaccumulative substances (PTBs)
For lithospheric environment (previously at this number) see 502.52, 551.4
 ◇ 504.5:551.577.13 Pollution by acid rain
 ◇ 504.5:628.3 Pollution by sewage
 ◇ 504.5:628.4.047 Pollution by radioactive waste
 ◇ 504.5:661.16 Pollution by pesticides
- 504.6 Damage from physical factors.**
 □ Effects of vibration, noise, heat
 ◇ 504.6:534.322.3 Damage caused by noise
- 504.61 Damage by man to the environment**
 ◇ 504.61:355.01 Damage caused by war
 ◇ 504.61:62 Damage caused by engineering works
 ◇ 504.61:69 Damage caused by building works
- 504.7 Global warming. 'Greenhouse effect'.**
 □ Effects of 'greenhouse gases'
For biospheric environment (previously at this number) see 502.211
 ◇ 504.7:582.26/.27 Algal blooming
- 504.8 Nuclear winter**
- 504.9 Wilful, wanton human damage to the environment. Vandalism**

51 MATHEMATICS

- | | |
|--|--|
| <p>51-3 COMPUTATION TECHNIQUES.
 □ Calculations. Programs. Devices</p> <p>51-32 Calculation without aids</p> <p>51-33 Use of tables
 ⇒ 519.66</p> | <p>51-35 Use of mechanical, graphical and other devices. □ Slide rules. Nomograms
 ⇒ 519.67</p> <p>51-37 Use of calculators, computers in mathematics
 ⇒ 004</p> |

51-7	MATHEMATICAL STUDIES AND METHODS IN OTHER FIELDS OF KNOWLEDGE. □ Scientific mathematics. Actuarial mathematics Denote the field by :... ⇒ 519.862	510.65	Logico-mathematical theories. □ Formal arithmetic. Formal number theory
51-8	MATHEMATICAL GAMES AND RECREATIONS	510.66	Inference search and decision problems in logical and logico-mathematical calculi ⇒ 519.226
510	FUNDAMENTAL AND GENERAL CONSIDERATIONS OF MATHEMATICS	510.67	Theory of models ⇒ 519.86
510.2	Foundations of mathematics	510.8	General mathematical systems
510.21	General philosophical considerations. Critical aspects. Logical antinomies ⇒ 1	511	NUMBER THEORY
510.22	Set theory. Set theoretic approach	511.1	Arithmetic. Elementary number theory
510.222	Naive set theory	511.11	Construction of number systems (natural numbers, integers, real numbers, complex numbers). Number notations
510.223	Axiomatic set theory. Axiomatization of analysis	511.12	Integers and their manipulation. □ Addition. Subtraction. Multiplication. Division
510.225	Descriptive set theory ⇒ 515.128 ⇒ 517.517	511.13	Factors. Fractions. Ratios. Proportions. Percentages ⇒ 511.172
510.227	Theory of order types and of ordinal and cardinal numbers	511.14	Roots and their extraction. Irrationals and other incommensurables (elementary treatment). Surds. Rationalization. Imaginaries. Complex numbers ⇒ 511.2
510.23	Formalism (mathematical aspects)	511.17	Elementary number theory
510.24	Intuitionism (mathematical aspects)	511.172	Multiplicative structure of the ring $\mathbb{Z}$ of integers (including divisibility, least common multiple, most common divider, congruences, power residue, quadratic residue) ⇒ 511.13
510.25	Constructive approach. Constructive mathematics	511.174	Arithmetic functions (elementary theory)
510.26	Logical positivism ⇒ 165.731	511.176	Number sequences (including Faray sequences). Special numbers and polynomials (including Bernoulli numbers and polynomials)
510.27	Logical semantics. Semantic antinomies ⇒ 519.767	511.178	Combinatorial number theory (including elementary methods of partitions) ⇒ 511.344 ⇒ 519.1
510.5	Algorithms. Computable functions	511.2	Algebraic number theory ⇒ 511.14 ⇒ 511.331 ⇒ 511.38 ⇒ 511.522 ⇒ 511.525 ⇒ 511.8 ⇒ 512.62
510.51	Theory of algorithms: general considerations ⇒ 519.712	511.22	Local fields
510.52	Algorithmic complexity	511.221	Multiplicative group and ring of integers of local field as Galois modules
510.53	Algorithmic problems. Theories of hierarchies ⇒ 512.54.05	511.222	Filtrations and ramification
510.54	Algorithmic set theory	511.223	Local class field theory. Reciprocity laws
510.56	General theory of calculi	511.224	Galois representations for local fields ⇒ 512.547
510.57	Computable, recursive functions	511.225	Non-Archimedean analysis ⇒ 512.7 ⇒ 517
510.6	Mathematical logic ⇒ 16	511.225.1	p-adic analytic functions ⇒ 517.53
510.62	Logical languages. Logico-object languages	511.225.2	p-adic Banach algebras ⇒ 517.986.2
510.63	Logical theories. Logico-object theories. Classical logical systems	511.225.3	Special p-adic functions ⇒ 517.58
510.633	Propositional logic (and calculus) ⇒ 512.563	511.23	Algebraic number fields
510.635	Predicate logic (and calculus). □ Theories of types	511.231	Isolated questions of algebraic number fields theory
510.64	Nonclassical, formal systems of logic	511.232	Asymptotic distribution of fields
510.643	Modal logics	511.233	Discriminants of algebraic number fields
510.644	Multiple-value logics		
510.645	Formalization of traditional logics. □ Syllogistics		
510.646	Inductive logic ⇒ 162.3		
510.647	Probabilistic logic ⇒ 519.21		

- 511.234 Divisor class group. Divisor class number
 511.235 Special fields. $\square$ Low-degree fields. Parametric theory of fields
 511.236 Class field theory. $\square$ Abelian and cyclotomic fields. Abelian extensions of quadratic fields. Fields with complex multiplication. Gamma (G) extensions of fields. Brauer group of algebraic number fields
 511.237 Non-Abelian generalizations of class fields theory
 511.238 Galois theory of algebraic number fields
 $\Rightarrow$ 512.623.2
 511.24 Algebraic function fields of one variable over finite field
 $\Rightarrow$ 512.772
 511.26 Special algebraic numbers (including PV-numbers)
 511.3 Analytic number theory
 $\Rightarrow$ 511.524
 511.31 Elementary methods in analytic number theory
 $\Rightarrow$ 511.337
 511.313 Distribution of primes (elementary methods)
 511.315 Sequences. Densities of sequences. Shnirelman method
 511.317 Estimates on arithmetic functions. Extremal values of arithmetic functions
 511.32 Estimates on trigonometric sums and character sums. $\square$ Gauss sums. Klosterman sums. Dedekind sums. Weyl sums
 511.33 Multiplicative number theory
 $\Rightarrow$ 511.38
 511.331 Arithmetic Dirichlet series. $\square$ Zeta function. Dirichlet L-function. Dedekind L-function. Artin L-function
 $\Rightarrow$ 511.2
 $\Rightarrow$ 512.75
 $\Rightarrow$ 517.537.6
 511.333 Distribution of primes. $\square$ Distribution of primes in algebraic number fields
 511.333.2 Distribution of primes in commutative semigroups
 511.335 Dirichlet series and asymptotics of number functions
 511.337 Sieve methods. Large sieve method
 511.338 Lattice points in regions
 511.34 Additive number theory. Analytic methods
 $\Rightarrow$ 511.524
 511.344 Partitions
 $\Rightarrow$ 511.178
 $\Rightarrow$ 519.116
 511.346 Waring problem. Additive equations and systems
 511.348 Goldbach problem. Additive equations and systems on primes
 511.35 Asymptotics and estimates of number functions
 511.352 Multiplicative and additive functions
 511.38 Automorphic forms
 $\Rightarrow$ 511.2
 $\Rightarrow$ 511.33
 $\Rightarrow$ 512.7
 511.381 Automorphic forms of one variable. Modular forms of one variable
 511.382 Hilbert modular forms
 511.383 Siegel modular forms
 511.384 General approach to automorphic forms.
 $\square$ Representation-theoretic methods. Trace formula
 $\Rightarrow$ 512.817
 $\Rightarrow$ 515.178
 $\Rightarrow$ 517.986
p-adic automorphic forms
 511.386
 511.4 Diophantine approximations and inequalities. Theory of transcendental numbers. Geometry of numbers
 511.41 Continued fractions. Generalizations of continued fraction algorithms
 $\Rightarrow$ 511.72
 511.42 Diophantine approximations: general theory
 $\Rightarrow$ 511.46
 511.43 Analytic theory of Diophantine inequalities (circular method). Fractional parts. Uniform distributions. Applications to numerical analysis
 511.44 Approximation by rational and algebraic numbers to algebraic numbers (including Thue inequality and its generalizations)
 $\Rightarrow$ 511.523
 511.46 Theory of transcendental numbers
 $\Rightarrow$ 511.42
 511.462 Irrationality and linear independence of numbers, estimates of their measures
 511.464 Transcendence and algebraic independence of numbers, estimates of their measures
 511.48 Geometry of numbers
 511.5 Diophantine equations. Theory of forms
 511.52 Algebraic Diophantine equations
 $\Rightarrow$ 512.75
 $\Rightarrow$ 512.774
 511.522 Algebraic number theory methods in Diophantine equations. Norm equation.
 $\square$ Cyclotomic fields and last Fermat theorem
 $\Rightarrow$ 511.2
 511.523 Diophantine approximation methods in Diophantine equations (including Thue method and its generalizations)
 $\Rightarrow$ 511.44
 511.524 Analytic theory of Diophantine equations
 $\Rightarrow$ 511.3
 511.525 Equations over local number fields and rings.
 $\square$ Approximation of their solutions.
Local-global results
 $\Rightarrow$ 511.2
 $\Rightarrow$ 512.74
 511.526 Mathematical logic methods in Diophantine equations (including decidability, denumerability, enumeration of solutions)
 $\Rightarrow$ 510.65
Special Diophantine equations
 511.528
 511.53 Nonalgebraic Diophantine equations
 511.55 Theory of quadratic forms
 $\Rightarrow$ 512.647
 511.57 Theory of higher-degree forms and systems of forms
 $\Rightarrow$ 512.647
 $\Rightarrow$ 512.75
 $\Rightarrow$ 512.772
 $\Rightarrow$ 512.774

511.7	Metric number theory. Probabilistic number theory	512.536.7	Topological semigroups. $\square$ Compact and connected semigroups
511.72	Metric number theory $\Rightarrow$ 511.41	512.538	Various generalizations of associativity
511.75	Probabilistic number theory	512.54	Groups. Group theory

511.82	Arithmetic of matrices	512.54.03	Elementary theory of various classes of groups
511.84	Arithmetic of quaternions	512.54.05	Algorithmic problems in group theory. The word problem
511.86	Arithmetic of central simple algebras	512.541	Abelian groups
511.88	Arithmetic of general algebras and rings	512.541.1	Purity and its generalizations. $\square$ Neatness. Algebraically compact groups
512	ALGEBRA	512.541.2	High subgroups. $\square$ E-groups
512.1	Elementary algebra: operations, formulae	512.541.3	Direct and subdirect sums. $\square$ Restricted groups
512.12	Addition. Subtraction. Multiplication. Division. Progressions	512.541.4	Extensions of Abelian groups. $\square$ Splitting of mixed Abelian groups
512.13	Identities and inequalities	512.541.5	Mappings of a group into itself and into other groups. $\square$ Automorphisms. Endomorphisms. Characteristic subgroups. Homomorphic images of a group. Equivalent Abelian groups. Quasi-isomorphisms
512.14	Binomial formula. Sum of powers of first n numbers etc. Powers of polynomials	512.541.6	Primary Abelian groups
512.5	General algebra	512.541.7	Torsion-free Abelian groups
512.53	Semigroups	512.541.8	Systems of generators. Factorization
512.531	Semigroups with finiteness conditions	512.542	Finite groups
512.532	Generating sets, relations and identities of semigroups	512.542.1	Generators and defining relations
512.532.2	Free semigroups, defining relations	512.542.2	Automorphisms of finite groups
512.532.3	Commutative semigroups	512.542.3	Finite p-groups
512.532.5	Idempotent semigroups	512.542.4	Finite solvable groups
512.533	Equivalences and complexes in semigroups. Homomorphisms	512.542.5	Finite simple groups. $\square$ Subgroups of nonsolvable groups
512.533.1	One-side regular equivalences	512.542.6	Arithmetic structure and normal structure of finite groups. $\square$ Extensions of finite groups. Normal series in finite groups. Sylow theorems. Factorizations. Normal complements
512.533.2	Homomorphisms of semigroups. $\square$ Congruences. Endomorphisms. Automorphisms. Correspondences. Products. Bands	512.542.7	Permutation groups $\Rightarrow$ 519.115.1
512.533.4	Special elements and complexes in semigroups	512.543	Relations between elements of groups
512.533.5	Ideals of semigroups. $\square$ Ideal equivalences. Homogroups	512.543.1	Systems of generators
512.533.7	Subsemigroups	512.543.2	Varieties of groups. $\square$ Identity relations
512.533.8	Lattices of subsemigroups, ideals and congruences of semigroups	512.543.5	Operations on groups. $\square$ Free, direct, regular, wreath products
512.534	Semigroups of transformations	512.543.7	Equations in groups. Embedding theorems in group theory. $\square$ Adjunction problem. Complete groups and completions
512.534.1	Semigroups of multivalued transformations (binary relations)	512.544	Relations between subgroups. Generalized solvable groups and finiteness conditions
512.534.2	Semigroups of single-value transformations	512.544.2	Lattices of subgroups. $\square$ Splitting of groups
512.534.3	Representation of semigroups by transformations	512.544.3	Normal series and systems. $\square$ Radicals in groups
512.534.4	Restrictive semigroups of mappings	512.544.4	Characteristic subgroups, automorphisms, endomorphisms
512.534.5	Semigroups of transformations of sets equipped with structures	512.544.5	Locally finite groups
512.534.7	Matrix semigroups. Linear semigroups	512.544.7	Approximations of groups
512.535	Inverse semigroups (generalized groups). $\square$ Complexes. Homomorphisms. Regular semigroups. Semiheaps and generalized heaps	512.545	Ordered groups
512.536	Semigroups with additional structures	512.546	Topological groups
512.536.1	Semigroups with operators. Omega semigroups	512.546.1	General theory of topological groups
512.536.2	Connection with theory of rings. Multiplicative semigroups of rings	512.546.2	Abelian topological groups
512.536.4	Semigroups with involution	512.546.3	Locally compact groups
512.536.5	Quasi-ordered and ordered semigroups. $\square$ Residual semigroups	512.546.4	Representations of topological groups
		512.546.6	Relations between subgroups in topological groups. Finiteness and related conditions
		512.546.8	Generalizations of topological groups
		512.547	Linear representations of abstract groups. Group characters
		512.547.2	Representations of finite groups
		512.547.4	Representations of infinite groups
		512.548	Generalizations of groups. Groupoids. $\square$ Quasigroups

- 512.55 Rings and modules**
 512.552 Associative rings and algebras
 512.552.1 Structures of rings
 512.552.2 Rings with chain conditions. $\square$ Artinian rings. Noetherian rings. Quasi-Frobenius rings
 512.552.3 Rings with conditions on ideals or subrings.
 $\square$ Skew fields
 512.552.4 Defining and identity relations in rings. Operations on rings
 512.552.5 Embeddings of rings. $\square$ Quotient rings
 512.552.6 Extensions of rings
 512.552.7 Semigroup and group rings
 512.552.8 Representations of rings
 512.553 Modules. $\square$ Homological classification of rings
 512.554 Nonassociative rings and algebras
 512.554.3 Lie rings. Lie algebras
 $\Rightarrow$ 512.81
 512.554.5 Alternative rings and closely related rings
 512.554.7 Jordan rings and algebras
 512.555 Ordered rings and modules
 512.556 General theory of topological rings, modules, fields
 $\Rightarrow$ 517.986.2
 512.558 Generalizations of rings

512.56 Lattices, including Boolean rings and algebras
 512.562 Partially ordered sets
 512.563 Boolean rings and algebras
 $\Rightarrow$ 517.987.3
 512.565 Types of lattice
 512.565.2 Distributive lattices
 512.565.3 Dedekind lattices and similar lattices
 512.565.6 Complemented lattices
 512.565.8 Complete lattices
 512.567 Representations of lattices
 512.568 Generalizations of lattices
 512.568.2 Semilattices
 512.568.3 Noncommutative lattices
 512.568.5 Multilattices

512.57 Universal algebras. Free algebras
512.58 Categories. Category theory
 $\Rightarrow$ 517.983.8
 512.581 General considerations of category theory.
 $\square$ Brandt groupoids. Ringoids. Inductive categories
 512.582 Functors
 512.583 Representations of categories
 512.585 Abelian categories
 512.587 General theory of species of structures (according to Ehresmann)

512.6 Special branches of algebra
512.62 Fields. Polynomials
 512.622 Polynomials, including binomials and prime factors
 512.623 General field theory
 512.623.2 Extensions of fields. $\square$ Derivations in fields. Galois extensions
 512.623.3 General Galois theory
 512.623.4 Valuations of fields
 512.623.5 Ordered fields
 512.624 Finite fields
 512.624.2 Polynomials over finite fields
 512.624.3 Equations and systems of equations over a finite field
 512.624.5 Linear sequences over a finite field
 512.624.7 Perfect difference sets
 512.628 Differential algebra. Difference algebra

512.64 Linear and multilinear algebra
 512.642 Vector spaces. Vector space theory
 512.643 Matrices and linear mappings. Matrix theory
 512.643.2 Determinants and their generalizations
 512.643.4 Matrix equations
 512.643.5 Eigenvalues of matrices
 512.644 Systems of linear equations and inequalities
 512.647 Multilinear algebra. Forms
 $\Rightarrow$ 511.55
 $\Rightarrow$ 511.57

512.66 Homological algebra
 512.662 Chain complexes. $\square$ Filtrations. Exact couples. Spectral sequences
 512.664 Derived functors. $\square$ Deformations of algebraic structures
 512.667 Algebraic analogues of various constructions from topology and algebraic geometry

512.7 Algebraic geometry
512.71 Commutative rings and algebras. Local theory. Foundations of algebraic geometry
 512.711 General commutative ring theory
 $\Rightarrow$ 512.55
 $\Rightarrow$ 512.62
 512.712 Valuations on commutative rings and theory of divisibility
 512.713 Arithmetic rings. Dedekind and Prüfer rings
 512.714 Polynomial rings
 512.715 Modules over commutative rings
 $\Rightarrow$ 512.553
 512.717 Local algebra. Local theory

512.72 Structure and variations of algebraic varieties. Fibre bundles. Vector bundles. Fibrations
 512.721 Moduli of algebraic varieties
 512.722 Structure of families. Picard varieties
 512.723 Algebraic vector bundles
 512.725 Algebraic fibrations with degenerate fibres

512.73 Cohomology theory of algebraic varieties and schemes
 512.732 Algebraic sheaves and cohomology with coefficients therein
 512.734 Cycles: intersection theory, equivalence
 512.736 Serre cohomology. K-theory
 512.737 Grothendieck cohomology and topology

512.74 Algebraic groups
 512.741 Formal groups
 512.742 Abelian varieties and schemes. $\square$ Arithmetic of elliptic curves
 512.743 Linear algebraic groups
 512.745 Algebraic groups of transformations
 512.747 Pro-algebraic groups and group schemes

512.75 Arithmetic problems of algebraic varieties.
 $\square$ Rationality questions. Zeta-functions

512.76 Birational geometry. Mappings etc.
 512.761 Singularities. Singular points of algebraic varieties
 512.763 Linear systems and rational mappings
 512.765 Modifications and the problem of minimal models

512.77 Algebraic curves. Algebraic surfaces. Three-dimensional algebraic varieties
 512.772 Algebraic curves
 512.774 Algebraic surfaces
 512.776 Three-dimensional algebraic varieties

512.78 Analytic spaces on arbitrary complete normed fields
 $\Rightarrow$ 515.17

512.81 Lie groups
 $\Rightarrow$ 512.554.3

- 512.812 General Lie group theory. □ Properties, structure, generalizations of Lie groups and Lie algebras
- 512.813 Special classes of Lie groups. □ Compact, semisimple, solvable, nilpotent Lie groups and Lie algebras
- 512.814 Continuous subgroups of Lie groups. □ Cartan subgroups
- 512.815 Linear representations of Lie groups
- 512.816 Lie transformation groups. □ Homogeneous spaces
- 512.817 Discrete subgroups. Discrete transformation groups
⇒ 511.384

 514.764 Classical spaces with connections and their generalizations
 514.764.2 Riemannian and pseudo-Riemannian spaces
 514.764.21 General theory of Riemannian and pseudo-Riemannian spaces
 514.764.22 Special types of Riemannian space.
 $\square$ Reducible, recurrent, symmetric Riemannian and pseudo-Riemannian spaces. Einstein spaces
 514.764.25 Mappings of Riemannian and pseudo-Riemannian spaces
 514.764.27 Submanifolds of Riemannian and pseudo-Riemannian spaces. $\square$ Hypersurfaces
 514.764.3 Spaces with an affine connection
 514.764.3 $\equiv$ 514.764.2
 514.764.32 Special types of space with an affine connection. $\square$ Weyl spaces
 514.764.4 Spaces with a projective connection
 514.764.4 $\equiv$ 514.764.2
 514.764.5 Spaces with a conformal connection
 514.764.6 Spaces with a symplectic connection
 514.764.7 Spaces with a Euclidean, pseudo-Euclidean or generalized Euclidean connection
 514.765 Geometry of homogeneous spaces. Lie group geometry
 514.765.1 Invariant infinitesimal structures in homogeneous spaces. $\square$ Holonomy groups
 514.765.2 Vector and tensor fields in homogeneous spaces
 514.765.7 Integral geometry
514.77 Differential geometry of submanifolds in the large and of metrizable manifolds
 514.772 Differential geometry of submanifolds in the large. Nonregular submanifolds
 514.772.2 Geometry in the large of curves and surfaces in Euclidean space
 514.772.3 Images in the large
 514.774 Geometry of metrizable manifolds. Minkowsky geometry. Hilbert geometry. Geometry of geodesics
 514.774.2 Minkowsky geometry
 514.774.4 Hilbert geometry
 514.774.8 Geometry of geodesics
514.8 Geometric study of objects of mechanics and physics
514.82 Geometric questions and methods in relativity theory. Geometric questions of cosmology, of unified field theory etc.
514.83 Geometric study of fields of physical objects
514.84 Geometric methods in quantum mechanics and in the theory of elementary particles
514.85 Geometric methods in general mechanics
514.86 Geometric methods in mechanics of continuous media. $\square$ In the theory of shells
514.87 Geometric questions and methods in crystallography
514.88 Geometric questions and methods in optics
515.1 Topology
515.12 General topology
 515.122 Topological spaces
 515.122.2 Axiomatic theory of topological spaces.
 $\square$ Compact spaces. Paracompact spaces. k-spaces
 515.122.3 Nonaxiomatic theory of topological spaces.
 $\square$ Continuous images of given spaces. Dyadic compacta
 515.122.4 Topological properties of spaces with supplementary structure and topological transformation groups
 515.122.5 Construction of topological spaces. Operations on topological spaces
 515.122.8 Generalizations of topological spaces
 515.123 Uniform spaces. Proximity spaces
 515.123.2 Axioms of uniform and proximity spaces
 515.123.4 Uniform spaces. Uniformly continuous mappings
 515.123.5 Proximity spaces

- 515.123.7 Comparison of topologies, uniformities and proximities
- 515.124 Metric spaces
- 515.124.2 Axioms and generalizations of metric spaces
- 515.124.3 Topological properties of metric spaces
- 515.124.4 Metric properties of metric spaces
- 515.124.5 Classes of metric spaces defined by topological properties
- 515.124.6 Classes of metric spaces defined by extrinsic conditions (imposed on possible imbedding spaces)
- 515.125 Topology of Euclidean spaces
- 515.126 Continuous mappings
- 515.126.2 Special types of continuous mapping. $\square$ Open, closed mappings. Perfect mappings. Monotone mappings
- 515.126.4 Fixed points and coincidences
- 515.126.8 Generalizations of continuous mappings
- 515.127 Dimension. Other numerical topological invariants
- 515.127.1 Dimension theory
- 515.127.2 Dimension-type invariants
- 515.128 Descriptive set theory of topological spaces
 $\Rightarrow$ 510.225
 $\Rightarrow$ 517.517
- 515.14 Algebraic topology**
- 515.142 General theorems on fundamental categories and functors
- 515.142.2 General topological categories. Categories whose objects are topological spaces subject to various general restrictions, and whose morphisms are either continuous mappings or homotopy classes of such mappings. Other closely related categories
- 515.142.21 Homology and cohomology groups of spaces: definitions, basic properties. Axiomatic questions
- 515.142.22 Study of topological spaces and continuous mappings by homological methods.
 $\square$ Homological dimension theory. Homological theory of fixed points and coincidence points
- 515.142.23 Homology and cohomology with non-Abelian coefficients
- 515.142.25 Homotopy and cohomotopy groups: definitions, basic properties. Axioms etc.
- 515.142.27 Functors with values in general topological categories (operations on topological spaces)
- 515.142.3 Polyhedral categories. Categories whose objects are polyhedra
- 515.142.32 CW-complexes
- 515.142.33 Simplicial complexes (triangulations). Simplicial schemes
- 515.142.4 Categories approximating to general topological and polyhedral categories
- 515.142.42 Categories whose morphisms are stable mappings or homotopy classes of such mappings. Categories of spectra. $\square$ Bordism. Cobordism
- 515.142.44 Categories of semi-exact functors
- 515.142.5 Simplicial sets. $\square$ Simplicial spectra
- 515.143 Homotopy theory: basic problems
- 515.143.2 Decompositions of spaces and mappings.
 $\square$ Moore-Postnikov systems. Postnikov invariants. Lyusternik-Shnirelman categories
- 515.143.3 Theory of obstructions. General classification and extension theorems for continuous mappings and cross-sections
- 515.143.5 Cohomology operations
- 515.145 Spaces with various additional general properties or derived by various general constructions
- 515.145.2 Fibre spaces. Fibre bundles. $\square$ Spectral sequences. General theorems on vector bundles
- 515.145.3 Spaces with operators
- 515.145.5 Spaces with multiplication (H-spaces). Loop spaces
- 515.145.6 Spaces with comultiplication and suspensions
- 515.145.8 Spaces with only a finite number of non-homotopy groups. $\square$ Eilenberg-MacLane spaces
- 515.146 Concrete spaces. Computation of homotopy invariants
- 515.146.2 Computation of homotopy groups
- 515.146.3 Computation of homology and cohomology groups
- 515.146.5 Computation of K-functors, of J-functors
- 515.146.6 Computation of bordism and cobordism groups
- 515.148 Isotopy theory
- 515.16 Topology of manifolds**
- 515.162 Low-dimensional manifold topology.
 $\square$ Topological surfaces. Topological 3-manifolds, 4-manifolds. Knots. Links. Braids
- 515.163 Topological manifolds. $\square$ Microbundles. Imbeddings. Immersions
- 515.164 Topology of smooth and piecewise linear manifolds
- 515.164.2 Classification of smooth and piecewise linear manifolds
- 515.164.3 Fibrations of smooth manifolds. Fibre bundles with smooth manifolds as bases
- 515.164.6 Smooth and piecewise linear imbeddings and immersions of manifolds
- 515.164.8 Groups acting on smooth and piecewise linear manifolds
- 515.165 Topology of smooth manifolds provided with additional structure. $\square$ Kähler manifolds. Riemann manifolds
- 515.168 Differential and integral operators on manifolds
- 515.17 Analytic spaces**
 $\Rightarrow$ 512.78
 $\Rightarrow$ 517.547.7
- 515.171 General theory of complex and real analytic spaces
- 515.172 Analytic mappings and constructions of complex spaces
- 515.172.2 Holomorphic mappings of complex spaces
- 515.172.3 Plurisubharmonic functions, pseudoconvex and pseudoconcave domains and their generalizations. $\square$ Levi problem
- 515.172.4 Meromorphic functions and mappings
- 515.172.5 Multivalent analytic functions
- 515.172.6 Quotient spaces of complex spaces
- 515.172.7 Analytic coverings
- 515.172.8 Modifications of complex spaces
- 515.173 Complex spaces of one, two and three dimensions
- 515.173.2 One-dimensional complex manifolds
- 515.173.4 Complex surfaces
- 515.173.6 Three-dimensional complex spaces
- 515.174 Classes of complex spaces defined by global conditions. $\square$ Holomorphically convex and complete spaces
- 515.175 Generalizations of analytic spaces. $\square$ Banach analytic spaces. Partially analytic spaces
- 515.176 Holomorphic fibre spaces
- 515.177 Complex spaces with a group of automorphisms
- 515.178 Automorphic functions
 $\Rightarrow$ 511.384

 519.172 Particular classes of graphs. Trees
 519.172.1 Trees
 519.172.2 Planar graphs
 519.172.3 Digraphs. Tournaments
 519.172.4 Regular graphs
 519.172.5 Bipartite graphs
 519.173 Topological and metric problems of graph theory. □ Connectivity. Planarity
 ⇒ 515.14
 519.174 Structural properties of graphs. Colourings
 519.174.1 Graphical partitions
 519.174.2 Walks in graphs
 519.174.3 Coverings and packings in graphs
 519.174.5 Factorization of graphs
 519.174.7 Colourings of graphs
 519.175 Classification and enumeration of graphs and digraphs
 519.176 Extremal problems of graph theory
 519.177 Matrix methods in graph theory. Spectral graph theory
 519.178 Algorithmic questions of graph theory
 ⇒ 519.16
 519.179 Generalizations of graphs
 519.179.1 Hypergraphs
 519.179.2 Nets
- 519.2 Probability. Mathematical statistics**
519.21 Probability theory. Stochastic processes
 519.211 Foundations and axioms of probability theory
 519.212 Abstract probability theory
 519.212.2 Combinatorial probabilities
 519.212.3 Geometrical probabilities
 519.213 Probability distributions and densities.
 □ Normal distribution. Characteristic functions. Measures of dependence. Infinitely divisible laws. Stable laws
 519.213.1 Normal distribution
 519.213.2 Characteristic functions, moments, semi-invariants and other characteristics
 ⇒ 517.5
 519.213.3 Measures of dependence
 519.213.5 Infinitely divisible laws
 519.213.7 Stable laws
 519.214 Limit theorems
 519.216 Stochastic processes in general
 519.216.3 Prediction theory
 519.216.5 Stopping times
 519.216.8 Martingales
 519.217 Markov processes
 519.217.1 General theory of Markov processes.
 □ Properties of sample functions
 Markov chains. Processes with finite or countable set of states
 Processes with independent increments
 Diffusion processes and their applications
 Additive functionals. Probabilistic potential theory
 ⇒ 517.982.26
 Transformation of Markov processes
 Boundary theory for Markov processes
 Controlled Markov processes
 Special stochastic processes
 Branching and epidemic processes
 Renewal processes
 Point random processes
 Gaussian processes and measures
 Stationary and harmonizable sequences and processes
 Extrapolation. Interpolation. Filtration
 Ergodic theorems
 Random functions of several variables
- 519.22 Statistical theory. Statistical models. Mathematical statistics in general**
 ⇒ 311
 Foundations of statistical theory
 Statistical dispersion and relationships.
 Statistical mean, deviations etc.
 Sufficiency. Sufficient statistics
 Distribution theory. □ Asymptotic theory.
 Characterization and structure theory
 Inference and decision theory. □ Likelihood.
 Bayesian theory. Fiducial probability
 ⇒ 510.66
- 519.23 Statistical analysis. Inference methods**
 Parametric methods
 Estimation of parameters and functionals
 Point estimation
 Confidence regions, tolerance, limits
 Hypothesis testing. □ Criteria. Discrimination
 Variance analysis. Covariance analysis
 Correlation analysis. Regression analysis
 Ranking and selection
 Paired and multiple comparisons
 Nonparametric methods
 519.234 ≡ 519.233.2/6
 Order statistics
 Paired comparison methods
 Statistics of dependent variables. Contingency tables
 Multivariate statistical methods
 519.237 ≡ 519.233.2/6
 Factor analysis
 Cluster analysis. Classification
- 519.24 Special statistical applications and models**
 Experimental design
 Optimal designs
 Block designs
 ⇒ 519.144
 Factorial designs
 Sampling. Sampling theory

519.244	Sequential methods. □ Optimal stopping. Cusum technique (cumulative sum technique)	519.66.099	Nine-figure tables. Tables to more than nine figures
519.245	Stochastic approximation. Monte Carlo methods	519.661	General tables. Ready reckoners etc.
519.246	Statistics of stochastic processes. □ Estimation of stochastic processes. Hypothesis testing. Statistics of point processes	519.662	Logarithm tables. Tables of elementary functions
519.246.8	Time series analysis. □ Autocorrelation. Regression	519.665	Tables of higher transcendental functions
519.248	Engineering statistics. Operational research statistics. □ Queuing theory. Quality control. Reliability	519.67	Machine, graphical and other methods of computational mathematics ⇒ 51-3
519.25	Statistical data handling	519.672	Mechanical methods of calculation. □ Slide rules. Desk calculators
519.252	Collection of data and planning of surveys	519.673	Solution of mathematical problems by use of modelling systems
519.253	Sample surveys ⇒ 519.243	519.674	Graphical methods of computation
519.254	Computation of data. Algorithms	519.675	Nomography. Nomographic devices
519.255	Presentation of data. □ Format of data	519.676	Probabilistic methods of computation
519.256	Preservation of original data. Data banks	519.677	Solutions of problems of mathematical analysis and applied problems
519.257	Use of statistical data	519.7	Mathematical cybernetics ⇒ 007 ⇒ 621.391
519.258	Types of statistical data	519.71	Control systems theory: mathematical aspects ⇒ 303.725.36 ⇒ 330.46
519.6	Computational mathematics. Numerical analysis ⇒ 004.3 ⇒ 51-3	519.711	General questions of control theory. □ Models. Modelling. Coding. Theory of nets
519.61	Numerical methods of algebra	519.712	Cybernetic problems of theory of algorithms. □ Universal machines ⇒ 510.51
519.612	Numerical methods for the solution of systems of linear alphabetic equations. □ Square matrix. General matrix	519.713	Automata
519.613	Numerical methods for matrix inversion	519.714	Synthesis questions in control theory. □ Synthesis problems for concrete classes of schemes. Methods of synthesis for different classes of function. Minimization of Boolean functions
519.614	Numerical methods for computing eigenvalues and eigenvectors of matrices	519.715	Analysis problems in control theory
519.615	Numerical methods for the solution of transcendental equations and systems of equations	519.716	Functional systems. □ Completeness problems. Lattice of closed classes. Metric problems
519.62	Numerical methods for solution of ordinary differential equations	519.717	Identity transformations. Transformation rules
519.622	Cauchy problems for ordinary differential equations	519.718	Stability. Reliability. Checking. □ Synthesis. Error-correcting systems. Tests
519.624	Boundary value problems for ordinary differential equations	519.72	Information theory: mathematical aspects ⇒ 303.725.37 ⇒ 330.47
519.63	Numerical methods for solution of partial differential equations	519.722	Entropy. Amount of information and its properties
519.632	Second-order equations of elliptic type	519.723	Asymptotic theorems of optimal coding. Shannon theory. Channels
519.633	Second-order equations of parabolic and hyperbolic type	519.724	Computation of information-theory characteristics for specific channels and messages. □ Channel capacity computation. Error-probability computation
519.635	Partial differential equations of higher order (and systems of such)	519.725	Algebraic theory of error-correcting codes
519.64	Numerical methods for solution of integral equations. Quadrature formulae	519.726	Nonhomogeneous codes for messages
519.642	Numerical methods for solution of integral equations	519.727	Methods of sequential coding
519.644	Quadrature formulae ⇒ 517.518.87	519.728	Methods of coding in continuous channels
519.65	Approximation. Interpolation ⇒ 511.4	519.728.2	Quantification of communications
519.651	Approximation of functions	519.728.4	Gaussian channels
519.652	Interpolation. Extrapolation	519.728.6	Channels with fading
519.653	Numerical differentiation	519.76	Semiotics. Mathematical theory of systems of symbols. Mathematical linguistics ⇒ 003 ⇒ 510.62 ⇒ 81'32
519.654	Least squares method	519.762	Syntactic study of systems of symbols
519.657	Empirical formulae	519.763	Meaningful interpretation of sets of symbols
519.66	Mathematical tables and their compilation ⇒ 51-3	519.764	Deciphering of systems of symbols
519.66.09	Tables according to degree of accuracy		
519.66.094	Four-figure tables		
519.66.095	Five-figure tables		

519.765	Mathematical linguistics in general. General mathematical investigations of languages	519.855	Parametric programming
519.766	Models for languages and language structures	519.856	Stochastic programming
519.766.2	Algebraological models. Set-theory models	519.857	Dynamic programming. □ Multistep games
519.766.4	Probabilistic-statistical models	519.86	Theory of economic-mathematical models
519.767	Semantics of a language: mathematical aspects ⇒ 510.27		⇒ 330.4
519.768	Mathematics of machine translation	519.862	⇒ 510.67
519.8	Operational research ⇒ 005.31 ⇒ 303.725.35 ⇒ 330.45	519.863	Descriptive models. □ Macroeconomic models.
519.81	Theory of utility and acceptability of solutions	519.865	Econometrics (mathematical) ⇒ 51-7
519.812	General theory of utility	519.866	Optimization models
519.813	Games of chance. Experimental games	519.868	Theory of economic behaviour. □ Exchange models. Equilibrium models. Theory of the firm. Portfolio selection
519.814	Theory of statistical solutions		Modelling of specific aspects of the economy.
519.816	Theory of decision-making	519.87	□ Price formation models. Cost-effectiveness models
519.83	Theory of games		Branching models
519.832	Antagonistic games. Matrix games	519.872	Mathematical models for operational research
519.833	Noncoalition games. □ Bimatrix games		Queuing theory. □ Service systems. Numerical simulation
519.834	Coalition games	519.873	Theory of reliability and reservation. Quality control
519.837	Dynamic games. □ Positional games	519.874	Theory of supplies and stock control. Inventory theory. □ Models of storage. Models of replacement

539.12-18	Beams. □ Energy spectrum. Polarization	539.165	Alpha-radioactivity and decay
539.122	Photons (including gamma-radiation) ⇒ 535.14 ⇒ 539.166	539.166	Beta-radioactivity and decay
539.123	Neutrinos	539.169	Gamma-radioactivity
539.123.6	Antineutrinos		Radioactivity other than alpha, beta and gamma types ⇒ 539.173.7 ⇒ 539.173.84
539.124	Electrons (including beta-particles) ⇒ 537.533 ⇒ 539.165	539.17	Nuclear reactions. Fission. Fusion. Chain reactions etc. ⇒ 621.039
539.124.6	Positrons	539.17.02	Cross-sections
539.125	Nucleons	539.171	Scattering: elastic, inelastic. Polarization
539.125.4	Protons	539.172	Individual nuclear reactions
539.125.46	Antiprotons	539.173	Fission
539.125.5	Neutrons	539.173.7	Spontaneous fission
539.125.52	Transport of neutrons. Neutron flux distribution	539.173.8	Products of fission <i>Specify by :546...</i>
539.125.56	Antineutrons	539.173.84	Neutrons produced in fission. □ Number of neutrons. Energy. Delayed neutron emission
539.126	Mesons. Hyperons	539.175	Chain reactions. Cyclic reactions
539.126.3	Light mesons	539.175.2	Chain-reacting fission
539.126.33	μ -mesons	539.175.3	Chain-reacting fusion
539.126.34	p-mesons	539.175.4	Cyclic nuclear reactions
539.126.4	Heavy mesons	539.18	Physics of single atoms ⇒ 535.338 ⇒ 544.11
539.126.6	Hyperons	539.182	General theory. Wave functions. Methods of solution. Atomic models
539.128	Simple particles (atomic number or charge less than 3) ⇒ 539.14	539.183	Properties of atoms in general
539.128.2	Deuterons (^2H)	539.183.2	Atomic mass. Isotopes ⇒ 539.143.2 ⇒ 54.027 ⇒ 621.039.3 ⇒ 621.384.8
539.128.3	Tritons (^3H)	539.183.3	Electronic configuration (shells etc.). Relationship to periodic table
539.128.4	Alpha-particles (^4He)	539.183.4	Spin and moments
539.128.53	Helium-3 (^3He)	539.183.5	Size. Dimensions. Radii
539.128.55	Helium-5 (^5He)	539.184	Internal mechanics of atoms
539.14	Nuclei	539.184.2	Energy levels and their structure
539.141	Nuclear forces	539.184.3	Ionization energies
539.142	Nuclear models	539.184.5	Excited states
539.142.2	Individual particle models. □ Shell models. Statistical models	539.186	Excitation and interaction of atoms. □ Interatomic forces
539.142.3	Collective models. □ Bohr-Mottelson model. Alpha-particle model. Resonating group structure	539.188	Atomic beams and rays
539.143	Properties of nuclei	539.189	Analogous systems
539.143.2	Nuclear mass ⇒ 539.183.2	539.189.1	Mesic atoms
		539.189.2	Positronium
		539.19	Physics of single molecules
		539.192	General theory. Wave functions and methods of solution

539.193	General properties. □ Configuration and geometry of molecules. Bond lengths and angles in molecules. Moments	539.31	Generalities. Elastic forces. Elastic potential. Elastic region. Elastic limit
539.194	Internal mechanics of molecules. □ Energy relationships. Vibration and rotation in molecules. Electronic levels. Bonds. Resonance energies, potentials. Nuclear coupling. Polarizability	539.311	Elastic equilibrium conditions (elastostatics)
539.196	Interaction of molecules: with atoms, with other molecules. Excitation and dissociation of molecules. Intermolecular forces ⇒ 539.6	539.312	Conditions of elastic motion (elastokinetics)
539.198	Molecular beams and rays	539.313	Relationships between elastic forces and deformation
539.199	Macromolecules	539.319	Internal stresses in a body due to processing, mode of use etc. □ Stress distribution. Shrinkage stresses ⇒ 539.219.2
539.2	Properties and structure of molecular systems ⇒ 548.1	539.32	Elasticity moduli. □ Variation of modulus with conditions, e.g. temperature. Young's modulus
539.21	Properties of molecular systems	539.37	Deformation in general. □ Plane deformation. Three-dimensional deformation. Deformability
539.211	Surfaces of molecular systems. External structure. □ Fracture surfaces. Plane fracture. Conchoidal fracture. Laminar fracture. Fibrous fracture	539.371	Temporary deformation. Elastic deformation (spontaneously reversible deformation)
539.213	Amorphism. Amorphous state. Vitreous state. □ Theory, properties of the vitreous state	539.372	Nonspontaneously reversible deformation
539.214	Plasticity. Plastometry	539.373	Permanent, irreversible deformation.
539.215	Pulverulence. Powderiness. Specific surface. Friability. Colloidal distribution. Regularity, homogeneity. Granular fineness	539.374	Deformation of hardenable materials
539.216	Cellular structure. Fibrous structure. Laminar structure. Films. Thin films. Radiating structures	539.375	Plastic deformation. Viscous deformation.
539.217	Porosity. Permeability. Imperviousness	539.375.5	Properties of solids not cold-workable. Yielding
539.218	Compactness, closeness. Freedom from pores	539.375.6	Limit of deformation
539.219	Other properties and phenomena	539.376	Deformation at breaking
539.219.1	Irregularities. Impurities. Inclusions. Heterogeneity. □ Streaks. Gas emission	539.377	Wear in general ⇒ 539.43 ⇒ 539.538 ⇒ 620.178.16
539.219.2	Relationships between internal stresses and irregularities. □ Fissures. Cracks. Tears. Splits. Grooves. Notches. Flaking. Peeling. Exfoliation. Discontinuity. Noncohesion ⇒ 539.319	539.378	Deformation under constant load. Creep ⇒ 539.434
539.219.3	Diffusion. Autodiffusion	539.378.2	Influence of temperature on deformation.
539.22	Isotropy and anisotropy in molecular structure. Order-disorder. Texture of molecular systems and materials (especially synthetics) in general ⇒ 548.735	539.378.3	□ Hardening. Annealing. Quenching ⇒ 539.516
539.23	Production of thin films	539.378.6	Other types of deformation
539.231	Mechanical production. □ By spraying, sputtering	539.379	Welding by compression
539.232	Chemical production. □ By oxidation	539.38	Diffusion of bodies by compression
539.233	By adsorption	539.381	Disintegration. Dispersion
539.234	By evaporation and condensation	539.382	Effects of deformation. □ Volume: growth, shrinkage, constancy. Slip bands. Slip planes
539.24	Microstructure revealed by photomicrography. Structure of very small particles	539.383	Various causes of deformation. Graphic representation of deformation
539.25	Properties and structures revealed by ultramicroscopy	539.384	Generalities. Homogeneous and heterogeneous deformation
539.26	Properties and structures revealed by X-rays. Revelation of fine structure ⇒ 621.386	539.385	Deformation by extension. □ Stress-strain curves. Stress modulus. Influence of shape of specimen
539.27	Structure of molecular systems revealed by electron diffraction	539.386	Deformation by compression, crushing
539.3	Elasticity. Deformation. Mechanics of elastic solids ⇒ 620.1	539.387	Deformation by flexion
		539.388	Deformation by torsion. □ Warping. Torsion modulus
		539.388.1	Deformation by shearing. Shear
		539.388.2	Deformation by folding, winding, curving
		539.388.8	Other causes of deformation
		539.389	Deformation by fatigue
		539.389.1	Deformation by particular working methods.
		539.389.2	□ Deformation by drawing, rolling, stamping, pressing, punching, deep-drawing, drilling, forging
		539.389.3	Shrinkage and swelling according to moisture content
		539.389.4	Permanent deformation phenomena in solid bodies
		539.4	Yield point
			Hardening. □ Bauschinger effect
			After-effects. Ageing. Recovery.
			Accommodation
			Hysteresis
			Strength. Resistance to stress ⇒ 539.55 ⇒ 620.1

539.4.01	Theory. Various influences on strength	539.433	Resistance to vibration, oscillation
539.4.011	Theory of stress resistance	539.434	Creep resistance. Long-time creep strength.
539.4.011.1	Cohesion		Heat resistance. Resistance to quenching
539.4.011.2	Extension. Stretching	539.435	Natural stress limit. Endurance strength
539.4.011.22	Elastic limit		
539.4.011.25	Breaking point. Breaking stress	539.5	Properties of materials affecting deformability
539.4.012	Design theory. Permissible stresses		
539.4.013	Influence of shape of a body on its strength.	539.51	General properties of materials
	□ Notches. Corners. Waists. Constrictions	539.511	Malleability
539.4.014	Mechanical influences on strength. □ Tension.		⇒ 620.163.2
	Initial stress. Inherent stress	539.512	Weldability
539.4.015	Influence of structure on stress		⇒ 620.163.3
539.4.016	Influence of treatment, working		⇒ 620.179.2
	Details by :621.7... and :621.9...		⇒ 621.791.011
	◇ 539.4.016:621.785 Influence of heat treatment	539.514	Grindability. Crushability
539.4.019.1	Influence of time. Influence of rate of deformation	539.516	⇒ 620.163.4
539.4.019.2	Influence of dimensions. Influence of size		Hardenability
539.4.019.3	Physical influences		⇒ 620.163.6
			⇒ 620.179.3
539.41	Resistance to elastic deformation. Cohesive strength	539.52	Elasticity
539.411	Resistance to compression. Crush resistance.	539.53	Hardness. Softness. □ Hardness scales
	Buckling resistance	539.533	Resistance to penetration. Resistance to deformation.
539.412	Resistance to tension. Tear resistance	539.536	Hardness distribution
539.413	Resistance to flexion, bending	539.537	Surface hardness. Scratch hardness.
539.414	Resistance to torsion, twisting	539.538	Resistance to scraping
539.415	Resistance to shear. Resistance to punching	539.55	Impact strength
539.416	Resistance to creasing, folding, bending	539.551	Resistance to wear
539.417	Resistance to drawing. Resistance to rolling	539.554	Toughness and flexibility
539.419	Resistance to complex stresses. □ Resistance to dropping. Resistance to tumbling	539.557	Toughness. Ductility
			Cleavability
539.42	Fracture. Fracture mechanics	539.56	Flexibility. Pliability
539.421	Crack initiation. Crack propagation. Crack arrest. □ Stress intensity factor. Crack opening displacement. J integral	539.57	Brittleness. Friability. Fragility
		539.58	Consistency. Flow characteristics
539.422	Mode of fracture. □ Microstructure of fracture	539.6	Compressibility of solids
539.422.2	External appearance of the fracture		Intermolecular forces
539.422.22	Brittle fracture	539.61	⇒ 539.196
539.422.23	Ductile fracture. Sliding fracture. Shear fracture	539.62	Cohesion. Adhesion
539.422.24	Fatigue fracture, failure		Friction
539.422.25	Cleavage fracture. Cleavage separation fracture	539.621	⇒ 531.43
539.422.3	Structural fracture. □ Grain structure of fracture	539.622	Sliding friction
539.422.5	Fracture in composite materials	539.63	Rolling friction
539.424	Ultimate tensile strength. Fracture strength	539.67	Impact effects
539.43	Resistance to repeated stresses	539.8	Internal friction. Attenuability
539.431	Resistance to alternating stresses. Fatigue resistance	539.87	Other physico-mechanical effects
539.432	Resistance to repeated complex stresses	539.89	Mechanical effects of physical phenomena
	◇ 539.432:62-233.1 Stresses in transmission shafts	539.893	Effects of mechanical processes. Effects of pressure
			Production of very high pressures.
			Hypercompression

54 CHEMISTRY. CRYSTALLOGRAPHY. MINERALOGY

⇒ 340.67
 ⇒ 550.4
 ⇒ 66

54-1	State of substance	54-121	Elementary
	⇒ 62-403/-405	54-122	Molecular
54-11	State as regards occurrence and treatment	54-123	Atomic
54-112	Natural. Native. Raw. Untreated	54-124	Monomeric
54-114	Man-made. Synthetic. Artificial. Prepared	54-125	Isomeric
54-116	Processed. Treated. Converted. Modified	54-126	Polymeric. Oligomeric
54-12	State as regards atomic or molecular structure	54-127	Polycondensed
		54-128	Ionic. Ionized
		54-128.2	Anions

54-128.4	Cations	54-31	Oxides
54-13	Gaseous state	54-32	Acids
54-132	Rarefied	54-323	Meta-acid type
54-133	Compressed	54-324	Pyro-acid type
54-134	Vapour state	54-325	Ortho-acid type
54-135	Homogeneous gaseous phase containing more than one component 54-135.1/.5 $\equiv$ 54-145.1/.5	54-328	Poly acids. Heteropoly acids
54-138	Colloidal state with gaseous continuous phase. □ Mists. Smokes. Aerosols $\Rightarrow$ 544.772	54-36	Bases. Hydroxides

543.63	Analysis of organic substances	543.632.534	Substituted hydroxyl groups. Alkoxy groups. Ethers. Acetals. Ketals
543.631	Determination of composition of organic substances 543.631 ≡ 543.61	543.632.538	Hydroxyl groups in compounds containing other functional groups ⇒ 543.635.2
543.632	Specific analysis methods of organic substances	543.632.54	Determination of epoxy and peroxide groups
543.632.2	Constituents and properties obtained by heating to high temperatures	543.632.542	Epoxy groups. Epoxy compounds
543.632.22	By combustion and ignition in air. Determination of ash content	543.632.545	Peroxide groups. Peroxide and hydroperoxide compounds
543.632.23	By distillation away from the air	543.632.55	Determination of sulphur-containing functional groups
543.632.232	Constituents volatile at high temperature	543.632.552	Thiols. Dialkyl sulphides. Dialkyl disulphides
543.632.234	Carbonized residue. Carbonizable constituents	543.632.554	Sulpho acids and their derivatives in the sulpho group: salts, esters, halogenides etc.
543.632.24	Soot-forming tendency	543.632.559	Other functional, sulphur-containing groups
543.632.4	Elemental analysis	543.632.56	Determination of nitrogen-containing functional groups
543.632.42	Determination of carbon	543.632.562	Amino groups
543.632.43	Determination of hydrogen	543.632.562.1	Primary
543.632.44	Determination of oxygen	543.632.562.2	Secondary. Imino groups
543.632.45	Determination of nitrogen	543.632.562.3	Ternary
543.632.46	Determination of sulphur and analogues	543.632.562.4	Quaternary. Ammonium salts
543.632.461	Sulphur	543.632.563	Hydrazine group. Hydrazo compounds
543.632.462	Selenium and tellurium	543.632.564	Azo group. Azoxy and diazo groups. Diazonium salts
543.632.47	Determination of phosphorus and its analogues	543.632.565	Nitrile group. Nitriles
		543.632.566	Isonitrile, isocyanide group. Isothiocyanate group
		543.632.567	Nitro group. Nitroso, isonitroso groups (oximine)
		543.632.569	Other functional, nitrogen-containing groups. □ Heterocyclic nitrogen
		543.632.57	Determination of unsaturated bonds. Saturation. Unsaturation. Extent of unsaturation. Unsaturation values

543.632.571	Unsaturated bond position	543.645.3	Alkaloids
543.632.572	Alkene function. Compounds with one double bond. Olefins. Vinyl compounds	543.645.4	Enzymes
543.632.572.2	Acyclic	543.645.5	Vitamins
543.632.572.3	Containing cycles	543.645.6	Peptides. Proteins
543.632.573	Diene function. Compounds with two double bonds. Dienes. Conjugated double bonds. Diene value	543.645.7	Antibiotics
543.632.574	Tail methylene function	543.645.9	Other biochemical substances
543.632.576	Alkene function. Compounds with ternary bond. Less saturated compounds	543.67	Analysis of super-pure matter
543.632.58	Determination of various functional groups	543.68	Proximate analysis. Analytical control in production
543.632.582	Active hydrogen		⇒ 543.068.2
543.632.585	Phosphorus-containing functional groups	543.682	⇒ 543.068.8
543.632.59	Determination of other functional groups	543.682	Methods of monitoring
543.632.6	Characteristic (selective) reactions of organic substances. Colour reactions	543.683	Methods of checking
543.632.9	Other methods of organic substance analysis	543.684	Discrete control methods
543.635	Determination of particular groups of organic substances	543.69	Analysis of other substances
	⇒ 543.632.5	543.9	Analysis by biological and biochemical reactions. Biological methods used for analytical purposes
543.635.2	Determination of carbohydrates	543.92	Sensory reactions. Organoleptic testing
543.635.22	Monosaccharides		⇒ 544.165
543.635.222	Lowest (dioses, trioses, tetroses)	543.926	Characteristic smell
543.635.225	Pentoses	543.927	Characteristic taste
543.635.226	Hexoses	543.928	Characteristic feel
543.635.24	Oligosaccharides (dextrins)	543.929	Characteristic effect on the palate
543.635.25	Polysaccharides	543.94	Fermentative methods
543.635.252	Starches	543.95	Microbiological methods
543.635.254	Celluloses	543.97	Methods using plants and animals (changes in evolution)
543.635.28	Fission products	544	PHYSICAL CHEMISTRY
	543.635.282/285 ≡ 543.635.22/25	544-931.2	Direct
543.635.3	Determination of fats and higher fatty acids. Determination of fattiness. Determination of oils	544-931.4	Indirect. Reverse (back)
543.635.32	Neutral fats and oils (triglycerides)	544-971	Thermodynamic characteristics
543.635.33	Fats and higher fatty acids in the aggregate. Saponification value	544-971.2	Exothermic
543.635.34	Mono- and diglycerides	544-971.4	Endothermic
543.635.35	Free higher fatty acids	544-971.6	Reversible. Irreversible
543.635.352	Saturated higher fatty acids	544-971.62	Reversible
543.635.353	Unsaturated higher fatty acids	544-971.63	Irreversible. Spontaneous
543.635.355	Volatile fatty acids. Reichert-Meisssl number. Polenski number	544.01	Chemical substances and systems. Origin. Natural state. Phases
543.635.4	Determination of phosphatides (phospholipids) and other lipids	544.011	Single-phase systems
543.635.5	Determination of saponifiable and nonsaponifiable matter	544.012	Two-phase systems
543.635.52	Saponifiable. Soap contents	544.013	Three-phase systems
543.635.53	Nonsaponifiable	544.014	Four- and multiphase systems
543.635.6	Determination of aromatic and naphthenic compounds	544.015	Phase state
543.635.62	Aromatic	544.015.2	Phase formation. Nucleation
543.635.63	Naphthenic	544.015.22	Phase partition. Phase surfaces
543.635.7	Determination of terpenes	544.015.3	State diagrams
543.635.9	Determination of other substances	544.015.32	Phase boundaries. Liquidus. Solidus. Triple points. Critical points
543.637	Determination of reactivity, oxidizability, combustibility, explosiveness	544.015.33	Singularities on phase equilibrium curves. Eutectics. Dystectics. Peritectics. Cusps
543.637.2	Reactivity. Inertia	544.015.34	Azeotropy
	⇒ 543.23	544.015.35	Cross-sections. Cuts
543.637.4	Oxidizability	544.015.4	Phase transitions. Phase transformations
543.637.5	Combustibility. Ignition temperature. Flash point	544.015.5	Phase exchange. Interphase exchange. Interphase distribution
543.637.6	Explosiveness. Stability	544.016	Physicochemical analysis.
543.637.7	Decomposition point	544.016.2	Composition/property diagrams
543.64	Analysis of biological (natural and synthetic) matter		Composition/temperature relation. Thermal analysis. Composition/temperature diagrams
543.641	Determination of composition		◇ 544.016.2:543.572.3 Differential thermal analysis
	543.641 ≡ 543.61		◇ 544.016.2:543.573 Thermogravimetry
543.645	Determination of particular groups of biochemical substances		◇ 544.016.2:543.575 Dilatometry
543.645.2	Steroids		

544.016.3	Composition/pressure relation. Composition/pressure diagrams	544.022.36	Topological disorder
544.016.4	Composition/solubility relation. Composition/solubility diagrams	544.022.37	Electronic disorder (irregularities in electron shell structures of atoms or ions). Electronic defects
544.016.5	Microstructure analysis.	544.022.372	Conduction band electrons. Polarons
544.018	Composition/microstructure relation	544.022.373	Electron holes
	Electrochemical systems. Electrolytes	544.022.38	Defect migrations. Defect interactions
	<i>Auxiliary is mainly for use in 544.6.</i>	544.022.382	Defect migrations. Defect mobilities
	<i>Detailed subdivisions are listed at 544.6.018</i>	544.022.384	Defect interactions. □ Physicochemical transformations and reactions via defects. Chemistry of imperfect crystals
544.018.2	Electrochemical systems	544.022.384.2	Quasichemical reactions. Reactions between defects
544.018.4	Electrolytes	544.022.384.3	Interactions between defects and crystalline lattice. Shear-structure formation
544.02	Chemical composition. Structure. Isotopes etc.	544.022.4	Types of crystal structure ⇒ 548.3
544.021	General composition and formulae. □ Molecular, structural, general, empirical formulae, symbols. Chemical symbolics	544.022.5	Noncrystalline structures. Structures of colloidal systems. Liquid-crystalline structures
544.022	Structure	544.022.51	Crystalline-amorphous structure. Crystallite structure
544.022.1	Positional sequence of atoms in a molecule	544.022.52	Globular, fibrillar structures
544.022.11	Primary atoms	544.022.522	Globular structure
544.022.12	Secondary atoms	544.022.524	Fibrillar structure
544.022.13	Tertiary atoms	544.022.53	Micellar, vesicular, cellular, capillary-porous structures
544.022.14	Quaternary atoms	544.022.532	Micellar structure
544.022.2	Order. Orderliness. Ordering	544.022.533	Vesicular structure
544.022.21	Degree of order. Order parameters	544.022.535	Cellular, honeycomb structure
544.022.22	Short-range order. Local (site) order. Coordinational order	544.022.537	Capillary-porous, spongy structures
544.022.23	Intermediate-range order	544.022.54	Periodic colloidal structures
544.022.24	Long-range order	544.022.542	Oriented structures. Schiller layers. Tactoids
544.022.242	Structural ordering. Translational order (space periodicity). Translational ordering	544.022.544	Liesegang rings
544.022.243	Orientational order. Orientational ordering	544.022.55	Mosaic structure. Network structure
544.022.244	Topological order	544.022.552	Mosaic structure
544.022.246	Internal long-range order. Organized structure (of amorphous polymers)	544.022.554	Network structure
544.022.3	Disorder. Disorderliness. Disordering. Disordered systems. Defects (imperfections) of real bodies	544.022.56	Layered structure
544.022.31	Degree of disorder. Degree of disordering	544.022.57	Columnar structure
544.022.34	Structural disorder. Translational disorder. Atomic defects	544.022.58	Disc-shaped, ball-shaped structures
544.022.341	Point defects in general	544.022.582	Disc-shaped structure
544.022.342	Intrinsic disorder. Intrinsic defects	544.022.584	Ball-shaped (beady) structure
544.022.342.2	Vacancies. Schottky defects. Divacancies	544.022.6	Amorphous structures
544.022.342.3	Intrinsic interstitial defects. Frenkel defects	544.022.7	Textures. Disclinations (disinclinations)
544.022.342.4	Anti-Frenkel disorder	544.022.72	Fibre-like (filament-like) texture
544.022.342.7	Intrinsic colour centres	544.022.73	Rod-like texture
544.022.343	Extrinsic (impurity) disorder. Extrinsic defects	544.022.74	Confocal texture
544.022.343.2	Anti-structural disorder. □ Substitutional defects. Isovalent and heterovalent (donor and acceptor) impurities	544.022.75	Ladder (step-like) texture
544.022.343.3	Interstitial defects	544.022.79	Other textures
544.022.343.7	Impurity colour centres	544.022.8	Binding. Setting. Cross-linking <i>Auxiliary and its subdivisions are mainly for use in 544.77</i>
544.022.343.8	Impurity paramagnetic centres	544.022.82	Setting. Structurization. Bound disperse systems
544.022.344	Continuous defects	544.022.822	Gelation. Jelling (jellification). Transition to liquid-like state (to structured liquid). Sol-gel transition. Coagulation structure. Coagulation contacts. Thixotropy. Rheopexy
544.022.344.1	One-dimensional (linear) defects. □ Dislocations. Crowdions	544.022.823	Colloidal setting (dispersion binding). Transition to solid-like state. Condensation-crystallization structure. Phase contacts. Dilatancy
544.022.344.2	Two-dimensional defects. □ Dislocation networks. Defects of stacking. Grain boundaries	544.022.83	Agitation. Setting destruction
544.022.344.3	Three-dimensional (volume) defects. □ Clusters of point defects. Pores. Channels. Inclusions	544.022.84	Swelling. Swelling ability
544.022.346	Nonorganized structure (of amorphous polymers)	544.022.85	Syneresis (synaeresis)
544.022.347	Nonstoichiometry. Deviations from stoichiometric composition	544.023	Structure of boundary layers and films. Degree of dispersity
544.022.347.2	Degree of nonstoichiometry	544.023.2	Interfacial layers and films. Surface (backed) films. Unbacked films
544.022.347.3	Homogeneity range	544.023.22	Mono-, bi- and polymolecular (multimolecular) layers and films 544.023.221
544.022.35	Orientational disorder	544.023.222	Monomolecular layers and films Bimolecular layers and films

544.023.223	Polymolecular (multimolecular) layers and films	544.076.2	Electrochemical cells
544.023.23	Continuous films. Condensed and expanded films	544.076.3	Construction elements of electrochemical cells
544.023.232	Condensed films	544.076.32	Electrodes
544.023.233	Expanded films	544.076.34	Membranes and diaphragms in electrochemical cells
544.023.25	Oriented films		
544.023.26	Multicomponent films	544.08	Measurements and measuring techniques 544.08 $\equiv$ 53.08
544.023.27	Unbacked films		
544.023.5	Dispersity	544.1	Chemical structure of matter
544.023.51	Monodispersity	544.11	Concepts of atomic and molecular theory $\Rightarrow$ 539.1
544.023.52	Polydispersity	544.112	Atoms and molecules
544.023.522	Size distribution of particles and pores	544.116	Concepts of chemical elements

- 546 INORGANIC CHEMISTRY**
Classification of compounds.
Most chemical compounds are to be considered as the result of an actual or hypothetical reaction of two oxides with each other, or of an oxide with a hydride. In this way, a chemical compound may be designated by the oxide or hydride radicals from which it is derived.
The chemical compound is denoted by means of the apostrophe. A binary compound is denoted by citing the number

546.133.1	Oxide of monovalent chlorine and its derivatives. Hypochlorites $\diamond$ 546.133.1-32 Hypochlorous acid HOCl
546.133.2	Hypothetical oxide of divalent chlorine
546.133.3	Oxide of hypothetical trivalent chlorine. Derivatives of chlorous acid HClO ₂ . Chlorites $\diamond$ 546.133.3-32 Chlorous acid
546.134	Chlorine dioxide ClO ₂ and its derivatives
546.135	Derivatives of pentavalent chlorine. Chlorates $\diamond$ 546.135-32 Chloric acid HClO ₃
546.136	Hypothetical derivatives of hexavalent chlorine
546.137	Derivatives of heptavalent chlorine. Perchlorates $\diamond$ 546.137-32 Perchloric acid HClO ₄
546.14	Bromine Br 546.14 $\equiv$ 546.13
546.15	Iodine I 546.15 $\equiv$ 546.13
546.16	Fluorine F 546.16 $\equiv$ 546.13 <i>except:</i>
546.169	Astatine At 546.169 $\equiv$ 546.13
546.17/.19	Nonmetals of the fifth group. Nitrogen group
546.17	Nitrogen N
546.171	Hydrogen compounds of nitrogen
546.171.1	Ammonia NH ₃ and its metal derivatives. Nitrides $\Rightarrow$ 546.39
546.171.5	Hydrazine N ₂ H ₄ and its derivatives
546.171.6	Azo derivatives
546.171.8	Hydrazoic acid HN ₃ and its derivatives. Azides
546.172	Hydroxylamine NH ₂ OH and its derivatives
546.172.5	Nitrous oxide N ₂ O and its derivatives
546.172.6	Nitric oxide NO and its derivatives
546.173	Derivatives of trivalent nitrogen. Derivatives of nitrogen trioxide. Nitrites $\diamond$ 546.173-31 Nitrogen trioxide N ₂ O ₃ $\diamond$ 546.173-325 Nitrous acid HNO ₂ $\diamond$ 546.173'131 Nitrogen trichloride NCl ₃
546.174	Derivatives of tetravalent nitrogen. Nitrogen dioxide NO ₂ . Dinitrogen tetroxide N ₂ O ₄
546.175	Derivatives of pentavalent nitrogen. Derivatives of nitrogen pentoxide. Nitrates $\diamond$ 546.175-31 Nitrogen pentoxide N ₂ O ₅ $\diamond$ 546.175-323 Nitric acid HNO ₃
546.176	Aqua regia. Mixture of hydrochloric acid and nitric acid
546.177	Compounds of nitrogen. Pernitric acid HNO ₄
546.18	Phosphorus P 546.18 $\equiv$ 546.17
546.19	Arsenic As 546.19 $\equiv$ 546.17
546.2	Nonmetals of the third, fourth, sixth group and zerovalent elements
546.21	Oxygen O
546.212	Water H ₂ O $\diamond$ 546.212*2 Heavy water D ₂ O
546.214	Ozone O ₃
546.215	Hydrogen peroxide H ₂ O ₂
546.216	Oxygen with positive valence. Tetravalent and hexavalent oxygen
546.217	Air $\Rightarrow$ 551.510.41

546.22/.24	Sulphur group. Chalkogens. Chalkogenides in general	546.272	Lower boroxides. Unsaturated boroxides. □ Boroxide B_2O_2 . Boron monoxide BO
546.22	Sulphur S	546.273	Trivalent boron and its derivatives. Borates ◇ 546.273-31 Boron trioxide B_2O_3 ◇ 546.273-324 Tetraboric acid $H_2B_4O_7$ ◇ 546.273-325 Boric acid H_3BO_3 . Boracic ◇ 546.273'131 Boron trichloride BCl_3
546.221	Derivatives of negative bivalent sulphur		
546.221.1	Hydrogen sulphide H_2S and its derivatives. Sulphides		
546.222	Hydrogen persulphides. Polysulphides		
546.223.1	Derivatives of hypothetical monovalent sulphur oxide. Sulphur suboxide S_2O	546.28	Silicon Si
546.223.2	Derivatives of hypothetical divalent sulphur oxide. Sulphur monoxide SO. Thiosulphates ◇ 546.223.2-325 Hyposulphurous acid H_2SO_2	546.281	Silicon hydride and its derivatives. Silanes. Silicides ◇ 546.281'261 Silicon carbide SiC
546.223.3	Derivatives of trivalent sulphur oxide ◇ 546.223.3-31 Sulphur sesquioxide S_2O_3	546.282	Lower silicon oxides. Unsaturated silicon oxides
546.224	Derivatives of tetravalent sulphur. Sulphites ◇ 546.224-31 Sulphur dioxide SO_2 ◇ 546.224-325 Sulphurous acid H_2SO_3	546.284	Silicic anhydride and its derivatives. Silicates ◇ 546.284-31 Silicon dioxide SiO_2 ◇ 546.284-325 Silicic acid H_2SiO_3 ◇ 546.284'161 Silicon tetrafluoride SiF_4 ◇ 546.284'161-32 Fluorosilicic acid H_2SiF_6
546.226	Sulphur trioxide and its derivatives. Sulphates ◇ 546.226-31 Sulphur trioxide SO_3 ◇ 546.226-324 Pyrosulphuric acid $H_2S_2O_7$ ◇ 546.226-325 Sulphuric acid H_2SO_4 ◇ 546.226'221-32 Thiosulphuric acid $H_2S_2O_3$	546.286	Derivatives of hexavalent silicon
546.227	Persulphuric acid $H_2S_2O_8$. Peroxosulphuric acid	546.287	Organosilicon compounds. Silico-oxalic acid HOOSi-SiOOH ⇒ 547.1'128
546.228	Polythionic acids in general. Dithionic acids	546.289	Germanium Ge 546.289 = 546.28
546.23	Selenium Se 546.23 = 546.22		
546.24	Tellurium Te 546.241/.248 = 546.221/.228	546.29	Zerovalent elements
546.249	Polonium Po 546.249 = 546.22	546.291	Helium He
		546.292	Neon Ne
546.25	Nonmetals of the third and fourth groups in general	546.293	Argon Ar
		546.294	Krypton Kr
546.26	Carbon C <i>For organic derivatives of carbon and its compounds and for compounds of carbon and halogens use 547</i> ◇ 546.26-162 Graphite. Diamond ⇒ 549.21	546.295	Xenon Xe
546.261	Carbides	546.296	Radon Rn
546.262	Lower and unsaturated oxides of carbon and their derivatives		
546.262.3	Divalent carbon and its derivatives ◇ 546.262.3-31 Carbon monoxide CO		
546.262.5	Carbonyl compounds in general ⇒ 546.725 ⇒ 546.735 ⇒ 546.745 ⇒ 546.765	546.3	Metals in general
546.263	Hypothetical trivalent carbon		
546.264	Tetravalent carbon. Carbonates ◇ 546.264-31 Carbon dioxide CO_2	546.30	Transition metals. Metalloids
546.265	Compounds of carbon with sulphur, selenium, tellurium and their derivatives, including those containing oxygen and halogens	546.302	Transition metals <i>Class here compounds of specified transition metals. For details about electron shells of transition metals see under 544 Physical Chemistry. Specific transition metals are classed within the appropriate metal groups</i> ◇ 546.302'221.1 Sulphide of transition metals
546.266	Cyanogen $N \equiv C - C \equiv N$ ⇒ 547.491	546.303	Metalloids <i>Class here compounds of specified metalloids. For properties and other details of metalloids see 544</i>
546.267	Hydrocyanic acid HCN and its derivatives. Cyanides		
546.268.1	Cyanic acid $N \equiv C - OH$ and its derivatives. Cyanates	546.31	Elements of the first group in general.
546.268.2	Isocyanic acid $O = C = NH$ and its derivatives. Isocyanates		Metals of the first group ⇒ 546.55
546.268.3	Fulminic acid $C \equiv N - OH$	546.311	Generalities on the alkali metals
546.268.5	Thiocyanic acid $N \equiv C - SH$ and its derivatives		
546.268.6	Isothiocyanic acid $S = C = NH$ and its derivatives	546.32	Potassium K ◇ 546.32-31 Potassium oxide K_2O ◇ 546.32-36 Potassium hydroxide KOH ◇ 546.32-39 Potassium peroxide K_2O_2 ◇ 546.32'131 Potassium chloride KCl ◇ 546.32'135 Potassium chlorate $KClO_3$ ◇ 546.32'173 Potassium nitrite KNO_2 ◇ 546.32'175 Potassium nitrate KNO_3 ◇ 546.32'185 Potassium phosphates ◇ 546.32'226 Potassium sulphate K_2SO_4 ◇ 546.32'226-384.1 Potassium hydrogen sulphate $KHSO_4$ ◇ 546.32'264 Potassium carbonate K_2CO_3 ◇ 546.32'264-384.1 Potassium hydrogen carbonate $KHCO_3$ ◇ 546.32'267 Potassium cyanide KCN
546.27	Boron B		
546.271	Boron hydrides and their derivatives. Boranes. Borides ◇ 546.271-386 Boron hydride. Boranates		

	◇ 546.32'273 Potassium borate $K_2B_4O_7$	546.655.3	Trivalent cerium
	◇ 546.32'273-39 Potassium perborate $KBO_2 \cdot H_2O_2 \cdot 3H_2O$	546.655.4	Tetravalent cerium
	◇ 546.32'284 Potassium silicates $K_2O \cdot xSiO_2$	546.656	Praseodymium Pr
	◇ 546.32'284'161 Potassium fluorosilicate K_2SiF_6	546.657	Neodymium Nd
		546.658	Promethium Pm
		546.659	Samarium Sm
546.33	Sodium Na	546.66	Yttrium group in general
	◇ 546.33'131 Sodium chloride NaCl. Table salt		546.66 $\approx$ 546.655
	$\Rightarrow$ 549.451.1, 553.631, 661.833		$\Rightarrow$ 546.650
	◇ 546.33'273 Sodium tetraborate $Na_2B_4O_7$. Borax	546.661	Europium Eu
546.34	Lithium Li	546.662	Gadolinium Gd
546.35	Rubidium Rb	546.663	Terbium Tb
546.36	Caesium Cs	546.664	Dysprosium Dy
546.37	Francium Fr	546.665	Holmium Ho
546.39	Ammonium radical	546.666	Erbium Er
546.4	Elements of the second group in general. Metals of the second group	546.667	Thulium Tm
546.40	Alkaline earth metals in general	546.668	Ytterbium Yb
546.41	Calcium Ca	546.669	Lutetium Lu
546.42	Strontium Sr	546.68	Gallium group in general
546.43	Barium Ba	546.681	Gallium Ga
546.44	Radium Ra		546.681 $\approx$ 546.683
546.45	Beryllium Be	546.682	Indium In
546.46	Magnesium Mg		546.682 $\approx$ 546.683
546.47/49	Zinc, cadmium and mercury group in general	546.683	Thallium Tl
546.47	Zinc Zn	546.683.1	Monovalent thallium
546.48	Cadmium Cd	546.683.3	Trivalent thallium
546.49	Mercury Hg	546.7	Metals of the sixth and seventh group. Base metals of the eighth group. Actinides
546.491	Monovalent mercury. Mercurous compounds	546.71	Elements of the seventh group in general. Metals of the seventh group. Manganese group
546.492	Divalent mercury. Mercuric compounds	546.711	Manganese Mn
546.55	Copper, silver and gold group in general	546.712	Divalent manganese
546.56	Copper Cu	546.713	Trivalent manganese
546.561	Monovalent copper. Cuprous compounds	546.714	Tetravalent manganese. Manganite
546.562	Divalent copper. Cupric compounds	546.716	Hexavalent manganese. Manganates
546.57	Silver Ag	546.717	Heptavalent manganese. Permanganates
546.571	Monovalent silver		◇ 546.717'32 Potassium permanganate $KMnO_4$
546.572	Divalent silver	546.718	Technetium Tc
546.59	Gold Au		546.718.2/.7 $\approx$ 546.712/.717
546.591	Monovalent gold	546.719	Rhenium Re
546.593	Trivalent gold		546.719.2/.7 $\approx$ 546.712/.717
546.6	Elements of the third group in general. Metals of the third group	546.72/.74	Base metals of the eighth group. Iron group in general
	<i>Numbers may be completed by adding a number 1,2,3 etc. indicating the valency of an element</i>		<i>For noble metals of the eighth group see 546.9</i>
	◇ 546.632 Bivalent scandium	546.72	Iron Fe

547

ORGANIC CHEMISTRY

547'11/19 $\equiv$ 546.1/9547'2/8 $\equiv$ 547.2/8

Further details may be denoted:

(a) by apostrophe.

(b) by hyphen auxiliaries -1/-4 listed under 54.

(c) by point-nought auxiliaries .01/.08 listed under 54.

(d) by the condensed formula added directly to 547, e.g. 547CH₃O Methanol (methyl alcohol). Cf. 547.261

547-3

Types of organic compound

The -3 auxiliaries may be used with subdivisions 547.1/9, but not with 547 itself.

For organic compounds as a whole use 547.1-3... (see note at 547.1-3).

The -3 auxiliaries at 54 are applicable with addition of numbers indicated below

547-30

Oxygen-free compounds

547-302

Halogen derivatives

547-304

Nitrogenous compounds (C-N)

◇ 547.1-32-304.2 Amino acids

⇒ 547-327

547-304.1

Nitro derivatives. Nitroso derivatives

547-304.2

Amines. Imines. Ammonium bases. Ammonium salts

547-304.3

Hydrazines. Hydrazo derivatives. Diazonium salts

547-304.4

Azo derivatives. Diazo derivatives. Diazonium salts

547-304.5

Hydroxylamines

547-304.6

Oximes. Hydrazones. Semicarbazones. Azines (aldazines, ketazines)

547-304.7

Nitriles. Isonitriles

547-304.9

Other compounds. □ Triazines. Triazenes. Tetrazenes

547-305

Compounds containing sulphur directly linked to carbon

547-31/-39

Compounds containing oxygen (C-O)

547-311

Oxides. Epoxy compounds

547-312

Anhydrides

547-313

Lactides

547-314

Lactones

547-315

Esters of inorganic acids in general
⇒ 547-326

547-316

Aldehydes. Ketones. Acetals. Ketals

547-317

Diketopiperazines

547-318

Lactams

547-326

Esters in general
⇒ 547.315

547-327

Amides. Imides. Amidines. Hydroxamic acids.
Other substitutions by nitrogen in the carboxyl group

547'0

Details of the structure of organic compounds

These special auxiliaries are developed at various places in 547, e.g. at 547.52

547.022

Structure of organic compounds

547.022.1

Structure of organic compounds from the point of view of linking of the carbon atoms

547.022.11

Primary carbon atoms

547.022.12

Secondary carbon atoms

547.022.13

Tertiary carbon atoms

547.022.14

Quaternary carbon atoms

547.1

Classification of organic compounds.
Element-organic compounds

547.1-3

Types of organic compounds

Specify type using -3... auxiliaries at 54 and additions at 547. Use the highest number if more than one subdivision is applicable; the second group may be indicated by adding another hyphen auxiliary. Derivatives are indicated in the same way as the applicable functional groups themselves

◇ 547.1-316-315 Oxyaldehydes. NOTE: from -316 Aldehydes and -315 Esters of organic acids

◇ 547.1-32-304.2 Aminoacids. NOTE: from -32 Acids and -304.2 Amines

◇ 547.1-32 Acids

◇ 547.1-326 Esters

◇ 547.1-315 Esters of inorganic acids

547.1'1

Element organic compounds

547.1'1 $\equiv$ 546

Organic compounds of carbon with elements other than the halogens, nitrogen, oxygen or sulphur (which are classed under 547.2/9)

Classification of element organic compounds is based on the notation of the element in 546. The organic part is specified by the addition of '2/8

◇ 547.1'147'212 Diethyl zinc

547.1'11

Organic compounds of nonmetals in general

547.1'123

Organic compounds of selenium

547.1'124

Organic compounds of tellurium

547.1'127

Organic compounds of boron

547.1'128

Organic compounds of silicon

547.1'13

Organometallic compounds

547.1'147

Organic compounds of zinc

547.14

Comparison of cyclic and acyclic compounds

547.15

Organic compounds of the bivalent carbon atoms. Carbenes

547.16

Organic compounds not containing carbon.
□ Boroxynes, Borazines, Cyclosiloxanes. Phosphazenes

547.2

Acyclic compounds in general

547.21

Saturated hydrocarbons. Alkanes (paraffins) C_nH_{2n+2}

Details by special auxiliaries at 54

547.413.5	Perhalogeno derivatives of unsaturated hydrocarbons. Perhalogeno derivatives of ethylene	547.443	Polyketones
		547.444	Ketoaldehydes. □ Methylglyoxal C ₃ H ₄ O ₂
		547.445	Diketenes. Ketoketenes. Acetylketenes

547.446	Halogeno derivatives of aldehydes and ketones. □ Chloral CCl_3CHO . Chloral hydrate $\text{CCl}_3\text{CH}(\text{OH})_2$	547.458.85	Tunicin. Mannosocellulose
547.447	Carbonyl compounds with nitroso, nitro, amino or hydrazino groups, linked to carbon via nitrogen or some other element. □ Amino derivatives. Muscarine $\text{C}_8\text{H}_{19}\text{NO}_3$	547.458.87	Hemicelluloses. Lichenin
547.448	Aldehyde and ketone compounds containing phosphorus, arsenic etc. <i>Specify compounds by use of apostrophe</i>	547.458.88	Pectin
547.449	Compounds containing a metal directly linked to carbon <i>Specify compounds by use of apostrophe</i>	547.459	Hydroxyketones and hydroxyaldehydes with nitroso, nitro, amino, hydrazino and other groups linked to carbon via nitrogen or some other element $547.459 \equiv 547.41$
547.45	Hydroxyaldehydes. Hydroxyketones	547.459.5	Glucosamines
547.451	Hydroxyaldehydes and hydroxyketones other than true sugars. □ Glycolaldehyde $\text{C}_2\text{H}_4\text{O}_2$. Aldols $\text{C}_4\text{H}_8\text{O}_2$	547.46	Polycarboxylic acids
547.452	Aldehydes and ketones, oxaldehydes and oxyketones containing sulphur groups	547.46'05	Polycarboxylic acids in which one or more carboxyl groups are replaced by nitrile groups or by acyl halide groups, or which are substituted in one or more carboxyl groups by ammonia, hydrazine etc.
547.452.2	Mercaptoaldehydes. Mercaptoketones.	547.46'051	IsoNitriles of polycarboxylic acids
547.452.3	Sulphides of aldehydes and ketones	547.46'052	Nitriles of polycarboxylic acids in general
547.452.4	Sulphonics, sulphinic and sulphenic acids of aldehydes and ketones. □ Acetaldehydisulphonic acid	547.46'053	Acyl halides of polycarboxylic acids in general
547.452.7	Aldehydes and ketones containing different sulphur groups. Sulphur containing oxaldehydes and oxyketones. Sulphonic acids of oxaldehydes and oxyketones	547.46'054	Polycarboxylic acids which are substituted in one or more carboxyl groups by ammonia, hydrazine etc.
547.454	Carbohydrates in general	547.46'054.4	Amides
547.455	Simple sugars (monosaccharides) <i>Denote sugar derivatives by apostrophe combination</i>	547.46'054.5	Imides. Imidic acids. Imidoethers. Imidoaldehydes
547.455.3	Trioses. Glyceraldehyde $\text{C}_3\text{H}_6\text{O}_3$	547.46'054.6	Amidines
547.455.4	Tetroses $\text{C}_4\text{H}_8\text{O}_4$. □ Erythrose. Threose	547.46'054.7	Hydroxylamine derivatives. □ Hydroxamic acids. Hydroxamic acids. Amidoximes
547.455.5	Pentoses $\text{C}_5\text{H}_{10}\text{O}_5$	547.46'054.8	Hydrazine derivatives. □ Hydrazidamines
547.455.522	Ribose	547.46'054.9	Derivatives of hydrazoic acids and other derivatives which are substituted by nitrogen in the carboxyl group
547.455.524	Arabinose	547.46'055	Derivatives of polycarboxylic acids containing two or more of the various groups given in subdivisions 547.46'052/054
547.455.526	Xylose	547.461	Saturated dicarboxylic acids in general
547.455.528	Lyxose	547.461.2	Oxalic acid. Oxalates. Oxamide
547.455.6	Hexoses $\text{C}_6\text{H}_{12}\text{O}_6$	547.461.3	1,3-Dicarboxylic acids. Malonic acid and its salts. Malonic diethyl ester
547.455.62	Aldohexoses with six carbon atoms	547.461.4	1,4-Dicarboxylic acids. Succinic acid and its derivatives $\text{C}_4\text{H}_4\text{O}_2$
547.455.623	Glucose	547.461.5	Glutaric acid and its homologues
547.455.624	Mannose	547.461.6	Adipic acid and its homologues
547.455.63	Ketohexoses with six carbon atoms	547.461.7	Pimelic acid and its homologues
547.455.633	Fructose	547.461.8	Dicarboxylic acids with carboxyl groups separated by more than five carbon atoms. □ Suberic acid. Azelaic acid. Sebatic acid
547.455.635	Sorbose	547.462	Unsaturated dicarboxylic acids
547.455.65	Inulin	547.462.3	Fumaric acid. Itaconic acid
547.455.7	Heptoses	547.463	Polycarboxylic acids
547.455.8	Octoses	547.463.1	Saturated tricarboxylic acids and derivatives
547.455.9	Higher monosaccharides	547.463.2	Unsaturated tricarboxylic acids
547.458	Polysaccharides	547.463.3	Saturated tetracarboxylic acids in general
547.458.1	Polysaccharide sugars in general	547.463.7	Unsaturated tetracarboxylic acids
547.458.2	Disaccharides. □ Sucrose (Saccharose. Cane sugar). Maltose. Trehalose	547.463.8	Pentacarboxylic acids. □ Of propane, propene, butane, butene
547.458.3	Trisaccharides. □ Dextrose	547.463.9	Hexacarboxylic acids. □ Of ethane, propane, pentane, hexane
547.458.41	Tetrasaccharides	547.464	Halogeno derivatives of carboxylic acids. □ Chloroformic acid. Chloroacetic acid
547.458.5	Non-sugar polysaccharides	547.465	Nitro and nitroso derivatives of carboxylic acids
547.458.6	Starch and other reserve substances	547.466	Amino derivatives of carboxylic acids. Amino acids
547.458.61	Starch	547.466.1	Amino acid condensations and linkages in general. Betaines. Lactams. Peptide links
547.458.63	Glycogen	547.466.2	α-Monoamino derivatives of saturated monocarboxylic acids. α-Amino fatty acids
547.458.68	Dextrin	547.466.22	Glycocoli. Glycine and its derivatives
547.458.7	Natural gums and mucilages	547.466.23	Alanine
547.458.8	Cellulose. Other carbohydrates of cell membranes	547.466.24	α-Aminobutyric acid
547.458.81	Cellulose. Hydrated celluloses	547.466.25	α-Aminovaleric acid. Valine
547.458.82	Cellulose esters. Nitrocelluloses. Acetylcelluloses. Viscose. Viscoid	547.466.26	α-Aminocaproic acid. Leucine. Isoleucine
547.458.83	Amyloids		
547.458.84	Lignocellulose. Other crude natural celluloses		

547.466.27	Higher α -amino acids	547.491.4	Mustard oil. Sinapic acid. Allyl thiocyanate
547.466.3	α -, γ -, δ -Monoamino fatty acids. Other monoamino fatty acids. α -Aminopropionic acid. γ -Aminobutyric acid. δ -Aminovaleric acid	547.491.6	Cyanamide
547.466.4	Diamino derivatives of fatty acids. Ornithine	547.491.7	Cyanazide
547.466.5	Amino derivatives of unsaturated monobasic acids. β -aminocrotonic acid	547.492	Carbonic acid derivatives in general
547.466.6	Amino derivatives of saturated dicarboxylic acids	547.493	Carbonic acid esters
547.466.63	Aspartic acids. Asparagine	547.494	Sulphur derivatives of carbonic acid
547.466.64	Glutamic acid. Glutamine	547.494.3	Trithiocarbonic acid
547.466.7	Amino derivatives of unsaturated dicarboxylic acids. Aminomaleic acid. Aminofumaric acid	547.495	Ammonia derivatives of carbonic acid
547.467	Hydrazino, azo, diazo, azido and hydroxyamino derivatives of carboxylic acids	547.495.1	Carbamic acid and its derivatives. Aminoformic acid. Urethanes
547.47	Hydroxy acids. Sulphonic, sulphinic and sulphenic acids of the carboxylic acids	547.495.2	Urea and its derivatives. Carbamide
547.471	Hydroxy derivatives of monobasic acids, in general	547.495.5	Biuret
547.472	α -Hydroxy fatty acids	547.495.6	Ureides
547.472.2	Glycolic acid	547.495.9	Guanidine and its derivatives. Nitroguanidine. Creatine. Creatinine. Arginine
547.472.3	Lactic acid. Lactates	547.496	Ammonia derivatives of thiocarbonic acids
547.473	Other monohydroxy acids. Lactones	547.496.3	Thiourea and its derivatives. Thiocarbamide
547.474	Polyhydroxy derivatives of fatty acids. Hydroxylactones	547.497	Hydrazine derivatives and di-imido derivatives of carbonic acid and thiocarbonic acids.
547.474.3	Glyceric acid. Glycidic acid	547.497.6	Semicarbazide
547.474.6	Gluconic acid. Mannonic acid	547.498	Hydroxylamine derivatives.
547.475	Hydroxy derivatives of unsaturated monobasic acids		□ Carbohydroxamic acid. Carbohydroximic acid
547.475.1	Hydroxy acids with one double bond		Carbonic acid derivatives of hydrazoic acid, of triazene, of triazane, of tetrazene.
547.475.124	Ricinoleic acid		□ Methylcarbonic azide. Carbamic azide.
547.475.2	Ascorbic acid		Carbamide imide azide. Carbazide. Aliphatic diazoamino compounds. Triazenedicarboxylic acid amidinic nitrile. Triazenedicarboxylic acid amidine-amide.
547.475.4	Hydroxy acids with one triple bond. α -Hydroxytetrollic acid. Ricinostearolic acid	547.5	Guanylnitrosoaminoguanilyltetrazene
547.475.5	Hydroxy acids with two or more double bonds	547.51	Isocyclic compounds in general.
547.476	Hydroxy derivatives of dicarboxylic acids	547.512	Mononuclear compounds in particular
547.476.2	Monohydroxysuccinic acids. Malic acids. Malates	547.513	Allicyclic compounds in general
547.476.3	Tartaric acids. Racemic acid	547.514	Cyclopropane group
547.476.6	Saccharic acids	547.517	Cyclobutane group
547.476.7	Derivatives of pimelic acid, suberic acid, sebacic acid	547.518	Cyclopentane group
547.477	Hydroxy derivatives of polycarboxylic acids. Citric acid		Heptamethylene or cycloheptane group.
547.478	Hydroxycarboxylic acids containing halogens, nitrogen or other nonmetals directly linked to carbon		□ Suberone. Unsaturated derivatives
547.478.9	Carboxylic acids containing sulphur, but not in the carboxyl group	547.52/59	Isocyclic compounds with one ring containing more than seven carbon atoms
547.48	Aldehydoacids. Ketoacids	547.52	Mononuclear compounds in general
547.481	Aldehydoacids in general. Glyoxylic acid	547.52'02/04	Aromatic compounds in general. Benzene nucleus in general
547.482	Aldehydodicarboxylic acids	547.52'021	Relative positions of the substituents
547.483	Aldehydohydroxy acids. Glucuronic acid	547.52'022	<i>Applicable throughout 547.52/59</i>
547.484	Ketoacids	547.52'023	Ortho. 1,2-Dialkylarenes
547.484.2	Saturated α -ketoacids. Pyruvic acid	547.52'031	Meta. 1,3-Dialkylarenes
547.484.3	Saturated β -ketoacids. Acetoacetic acid	547.52'032	Para. 1,4-Dialkylarenes
547.484.4	Saturated α -ketoacids. Laevulinic acid	547.52'033	Vicinal. 1,2,3-Trialkylarenes
547.485	Dicarboxylic ketoacids	547.52'041	Asymmetric. 1,2,4-Trialkylarenes
547.485.2	Oxalacetic acid	547.52'042	Symmetric. 1,3,5-Trialkylarenes
547.485.6	Ketoglutaric acids	547.52'043	1,2,3,4-Tetra-alkylarenes
547.486	Polycarboxylic ketoacids	547.521	1,2,3,5-Tetra-alkylarenes
547.487	Ketenic acids	547.523	1,2,4,5-Tetra-alkylarenes
547.488	Derivatives of aldehydoacids and ketoacids containing halogens, nitrogen or sulphur directly linked to carbon	547.524	Aromatic character. Constitution of benzene
547.49	Derivatives of cyanogen, of carbonic acid	547.525	Isomerism of the substitution products of benzene
547.491	Cyanogen compounds	547.526	Determination of position
	$\Rightarrow$ 546.26	547.53	Entry of substituents
		547.533	Genetic relationships between the benzene derivatives and compounds of other classes
			Benzene and its homologues.
			Hydrocarbons containing a benzene nucleus, in general

547.539.232.3	Benzotrichloride	547.556.35	Azoxy compounds. □ Azoxybenzene. Azoxytoluenes
547.539.251.2	Pentachlorobenzene	547.556.4	Hydrazo compounds
547.539.261	Hexachlorobenzene	547.556.5	Diazo compounds, hydrazines and their derivatives in general
547.539.3	Bromo derivatives. Bromobenzene	547.556.7	Diazo compounds
547.539.4	Iodo derivatives. Iodobenzene	547.556.8	Hydrazines. □ Phenylhydrazine
		547.556.9	Aliphatic-aromatic azo and hydrazo compounds. Hydrazone and formacyl compounds. Osazones
547.54	Sulphuric acid derivatives. Sulphurous acid derivatives of benzene hydrocarbons. Thiosulphuric acid derivatives of benzene hydrocarbons. Derivatives of nitric acid, of nitrous acid	547.557	Compounds whose molecule contains more than two nitrogen atoms directly linked
547.541	Benzenesulphonic acid. Benzyisulphonic acid and its homologues. Arysulphonic acid	547.557.1	Diazoamino compounds. Diazoaminobenzene
547.541.1	Monosulphonic acids. Benzenesulphonic acid. Benzyisulphonic acid	547.56	Phenols. Aromatic alcohols
547.541.2	Disulphonic acids	547.561	Generalities on monohydric phenols
547.541.3	Arysulphonic acids with more than two -SO ₃ H groups	547.562	Phenol (carbolic acid). Phenol ethers. Phenol esters. Phenetole
547.541.5	Arysulphonic acids substituted in all -SO ₃ H groups, except metal sulphonates and sulphonic acid esters	547.562.1	Phenol
547.541.51	Sulphohalogenides	547.562.3	Halogeno derivatives
547.541.52	Sulphonamides and their derivatives substituted in the -NH ₂ group	547.562.4	Functional derivatives of phenol
547.541.521	Sulphonamides SO ₂ (NH ₂) ₂		<i>Further particulars may be denoted by apostrophe combination</i>
547.541.522	Sulphohalogenamides	◇ 547.562.4'133	Sodium phenoxide
547.541.6	Arysulphonic acids containing nonsubstituted -SO ₃ H groups adjacent to substituted -SO ₃ H groups, except metal sulphonates and sulphonic acid esters	◇ 547.562.4'261	Anisole
547.542	Sulphinic acids. Sulphenic acids	◇ 547.562.4'562.1	Diphenyl ether
547.543	Thiosulphonic acids	547.563	Cresols. Other homologues of phenol with saturated sidechains. Thymol
547.544	Sulphoxides. Sulphones	547.564	Other substitution products of monohydric phenols
547.545	Nitro derivatives of benzene hydrocarbons. Nitroso compounds	547.564.1	Hydroxybenzenesulphonic acids.
547.546	Nitro compounds with -NO ₂ groups in the nucleus. □ Nitrobenzene. Dinitrobenzene. Nitrotoluenes	547.564.2	Phenolsulphonic acid
547.547	Nitro groups with -NO ₂ groups in the sidechain. □ Phenylnitromethane. Phenylnitroethane	547.564.3	Nitrosophenols
547.548	Halogenated nitro compounds. □ Chloronitrobenzenes	547.564.4	Nitrophenols. Picric acid. Dinitrocresols
547.549	Nitrosulphonic acids. Halogenosulphonic acids		Aminophenols. Anisidine. Phenetidine. Phenacetine
547.549.1	Nitrosulphonic acids		
547.549.2	Halogenosulphonic acids		

547.564.6	Oxyazo compounds. Sudan dyes. Azo derivatives of phenol. Aliphatic azo compounds	547.585	Acids with three or more carboxyl groups in the benzene nucleus. □ Benzenetricarboxylic acids. Benzenetetracarboxylic acids. Benzenepentacarboxylic acids. Mellitic acid
547.564.7	Hydrazo derivatives of phenol. Aliphatic hydrazo compounds	547.586.1	Acids with one or more of the carboxyl groups in saturated sidechains, in general
547.564.8	Diazo derivatives of phenol	547.586.2	Monobasic phenylaliphatic acids. Phenylacetic acid. Phenylalanine
547.564.9	Phenylhydrazines	547.586.3	Polybasic phenylaliphatic acids
547.565	Polyhydric phenols	547.586.4	Acids with one or more of the carboxyl groups in unsaturated sidechains, in general
547.565.2	Dihydric phenols. □ Pyrocatechol (o-dihydroxybenzene). Guaiacol. Veratrol. Cresol. Resorcinol (1,3-dihydroxybenzene). Styphnic acid. Orcinol. Hydroquinone (1,4-dihydroxybenzene)	547.586.5	Monobasic acids with one double bond. Atropic acid. Cinnamic acid
547.565.3	Trihydric phenols. Pyrogallol. Phloroglucinol	547.586.6	Monobasic acids with triple bonds
547.565.4	Tetrahydric phenols	547.586.7	Dibasic acids
547.565.6	Hexahydric phenols. □ Hexahydroxybenzene	547.587	Phenol-carboxylic acids
547.566	Phenols with unsaturated sidechains	547.587.1	Monohydroxy derivatives of monobasic nuclear carboxylic acids. □ Salicylic acid. Salol. Acetylsalicylic acid
547.566.1	Anethole	547.587.2	Polyhydroxy derivatives of monobasic nuclear carboxylic acids. □ Vanillic acid. Gyrophoric acid. Gallic acid. Tannin
547.566.2	Eugenol. Isoeugenol. Safrole. Isosafrole	547.587.3	Hydroxy derivatives of polybasic nuclear carboxylic acids
547.566.3	Myristicin	547.587.4	Hydroxy derivatives of carboxylic acids with carboxyl groups in saturated sidechains. □ Hydrocoumaric acids. Melilotic acid. Tyrosine
547.567	Quinones. □ Quinhydrone. Thymoquinone	547.587.5	Hydroxy derivatives of carboxylic acids with carboxyl groups in unsaturated sidechains
547.568	Aromatic alcohols. Phenol alcohols	547.587.51	Coumarin. Coumarinic acid. Coumaric acid
547.568.1	Aromatic alcohols. □ Benzyl alcohol. Cinnamyl alcohol. Methylphenyl carbinol. Phenylethylene glycol	547.587.52	Dihydroxycinnamic acids. Caffeic acid. Umbelliferone
547.568.5	Phenol alcohols. □ Oxybenzylalcohol	547.587.53	Trihydroxycinnamic acids. Sinapinic acid. Daphnetin. Aesculetin. Chrysotropic acid
547.569	Aromatic derivatives of hydrogen sulphide. □ Monothiophenols. Mercaptans	547.587.54	Piperic acids. Hydropiperic acids
547.57	Aromatic carbonyl compounds and their derivatives	547.587.6	Sulphur containing compounds of phenol-carboxylic acids
547.571	Aromatic aldehydes. □ Benzaldehyde. Cuminaldehyde. Terephthalaldehyde. Cinnamaldehyde	547.588	Alcohol acids. Phenol-alcohol acids
547.572	Aromatic ketones. □ Acetophenone	547.588.1	Alcohol acids with hydroxyl and carboxyl groups in the same sidechain. □ Mandelic acid. Tropic acid
547.573	Aromatic thioaldehydes. □ Aliphatic-aromatic thioketones. Thiobenzaldehyde. Thioacetophenone	547.588.2	Alcohol acids with hydroxyl and carboxyl groups in different sidechains
547.574	Condensation products of aromatic aldehydes. □ Oximes. Hydrazones	547.588.3	Phenol-alcohol acids. Meconine
547.575	Compounds containing both carbonyl and hydroxyl groups, in general	547.588.6	Sulphur containing compounds of alcohol acids and alcohol phenol acids
547.576	Hydroxyaldehydes. □ Salicylaldehyde. Anisaldehyde. Vanillin. Piperonal	547.589	Aldehydoacids. Ketoacids
547.577	Hydroxyketones. □ Hydroxyacetophenone. Dihydroxyacetophenone. Acetopyrocatechol	547.59	Hydrogenated mononuclear benzene hydrocarbons and their derivatives. Mononuclear hydro-aromatic compounds
547.578	Aldehydoalcohols. Ketoalcohols. □ Phenyl-lactic aldehyde. Phenyl tetrose	547.591	Generalities. Relationship to aromatic compounds. Partially hydrogenated aromatic compounds
547.579	Sulphur containing analogues	547.592/595	Derivatives of hydrogenated benzene hydrocarbons other than hydrogenated cymenes
547.58	Mononuclear aromatic acids. Aromatic acids in general	547.592	Hydrocarbons and their halogens, nitro and amino derivatives. Cyclohexane
547.581	Monobasic acids with carboxyl group directly attached to the ring	547.592.1	Cyclohexane, its halogeno derivatives, sulphur and acid derivatives and nitrogen derivatives etc.
547.581.2	Benzoic acid	547.592.12	Cyclohexane
547.582	Acid derivatives with substituents in the carboxyl group. □ Benzoyl chloride. Anhydrides. Esters	547.592.13	Halogeno derivatives
547.583	Derivatives formed by substitution in the benzene nucleus	547.592.14	Sulphurous acid derivatives. Analogous selenium or tellurium derivatives
547.583.1	Halogeno derivatives. □ Chlorbenzoic acids	547.592.15	Nitro derivatives. Amino derivatives
547.583.2	Sulphobenzoic acid. □ Saccharin	547.593	Hydrogenated benzene derivatives containing hydroxyl groups. Cyclohexanol. Naphthenol
547.583.4	Nitroso derivatives. Nitro derivatives	547.593.2	Hydroxy derivatives of cyclohexane. Homologues. Functional derivatives. Halogeno derivatives. □ Cyclohexanol. Naphthenol
547.583.5	Amino derivatives. □ Anthranilic acid		
547.583.6	Azoxy azo and hydrazo derivatives. □ Diazobenzoic acids, hydrazobenzoic acid, diazoaminobenzoic acid		
547.583.7	Azido derivatives		
547.584	Dicarboxylic acids with carboxyl groups linked to the nucleus. □ Phthalic acid. Phthalic anhydride. Isophthalic acid. Terephthalic acid. Phthalimide		

547.593.3	Hydroxy derivatives of cyclohexene. Cyclohexenol. Homologues, functional derivatives and halogeno derivatives		
547.593.4	Hydroxy derivatives of cyclohexadienes. Homologues, functional derivatives and halogeno derivatives		
547.594	Aldehydes. Ketones. Cyclohexanone	547.596.7	menthenols (isopulegol, terpineol, pinol hydrates, pinol, diosphenol), aminomenthenes (dihydrocarvylamine, vestrylamine). Unsaturated hydrocarbons (menthene). Carvomenthene. Ascaridole
547.594.1	Aldehydes. □ Cyclocitral, trimethyltetrahydrobenzaldehyde, dihydrobenzaldehyde		Doubly unsaturated derivatives of methane. Doubly unsaturated hydrocarbons. □ Menthadiene, menthadienone, carvone, carvone oxime, hydroxyaminocarvoxime, menthadienols, carveol, aminomenthadiene, carvylamine. Dihydrocymene, terpinenes, dipentene, limonene, phellandrene, carvestrene, sylvestrene
547.594.3	Saturated ketones. □ Cyclohexanone and its homologues, methylhexahydroacetophenone, hexahydropropionophenone, cyclohexanedione, methylcyclohexanedione, acetylmethylcyclohexanone, cyclohexanetrione, tetrachlorotetraketohexamethylene	547.597	Polycyclic terpenic compounds in general. Carane group
547.594.4	Unsaturated ketones. □ Cyclohexenone, isoacetophorone, acetylmethyltetrahydrobenzene, irone, ionone, heptachlorocyclohexenone, octachlorocyclohexenone, cyclohexenedione	547.598	Pinane group
547.594.5	Quinols (unsaturated ketoalcohols). □ Dimethylquinol, tribromomethylquinol, pseudophenols	547.599	Camphane group
547.595	Hydro-aromatic carboxylic acids	547.599.1	Saturated hydrocarbons and transformation products. Camphane. Isohydrocamphene
547.595'05	Derivatives of hydro-aromatic carboxylic acids according to carboxyl group 547.595'05 ≡ 547.46'05	547.599.2	Unsaturated hydrocarbons. □ Camphene, bornylene, fenchene and their transposition products. Camphenylene. Apocamphoric acid. Hydroxyfenchylic acid
547.595.2	Monocarboxylic acids of cyclohexane. Cyclohexanecarboxylic acid (hexahydrobenzoic acid). Halogen and amino derivatives. Hexahydrosalicylic acid. Hydroshikimic acid. Quinic acid. Dihydroxyhydroshikimic acid. Oxoheptanecarboxylic acid. Dioxocyclohexanecarboxylic acid	547.599.3	Amines. □ Bornylamine, neobornylamine, camphylamine, campholamine, fenchylamine, fencholenamine
547.595.3	Monocarboxylic acids of cyclohexene. Cyclohexenecarboxylic acids (tetrahydrobenzoic acids). Cyclogeranic acid. Shikimic acid. Sedanolic acid. Sedanonic acid. Oxocyclohexanecarboxylic acid	547.599.4	Alcohols. □ Borneol, isoborneol, fenchyl alcohol, isofenchyl alcohol, camphene glycol
547.595.4	Monocarboxylic acids of cyclohexadiene. Cyclohexadienecarboxylic acid (dihydrobenzoic acid)	547.599.6	Saturated ketones. Camphor and its derivatives. □ Camphoroxime
547.595.6	Dicarboxylic acids of cyclohexane. □ Hexahydrophthalic acid, hydroxyhexahydroisophthalic acid, dihydroxyhexahydroisophthalic acid, oxocyclohexanedicarboxylic acid, 2,3-succinoylsuccinic acid	547.599.7	Unsaturated ketones. □ Camphenone
547.595.7	Dicarboxylic acids of cyclohexene	547.599.8	Derived acids
547.595.8	Dicarboxylic acids of cyclohexadiene. □ Dihydroterephthalic acid	547.6	Polynuclear benzene derivatives and their hydrogenated derivatives. Polycyclic compounds in general
547.595.9	Hydro-aromatic polycarboxylic acids. □ Cyclohexanetricarboxylic acid, methylcyclohexadienetricarboxylic acid, dioxocyclohexanetetracarboxylic acid, isohydromellitic acid	547.61	Generalities on the isocyclic compounds with several nuclei
547.596	Derivatives of hydrogenated cymenes. Chemistry of the monocyclic terpenes	547.62	Polynuclear systems with rings directly linked
547.596.2	Saturated derivatives of menthane. □ Menthane, menthone, carvomenthone, menthadiene, menthanols (menthol, carvomenthol), terpin, terpin hydrate, cineol, menthanetriols, limonetrine, aminomenthanes, menthylamine, carvomenthylamine, pulegonamine, menthylhydrazine. Saturated hydrocarbons (menthanes)	547.621	Biphenyl series in general
547.596.4	Unsaturated simple derivatives of methane. □ Menthene, pulegone, isopulegone, dihydrocarvone, carvenone, carvotanacetone,	547.622	Biphenyl and its homologues
		547.623	Phenols and quinones of the biphenyl series
		547.624	Acids of the biphenyl series. □ Phenylbenzoic acid. Biphenylcarboxylic acid
		547.625	Amino and azo compounds of the biphenyl series. □ Congo dyes. Benzidine. Tolidine. Chrysamine
		547.626	Hydrogenated biphenyl derivatives. □ Tetrahydrobiphenyl
		547.628	Terphenyl. Triphenylbenzene. Tetraphenylbenzene
		547.629	Phenylcyclopropane compounds. Phenylcyclobutane compounds. Phenylcyclopentane compounds
		547.63	Polynuclear indirectly linked systems
		⇒ 547.551.2	
		547.631	Diphenylmethane group. Phenylfulvene group
		547.631.1	Diphenylmethane group in general Further particulars may be denoted by special auxiliaries
		547.631.2	◇ 547.631.1.05 Synthesis. Zincke's method. Friedel-Crafts reaction. Baeyer synthesis
			Compound of two benzene rings bound by a methylene group or substituted methylene group. □ Diphenylmethane. Diphenyl-2,2-propane

547.631.3	Nitro and amino derivatives of diphenylmethane and its homologues	547.638.2	Triphenylpropane group. □ 1,1,3- or 1,2,3-triphenylpropane, benzylidenesoxymethine, symmetrical triphenylglutaric acid
547.631.4	Phenols and alcohols	547.638.3	Tetraphenylpropane group.
547.631.6	Diphenylacetaldehyde. Benzophenone and its derivatives. Dyestuffs of the diphenylmethane series. Auramine. Pyronine. Maclurin	547.638.4	Hexaphenylpropane group
547.631.7	Carboxylic and hydroxycarboxylic acids. □ Diphenylacetic acid, benzhydrylcarboxylic acids, phenylphthalide	547.638.5	1,4-Diphenylbutane group. □ 1,2-Dibenzylethane, diphenyldiacetylene, diphenacyl-2,3-dibenzoylsuccinic acid, pulvic acid, vulpic acid
547.631.8	Hydrogenated derivatives of diphenylmethane. □ Hexahydrobenzophenone, methylenedihydroresorcinol	547.639	Triphenylbutane group. Tetraphenylbutane group. □ Dibenzoylstyrene, dibenzoylstilbene, desoxybenzoinpinacone, benzoinpinacone, dibenzylacetophenone, tribenzoylmethane
547.631.9	Phenylfulvene group		Compounds with benzene nuclei linked by aliphatic chains or by cyclic systems <i>For systems with several nuclei and directly linked rings use 547.62.</i> <i>For those that are linked by aliphatic chains use 547.631/.638</i>
547.632	Triphenylmethane group	547.64	Condensed cyclic systems in general.
547.632.2	Triphenylmethane		Spiranes
547.632.3	Homologues of triphenylmethane and of triphenylmethanol, and their halogeno, nitro and sulphonic acid derivatives ⇒ 547.633.4	547.642	Spiranes
547.632.4	Generalities on the amino derivatives of the triphenylmethane series	547.65	Binuclear systems in general
547.632.5	Malachite green group	547.651	Generalities on naphthalene and its derivatives. Isomerism of the compounds of naphthalene. Isomerism of the substitution products of naphthalene. Genetic relationships between naphthalene derivatives and compounds of other classes
547.632.6	Rosaniline group. Methyl violet. Fuchsine. Aniline blue	547.652	Naphthalene, its homologues and halogeno derivatives
547.633	Oxygenated and hydrogenated derivatives of triphenylmethane	547.653	Sulphonic and nitro derivatives etc. □ Naphthalenesulphonic acids
547.633.4	Hydroxy derivatives. Phenols and alcohols of the triphenylmethane series. □ Triphenylmethanol. Hydroxytetramethyldiaminotriphenylmethane, dihydroxytriphenylmethanol (benzaurine), dihydrotriphenylmethane, tetramethylrosamine, leucarine, aurine, leucorosolic acid, rosolic acid, eupittonic acid	547.654	Non-oxygenated naphthalene derivatives. □ Naphthylamine
547.633.5	Aldehydes and ketones of the triphenylmethane series	547.655	Hydroxy derivatives of naphthalene. □ Naphthaquinones. Naphthazarin
547.633.6	Acids of the triphenylmethane series. □ Triphenylmethanecarboxylic acid, triphenylmethanolcarboxylic acids, diphenylphthalide, phthalophenone, dimethylanilinophthalide, phenolphthalein, fluorane, fluorescein, eosin, gallein, rhodamine	547.656	Aldehydes and ketones of the naphthalene series
547.633.8	Hydrogenated derivatives of triphenylmethane	547.657	Acids of the naphthalene series. □ Naphthoic acid. Naphthalenecarboxylic acids
547.634	Tetraphenylmethane	547.659	Reduction products of naphthalene. □ Hydronaphthoic acids
547.636	Symmetrical diphenylethane group	547.66	Other systems with two condensed nuclei
547.636.2	1,2-Diphenylethane	547.661	Compounds with either one naphthalene nucleus and benzene nuclei, or several naphthalene nuclei
547.636.3	Hydrocarbons of the stilbene and tolane groups and their addition products	547.663	Systems with two nuclei consisting of a nucleus with six carbon atoms condensed with a nucleus having a different number of carbon atoms, in general
547.636.4	Amines of the diphenylethane series	547.664	Phenyltrimethylene and phenyltetramethylene group
547.636.5	Alcohols	547.665	Indene group. □ Indene. Indane (hydrindene)
547.636.6	Aldehydes. Ketones	547.667	Benzocycloheptane group
547.636.7	Acids. □ Phenylcinnamic acid, phenylhydrocinnamic acid, diphenylsuccinic acid, benzylidenephthalide, isobenzylidenephthalide, diphtalyl acid, diphtalylic acid, desylacetic acid	547.669	Other systems with two condensed nuclei
547.636.8	Hydrogenated derivatives of diphenylethane	547.67	Trinuclear systems
547.637	Triphenylethane group. Tetraphenylethane group. Pentaphenylethane group.	547.672	Anthracene and its derivatives. □ Anthrahydroquinone. Chrysarobin
547.638	Hexaphenylethane group	547.673	Anthraquinone and its derivatives. □ Alizarin. Purpurin
547.638.1	Compounds with two or more benzene nuclei linked by a chain of three or more carbon atoms or by other benzene nuclei	547.674	Compounds with benzene nuclei in addition to the anthracene nucleus. □ Phenylanthranol. Phenylanthracene. Phenolphthalidine
	1,3-Diphenylpropane group. □ 1,3-Dibenzoylacetone, dibenzoylmethane, debenzyl ketone, benzylideneacetophenone, benzylacetophenone, hydroxybenzylideneacetophenone, 1,3-dibenzoyl-2-hydroxypropylene, diphenylpropane-1,2,3-trione, dibenzylacetic acid, α,α' -diphenylglutaric acid, dibenzylglucolic acid	547.675	Phenylene group
		547.677	Phenanthrene and pyrenone group

547.678	Condensed trinuclear systems with benzene nuclei linked to nuclei with a different number of carbon atoms. Acenaphthene group. Fluorene group. Naphthindene group. Pentanthrene group. Indacene group	547.738	Five-membered rings containing several sulphur hetero-atoms or sulphur and another element except nitrogen
547.678.1	Diphenylene. Dibenzcyclobutadiene	547.739	Selenophen, tellurophen and their derivatives
547.678.2	Acenaphthene group. □ Acenaphthene, acenaphthylene, acenaphthenequinone	547.741.75	Pyrrole group
547.678.3	Fluorene group. □ Fluorenedibiphenylene-ethane, fluorenedibiphenylethylene, fluorenol, fluorenone, retene, acids of the fluorene group	547.74	Pyrroles in general
547.678.4	Naphthindene group	547.741	Pyrrole. Addition products of pyrrole after nitrogen
547.678.5	Pentanthrene group	547.742	Homologues of pyrrole. □ Methylated homologues, haemopyrrole
547.678.6	Indacene group	547.743	Non-oxygenated derivatives
547.678.7	Benzidine group	547.744	Hydroxy derivatives of pyrrole
547.68	Systems with more than three condensed nuclei	547.745	Carbonyl derivatives of pyrrole. Aldehydes. Oxycyclic ketones. Exocyclic ketones. Oxoheterocyclic derivatives. Pyrrolidone etc.
547.681	Pyrene group	547.746	Non-hydrogenated carboxylic acids of pyrrole. □ Pyrrolecarboxylic acids, pyrroledicarboxylic acids and their homologues, hydroxycarboxylic acids, ketocarboxylic acids
547.682	Naphthacene group. Naphthanthracene group	547.747	Hydrogenated carboxylic acids of pyrrole. □ Pyrrolinecarboxylic acids. Proline. Tropinic acid
547.683	Chrysene group	547.748	Multiring noncondensed systems in which the rings are directly linked to one another. □ Diperyl derivatives
547.684	Dinaphthanthracene group	547.749	Multiring noncondensed systems in which the rings are indirectly linked to one another
547.685	Picene group	547.75	Condensed systems with one pyrrole ring
547.686	Fluoranthene group	547.752	Indole and its nitrogen-containing derivatives
547.687	Di-indanoyl. Di-indanyl	547.753	Homologues of indole. □ 2-Methylindole, 3-methylindole (skatole), alkylindolines, alkylindolenines
547.688	Tris(trimethylene)benzene	547.754	Non-oxygenated derivatives. □ Hydrogen addition products of indole. Indoline. Halogenated derivatives of indole
547.689	Other groups	547.755	C-hydroxy derivatives of indole and indoline. □ Indoxyl, indolyethyl alcohol (tryptophol), trimethylindolinol
547.7	Heterocyclic compounds in general. Compounds with three-membered to five-membered rings in particular	547.756	Carbonyl derivatives of indole and of indoline. □ Indoxyl. Indolethylalcohol (tryptophol). Trimethylindolinol
547.71	Three-membered rings. Four-membered rings	547.757	Carboxylic acids of the indoles. □ Indolecarboxylic acid, indolylacetic acid, indolylpropionic acid, tryptophane, indoxyl acid
547.72	Five-membered rings	547.758	Indigo blue and associated derivatives of indole. □ Indigo white, indigo carmine
547.722	Furan, its homologues and non-oxygenated substitution products	547.759	Other condensed derivatives of pyrrole
547.723	Hydroxy derivatives of the furan group	547.76	Heterocyclic five-membered systems with one hetero-atom other than oxygen, sulphur or nitrogen. Compounds containing as hetero-atom iodine, nickel, boron etc.
547.724	Carbonyl derivatives of the furan group	547.77	Five-membered heterocyclic rings with two hetero-atoms, in general, except those with only oxygen or sulphur hetero-atoms.
547.725	Carboxylic acids of the furan group. □ Pyromucic acid, dehydromucic acid, pyrotritaric acid, carbopyrotritaric acid, methronic acid, furfurylacrylic acid	547.78	□ Pyrazoles. Pyrazoline. Pyrazolone. Antipyrine
547.727	Noncondensed systems of the furan type with several rings	547.781	Imidazoles. Isoxazoles. Oxazoles.
547.728	Condensed systems of the furan type with several rings	547.782	Isothiazoles. Thiazoles
547.729	Five-membered rings containing several oxygen hetero-atoms or oxygen and another element except nitrogen and sulphur	547.783	Imidazole (glyoxaline) group in general. □ Histamine
547.73	Five-membered rings containing sulphur as hetero-atom. Thiophene group	547.784	Hydroxy derivatives of imidazole
547.732	Compounds containing one thiophene ring. Thiophene group in general. □ Thiophene, its homologues, halogeno derivatives, sulphonic acid derivatives, nitro derivatives, amino derivatives and organometallic compounds, tetrahydrothiophene	547.785	Carbonyl derivatives of imidazole. Exocyclic derivatives. Glyoxalane. Ethylene-urea (glyoxalidone). Hydantoin. Allantoin.
547.733	Hydroxy derivatives. Keto derivatives. Carboxylic derivatives	547.786	Methyleneoxamide. Parabanic acid. Imides of keto-heterocyclic derivatives
547.734	Noncondensed systems of the thiophene type with several rings	547.787	Carboxylic acids of imidazoles. □ Histidine
547.735	Condensed systems of the thiophene type in general. □ Thionaphthens	547.788	Systems with several imidazole rings
547.736	Other condensed systems containing thiophene and benzene rings. □ Thiophthalan. Naphthiophen. Diphenylene sulphide	547.789	Isoxazole compounds
547.737	Condensed systems containing several thiophene rings. □ Thiophthen. Sulphetone		

547.787	Oxazole compounds	547.84	Heterocyclic compounds with six atoms in the ring, of which two are hetero-atoms other than nitrogen
547.788	Isothiazoles. Benzisothiazole		
547.789	Thiazole group. Other five-membered rings with two hetero-atoms	547.841	Dioxan and its derivatives 547.841.5/66 $\equiv$ 547.85/866
547.79	Five-membered heterocyclic systems with three or four hetero-atoms, except those with only oxygen or sulphur hetero-atoms. Triazoles. Methylene red. Tetrazoles	547.842	Dithian and its derivatives. Divinylene disulphide. Thianthrene 547.842.5/66 $\equiv$ 547.85/866
547.8	Heterocyclic compounds with six or more atoms in the ring	547.843	Thioxan (oxthian) compounds. 1,4-Thioxan. Phenoxthin. Naphthoxthin
547.81	Pyran and penthiophen group. Its analogues	547.85	Azines in general. Pyridazine and pyrimidine group
547.812	Pyrans	547.852	Pyridazines (1,2-diazines)
547.813	Systems with several noncondensed pyran rings	547.853	Pyrimidine compounds
547.814	Benzopyran compounds	547.854	Mononuclear pyrimidine derivatives containing oxygen. $\square$ Uracil. Thymine. Barbituric acid. Veronal. Thiouracil
547.815	Xanthen compounds		Uncondensed polynuclear pyrimidine systems
547.816	Other condensed systems of pyran. $\square$ Naphthopyrane. Dinaphthopyrane. Hydroxybinaphthylene. Hydroxyceroxene	547.855	Quinazoline and other condensed systems of pyrimidine rings and carbon rings
547.818	Compounds of penthiophen (thiopyran). $\square$ Thiocoumarine	547.856	Purine group
547.819	Heterocyclic compounds with a ring of six atoms including only one hetero-atom, the hetero-atom being other than oxygen, sulphur, selenium, tellurium or nitrogen	547.857	Purine and its methyl derivatives
547.82	Pyridine compounds in general. Uncondensed systems in particular	547.857.1	Halogeno derivatives. Other non-oxygenated derivatives
547.821	Pyridine. Pyridine compounds. $\square$ Picolines. Lutidines	547.857.2	Compounds with one oxygen atom linked to an esocyclic carbon atom. $\square$ Hypoxanthine
547.822	Non-oxygenated pyridine derivatives. $\square$ Piperidine	547.857.3	Compounds with two oxygen atoms linked to an esocyclic carbon atom. $\square$ Theophylline. Theobromine. Caffeine
547.823	Hydroxy derivatives of pyridine and of piperidine	547.857.4	Compounds with three oxygen atoms linked to an esocyclic carbon atom. $\square$ Uric acid
547.824	Carbonyl derivatives of pyridine and of hydrogenated pyridine. N-Alkyl pyridones. Pyridon. Hydroxypyromecazonic acid. Pyridoquinone. Pyromecazone. Piperidone. Triacetoneamine etc. Pyridine aldehyde. Pyridylalkyl ketones. Hydrogenated aldehydes and ketones of the pyridine series	547.857.5	Compounds with more than three oxygen atoms linked to esocyclic carbon atoms. $\square$ Alkylhydroxyisouric acid. Uric acid glycols
547.825	Thiolic and thionic derivatives of pyridine and of hydrogenated pyridines	547.857.6	Compounds which appear as imides of ketopurine compounds. $\square$ Adenine. Guanine
547.826	Non-hydrogenated carboxylic acids of the pyridine series	547.857.7	Carboxylic acids
547.827	Hydrogenated carboxylic acids of the pyridine series. Dihydrocarboxylic acids, tetrahydrocarboxylic acids, hexahydrocarboxylic acids. $\square$ Loiponic acid, scopolic acid, Eucaïne A, cincholoiponic acid, cincholoipine, meroquinene, granatic acid	547.857.8	C-aryl purine compounds
547.828	Systems in which pyridine rings are directly linked to other rings. $\square$ Bipyridyl. Bipiperidyl. Phenyl compounds of pyridine. Pyridyl pyrrole	547.86	Pyrazine, oxazine and thiazine compounds
547.829	Systems in which pyridine rings are indirectly linked to other rings. $\square$ Pyridoin. Pyridostilbene. Papaveric acid. Stilbazole	547.861	Pyrazine group in general. $\square$ Pyrazine
547.83	Condensed systems of the pyridine type	547.862	Systems with several uncondensed pyrazine nuclei. C-aryl pyrazine compounds. Nuclei of pyrazine and of benzene linked by intermediary groups. Nuclei of pyrazine and of unidazole linked by intermediary groups
547.831	Quinoline group. $\square$ Quinoline. Lepidine. Hydroxyquinolines	547.863	Condensed systems of pyrazine in general. Quinoxaline and other systems obtained from pyrazine by unilateral orthocondensation with carbon rings
547.832	Polynuclear quinoline derivatives. $\square$ Diquinolyl. Atophan	547.864	Phenazine group. $\square$ Induline. Mauveine. Safranil
547.833	isoQuinoline group	547.865	Other systems obtained from pyrazone by bilateral condensation with carbon rings
547.834	Other systems with two condensed pyridine nuclei. Tropine	547.866	Pyrazine in direct condensation with hetero rings
547.835	Acridine group	547.867	Oxazine compounds
547.836	Other condensed trinuclear systems	547.869	Thiazine, selenazine and analogous compounds. Thiodiphenylamine. Methylene blue
547.837	Systems with four condensed pyridine nuclei. $\square$ Anthraquinoline (alizarin blue). Quindoline. Apomorphine	547.87	Heterocyclic systems with six atoms in the ring, of which three are hetero-atoms
547.838	Systems with five or more condensed pyridine nuclei. $\square$ Indanthrene red. Flavanthrene	547.88	Heterocyclic systems with six atoms in the ring, having more than three hetero-atoms
		547.89	Heterocyclic systems with more than six atoms in the ring
		547.9	Natural substances. Substances of unknown composition $\Rightarrow$ 577.1 $\Rightarrow$ 615.2

- 549.3 Sulphides. Sulpho-salts**
- 549.31 Sulphides, selenides and tellurides of semimetals**
 549.311 Subsulphides. Dimorphite (dimorphine)
 549.312 Monosulphides. Realgar
 549.313 Sesquisulphides
 549.313.1 Orpiment
 549.313.2 Stibnite (antimonite)
 549.313.3 Bismuthinite
- 549.32/.33 Sulphides, selenides and tellurides of metals**
 549.321 Zinc sulphide group
 549.321.13 Sphalerite (zinc blende)
 549.322 Sulphides etc. of iron, cobalt and nickel
 549.322.21 Pyrrhotite
 549.322.23 Niccolite
 549.323 Sesquisulphides. Badenite
 549.324/.326 Disulphides of iron and related sulphides
 549.324.31 Pyrite. Iron pyrites
 549.324.41 Cobaltite
 549.324.42 Gersdorffite
 549.324.61 Marcasite. Spear pyrites, coxcomb pyrites
 549.324.62 Arsenopyrite
 549.325.2 Molybdenite
 549.327 Subarsenides etc. of the metals of the copper group
 549.328 Sulphides etc. of lead
 549.328.1 Galena (lead glance)
 549.328.2 Clausthalite
 549.331 Sulphides etc. of the monovalent heavy metals
- 549.331.11 Argentite (silver glance)
 549.331.14 Petzite
 549.331.21 Chalcocite (copper glance)
 549.332 Sulphides of copper
 549.333 Sulphides of mercury
 549.334 Tellurides of gold and silver
- 549.35 Sulpho-salts and corresponding selenium and tellurium compounds**
 549.351 Sulpho-ferrides and related sulpho-salts
 549.351.11 Bornite
 549.351.12 Chalcopyrite (copper pyrites)
 549.351.2 Salts of monovalent and divalent metals. Cubanite (chalmersite)
 549.351.31 Linnaeite
 549.352 Sulpho-arsenites, antimonites and bismuthites
 549.352.211 Chalcostibite (wolfsbergite)
 549.352.26 Zinckenite
 549.352.27 Sartorite (scleroclase)
 549.354.11 Proustite
 549.354.12 Pyrargyrite
 549.354.42 Bournonite
 549.355 Tetrahedrite group. Grey copper ore
- 549.36 Sulpharsenates. Sulphantimonates. Sulphovanadates**
- 549.37 Sulphostannates. Sulphogermanates**
 549.371 Stannite (tin pyrites)
- 549.38 Compounds of sulphostannates with sulphoantimonites**
- 549.4 Halides**
- 549.45 Simple halides**
 549.451 Halides of the alkali metals and ammonia
 549.451.1 Halite (rock salt)
 549.451.2 Sylvine
 549.452 Halides of silver and copper
 549.453 Halides of mercury
 549.454 Halides of bivalent metals
 549.454.2 Fluorite (fluorspar)
 549.455 Halides of trivalent and tetravalent metals
 549.456 Hydrated simple halides
- 549.46 Double halides**
 549.461 Anhydrous double halides
 549.461.12 Cryolite
 549.461.17 Yttrocerite. □ Yttrocalcite, yttrium calcium fluoride
 549.462 Hydrated double fluorides
 549.463 Anhydrous double chlorides
 549.464 Hydrated double chlorides
 549.464.1 Carnallite
- 549.47 Oxyhalides**
- 549.5 Oxygen compounds**
- 549.51 Oxides**
 549.511.1 Ice, as mineral
 549.512 Oxides of nonmetals of Group 6
 549.512.1 Tellurite
 549.512.3 Molybdate
 549.513 Sesquioxides of semimetals
 549.513.1 Cubic series. □ Arsenolite. Senarmontite
 549.513.2 Monoclinic or pseudorhombic series
 549.514 Oxides of silicon, titanium, zirconium
 549.514.5 Silicon dioxide
 549.514.51 Quartz
 549.514.52 Chalcedony
 549.514.53 Opal
 549.514.54 Lechatellierite
 549.514.56 Tridymite
 549.514.58 Cristobalite
 549.514.6 Titanium dioxide
 549.514.7 Having the same structure as rutile

549.514.73	Pyrolusite (polianite)	549.623.5	Mica group. □ Muscovite. Biotite
549.514.8	Isomorphous with rutile	549.623.6	Brittle mica group
549.514.81	Zircon	549.623.7	Chlorite-serpentine group. Serpentine
549.514.82	Thorite. Uranothorite	549.623.8	Talc group. □ Talc. Steatite (soapstone).
549.514.87	Uraninite (pitchblende. Ulrichite)		Sepiolite (meerschaum)
549.516	Oxides of bivalent metals	549.623.9	Kaolin group. □ Kaolinite
549.516.11	Periclase		
549.516.13	Manganosite	549.63	Intermediate silicates
549.516.22	Zincite (red zinc ore)	549.631	Thortveitite group. □ Barysilite. Thortveitite
549.517	Sesquioxides of trivalent metals	549.632	Cordierite group. Cordierite
549.517.1	Corundum. Ruby. Sapphire	549.633	Meliphan group
549.517.2	Haematite (iron-glance)	549.634	Astrophyllite group
549.518	Oxides of monovalent metals		
549.518.1	Cuprite	549.64	Metasilicates and metatitanates
549.519	Other noncubic oxides of bivalent metals having no crystallographic relationships with one another	549.641	Perovskite and ilmenite group
549.519.4	Massicot	549.641.23	Ilmenite
		549.642	Pyroxene
549.52	Hydroxides	549.642.12	Bronzite
549.521	Hydroxides of trivalent elements	549.642.13	Hypersthene
549.521.3	Sassolite (boric acid)	549.642.21	Diopside
549.521.4	Aluminium compounds. Diaspore	549.642.25	Common augite (black augite)
549.521.5	Iron compounds	549.642.26	Jadeite
549.521.6	Hydroxides of other metals	549.642.41	Wollastonite
549.521.61	Manganite	549.642.51	Rhodonite
549.522	Hydroxides of bivalent elements	549.643	Amphibole
549.523	Hydrated oxides of elements of high valency	549.643.11	Anthophyllite
549.525	Compounds of several hydroxides	549.643.21	Tremolite
		549.643.22	Actinolite
549.53	Oxysulphides. Kermesite (antimony blende)	549.643.25	Common hornblende
549.6	Silicates. Titanates. Zirconates. Stannates	549.643.31	Glaucophane
		549.643.32	Riebeckite
549.61	Basic silicates	549.645	Leucite
549.611	Hyperbasic silicates. Sapphirine and staurolite group	549.646	Beryl group. Emerald. Aquamarine
549.611.11	Sapphirin	549.65	Polysilicic acid salts
549.611.21	Staurolite	549.651	Feldspar group
549.611.23	Zunyite	549.651.11	Orthoclase (potash feldspar). Adularia
549.612	Tourmaline group	549.651.12	Sanidine (potash soda feldspar)
549.613	Andalusite group	549.651.2	Plagioclases
549.613.1	Andalusite (chiastolite)	549.655	Titanite (sphene)
549.613.2	Sillimanite (fibrolite)	549.657.13	Benitoite
549.613.3	Kyanite (cyanite, disthene, rhaetizite)	549.66	Heteropolysilicic acids and related salts. Heteropolyacidic salts of tetravalent and pentavalent nonmetals. □ Ardennite.
549.613.4	Mullite		Polymignite. Derbylite. Steenstrupite. Britholite.
549.614	Topaz group. Topaz		Epistolite. Euxenite. Polycrase. Blomstrandine.
549.616	Humite group		Priorite. Aeschynite. Erikite. Katoptrite.
549.618	Epidote group		Chalcolamprite. Lewisite
549.619	Other basic silicates	549.67	Zeolites
549.619.1	Vesuvianite	549.68	Compounds containing water of crystallization, of silicates with carbonates, sulphates and uranates
549.62	Orthosilicic acid salts		
549.621	Normal salts	549.69	Other silicates
549.621.1	Rhombic series. Olivine group	549.691	Amorphous silicates
549.621.14	Olivine (chrysolite, peridot)	549.691.1	Anhydrous amorphous silicates. Natural glass.
549.621.2	Trigonal series. Phenacite group		Tektites (moldavite, australite, billitonite)
549.621.3	Pseudohexagonal series. Trimerite		
549.621.4	Nepheline group	549.7	Other compounds of oxyacids
549.621.43	Nepheline	549.73	Borates. Aluminates. Ferrites. Arsenites. Antimonites. Other salts of trivalent elements
549.621.5	Sodalite group		Anhydrous aluminates, borates etc.
549.621.51	Sodalite	549.731	Cubic series. □ Spinel. Magnetite. Chromite
549.621.53	Haüyne (latialite)	549.731.1	Chrysoberyl
549.621.55	Lazurite	549.731.2	Ludwigite
549.621.6	Danburite group	549.731.33	Boracite
549.621.7	Pseudobrookite	549.731.6	Hydrated borates. □ Borax
549.621.8	Eulytine group. Eulytine (agricolite)	549.732	Hydrated compounds of borates and sulphates.
549.621.9	Garnet group	549.733	Sulphoborite
549.623	Acid orthosilicates and related minerals		Salts of arsenious and antimonious acids
549.623.1	Dioptase group	549.736	
549.623.11	Dioptase	549.74	Carbonates. Selenites. Tellurites. Manganites. Plumbates
549.623.2	Prehnite		
549.623.3	Axinite		
549.623.4	Pyrosmalite		

549.741	Anhydrous acid and normal carbonates	549.763	Anhydrous compounds of sulphates with halides
549.742	Normal anhydrous carbonates of divalent metals	549.764	Anhydrous compounds of chromates and iodates
549.742.111	Calcite (calc-spar)	549.765	Anhydrous compounds of sulphates and chromates with carbonates
549.742.112	Magnesite	549.766	Hydrated sulphates and uranates containing a single metal
549.742.113	Rhodochrosite	549.766.13	Mirabilite (Glauber's salts)
549.742.114	Siderite (spathose iron)	549.766.21	Gypsum
549.742.115	Smithsonite (zinc spar). Calamine	549.766.3	Sulphates of other divalent metals
549.742.121	Dolomite	549.766.311	Kieserite
549.742.21	Aragonite	549.767	Hydrated sulphates containing more than one metal
549.742.23	Witherite	549.768	Hydrated compounds of sulphates with haloids and nitrates
549.743	Anhydrous basic carbonates	549.768.1	Kainite
549.743.11	Hydrozincite	549.8	Organic minerals
549.743.12	Malachite	549.88	Hydrocarbons
549.743.13	Azurite	549.882	Ozokerite (mineral wax) etc.
549.743.16	Hydrocerussite (plumbonacrite)	549.883	Oxygen-containing transformation products of hydrocarbons. □ Asphalt
549.743.21	Dawsonite	549.89	Fossil resins and salts of organic acids
549.744	Fluorocarbonates. Chlorocarbonates	549.892	Fossil resins
549.745	Compounds of carbonates and chlorides.	549.892.1	Amber
	Northupite	549.893	Salts of organic acids
549.746	Hydrated carbonates	549.9	Other methods of classifying minerals
549.747	Selenites and tellurites	549.902	Classification of minerals from crystallographic features
549.748	Manganites and plumbates	549.903	549.902 ≡ 548.1.02
549.75	Compounds of the pentavalent element oxyacids	549.903.1	Classification according to physical properties
549.751	Nitrates and iodates of monovalent and divalent metals	549.903.5	By relative density
549.751.11	Nitratine (soda nitre)	549.903.51	By optical properties
549.751.12	Nitre (saltpetre)	549.903.52	Isotropic minerals
549.752/757	Phosphates. Arsenates. Antimonates.	549.903.53	Uniaxial minerals (one optic axis)
	Vanadates. Niobates. Tantalates	549.903.54	549.903.52 ≡ 549.903.51
549.752	Normal and acid anhydrous salts		Biaxial minerals (two optic axes)
549.753	Anhydrous salts containing chlorine or fluorine.		549.903.53 ≡ 549.903.51
	Anhydrous basic salts		Anisotropic minerals in general
549.753.1	Apatite group. □ Pyromorphite. Vanadinite	549.903.55	549.903.54 ≡ 549.903.51
549.754	Anhydrous compounds of phosphates with sulphates and chromates	549.903.56	Transparent
549.755	Hydrated salts. Phosphates, arsenates etc.	549.903.9	Opaque
549.755.131	Turquoise. Callainite	549.905	Classification according to atomic structure
549.755.231	Vivianite	549.905.1	Classification of minerals from their genetic occurrence
549.755.35	Uranite	549.905.2	Authigenic
549.76	Sulphates. Chromates. Molybdates. Tungstates	549.905.3	Allothigenic
549.761	Anhydrous normal salts	549.905.8	Classification according to paragenesis
549.761.22	Glauberite		⇒ 553
549.761.31	Anhydrite		Classification according to pedogenesis
549.761.33	Celestite		
549.761.34	Barytes		
549.761.53	Scheelite		
549.761.6	Tungstates of iron and manganese, unrelated to monoclinic raspite		
549.762	Basic and hyperbasic anhydrous salts

564.329.2	Taenioglossa. □ Hydrobiidae. Spire shells.	567/569	VERTEBRATA
564.329.39	Littorinidae. Winkles (periwinkles)	567	PISCES: FISHES
564.329.6	Cypraeidae. Cowries	567.1	Pteraspodomorphi
564.329.8	Rhachiglossa. □ Fasciolaridae.	567.2	Cephalaspodomorphi
564.38	Pyramidellidae. Fusidae. Buccinidae.	567.21	Petromyzontiformes
564.38	Columbellidae. Muricidae. Purpuridae. Mitridae.	567.211	Petromyzontidae: Lampreys
564.38	Volutidae. Olovidae. Harpidae	567.23	Anaspidiformes
564.38	Toxoglossa. □ Conidae. Cone shells	567.25	Galeaspidiformes
564.5	Pulmonata. Lung-bearing gastropods.	567.27	Cephalaspidiformes
564.51	□ Land snails. Garden snails. Slugs. Water snails (freshwater snails)	567.3	Chondrichthyes: Cartilaginous fishes
564.52	Cephalopoda	567.31	Elasmobranchii (Plagiostomata)
564.51	Tetrabranchiata	567.4/.5	Osteichthyes: Bony fishes
564.52	Nautiloidea. Nautiloids	567.411	Dipnoi: Lungfish
564.53	Ammonoidea. Ammonoids (ammonites)	567.413	Coelacanthimorpha
564.55	Dibranchiata	567.413.1	Coelacanthiformes. Coelacanth
564.56	Octopoda. Octopuses	567.5	Teleostei: Teleosts
564.58	Decapoda	567.511	Leptolepidimorpha
564.581	Belemnoidea. □ Belemnitidae. Belemnites	567.6	Amphibia (Batrachia): Amphibians in general
564.582	Sepioidea. □ Squids. Cuttlefish	567.8	Anura. Tailless amphibians. □ Toads. Frogs
564.6	Molluscoidea (Tentaculata)	567.9	Urodela. Tailed amphibians. □ Newts. Axolotls. Salamanders
564.7	Bryozoa. Ectoprocta. Polyzoa. □ Moss animalcules. Sea-mat	567.99	Stegocephali. □ Temnospondyli: Sclerocephalus, Ichthyostega, Eryops, Branchiosaurus
564.8	Brachiopoda. Lamp-shells	568	SAUROPSIDA
565	ARTICULATA	568.1	Reptilia. Reptiles
565.1	Vermes. Worms. Helminths	568.112	Lacertilia
565.14	Annelida. Segmented worms. □ Bristle-worms	568.112.11	Gekkonidae
565.2	Arthropoda in general	568.112.13	Agamidae
565.3	Branchiata. Crustacea. Crustaceans. □ Entomostraca. Phyllopora. Cirripedia. Barnacles	568.112.14	Iguanidae
565.33	Ostracoda	568.112.16	Anguidae
565.36	Malacostraca in general. □ Arthrostraca	568.112.17	Helodermatidae
565.38	Thoracostraca. □ Decapoda. Brachyura. Crabs. Leptostraca. Phyllocarida	568.112.18	Varanidae
565.39	Palaeostraca	568.112.19	Teiidae
565.391	Gigantosthraca. Eurypteridae. □ Sea-scorpions	568.112.21	Chamaeleontidae
565.392	Xiphosura. King-crabs (horseshoe crabs)	568.112.23	Lacertidae
565.393	Trilobita. Trilobites	568.112.27	Scincidae
565.4/7	Tracheata	568.112.31	Dolichosauridae
565.4	Arachnoidea. Arachnids. □ Mites. Spiders. Scorpions. Chelifers. Ricinulei	568.112.32	Aigialosauridae
565.6	Myriapoda. □ Millipedes. Centipedes	568.112.33	Mosasauroidea
		568.112.34	Paterosauridae
		568.114	Amphisbaenidae
		568.115	Ophidia: Snakes

568.12	Rhyncocephalia. □ Rhyncosauridae. Sphenodontidae. Thalattosauridae	569.312	Edentata. □ Extinct anteaters, armadillos. Glyptodon
568.13	Testudinata. Chelonia. □ Tortoises. Turtles	569.32	Rodentia and Lagomorpha. □ Extinct rodents. Extinct relatives of rats, mice, beaver. Extinct rabbits, hares
568.14	Crocodylia. Parasuchia		
568.15	Ichthyosauria. Ichthyosaurs (fish-lizards)		
568.16	Sauropterygia	569.35/38	Insectivora. □ Extinct insectivores
568.163	Plesiosauria. □ Plesiosaurs. Pliosaurs	569.5	Cetacea and Sirenia. □ Extinct marine mammals
568.164	Placodontia. Placodonts		
568.165	Mesosauria. Mesosaurs	569.61	Proboscidea. □ Extinct relatives of elephants. Gomphotheriidae (mastodons). Dinotherium. Mammoths
568.17	Theromorpha. □ Cotylosauria: Bradysaurus. Pareiasaurus etc. Pelycosauria: Edaphosaurus etc. Cynodonita. Dimetrodon	569.62	Hyracoidea. □ Arsinoitherium
568.18	Pterosauria. □ Pterodactyl. Pteranodon	569.63	Typotheria
568.19	Dinosauria. Dinosaurs. □ Theropoda: Tyrannosaurus, Plateosaurus, Allosaurus etc. Sauropoda: Brontosaurus, Diplodocus etc. Praedentata: Iguanodon, Stegosaurus, Triceratops, Psittacosaurus etc.	569.64	Toxodontia
568.2	Aves. Birds in general	569.65	Litopterna
568.211	Archaeornithes. □ Archaeopteryx	569.66	Amblypoda. □ Uintatherium
568.215	Hesperornithiformes. Hesperornis	569.67	Astrapotheroidea
568.221	Struthioniformes: Flightless birds		
568.221.1	Struthionidae: Ostrich	569.71	Condylarthra
568.221.2	Rheidae: Rheas		
568.221.7	Dinornithidae: Moas	569.72	Perissodactyla. □ Chalicotheriidae. Palaetheriidae. Brontotherium
568.23	Sphenisciformes. Gaviliformes. Podicipediformes. Procellariiformes. Pelecaniformes	569.722	Rhinocerotidae. □ Woolly rhinoceros. Hyracodon
568.24	Gruiformes. Charadriiformes. Ciconiiformes	569.723	Equidae. □ Extinct equines
568.25	Anseriformes	569.73	Artiodactyla
568.26	Galliformes. Columbiformes	569.731	Nonruminantia. □ Extinct relatives of pigs, hippopotamuses
568.27/278	Psittaciformes. Piciformes. Apodiformes. Caprimulgiformes. Coraciiformes	569.732	Bunoselenodontia. □ Anthracotherium
568.279.2	Accipitriformes	569.733	Tylopoda. □ Camelidae. Extinct relatives of camels
568.279.25	Strigiformes: Owls	569.735	Ruminantia. □ Extinct elks. Extinct bovines. Aurochs
568.28/29	Passeriformes: Passerines		
569	MAMMALIA. MAMMALS	569.74	Carnivora. □ Canidae. Ursidae. Mustelidae. Hyaenidae. Felidae. Extinct felines: Machairodus (Smilodon), sabre-toothed tiger; cave lion
569.1	Prototheria (Eplacentalia)		
569.2	Metatheria (Didelphia)	569.8	Primates. □ Extinct prosimians, simians
569.22/23	Marsupialia. Extinct marsupials	569.89	Hominidae. Hominids. □ Early humans and related forms. Homo sapiens (humans, man)
569.22	Diprotodontia. □ Vombatidae. Macropodidae. Potoroidae		
569.23	Polyprotodontia		
569.3/8	Eutheria (Placentalia, Monodelphia). □ Extinct placental mammals

- 581.43 Roots. Organs of nutrition**
- 581.44 Stems (axes).** □ Neck, hypocotyl. Nodes. Terminal buds. Aerial stems. Tendrils. Cirri. Runners. Stolons. Subterranean stems. Rhizomes. Bulbs. Tubers. Underground runners
- 581.45 Leaves.** □ Laminae. Petioles. Leaf scars. Leaf bases. Leaf tendrils. Cirrous leaves. Sporophylls
- 581.46 Flowers**
- 581.47 Fruit**
- 581.48 Seeds**
 ⇒ 581.3
- 581.49 Other organs. Surface appendages.**
 □ Stipules. Ochreae. Ligules. Hairs. Prickles etc.
- 581.5 Habits of plants. Plant behaviour. Plant ecology. Plant ethology. The plant and its environment. Bionomics of plants**
 ⇒ 502.211:582
 ⇒ 581.18
 ⇒ 631.95
- 581.51 Instinct**
- 581.52 Environment and habitat of plants**
 581.522 Individual ecology. Autecology
 581.522.4 Adjustment. Acclimatization
 581.522.5 Ecological anatomy. Correlation of structure and environment. Advantageous or adaptive structure
 581.522.6 Migration. Dissemination
 581.524 Associational ecology. Synecology
 581.524.1 Theoretical and general questions. Mutual influences of living organisms
 581.524.12 Nature of competition
 581.524.13 Allelopathie
 581.524.14 Natural pruning
 581.524.2 Invasion
 581.524.3 Succession
 581.524.4 Zonation
 581.524.42 Horizontal zonation
 581.524.43 Vertical zonation
 581.524.44 Climatic zones
 581.524.5 Alternation
 581.526 Formational ecology
 581.526.1 General physiognomy and aspect
 581.526.12 Horizontal structure of vegetation
 581.526.13 Vertical structure of vegetation
 581.526.2 Factors determining occurrence and extent of formations
 581.526.3 Hydric formation. Hydrophytes
 581.526.32 Aquatic formations
 581.526.322 Running-water formation
 581.526.323 Bethos. □ Flora attached to bottom of sea, streams etc.
 581.526.324 Pleuston. □ Submerged, free-swimming or floating freshwater flora. Flora found specially in quiet water under shelving banks
 581.526.325 Plankton. Pelagic botany. Free-swimming or floating surface flora
 581.526.326 Hot-water formation
 581.526.33 Freshwater-swamp formations. Low-moor formations
 581.526.34 Heath formations
 581.526.35 Bog formations. High-moor formations
 581.526.4 Mesic formations. Mesophytes
 581.526.42 Forest formations
 581.526.422 Rain-forest formations
 581.526.423 Monsoon-forest formations
 581.526.424 Savanna-woodland formations
 581.526.425 Deciduous or hardwood-forest formations
 581.526.426 Evergreen-forest formations. □ Conifer. Sclerophyll
 581.526.427 Thorny-forest formations
 581.526.43 Vines. Climbing plants. Lianas
 581.526.44 Epiphytes
 581.526.45 Prairie formations
 581.526.5 Xeric formations. Xerophytes
 581.526.52 Halic formations. Halophytes. □ Salt-marsh formations. Alkali-land formation
 581.526.53 Desert and semi-desert formations. □ Chaparral formations. Tundra, cold-desert formations. Arid, dry-desert formations. Mangrove formations. Dune formations

- 581.526.54 Rock surface formations
 581.526.55 Snow and ice formations
 581.526.56 Crater formations. Crater plants
 581.526.6 Plant formations after ploughing
 581.526.62 Cultivation formation
 581.526.63 Post-cultivation formations
 581.526.65 Weed formations
 581.526.7 Ruderal plant formation
 581.527 Floristics. Floral regions

SYSTEMATIC BOTANY

For systematic palaeobotany see 561 which is parallel with 582

582-1

Concepts of general botany related to particular plants

582-1 ≡ 581

582.09

Classification according to size and form

Use either in the form listed here (as in the first example) or combined with 582.23/9 (as in the second example)

◇ 582.091(41) Trees of the British isles

◇ 582.628.091 Juglandales

Trees (large woody plants with trunk)

Shrubs (smaller woody plants without single trunk)

Undergrowth. Undershubs (e.g. brambles - Rosoideae)

Woody climbers (e.g. ivy - Araliaceae)

Herbaceous or non-woody plants (often called 'plants' or 'flowers')

582.23

Bacteria

582.231

Schizomycota (Bacteriophyta). Bacteria (as plants)

If in doubt prefer 579.8

582.232

Cyanophyta (Cyanophyceae, Cyanobacteria). Blue-green algae

582.233

Archaea (Archaeobacteria). □ Sulfolobus. Thermoplasma. Methanobacteria. Halobacteria

582.24

Protista (Protoctista). Chromista. Protozoa

582.241

Myxomycota (Mycetozoa). Acellular slime moulds. Plasmodial slime moulds

582.243

Hyphochytriomycota

582.244

Oomycota (Oomycetes)

582.244.1

Saprolegniales

582.244.2

Peronosporales

582.245

Plasmodiophoromycota

582.245.1

Plasmodiophorales

582.261/27

Algae. Phycology. □ Seaweeds. Pond

scums. Freshwater phytoplankton. Marine phytoplankton

Chrysophyta

582.261

Bacillariophyceae. Diatoms

582.261.1

Chrysophyceae: Golden-brown algae

582.261.2

Chlorophyta: Grass-green algae. Desmids

582.263

Chlorophyceae. Green algae. Ulva

582.263.1

Zygnemataceae: Conjugating green algae.

582.263.2

Volvocaceae. □ Spirogyra. Zygnema

582.263.3

Charophyceae. Charophytes. □ Stonewort

582.268

(Brittlewort). Chara

582.272

Xanthophyta: Yellow-green algae

582.276

Phaeophyta: Brown algae. □ Laminaria. Kelps.

582.273

Bladderwrack. Fucus

582.276

Rhodophyta: Red algae. □ Bangiophytes.

582.277

Florideophytes. Nemalion. Ceramium.

582.279

Gigartina. Gelidium

582.281

Pyrrophyta. Dinoflagellates. Cryptophytes.

582.281.21

Cryptomonas. Peridinales. Peridinae.

582.282

Ciliolagellatae

582.282.11

⇒ 593.162

582.277

Euglenophyta: Euglenoids

582.279

⇒ 593.161.3

582.28

Other algae or flagellates

582.281

Fungi (Eumycota, Eumycetes). True fungi.

582.281.21

Moulds. Mycology

582.282

Zygomycota (Zygomycetes)

582.282.11

Mucorales: Mould fungi

582.282.11

Ascomycota

582.282.11

Pneumocystidales. Protomycetales.

582.282.11

Schizosaccharomycetales. Taphrinales

- 582.282.12 Eurotiales
 582.282.123 Trichocomaceae (Aspergillaceae)
 582.282.123.2 Penicillium
 582.282.123.4 Aspergillus
 582.282.13 Lecanorales
 582.282.14 Leotiales
 582.282.16 Pezizales
 582.282.161 Helvellaceae
 582.282.162 Morchellaceae. Morels
 582.282.163 Tuberaceae. Truffles
 582.282.23 Saccharomycetales. □ Saccharomycetaceae.
 Saccharomyces cerevisiae: Brewer's yeast
 582.282.31 Other Ascomycota. □ Arthoniales.
 Dothideales. Ophiostomatales. Sordariales
 582.283 Chytridiomycota (Chytridiomycetes,
 Rumpomycetes)
 582.284 Basidiomycota (Basidiomycotina)
 582.284.1 Ustomycetes
 582.284.11 Ustilaginales. Smut fungi
 582.284.2 Teliomycetes
 582.284.21 Uredinales: Rust fungi
 582.284.3 Basidiomycetes
 582.284.4 Phragmobasidiomycetes
 (Heterobasidiomycetes). □ Auriculariales.
 Tremellales
 582.284.5 Holobasidiomycetes (Homobasidiomycetes)
 582.284.51 Agaricales. □ Agaricaceae. Mushrooms.
 Toadstools
 582.284.52 Boletales (Boletes). Poriales
 582.284.53 Cantharellales. □ Clavariaceae. Club fungi
 582.284.54 Nidulariales. Bird's nest fungi
 582.284.55 Lycoperdales. Puff Balls. Earth Stars
 582.284.56 Phallales. Stink-horns
 582.284.99 Other Basidiomycota
 582.288 Mitosporic fungi (Deuteromycotina,
 Deuteromycetes, Fungi imperfecti). Asexual
 fungi. □ Hyphomycetes (Hyphales)
- 582.29 Lichens**
*Class here treatments of lichens as a
 biological or nutritional group. Otherwise
 class lichens with relevant fungal or algal
 partners. For example Cetraria,
 Parmeliaceae (Iceland moss) should be
 classed at 582.282.13 Lecanorales*
- 582.3/99 Plantae**
- 582.32 Bryophyta (Musci). Bryology.** □ Mosses
 582.321 Hepatopsida (Hepaticae, Takakiopsida,
 Marchantiomorpha). Liverworts
 582.321.1 Jungermanniales
 582.321.2 Marchantiales
 582.322 Anthocerotophyta. Hornworts
 582.323 Sphagnopsida. Peat mosses. Bog mosses.
 Sphagnum
 582.324 Andreaeopsida. Granite mosses. Black mosses
 582.325 Bryopsida
 582.325.1 Polytrichales
 582.325.11 Eubryidae
 582.325.2 Bryales
 582.325.21 Hookeriales (Isobryales)
 582.325.23 Hypnobryales
 582.325.25 Buxbaumiales
 582.325.27 Schistostegales
 582.325.3 Other bryophytes
- 582.35/99 Tracheophyta. Vascular plants**
 582.361 Rhyniopsida. Primitive vascular plants
 582.363 Zosterophyllopsida. Ancestors of microphyllous
 plants
 582.364 Trimerophytids. Ancestors of megaphyllous
 plants
- 582.37/39 Pteridophyta. Ferns. Fern allies. Fernlike
 spore plants**
 582.374 Equisetopsida (Sphenopsida)
 582.374.2 Equisetales. □ Equisetaceae. Equisetum.
 Horsetails
 582.374.5 Calamitales. Extinct arborescent sphenopsids
- 582.38 Lycopsidea. Club mosses and their relatives**
 582.381 Lycopodiales. Club mosses. □ Lycopodiaceae
 582.382 Selaginellales. □ Selaginaceae. Fossil
 Selaginellites
 582.383 Isoetales. □ Isoetaceae. Quillwort
 582.383.1 Lepidodendraceae
 582.383.2 Sigillariaceae
 582.391 Psilotopsida: Whisk ferns. □ Psilotaceae
 582.394 Filicopsida (Filicales). Ferns and their relatives
 582.394.4 Ophioglossales
 582.394.41 Ophioglossaceae. □ Ophioglossum: Adder's
 tongue
 582.394.5 Mariattiales
 582.394.51 Marattiaceae
 582.394.7 Dennstaedtiaceae: Bracken
 582.394.722 Osmundaceae. Leptopteris. Osmunda
 582.394.726 Matoniaceae
 582.394.736 Cyathaceae. Cnemidaria. Cyanthea. Tree
 Ferns
 582.394.737 Hymenophyllaceae. Filmy ferns
 582.394.738 Gleicheniaceae
 582.394.739 Adantiaceae (Pteridaceae)
 582.394.742 Polypodiaceae. Colysis. Polypodium
 582.394.744 Schizaeaceae
 582.394.75 Marsiliaceae. □ Pilulariaceae: Pillwort
 582.394.77 Salviniales
 582.394.771 Salviniaceae. Free floating aquatics
 582.394.772 Azollaceae
- 582.4 Seed plants in general. Spermatophyta.
 Phanerogams. Siphonogamous
 embryophyta.**
- 582.41 Progymnospermopsida. Ancestors of
 gymnosperms**
- 582.42/47 Gymnospermopsida. Plants with naked
 seeds**
- 582.42 Gymnospermae in general. Archaeosperma
 (Archispermae). Naked-seed plants. The
 first seed plants**
- 582.43 Cycadopsida (Cycadatae, Pteridospermae).
 Fern-like seed plants**
- 582.44 Cycadaceae. Palm-ferns**
- 582.45 Bennettitales (Cycadeoidales)**
- 582.46 Ginkgoopsida. Ginkgoaceae. Ginkgo.**
 □ Maidenhair trees
 Cordaitales
- 582.47 Pinopsida (Coniferae, Coniferales). Conifers**
 582.471 Taxaceae. Yews. □ Taxus
 582.472 Podocarpaceae. Yellow woods. New Zealand
 white pine
 582.473 Araucariaceae. Monkey-puzzles. Norfolk Island
 pines. Araucaria
 582.475 Pinaceae. □ Pinus: Pines. Pitch pine. Picea:
 Spruce. Larix: Larch. Cedrus: Cedar. Firs.
 Pseudotsuga: Douglas fir
 582.476 Taxodiaceae. □ Swamp cypresses. Sequoias
 (Redwoods). Sequoiadendron (Big tree,
 Wellingtonia)
 582.477 Cupressaceae. □ Cupressus: Cypress. Thuja
 (Arbor.vitae, White cedar). Thujopsis.
 Juniperus: Juniper. Savin
 582.478 Other coniferae

582.49	Gnetopsida (Gnetales)	582.573.11	Agavaceae. □ Hostaceae
582.491	Ephedraceae. Ephedra	582.573.16	Alliaceae. □ Allium. Garlic. Onion
582.492	Welwitschiaceae. Welwitschia	582.573.21	Amaryllidaceae. □ Snowdrops. Narcissi.
582.493	Gnetaceae. Gnetum. Vinkella		Daffodils
582.5/.9	Angiospermae (Magnoliophyta).	582.573.26	Anthericaceae
	Angiosperms. Flowering plants.	582.573.31	Aphyllanthaceae
	Covered-seed plants. Later seed plants	582.573.36	Asparagaceae. □ Herreriaceae. Ruscaceae
582.52	Monocotyledonae (Liliopsida)	582.573.41	Asphodelaceae. □ Aloaceae: Aloes
582.521	Arecidae	582.573.46	Asteliaceae
582.521.1	Arecales	582.573.51	Blandfordiaceae
582.521.11	Palmae (Principes, Arecaceae). Palms	582.573.56	Convallariaceae
582.521.2	Cyclanthales	582.573.61	Cyanastraceae
582.521.21	Cyclanthaceae (Synanthae)	582.573.66	Doryanthaceae
582.521.3	Pandanales	582.573.68	Dracaenaceae. Dragon tree
582.521.31	Pandanaceae	582.573.71	Eriosphermaceae
582.521.4	Arales	582.573.76	Hemerocallidaceae
582.521.41	Araceae. Arums. □ Cuckoo-pint	582.573.81	Hyacinthaceae. □ Scilloideae. Bluebells.
582.521.42	Acoraceae		Hyacinths. Squill. Sea-onion
582.521.43	Lemnaceae. Duckweed	582.573.86	Hypoxidaceae. Curculigo
582.536	Alismatidae	582.573.88	Philesiaceae
582.536.1	Alismatales. □ Hydrocharitales, Najadales	582.573.90	Luzuriagaceae
582.536.11	Butomaceae	582.573.91	Phormiaceae. New Zealand flax
582.536.15	Alismataceae. □ Limnocharitaceae. Water plantain	582.573.96	Tecophilaeaceae. □ Ixioliriaceae
		582.573.98	Trilliaceae
582.536.21	Hydrocharitaceae. □ Frog-bit. Water thyme	582.574	Haemodorales
582.536.31	Potamogetonaceae	582.574.1	Haemodoraceae
582.536.32	Najadaceae. Waterweeds. Pondweeds	582.574.2	Philydraceae
582.536.33	Juncaginaceae	582.574.3	Pentastemonaceae
582.536.34	Aponogetonaceae	582.574.4	Pontederiaceae
582.536.4	Triuridales	582.574.5	Stemonaceae
582.536.41	Triuridaceae	582.574.6	Taccaceae
582.542	Commelinidae (Glumiflorae). Grasses.	582.575	Dioscoreales
	Bamboos	582.575.1	Dioscoreaceae. Yams
582.542.1	Cyperales	582.575.2	Smilacaceae
582.542.11	Graminae (Poaceae)	582.576	Velloziales
582.542.12	Cyperaceae. Sedges	582.576.1	Velloziaceae
582.542.2	Commelinales	582.59	Orchidales (Microspermae)
582.542.21	Rapateaceae	582.591	Corsiaceae
582.542.22	Commelinaceae. □ Tradescantia: Spider plant	582.594	Orchidaceae: Orchids. □ Paphiopedalum:
582.542.3	Eriocaulales		Lady's slipper. Vanilla. Orchis. Cattleya.
582.542.31	Eriocaulaceae. □ Pipewort		Cymbidium. Phalaenopsis. Dendrobium
582.542.4	Restionales. □ Restionaceae. Flagellariaceae	582.599	Anomaliae. Monocotyledons not provided for elsewhere
582.542.5	Juncales		
582.542.51	Juncaceae. Rushes	582.6/.9	Dicotyledonae (Magnoliopsida)
582.542.52	Thurniaceae	582.61	Dicotyledons in general
582.542.6	Hydatellales. Hydatellaceae	582.62	Hamamelididae
582.542.7	Typhales. □ Sparganiaceae. Typhaceae	582.621	Casuarinales. Casuarinaceae
582.548	Zingiberidae	582.628	Juglandales. Myricales. □ Rhoipteleaceae.
582.548.1	Bromeliales		Juglandaceae: Walnuts. Myricaceae. Sweet gale. Bog myrtle
582.548.11	Bromeliaceae. Pineapples	582.632	Fagales
582.548.2	Zingiberales	582.632.1	Betulaceae. □ Birches. Alders. Hornbeam.
582.548.21	Musaceae. □ Strelitziaceae. Heliconiaceae.		Hazelnut
	Musa: Banana. Strelitzia	582.632.2	Fagaceae. □ Beeches. Copper beech. Sweet chestnut. Oaks
582.548.23	Lowiaceae		Ticodendraceae
582.548.25	Cannaceae. □ Canna: Indian shot	582.632.3	Urticales
582.548.27	Zingiberaceae. Ginger	582.635	Ulmaceae. □ Elms. Wych-elms (witch-elms)
582.548.29	Marantaceae. Arrowroot	582.635.1	Moraceae. Mulberries. □ Ficus: Figs. Rubber plant. Artocarpus: Breadfruit
582.57	Liliidae	582.635.3	Cannabaceae (Cannabidaceae). □ Cannabis (Hemp). Hops
582.572	Liliales (Liliiflorae)		Urticaceae. Nettles
582.572.1	Alstroemeriaceae: Peruvian lily	582.635.38	Cecropiaceae
582.572.2	Burmanniaceae		Barbeyaceae
582.572.3	Colchicaceae	582.635.5	Eucommiales. Eucommiaceae
582.572.4	Calochortaceae	582.635.6	Hamamelidales
582.572.5	Campynemataceae	582.635.7	Myrothamnaceae. Myrothamnus
582.572.6	Melanthiaceae. Meadow saffron (Autumn crocus)	582.636	Hamamelidaceae. Wych-hazel (Witch-hazel)
		582.638	
582.572.7	Iridaceae. □ Geosiridaceae. Irises: Flags.	582.638.16	
	Crocuses. Gladioli	582.638.21	
582.572.8	Liliaceae. □ Lilies. Tulips		
582.573	Asparagales		

582.638.26	Platanaceae. Plane trees. □ American sycamore	582.681.26	Violaceae. Pansy (Heart's-ease)
582.643	Trochodendrales	582.681.31	Flacourtiaceae
582.643.1	Trochodendraceae. □ Tetracentraceae	582.681.36	Stachyuraceae
582.643.2	Cercidiphyllaceae	582.681.41	Passifloraceae. Passion-flower
582.643.3	Eupteleaceae	582.681.46	Caricaceae. Papaw
582.66	Caryophyllidae	582.681.51	Loasaceae
582.661	Caryophyllales (Centrospermae)	582.681.56	Datisceae
582.661.11	Didiereaceae	582.681.61	Begoniaceae
582.661.15	Chenopodiaceae. □ Halophytaceae. Goosefoot. Fat hen. Orache. Spinach. Sugar beet. Dysphania	582.681.66	Ancistrocladaceae
582.661.21	Amaranthaceae: Pigweed family. □ Foxtail	582.681.71	Cucurbitaceae. □ Gourds. Cucumber. Gherkin. Melons. Watermelon. Pumpkin. White bryony
582.661.26	Phytolaccaceae. □ Agdestidaceae. Barbeuiaceae. Gisekiaceae. Stegnospermataceae. Pokeweed. Inkberry	582.681.76	Elaeocarpaceae
582.661.31	Nyctaginaceae. □ Marvel of Peru	582.681.81	Salicaceae. □ Willows. Osiers. Poplars. Aspens
582.661.36	Aizoaceae. Hottentot fig	582.682	Euphorbiales
582.661.41	Portulacaceae. □ Hectorellaceae. Montia. Water blinks (Blinking chickweed)	582.682.1	Euphorbiaceae. Spurges. Dog's mercury
582.661.46	Basellaceae	582.682.2	Buxaceae. Box
582.661.51	Caryophyllaceae. □ Illecebraceae. Dianthus. Carnations. Pinks. Campions. Ragged robin. Sea purslane. Spurrey. Catchfly. Mouse-ear. Chickweed. Pearlwort. Sandwort. Soapwort. Stitchwort	582.682.3	Pandaceae
582.661.56	Cactaceae. Cactuses. □ Epiphyllum. Echinocactus. Giant cactus. Queen of the night. Opuntia. Prickly pear. Indian fig	582.682.4	Thymelaeaceae. □ Daphne. Spurge laurel
582.665	Polygonales	582.683	Capparidales. □ Batales (Batidales)
582.665.11	Polygonaceae. □ Dock. Sorrel. Bistort. Rhubarb. Knot-grass. Buckwheat	582.683.1	Capparidaceae (Capparaceae). Capers
582.668	Plumbaginales. □ Plumbaginaceae. Leadwort. Sea lavenders. Thrift. Sea pink	582.683.2	Cruciferae (Brassicaceae). □ Stocks. Cresses. Broccoli. Cauliflower. Water cress. Mustards. Radishes. Rape. Turnip. Wild cabbage. Rockets. Candytuft. Shepherd's purse. Woad
582.67	Magnoliidae	582.683.3	Resedaceae. □ Mignonette. Dyer's weed (Weld)
582.671	Nymphaeales. □ Nymphaeaceae. Ceratophyllaceae. Water lilies	582.683.4	Moringaceae. Moringa (Ben nut)
582.672	Piperales. □ Saururaceae. Piperaceae. Pepper	582.683.5	Bataceae
582.674	Aristolochiales. □ Aristolochiaceae: Birthworts. Hydnoraceae. Rafflesiaceae	582.683.6	Bretschneideraceae
582.675	Ranunculales. □ Papaverales	582.683.7	Akaniaceae
582.675.1	Ranunculaceae. □ Glaucidiaceae. Buttercups. Aconites. Monkshood. Crowfoot. Lesser celandine. Anemones. Spearwort. Marsh marigolds (Kingcups). Hellebores. Clematis. Old man's beard	582.683.8	Limnanthaceae
582.675.2	Coriariaceae. Tanner's tree (Ink tree)	582.684	Guttiferales
582.675.3	Berberidaceae. Barberry	582.684.1	Guttiferae (Clusiaceae). Garcinia family (St John's-wort family). □ Hypericaceae
582.675.4	Menispermaceae. Moonseed	582.684.2	Elatinaceae. Waterworts
582.675.5	Papaveraceae. □ Fumariaceae. Poppies. Chelidonium majus (Greater celandine)	582.684.3	Bonnetiaceae
582.677	Magnoliales. □ Laurales	582.685	Malvales
582.677.1	Magnoliaceae. Magnolias. Tulip tree	582.685.2	Malvaceae. Mallows. Cotton plant
582.677.2	Lauraceae. □ Cinnamon tree. Camphor tree. Bay laurel	582.685.3	Bombacaceae. Cotton-tree
582.677.3	Sabiaceae. □ Meliosmaceae	582.685.4	Tiliaceae. Lime tree (Linden)
582.677.4	Canellaceae (Winteranaceae). Canella. Warburgia	582.685.5	Sterculiaceae. □ Cacao: Cocoa beans. Cola tree (kola)
582.677.5	Annonaceae	582.685.6	Bixaceae. □ Cochlospermaceae. Annatto
582.677.7	Myristicaceae. □ Nutmeg. Mace	582.686	Nepenthales
582.677.8	Chloranthaceae	582.686.2	Nepenthaceae. Pitcher plants
582.678	Illiciales	582.686.3	Droseraceae. Sundew. Venus flytrap
582.678.1	Illiciaceae. Illicium. Japanese anise	582.687	Theales (including Diapensiales, Ebenales, Lecythidales)
582.678.2	Schisandraceae	582.687.11	Scytopetalaceae
582.678.3	Winteraceae. Drimys	582.687.16	Caryocaraceae
582.68	Dilleniidae	582.687.21	Theaceae. □ Asteropeiaceae. Camelliaceae. Tea plant
582.681	Violales. □ Salicales	582.687.26	Aquifoliaceae. Ilex (Holly)
582.681.11	Tamaricaceae. Tamarisk	582.687.31	Sarraceniaceae
582.681.16	Cistaceae. Rock-roses	582.687.36	Diapensiaceae
		582.687.41	Sapotaceae
		582.687.46	Ebenaceae. Ebony. Persimmon
		582.687.51	Styracaceae
		582.687.56	Lissocarpaceae
		582.687.61	Symplocaceae
		582.687.66	Lecythidaceae. □ Bertholletia: Brazil-nut
		582.688	Ericales
		582.688.1	Empetraceae. Crowberry
		582.688.2	Epacridaceae
		582.688.3	Ericaceae. □ Pyrolaceae. Monotropaceae. Azaleas. Rhododendrons. Gaultheria. Vaccinium. Bilberry (Whortleberry). Blueberry. Cranberry (Fenberry). Cavendishia. Erica. Heaths. Calluna. Heathers. Ling. Australian heath

582.688.4	Actinidiaceae	582.746.51	Aceraceae. Maple. Sycamore
582.689	Primulales	582.746.56	Hippocastanaceae. Horse chestnut
582.689.1	Myrsinaceae	582.746.61	Melanthaceae. Honeybush
582.689.2	Primulaceae. □ Primroses. Cowslips. Pimpernels. Yellow loosestrife	582.746.66	Anacardiaceae. □ Julianiaceae. Sumac. Poison ivy
582.689.3	Theophrastaceae. Jacquinia	582.751	Geraniales
582.7	Rosidae	582.751.1	Oxalidaceae. Wood sorrel. □ Lepidobotryaceae
582.711	Rosales	582.751.2	Geraniaceae. Geranium. Herb Robert. Cranesbills. Pelargonium. Storksbills
582.711.11	Saxifragaceae. □ Eremosynaceae. Parnassiaceae. Penthoraceae. Vahliaceae. Saxifrages. London pride. Anise	582.751.3	Tropaeolaceae
582.711.16	Crassulaceae. □ Stonecrops. Umbilicus. Pennywort	582.751.5	Balsaminaceae. Balsams. □ Impatiens
582.711.21	Cephalotaceae	582.755	Polygalales
582.711.26	Hydrangeaceae. □ Philadelphus: Mock orange	582.755.1	Malpighiaceae
582.711.31	Grossulariaceae. □ Escalloniaceae. Montiniaceae. Pterostemonaceae. Ribes. Currants. Gooseberries	582.755.2	Vochysiaceae
582.711.36	Pittosporaceae	582.755.3	Trigoniaceae
582.711.41	Byblidaceae	582.755.4	Tremandraceae
582.711.46	Brunelliaceae	582.755.5	Polygalaceae. Milkwort
582.711.51	Cunoniaceae	582.755.6	Xanthophyllaceae
582.711.56	Bruniaceae	582.755.7	Krameriaceae
582.711.61	Crossosomataceae	582.766	Celastrales
582.711.66	Columelliaceae	582.766.2	Icacinaceae
582.711.71	Rosaceae	582.766.3	Dichapetalaceae
582.711.711	Spiraeoideae. □ Spiraea. Meadowsweet	582.766.4	Corynocarpaceae
582.711.712	Rosoideae. □ Roses. Briars. Raspberry. Blackberry. Brambles. Strawberry. Cinquefoil. Geum (Avens)	582.766.5	Celestraceae. □ Hippocrateaceae. Spindle tree
582.711.713	Prunoideae. □ Almond. Apricot. Cherry. Peach. Plum. Damson. Blackthorn (Sloe)	582.766.6	Geissolomataceae
582.711.714	Malloideae. Malus. □ Apples. Pears. Crabtree (Crab. Crab-apple). Quince. Chaenomeles (Japonica). Cotoneaster. Rowan (Mountain ash). Hawthorn. Medlar	582.766.7	Stackhousiaceae
582.711.76	Connaraceae	582.766.8	Aextoxicaceae
582.721	Podostemales. Podostemaceae	582.766.9	Cardiopteridaceae
582.724	Protiales	582.776	Myrtales. □ Penaeaceae. Crypteroniaceae. Rhynchocalycaceae. Oliniaceae
582.724.1	Elaeagnaceae. □ Oleaster. Sea buckthorn	582.776.1	Lythraceae. Purple loosestrife.
582.724.2	Proteaceae	582.776.2	Sonneratiaceae. Punicaceae: Pomegranate
582.728	Santalales	582.776.4	Myrtaceae. □ Myrtles. Cloves. Pimento.
582.728.1	Olcaceae	582.776.5	Allspice. Eucalyptus. Gum trees
582.728.2	Santalaceae. Sandalwood	582.776.6	Melastomataceae. Astronia
582.728.3	Misodendraceae	582.776.7	Trapaceae. Horn nut
582.728.4	Loranthaceae. Mistletoe	582.782	Onagraceae. □ Evening primrose. Willowherb.
582.728.5	Balanophoraceae. □ Cynomoriaceae	582.782.1	Fuchsia
582.736	Leguminosae (Fabales). Legumes. Pulses	582.782.2	Combretaceae. Terminalia
582.736.1	Mimosoideae. □ Mimosa. Acacia (Wattles). Colophospermum (Balsam tree)	582.786	Rhamnales
582.736.2	Caesalpinioideae. □ Caesalpinia. Cassia. Senna	582.788	Rhamnaceae. □ Rhamnus: Buckthorn
582.736.3	Papilionoideae (Fabaceae). □ Lupins. Broom. Gorse (Furze). Medicks. Clover. Vetch. Lentils. Peas. Beans. Soya. Fenugreek. Castanospermum: Moreton Bay chestnut (Australian chestnut)	582.788.1	Vitaceae. Vines. Grapevines
582.741	Linales. □ Linaceae. Hugoniaceae. Flax (Linseed). Erythroxylaceae. Coca	582.788.2	Rhizophorales. Rhizophoraceae
582.746	Sapindales. □ Leitneriales	582.792	Cornales
582.746.11	Zygophyllaceae	582.792.1	Cornaceae. Dogwoods. □ Araliaceae.
582.746.16	Cneoraceae	582.792.2	Aucubaceae. Griselinaceae. Helwingiaceae.
582.746.21	Rutaceae. □ Rue. Citruses. Oranges. Lemons	582.794	Melanophyllaceae. Torricelliaceae
582.746.26	Simaroubaceae. □ Leitneriaceae. Quassia (Bitters)	582.794.1	Garryaceae
582.746.31	Irvingiaceae	582.794.2	Haloragidales
582.746.36	Burseraceae. □ Frankincense. Myrrh	582.913	Haloragidaceae (Haloragaceae). □ Myriophyllum. Water milfoils
582.746.41	Meliaceae. Cedrela	582.913.1	Gunneraceae. Gunnera
582.746.46	Sapindaceae. □ Ptaeroxylaceae. Soap-berry	582.913.2	Apiales
		582.913.3	Umbelliferae (Apiaceae). Carrot family (Parsley family). □ Sanicula. Chervil. Coriander.
		582.916	Hemlock. Caraway. Cumin. Celery. Parsley.
		582.916.11	Goutweed (Ground elder). Fennel. Dill. Carrot.
		582.916.16	Parsnip. Hogweed. Pimpinella (Anise)
			Araliaceae. Ivy
		582.9	Asteridae
		582.913	Callitrichales
		582.913.1	Hippuridaceae. Mare's tail
		582.913.2	Callitrichaceae. Mud water starwort
		582.913.3	Hydrostachyaceae. Hydrostachys
		582.916	Scrophulariales
		582.916.11	Buddlejaceae. Buddleia
		582.916.16	Oleaceae. □ Forsythia. Olea (Olive), Syringa (Lilac), Jasminum. Ash

582.916.21	Scrophulariaceae. □ Antirrhinum (Snapdragon). Veronica (Speedwell). Digitalis (Foxglove)			Sage. Clary. Melissa (Balm). Hyssop. Marjoram. Thyme. Mints (Spearment, Peppermint etc.). Ocimum. Basil
582.916.26	Orobanchaceae. Broomrape	582.933		Plantaginales. □ Plantaginaceae: Plantains (Ribwort)
582.916.31	Bignoniaceae. Calabash tree			Rubiales
582.916.36	Pedaliaceae. Sesame	582.936		Rubiaceae (Theligonaceae). □ Coffee.
582.916.41	Globulariaceae	582.936.1		Woodruff. Madder. Bedstraw. Lady's bedstraw.
582.916.46	Lentibulariaceae. □ Butterwort. Bladderwort			Cinchona (quinine)
582.916.51	Acanthaceae. Acanthus	582.936.2		Desfontainiaceae
582.916.56	Myoporaceae	582.936.3		Gelsemiaceae
582.916.61	Gesneriaceae. Saintpaulia (African violet)	582.971		Dipsacales
582.923	Gentianales	582.971.1		Caprifoliaceae. □ Carlemanniaceae.
582.923.1	Gentianaceae. Gentian			Honeysuckle (Woodbine). Elder. Viburnum.
582.923.2	Strychnaceae. Nux vomica			Guelder rose. Snowberry
582.923.3	Loganiaceae			Adoxaceae
582.923.4	Geniostomaceae	582.971.2		Valerianaceae. □ Triplotegiaceae. Valerians.
582.923.5	Apocynaceae. □ Dogbane. Vinca. Catharanthus. Periwinkle. Nerium (Oleander)	582.971.3		Corn-salad. Lamb's lettuce
582.923.6	Asclepiadaceae. Silkweed (Milkweed)	582.971.4		Dipsacaceae. □ Teasels. Scabious
582.926	Solanales	582.998		Asterales. □ Calycerales. Campanulales
582.926.1	Nolanaceae. Chilean bell-flower	582.998.1		Compositae (Asteraceae)
582.926.2	Solanaceae. □ Nightshades. Deadly nightshade (Belladonna). Henbane. Paprika. Capsicum. Hot peppers. Chillies. Tomato. Potato. Thorn-apple. Nicotiana (Tobacco). Petunia	582.998.12		Barnadesoideae
		582.998.14		Cichorioideae (Lactucoeideae). □ Chicory.
582.926.3	Convolvulaceae. □ Convolvulus (Bindweed). Batata (Sweet potato)	582.998.16		Endive. Hawkweeds. Dandelion. Lettuce
582.926.4	Polemoniaceae. □ Cobaeaceae. Jacob's ladder. Phlox			Asteroidae. □ Golden rod. Daisy. Aster. Edelweiss. Sunflower. Dahlia. Camomile (Chamomile). Tansy. Corn marigold. Yarrow (Milfoil). Chrysanthemum. Artemisias.
582.926.5	Hydrophyllaceae			Wormwood (Mugwort, Absinth). Tarragon.
582.929	Lamiales	582.998.2		Southernwood (Lad's love). Arnica. Groundsel.
582.929.1	Lennoaceae	582.998.3		Burdock. Thistles. Artichoke. Cornflower
582.929.2	Boraginaceae. □ Borage. Lungwort. Myosotis (Forget-me-not). Bugloss. Comfrey			Calyceraceae
582.929.3	Verbenaceae. □ Avicenniaceae. Cylocheilaceae. Phrymaceae. Stilbaceae. Verbena. Vervain	582.998.4		Campanulaceae. □ Pentaphragmataceae.
		582.998.5		Sphenocleaceae. Bell-flowers. Harebell.
582.929.4	Labiatae (Lamiaceae). □ Tetrachondraceae. Ajugoides. Rosmarinus (Rosemary). Ground ivy. Germander. Lavandula. Deadnettle. Salvia.	582.998.6		Lobelia. Rampion
				Goodeniaceae. □ Brunoniaceae
				Menyanthaceae. Buckbean
				Stylidiaceae. □ Donatiaceae. Stylidium.
				Forstera
		582.999		Anomaliae. Dicotyledons not provided for elsewhere

59 ZOOLOGY

◇ 59:069.029 Zoological gardens

59.01/08	Theoretical aspects, techniques etc. 59.01/08 ≡ 57.01/08	591.047	Transport of material in the body ⇒ 591.41
591	GENERAL ZOOLOGY	591.05	Physiological chemistry and metabolism in general. Composition of the body ⇒ 591.133.2 ⇒ 591.149
591-2/-9	Concepts of general zoology related to particular animals and classes of animal 591-2/-9 ≡ 592/599	591.1	Animal physiology ⇒ 612
591.04	Physics and chemistry of cells and organisms in general. Absorption	591.11	Blood. Body fluids in general. Circulation
591.041	Influence of nucleus and protoplasm. Irritability in general ⇒ 591.181	591.111	General chemical and physical properties of blood
591.044	Effect of physical and chemical factors of the environment on cells and organisms. □ Osmosis. Tropisms in general. Heliotropism. Phototropism. Effect of poisons. Effect of atmospheric pressure ⇒ 591.185 ⇒ 591.5	591.111.1	Composition of the blood. □ Erythrocytes (red corpuscles). Leucocytes (white corpuscles). Thrombocytes (blood platelets). Plasma (blood fluid). Serum. Fibrin
		591.111.2	Blood pigments. □ Haemoglobin. Haemocyanin. Echinochrome. Chlorocruorin. Haemerythrin. Achroglobin
		591.111.3	Congeaing, clotting, coagulation of blood. Haemolysis
591.046	Combined effects of cells and organs. Synergism. Division of labour	591.111.4	Physical properties of blood. □ Temperature. Viscosity. Osmotic pressure

- 591.111.7 Phagocytosis. Ingestion of foreign substances by leucocytes
- 591.111.8 Reticulo-endothelial defence systems. Antibodies. □ Precipitin reaction
- 591.112 Circulation of blood
- 591.112.1 Physiology of cardiac muscles. □ Stimulus formation. Sensitivity. Frequency of heartbeat
- 591.112.2 Activity of the heart. Valves. Cardiac sounds. Cardiac beat. □ Electrocardiogram
- 591.112.3 Blood pressure. Blood flow
- 591.112.4 Vascular nerves. Vasomotor fibres. Pressoreceptor nerves
- 591.112.5 Blood volume. Circulation time
- 591.112.6 Fluctuations without circulation
- 591.113 Haemolymph. Lymph of invertebrates
- 591.115 Fluid pressure inside a body. Turgor
- 591.12 Respiration. Breathing**
- 591.121 General physiology of respiration
- 591.122 Respiration over whole body surface. Cutaneous respiration
- 591.123 Respiration by aquiferous organs. Respiration by swim bladders
- 591.124 Intramolecular respiration
- 591.125 Respiration by branchiae (gills)
- 591.126 Respiration by tracheae (windpipes)
- 591.127 Respiration by lungs
- 591.128 Animal heat. □ Body temperature. Poikilothermal, 'cold-blooded' animals. Homeothermal, 'warm-blooded' animals. Temperature regulation. Insulation
- 591.13 Nutrition. Inanition**
⇒ 591.53
- 591.131 Seizure and comminution of food
- 591.131.1 Act of feeding in general. Feeding behaviour. Ways of ingesting food
⇒ 591.53
- 591.131.2 Killing of prey
- 591.131.3 Mastication. Saliva. Salivary acid
- 591.131.4 Digestion outside the mouth. Secretions for dissolution of nutrients outside the body
- 591.132 Digestion
⇒ 577.15
- 591.132.1 Mechanics of the stomach
- 591.132.2 Physiology of the stomach. □ Gastric juices
- 591.132.3 Rumination
- 591.132.4 Vomiting
- 591.132.5 Physiology of the midgut. □ Intestinal juice. Pancreatic juice. Bile (gall)
- 591.132.8 Regurgitation. Expulsion of indigestible elements in food through the mouth. Castings. Pellets
- 591.133 Physiological chemistry of foods and nutrition
- 591.133.1 Foods. Nutrients
- 591.133.11 Proteins
- 591.133.12 Fats
- 591.133.13 Carbohydrates
- 591.133.14 Water
- 591.133.15 Minerals
- 591.133.16 Vitamins
- 591.133.2 Synthetic metabolism. Assimilation of foods and nutrients. Enzymes. Ferments.
□ Anabolism. Catabolism
- 591.133.3 Food reserves and food storage in the animal body
- 591.133.31 Storage of fat
- 591.133.32 Storage of glycogen
- 591.133.33 Storage of protein
- 591.134 Growth
- 591.134.2 Rate of growth
- 591.134.3 Periodicity of growth
- 591.134.4 Course and duration of individual growth phase
- 591.134.5 Weight and bulk of the body
- 591.134.6 Ratio between body mass and body size
- 591.135 Physiology of the hindgut. □ Defecation. Evacuation of intestine
- 591.137 Uptake of nutrients and digestion in Protozoa
- 591.139 Senescence. Phenomena of ageing. Length of life. Rejuvenation. Death. Causes of death
- 591.14 Secretions. Excretions. Lymph. Glands in general**
- 591.141 Cutaneous secretions. □ Skin glands (function). Sweat glands. Lacrimal glands
- 591.142 Secretions in Protozoa
- 591.143 Serum. Serous fluids. Serous cavities
- 591.144 Lymphatic system of vertebrates (function). Spleen
- 591.145 Poisons. Poison glands. Toxins. Antitoxins
⇒ 591.431.6
⇒ 591.477.4
- 591.146 Secretions of the mammary glands. Milk
- 591.147 Internal secretions. Endocrine secretions. Hormones. □ Adrenalin. Insulin. Sex hormones. Androgens. Oestrogens
⇒ 577.17
- 591.148 Luminescence (bioluminescence)
⇒ 577.336
- 591.149 Excretions. Catabolism. □ Urine formation. Excreta (faeces, guano). Gaseous excretions. Sepia
- 591.15 Variation. Heredity**
⇒ 575.1
⇒ 575.2
⇒ 636.082
- 591.151 General polymorphism. Dimorphism
- 591.152 Geographic variation. Acclimatization
- 591.153 Heterophagous variation
- 591.155 Mimicry. Imitative (mimetic) variation
- 591.156 Sexual polymorphism
- 591.157 Variation of colour. Coloration (pigmentation).
□ Albinism. Melanism
⇒ 57.018.634
⇒ 572.522
- 591.158 Cross-bred (bastard) forms. □ Mongrels. Hybrids
- 591.159 Monstrous forms. Terata (monsters). Anomalies. Abnormalities
- 591.16 Generation. Procreation. Reproduction. Breeding. Biogenesis**
⇒ 57.017.5
⇒ 575
⇒ 591.56
⇒ 636.082
- 591.161 Abiogenesis (spontaneous generation)
⇒ 573.5
- 591.162 Parthenogenesis
- 591.163 Paedogenesis. Reproduction in immature stages. □ Larval reproduction. Pupal reproduction
- 591.164 Division (fission) in Protozoa
- 591.165 Vegetative propagation. Asexual reproduction.
□ Gemmation. Fragmentation
- 591.166 Gonochorism. Differentiation of sexes. Sexual reproduction in general
- 591.166.1 Mating. Copulation (including that of Protozoa)
- 591.166.5 Alternation of generations. □ Metagenesis. Alloëogenesis
- 591.167 Hermaphroditism. □ Autogamy. Autogamy
- 591.169 Regeneration. □ Sloughing. Moulting. Replacement

- 591.169.1 Physiological regeneration. Replacement of hair and teeth. Casting and renewal of antlers. Sloughing (casting of skin). Moulting. Replacement of epidermis, nails, claws
- 591.169.2 Occasional (reparative) regeneration. Repair of injuries
- 591.169.8 Autotomy. Self-amputation
- 591.17 Movement. Locomotion. Physiology of the skeleton and organs of locomotion**
- 591.171 Locomotion by legs. □ Walking. Running
- 591.172 Reptation. Crawling. Slithering
- 591.173 Swimming. Floating
- 591.174 Flying. Gliding
- 591.175 Physiology of the muscles
- 591.176 Skin. Pigment. Colouring matter
- 591.177 Mechanics of the skeleton and joints
- 591.178 Protoplasmic movement. Ciliary movement
- 591.18 Functions of the nervous system**
- 591.181 Excitability and physiology of the nerves in general. Electrophysiology
- 591.182 Nerves and muscles. □ Tonus. Reflex movements
- 591.185 Senses (reception). Tropisms. Taxes
⇒ 576.333
⇒ 591.044
- 591.185.1 Faculty of orientation
- 591.185.2 Mechanical senses. □ Touch (tactile sense). Sense of gravity (georeception). Geotaxis. Sense of balance (equilibrium). Sense of temperature (thermoreception). Thermotaxis. Sense of fluid flow (rheoreception). Rheotaxis. Chemical sensitivity (chemoreception). Chemotaxis
- 591.185.3
- 591.185.31 Sense of taste (gustation)
- 591.185.34 Sense of smell (olfaction)
- 591.185.5 Sense of hearing (audition)
- 591.185.6 Sense of light (photoreception). Sight. Vision. □ Phototaxis. Phototropism
- 591.185.62 Optical perception of direction
- 591.185.63 Optical perception of movement
- 591.185.67 Sense of colour
- 591.186 Hypnosis
- 591.187 Responses to stimuli in Protozoa
- 591.2 Diseases of (undomesticated) animals. Animal pathology**
Denote species by :592/599, diseases by :616...
591.2 ≡ 591.4
⇒ 636.09
- 591.3 Animal embryology. Animal ontogeny. Development of the individual organism**
- 591.31 Primary development of the egg.**
□ Fertilization. Segmentation
- 591.32 Formation of the embryonic rudiments**
- 591.33 Embryonic development without larval stage.** □ Ectoderm. Endoderm. Mesoderm. Mesenchyme
- 591.34 Metamorphosis. Larval stage**
- 591.341 Swarm cells (zoospores)
- 591.342 Larval forms of arthropods. □ Caterpillars. Maggots. Pupae. Chrysalises
- 591.343 Larval forms of Tunicata and vertebrates
- 591.35 Young animals**
- 591.35.02 Twinning research. □ Multiple births. Twins
- 591.351 Duration of development stage, to sexual maturity
- 591.36 Sexually mature animals**
- 591.366 Length of interval between breeding seasons (heats, ruts). Gestation period. Suckling period
⇒ 636.082.455
- 591.37 Hybridization. Crossing, cross-breeding. Interbreeding**
⇒ 591.158
⇒ 636.082.26
- 591.38 Inbreeding. Consanguineous breeding. Breeding in-and-in**
⇒ 636.082.25
⇒ 636.082.41
- 591.39 Experimental embryology. Mechanics of development**
Experiments on ova and spermatozoa
Experimental alteration of embryonic development. Determination of power of development
Experiments on larvae. Experimental alteration of metamorphosis
Experiments on surviving embryonic parts
- 591.391
- 591.392
- 591.393
- 591.398
- 591.4 Study of animal organs. Animal organology. Animal anatomy. Zootomy**
⇒ 611
- 591.4.068.1 Change of function
- 591.4.068.2 Atrophy
- 591.4.068.3 Transitory organs
- 591.4.068.4 Rudimentary organs
- 591.4.068.5 Homologous organs
- 591.4.068.6 Analogous organs
- 591.41 Circulatory organs. Circulatory system. Angiology**
- 591.411 Pericardium
- 591.412 Heart
- 591.413 Vessels. Arteries. Aorta
- 591.414 Veins. □ Portal vein
- 591.415 Capillaries
- 591.416 Vessels in the lower animals. Lacunae. Gastrovascular system
- 591.417 Echinoderm ambulacral system. Madreporites
- 591.42 Respiratory organs**
- 591.421 Nose
- 591.422 Larynx. Glottis. Vocal cords. Tympanum. Syrinx
- 591.423 Trachea (in vertebrates). Windpipe. Bronchi
- 591.424 Lungs
- 591.425 Pleura
- 591.426 Diaphragm
- 591.428 Branchiae. Branchial arches. Gills
- 591.429 Other respiratory organs. □ Tracheae (in invertebrates). Swim bladders. Siphons (of molluscs)
- 591.43 Organs of nutrition**
- 591.430 Organs of nutrition in Protozoa. □ Cytostome (cell mouth). Cytopyge (cytoproct, potential anus). Food vacuoles. Contractile vacuoles
- 591.431 Mouth
⇒ 591.145
⇒ 591.477.4
- 591.431.1 Proboscis for seizing food. Chitinous mandibles. Aristotle's lantern (in echinoderms)
- 591.431.2 Mouth appendages of arthropods
- 591.431.3 Tongue. Radula (in molluscs)
- 591.431.4 Teeth
- 591.431.5 Keratinous formations. □ Beaks. Horny plates. Baleen
⇒ 591.478

- 591.431.6 Oral glands. Salivary glands. Buccal glands.
Silk glands in Lepidoptera. Oral poison glands
⇒ 591.145
- 591.431.7 Cheek pouches (buccal pouches)
- 591.432 Pharynx. Oesophagus. □ Gullet. Crop.
Honey-bags
- 591.433 Stomach. Ventriculus. □ Gizzard
- 591.434 Gut. Intestine. □ Caecum. Rectum
- 591.435 Anus. Vent. Cloaca. □ Ink sac (in
cephalopods)
- 591.436 Hepar. Liver. Midgut glands of invertebrates.
□ Gall bladder
- 591.437 Pancreas. Hepatopancreas
- 591.438 Coeloms. Body cavities. Peritoneum
- 591.439 Corpora adiposa (fatty bodies)
- 591.44 Lymphatic system of vertebrates**
⇒ 591.144
- 591.441 Spleen
- 591.442 Lymphatic vessels. Lymph ducts. Lymph nodes
- 591.443 Thymus
- 591.444 Thyroid gland. Parathyroid gland
- 591.445 Suprarenal glands. Suprarenal medulla
- 591.446 Lymph glands
- 591.46 Urogenital system. Excretory organs.**
Sexual organs. Gonads. Sex glands
- 591.461 Excretory organs. □ Kidneys. Nephros
